INDICTMENT

07 CRIM 541

07 Cr.

COUNT ONE

The Grand Jury charges:

From at least in or about October 2001, up through and including in or about June 2003, in the Southern District of New York and elsewhere, DANIEL B. KARRON, the defendant, being an agent of an organization, which organization received, in any one-year period, benefits in excess of $10,000 under a Federal program involving a grant, contract, subsidy, loan, guarantee, insurance, and other form of Federal assistance, unlawfully, willfully and knowingly, did embezzle, steal, obtain by fraud, and otherwise without authority knowingly convert to the use of persons other than the rightful owner, and intentionally misapply, property valued at $5,000 and more that was owned by, and was under the care, custody, and control of such organization, to wit, KARRON, who was the President and Chief Technical Officer of Computer Aided Surgery, Inc. ("CASI"), knowingly misapplied more than $5,000 in Federal funds from an Advanced Technology Program grant awarded to CASI by the National

Institute of Standards and Technology toward the payment of unauthorized expenses.

(Title 18, United States Code, Section 666.)

-v.-	INDICTMENT
DANIEL B. KARRON,	S1 07 Cr. 541
Defendant.	

COUNT ONE

The Grand Jury charges:

1. From at least in or about October 2001, up through and including in or about June 2003, in the Southern District of New York and elsewhere, DANIEL B. KARRON, the defendant, being an agent of an organization, which organization received, in any one-year period, benefits in excess of $10,000 under a Federal program involving a grant, contract, subsidy, loan, guarantee, insurance, and other form of Federal assistance, unlawfully, willfully and knowingly, did embezzle, steal, obtain by fraud, and otherwise without authority knowingly convert to the use of persons other than the rightful owner, and intentionally misapply, property valued at $5,000 and more that was owned by, and was under the care, custody, and control of such organization, to wit, KARRON, who was the President and Chief Technical Officer of Computer Aided Surgery, Inc. ("CASI"), knowingly misapplied more than $5,000 in Federal funds from an Advanced Technology Program grant awarded to CASI by the National

Institute of Standards and Technology toward the payment of unauthorized expenses.

(Title 18, United States Code, Section 666.)

FORFEITURE ALLEGATION

2. As the result of committing the offense alleged in Count One of this Indictment, the defendant shall forfeit to the United States, pursuant to 18 U.S.C. § 981(a)(1)(C) and 28 U.S.C. § 2461, all property, real and personal, that constitutes or is derived from proceeds traceable to the commission of the offense, including, but not limited to, the following:

a. At least $390,000 in United States currency, in that such sum in aggregate represents the amount of proceeds obtained as a result of the offense alleged in Count One of this Indictment.

b. All right, title, and interest of the defendant in all that lot or parcel of land, together with its buildings, appurtenances, improvements, fixtures, attachments and easements, located at 300 East 33rd Street, Suite 4N, New York, NY 10016.

Substitute Asset Provision

c. If any of the above-described forfeitable property, as a result of any act or omission of the defendant:

(1) cannot be located upon the exercise of due diligence;

(2) has been transferred or sold to, or deposited with,

a third person;

(3) has been placed beyond the jurisdiction of the Court;

(4) has been substantially diminished in value; or

(5) has been commingled with other property which cannot be subdivided without difficulty;

it is the intent of the United States, pursuant to 21 U.S.C. § 853(p), to seek forfeiture of any other property of said defendant up to the value of the forfeitable property, including but not limited to, all that lot or parcel of land, together with its buildings, appurtenances, improvements, fixtures, attachments and easements, located at 300 East 33rd Street, Suite 4N, New York, NY 10016.

(Title 18, United States Code, Section 981(a)(1)(C); Title 28, United States Code, Section 2461; Title 21, United States Code, Section 853(p).)

Project Title: Anatomic Computer Modeling for Precise and Accurate Therapies

This Award approved by the Grants Officer is issued in triplicate and constitutes an obligation of Federal funding. By signing the three documents, the Recipient agrees to comply with the Award provisions checked below and attached. Upon acceptance by the Recipient, two signed Award documents shall be returned to the Grants Officer and the third document shall be retained by the Recipient. If not signed and returned without modification by the Recipient within 30 days of receipt, the Grants Officer may unilaterally terminate this Award.

5. PROJECT DESCRIPTION

All research shall be conducted in accordance with the Recipient's proposal dated 07/06/01 (Gate 1), and 08/06/01 (Gate 2), and all revisions/late documentation dated 08/21/01, 08/27/01, 09/06/01, 09/12/01, 09/14/01, and 09/--/01, including revised budget dated 09/--/01.

6. FUNDING LIMITATIONS

The scope of work and budget incorporated into this award cover a three-year period (referred to as the "project period") for a total amount of $2,000,000.00 in Federal funds. However, Federal funding available at this time is limited to $800,000.00 for the first year period from October 1, 2001 through September 30, 2002 (referred to as the "budget period"). The Grants Officer may require additional clarification to support the budget. If that results in changes to the budget or budget narrative, the Recipient shall submit, in writing, a revised budget and/or budget narrative to the Grants Officer for approval. Receipt of any funding beyond the first year up to the level projected under this award is contingent upon the availability of funds from Congress, satisfactory performance, and will be at the sole discretion of the National Institute of Standards and Technology (NIST). The Recipient may not obligate, incur any expenditure, nor engage in any activity that involves a commitment of Federal funds under this Agreement in excess of the Federal amount presently available. No legal liability exists or will result on the part of the Federal Government for payment of any portion of the remaining funds, which have not been made available under the award. If additional funds are not made available, any expenses incurred related to closeout activities must be funded from the amount already made available under this award. The notice of availability or non-availability of additional funding for the second and third year(s) will be made in writing by the Grants Officer. Only the Grants Officer is authorized to obligate funds. No other verbal or written notice should be relied upon by the Recipient. In the absence of a written notice of additional funding, no assumption should be made by the Recipient that the funds will be forthcoming.

rojected budget amounts and periods:

2: $600,000.00 (From 10/01/02 to 09/30/03)
3: $600,000.00 (From 10/01/03 to 09/30/04)

. COST SHARE

or the first year period, the cost sharing ratio (direct costs nly) applicable to this award is the Recipient's contribution of .61% ($30,000.00) and NIST's contribution of 96.39% $800,000.00).

. PERSONNEL AND CONSULTANT REQUIREMENT

he Recipient must provide to the ATP Project Manager in writing ithin 60 days of project start date, identification of the ersonnel on the project and the percentage of time including onsultants.

. REQUIREMENT OF ACCOUNTING SYSTEM CERTIFICATION

he Recipient, whether receiving Federal Funds or only providing atching funds, must have a functioning financial management ystem that meets the provisions of 15 CFR 14.21 to ensure oper accountability of funds. Therefore, Computer Aided urgery, Inc., must submit an **accounting system certification** sued by an Independent Certified Public Accountant (CPA) to e NIST Grants Officer within 90 days from the date of this ward.

DEFERRAL OF REVIEW OF USE OF HUMAN SUBJECTS

ased upon a review of the proposal dated July 6, 2001, ST has determined that the involvement of human subjects in search identified herein meets the criteria to qualify for a ferred review. This award is made in accordance with 15 R 27.118, which permits research that does not involve man subjects to proceed even though human subjects may involved at a later stage during the project period. In cordance with the 8/01 ATP General Terms and Conditions 9, the Recipient must submit the following documentation or to Year 3 of the project and prior to any research that ay involve human subjects, to the ATP Project Manager for iew and approval by appropriate NIST officials:

a) Documentation establishing approval of the project by an Institutional Review Board qualified under 15 CFR 27.103, OR

b) Documentation to support an exemption for the project pursuant to 15 CFR 27.101(b).

e documentation requirements are available on the ATP bsite at http://www.atp.nist.gov, outlined in the ATP oklet titled "Guidelines and Documentation Requirements for search Involving Human and Animal Subjects." No olvement of human subjects in research may be undertaken conducted, or costs involving human subjects research urred or charged to the project, until the NIST Grants er's approval of the above documentation is obtained in ing.

9607 # 7 NANB/H3050 Rev Budget dated 9/20/01

EST ED MULTI-YEAR BUDGET - SINGLE COMP.

	YEAR ONE	YEAR TWO	YEAR THREE	
1. OBJECT CLASS CATEGORY

Reference: Advanced Technology Program Award Number 70NANB1H3050

Dear Dr. Karron:

I am pleased to transmit three (3) copies of the referenced award. Please review the award documents thoroughly and if you agree with the provisions, sign the three (3) copies of the Financial Assistance Award (CD-450) and return two (2) originally signed copies, including the Special Award Conditions and budget, to:

National Institute of Standards and Technology
Grants and Agreements Management Division
100 Bureau Drive, Building 411, Room A143, Stop 3580
Gaithersburg, MD 20899-3580

You are to retain the third copy of the award document and provisions for your records. This award becomes void if not signed and returned within thirty (30) days of receipt. If you have any questions concerning this award, please contact the NIST Grants Specialist identified in the cooperative agreement special award conditions.

We congratulate you on receiving this award and wish you success in the development and broad dissemination of challenging high-risk technologies that could offer the potential for significant, broad-based economic benefits for the nation.

Sincerely,

Marc Stanley

Approval Expires: November 30, 2003

EXHIBIT 14

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in **Gate 2**. The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided:

Budget Data
Proposal Number _00-00-4607_
Name of Company _Computer Aided Surgery, Inc. _____ Year _2001_____

A. **Personnel** – List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
Dr. D. Karron, P.I.	$175,000	100%	$525,000
Mr. E. Gurfein, Project Manager	100,000	75%	300,000
Math and Graphics Programmer (TBD)	100,000	100%	300,000
Systems Administrator Network Programmer (TBD)	75,000	100%	205,000[1]
		TOTAL	**$1,330,000**

[1] Systems Administrator Network Programmer will work 100% of time year 1 at $75,000 annually and thereafter 85% of time a $65,000 annually in years 2 and 3.

B. Fringe Benefits – Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 26.87 % check here if included in indirect: _____

If percentage rate exceeds 35%, provide breakdown:

TOTAL **$358, 200**

C. Travel – Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
Paper Presentation Medicine Meets	Newport Beach, CA	Air, hotel, per diem	1 person, 3trips	$6,000
Lecture: Society of Industrial and Applied Math Activity Group on Imaging Science: Imaging Science 2001 Meeting	Boson MA		1 person 1 trip	$1,000
Lecture: American Association of Physicists in Medicine 2001 Annual Meeting	Salt Lake City, UT	Air, Per Diem, Hotel, Conf Fees	2 persons x 3 trips	$10,000
Association for Computing Machinery (ACM) Special Interest Group on Graphics (SIGGRAPH)	Orlando FL	Air, Per Diem, Hotel Conf Fees	1 person x 3 trips	$6,000
American College of Radiation Oncology			2 persons x 3 trips	$12,000

Travel justification for foreign travel and conferences:

TOTAL	$33,000

D. Equipment – Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
SGI Workstation			$18,000
SGI Server			45,000
Linux Server			15,000
Linux Workstation			3,000
Disk RAID			12,000
Gigabit Switch			2,000
Misc			5,500

Justification for any item over $100,000, or construction costs:

TOTAL $100, 500

E. Materials/Supplies – Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
Internet Service	500$/month		$14,000

Part of cost absorbed by SBIR project

TOTAL $14,000

F. Subcontractors – For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
NYU Medical Center	**Clinical Consultant**		**$50,000**

Subtotal **$50,000**

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost

Subtotal **0**

TOTAL **$150, 000**

G. **Other** – Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audits	$10,000x2	$20,000

TOTAL **$20,000**

H. **Indirect Costs** –Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost

TOTAL _____

1 Severability Statement

1.1 Year 1

At the close of the first year, a server will have been installed with a mock up facility to do DMT decomposition of 2D images supplied by users over the Internet. DMT map segmentation will be applied to 2D objects that will enable evaluation of precision and accuracy.

1.2 Year 2

At the end of Year 2, DMT will have been applied to stacks of images, supplied via the Internet user interface, enabling 3D model segmentation and evaluation of precision and accuracy.

1.3 Year 3

At the end of the third year, the implementation of the DMT algorithm will be up and running on the server. This is for the use and testing by our collaborators and alpha customers. Weak borders between objects will be segmented using carving segmentation, and clinical usefulness will be assessed in terms of precision and accuracy of characterization of segmented tumors.

MEMORANDUM FOR Selection Evaluation Board
Advanced Technology Program

FROM: Marilyn Goldstein
NIST Grants Officer

SUBJECT: Semifinalist Proposal Number 00-00-4607

GRANTS OFFICE REVIEWER: Hope Snowden

The initial review of the referenced proposal has been completed. It was noted that certain information is missing or unclear. Please provide the following information.

1. Please provide a budget narrative, consistence with the example provided in the ATP Proposal Kit exhibit 14, explaining the expenses proposed on the NIST 1262

2. **Please provide a Severability Statement.**

Severability of Project Tasks: The applicant should provide a brief statement of projected overall accomplishments for each proposed year of ATP funding. Characterize what successes the company expects to achieve by the end of each year that would maintain a high level of commitment by the company in continuing with the project. The accomplishment may take the form of describing to what extent the state-of-the-art of a technology area will be extended by the end of the year, or characterize what level of performance needs to be achieved by the end of the year to keep the project on track toward the overall project goals by the end of the project. Please do not provide a list of project milestones. The accomplishments are for the purposes of determining severability and should be no more than 2 or 3 statement per year. Explain what the company expects to achieve each year, not the steps required to achieve it.

12. PROPOSAL TITLE

Anatomic Computer Modeling for Precise and Accurate Therapies

13. NON-PROPRIETARY PROPOSAL ABSTRACT

Computer Aided Surgery, Inc. will develop a new computer application server that will take calibrated, encrypted raw images from a clients' medical imaging instrumentation (MRI, CT, Ultrasound, etc.), over the Internet.
Our system will rapidly generate encrypted, precise, accurate, and variable resolution three dimensional tiled models applicable for diverse applications as radiation therapy, surgical planning, intraoperative guidance, rapid manufacturing of prosthesis, verification of surgical results, robotic surgery trajectory planning, patient communication, education and other customer specific applications
The novel idea, that enables the technological leap forward is Digital Morse Theory.
The essential insight of Digital Morse Theory is that it describes the behaviour of three dimensional SpiderWeb surfaces surfaces in terms of Morse Critical features.
These surfaces are the computational building tiles of the biologically and medically important objects we wish to parse from an opaque brick of bytes that compromise a volume data set.
We can build an index of all of the objects in a volume to utilize these elements in terms of their generator critical points. Our novel geometric construction algorithms will be embodied in a network based application service provider model. The server will upload from the radiological diagnostic image producer, and download to the therapeutic consumer model. We will function as a unique, super specialty medical imaging Internet Service Provider.

14. CERTIFICATION: BY SIGNING THIS PROPOSAL COVER SHEET, I CERTIFY, TO THE BEST OF MY KNOWLEDGE AND BELIEF, THAT ALL INFORMATION IN THIS PROPOSAL IS TRUE AND CORRECT AND THAT:

A. THIS PROPOSAL IS NOT REQUESTING FUNDING FOR EXISTING OR PLANNED RESEARCH PROGRAMS THAT WOULD BE CONDUCTED IN THE SAME TIME PERIOD IN THE ABSENCE OF FINANCIAL ASSISTANCE UNDER THE ATP.

B. ALL INDIRECT COSTS PROPOSED IN THIS PROPOSAL ARE INCLUDED UNDER THE PROPOSER'S COST SHARE AND NO INDIRECT COSTS ARE INCLUDED IN THE ATP SHARE OF COSTS REQUESTED.

C. IF A LARGE BUSINESS, COST SHARING PROPOSED BY THE LARGE BUSINESS IS AT LEAST 60 PERCENT OF EACH YEAR'S TOTAL COSTS.

D. THE TOTAL VALUE OF ANY IN-KIND CONTRIBUTIONS DOES NOT EXCEED 30 PERCENT OF THE COMPANY'S TOTAL COST SHARE.

E. THE FOLLOWING QUESTIONS HAVE BEEN TRUTHFULLY ANSWERED:

		YES	NO
i.	IS THE COMPANY DELINQUENT ON ANY FEDERAL DEBT? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
ii.	WAS PROPOSAL OR VERY SIMILAR PROPOSAL SUBMITTED TO ANOTHER FEDERAL AGENCY? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
iii.	DOES THE COMPANY HAVE A PARENT COMPANY OUTSIDE THE UNITED STATES? (IF YES, IDENTIFY THE PARENT COMPANY AND ITS PLACE OF INCORPORATION IN ITEM 15, REMARKS.)	☐	☒
iv.	IS THE COMPANY MAJORITY OWNED BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
v.	IS THE COMPANY SUBJECT TO CONTROL BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
vi.	DOES THE PROPOSED R&D INVOLVE THE USE OF HUMAN SUBJECTS AND/OR HUMAN TISSUE, AND/OR HUMAN CELL LINES? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN INSTITUTIONAL REVIEW BOARD (IRB).)	☐	☒
vii.	DOES THE PROPOSED R&D INVOLVE THE USE OF VERTEBRATE ANIMALS? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN ANIMAL CARE AND USE COMMITTEE.)	☐	☒

15. REMARKS (CONTINUE ON A SEPARATE SHEET IF NECESSARY)

16. DESCRIBE WHAT EFFORTS WERE MADE, PRIOR TO APPLYING FOR ATP FUNDING, TO SECURE PRIVATE CAPITAL TO SUPPORT THIS PROJECT WHOLLY.

CASI's reputation as a basic research company has made our efforts to raise private capital for this high risk project difficult Traditional paths to commercalization financing would require many years of academic research, which private equity will not fund.

Our goal is to use ATP funding to go directly from preliminary results with a novel proven theory to market dominance intellectual property available to all medical and scientific customers over the internet.

3 The National Opportunity

Computer Aided Surgery, Inc. (CASI) will build a new Application Service Provider (ASP) on the Internet for uploading stacks of pixel images from varied medical imaging producers and downloading to client PC's dimensionally accurate and precise 3D models. These models are for treatment planning, simulation, rehearsal, patient, and medical education. The key feature of the CASI service is that it produces a novel 'graph' or index into all of the volume objects and a 3D model, not just an image. The user manipulates the model on the client computer equipped with a 3D interactive graphics accelerator board, commonly used for computer games, via web browser plug-in software. The model is used for making critical treatment decisions, such as planning radiation beam trajectories. This is a surgical anatomic "blueprint" for treatment planning and evaluation, intended to model and demonstrate properties of patient data. Digital Morse Theory (DMT) permits rapid segmentation and converts pixels into contours enabling rapid interaction by users via the Internet.

CASI offers a unique opportunity for broad-based national benefits by improving the quality and standards of national medical care with reduced cost, patient mortality and morbidity with faster throughput in many application areas. In this proposal, CASI will target Radiation and Oncology with Radiation Treatment (RT) planning technology.

Current technology for anatomic modeling and treatment planning consumes time, labor, and is complicated to use. Currently, professional operators are producing varied results, even with the same data, reprocessed by the same operator. It is not suitably precise for critical radiation or surgical therapy. CASI's improvement will use its DMT 3D surface to rapidly obtain stable measurements delivered via web browser. CASI technology anticipates demands for trajectory planning in the emerging markets of surgical robotics, radiation treatment, and image-guided therapy. Support of these industries will reap broad societal benefits including better medical care, improved national worker productivity, and longer life.

3.1 Proposed Technological Solution

CASI will build a clinical geometry "foundry", casting clinical models in triangular tiles that define intricate, real surfaces in three dimensions. These models will be used for solving problems such as calculating trajectories for radiation beams to treat cancer. CASI's improvement will use 3D surface modeling to rapidly obtain stable measurements delivered via web browser. CASI will embody its novel geometric algorithm as a network ASP and will 'cast' anatomical structures for biological, surgical, and educational purposes. With novel mathematical theory, computer graphics programming experience, and clinical research experience, CASI will deliver in many high tech medical and non-medical modeling applications.

3.2 National Economic Benefits

The nation will benefit by improved health care that will prolong the quality of life. Reduced employee sick leave will decrease disability related payouts and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs. It will also simplify clinical care. CASI will create new markets for model-based information as the core competency is established that will go beyond the initial applications. There are many potential markets. CASI is not selling a software product. It is providing a network-based service for manipulating user pixels into useful geometric constructs. CASI's business model is of software as an Application Service Provider (Torode 2001).

The visualization and modeling industry and technology are not being effectively developed in the United States. Wide diffusion of insight from image-based information will require new thinking, not just more bandwidth. CASI will move from a 'pixel based low information representation' to a

'DMT based object geometry representation' with high pragmatic information content.

Industries benefiting from this technology include medical imaging, animation, as well as Hollywood animation, and weather prediction in meteorology. The ultimate benefit to the public is better diagnosis and treatment for various cancers, with increased quality of life.

ATP funding is required because of short ROI period demanded by private investors, the relatively long development time required for this research, and the many broad areas beyond the immediately targeted medical application. CASI opportunities are in many disparate markets. The national opportunity is in the broad diffusion into many needed applications, and the ATP program is the only funding agency that can take such a broad view of the long term and fund it significantly.

3.2.1 Pathway to Economic Benefits

The CASI Internet solution will grow explosively once released. Internet payment systems provide the infrastructure for direct revenue recovery and interaction with customers. Insurance carriers reimburse costs of 3D studies at the one to three hundred dollar levels. Compared to the established market for high-resolution graphical representations in the medical illustration and advertising industry, it is clear that there is a much larger market for inexpensive patient specific diagnostic 3D models. CASI's intends to become THE clinical modeling resource firm, going beyond medical illustration, and becoming a reference standard for dimensionally precise and accurate anatomic models. The CASI will reduce the cost of generating models from tens of thousands of dollars and hundreds of person-hours to pennies and seconds.

The PI has extensive 'intrapeneurial' experience, starting with early computer networking within medical school in the early 80's (the ability to promote and launch projects inside large organizations). The PI has managed to attract bellwether early adopters in various medical specialties for early stage research collaboration. The PI's extensive medical center experience and professional standing enables CASI to effectively collaborate with clinical departments. These skills insure the broad diffusion of national benefits from CASI research into commercial development for the long-term success of the company and the return on the government's investment.

The PI has also recruited the participation of Mr. E. Gurfein, MBA, as the CASI project manager. Mr. Gurfein has over twenty years of experience in the marketing and commercialization of R&D with companies such as Sperry Rand, Perkin-Elmer, and Engelhard.

4 Potential for Broad-Based Economic Benefits

As discussed above, the broad based economic benefit to the nation will be improved health care that will prolong and improve the quality of life, reduce employee sick leave, will decrease disability related payouts, and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs.

America is underutilizing the product of its diagnostic imaging capital base. The medical imaging industry is not making the best use of the mega pixels of patient data these systems generate. From an information theoretic perspective, CASI estimates that 99% of that information is not contributing to the making of therapeutic decisions. The diagnostic imaging industry is not disseminating this information to all concerned parties rapidly, effectively, and usefully. New picture archiving and network distribution systems are helping to manage the raw data, the Next Generation Internet can make more of the raw data move faster, but what our nation needs from this data is essential insight. CASI will increase the information content and the pragmatic value (Weinberger 2001) of medical pixels by winnowing them down to geometric models, trajectory vectors, and critical features/points. DMT solves significant practical problems in image understanding and 3D modeling, as well as information compression. This leads directly to improved diagnostic accuracy, and therapeutic precision. Analysis of medical images is expensive because of the extensive and expensive human photo interpretation, hand contouring, and guesswork that is the current practice.

Medicine needs a rapid 3D modeling capability for precision image guided therapies. This is a particular problem in medical image analysis. CASI addresses the hard problem of bringing advanced mathematical insight directly to various application markets, and improving the yield, efficiency, and cost effectiveness of image based diagnosis and therapies. For our primary example application, this is the critical measurement of accurate tumor border and surrounding anatomy geometry required for precise targeting for surgical and radiation therapy

4.1 Specific Broad Based Economic Benefit

Broad based economic benefits will result from the CASI development plan, which consists of the direct development of core technology into specialized application areas. CASI will accomplish further development by fostering a network of bellwether early adopters professionals in other areas, leading to indirect national economic benefits. CASI's leading application area is improved treatment of breast cancer, followed by the prostate.

The second greatest killer of Americans is cancer. Breast cancer continues to be the second leading cancer in women in the US, with more than 45K deaths this year (Greenlee *et al* 2001). Cancers of the prostate, colon, and rectum combined to contribute 45% of cancer deaths among men. As baby boomers mature and become more susceptible to cancers in the next 10 to 20 years, these rates are expect to increase at a rate much greater than the general population growth.

Improved treatment of breast cancer is CASI's primary application area, followed by prostate cancers

4.1.1 CASI application development areas

Radiation Treatment (RT) beam trajectory planning in collaboration with Sylvia Formenti MD, and Keith DeWyngaert PhD at New York University Medical Center will be CASI's first application area. RT is the preferred way to target many types of cancerous tumors; however, localization of therapeutic intensity without collateral damage to healthy tissue is a serious problem. Improved diagnosis and earlier treatment have produce significant reductions in mortality. CASI technology improves treatment and affects the reduction of the morbidity (symptoms) of the disease increasing the quality of life during and after treatment.

Early detection, improved surgical techniques, and aggressive systemic therapy have improved quality of life and survival for patients with less advanced breast cancer Tumor regression is the result of the targeted radiation.

The nature of prostate cancer, similar to the breast, is that more radiation produces a better cure. Better targeting technology will have a profound effect on morbidity and mortality.

However, the potential for RT of solid tumors has not been realized mainly due to the dose-limiting toxicity associated with systemic large levels of radioactivity. The technology to be developed will increase the radiation delivered precisely and accurately to the tumor site and decrease the dosage to the non-target regions, a significant improvement in the treatment outcome can be expected. Even greater improvement in treatment outcome is expected when targeting technology is coupled with a variety of methods under investigation at NYUMC to improve the tumor targeting of radioimmunoconjugates including the use of antibody fragments, recombinant single-chain antibodies, and drugs to modulate tumor vasculature. This technology will also be useful in other cancers including prostate, head and neck and colon.

Radiosurgery is the use of carefully targeted radiation instead of surgery to treat tumors, generally in the head and neck. This expensive high technology treatment can spare the patient from invasive dissection surgery, with low morbidity. Treatment planning is a vital and much larger part of these procedures, and CASI modeling technology is expected to play a significant part in reducing costs and increasing throughput (Karron 1992).

4.1.2 Specific National Economic Benefits Table

[1]Patient Population Class	New Cases in 2001	Cost Per Case in K$			Mortality, 000		Morbidity		National Cost B$ / Throughput		
		Hi	Low	Avg.	Cur.	Del	Pre	Post	Now	Save	Rate
Breast Cancers	**193,700**	25	50	35	45	-2	Fair	Good	6.8	-.29	+25%
Prostate Cancers	**198,100**	30	20	25	30	-1	Fair	Good	4.9	-.27	+25%
Radiosurgically treated cancer	**8,000**	40	30	30	10	-1	VG	Excl	.24	.016	+50%
Estimated Totals	**412,000**			**27.5**			Fair	Good	12.2	**-.59**	+20%

The principal tangible value of the CASI technology treatment improvement is in reduction patient morbidity and cost, with an increased productivity. The estimated cost savings of CASI technology in RT planning is a reduction from $1K per average with a savings of $500 in cost savings for the Medical Physics component, a reduction from $2Kper case with a savings of $1K for the Physician Oncologist Treatment Planning, and a reduction estimated of $2K for Radiosurgery. RT treatment typically bills separately for the Medical Physics and the Oncologist treatment plans, so the savings are additive. Taking these cost savings to the national caseload will result in an estimated **national total savings of approximately $.5B / year, if CASI were in production today[2]**. Judging from the response to CASI collaboration offers by various medical specialty groups, there will be strong demand for our technology. **Assuming an average study produces at a $100 charge on the server computer, a 20% capture of the 400K/year new cases for RT treatment planning market, @ 2 studies / case, CASI can reasonably expect a gross revenue of $16M per year from this application alone[3]**. Finally, as explained above above, the national cancer rate is expect to grow faster than the national population growth, given the ageing of the baby boom cohort into middle and old age, where cancer strikes the most. Because CASI will become a web 'monopoly', it will become part of the standard of care for many RT and surgical procedures, CASI can expect much greater market share, as this market opens up and matures.

There are compelling intangible reasons for CASI technology beyond national cost savings and projected CASI revenue. Improved targeting means less total radiation dosage is used. That which is used is more concentrated, thus more effective in tumor shrinkage with less systemic toxicity, and less treatment morbidity (e.g., radiation damage to the heart, and/or lungs in breast cancer treatment, or the rectum and / or bladder in prostate treatment). Benefits for the patient are due to faster treatment planning, better targeting, with less treatment morbidity, and faster recovery.

Benefits to Insurance Companies and HMO's are better quality control; better ROI for imaging studies, and cheaper, faster, and better treatment planning. Insurance pays for 3D reconstruction studies, and RT planning, but at a price that does not permit adequate recovery of capital intensive computers they run on, and expensive software licenses, much less the time and expense of a professional to draft the studies. Typically, the studies cost so much more than insurance pays for them that they are not ordered, and are considered of marginal diagnostic value.

CASI can afford to charge as little as $100 per study, and is shown above, make significant revenue at a price third party payers reimburse. Depending on the application market, CASI or its franchisors, can charge more or less and still make money by the economics of scale, and the low cost and demands on its computer clients. CASI captures benefits from broad diffusion by charging for ASP time and usage, and as such directly benefits from broad diffusion via its bellwether and franchisor commercialization plan.

Application Area	Barrier	Solution
Dental Implant Surgical Planning	Optimal anchorage in inhomogeneous bone, optimal osseointegration	Braided DMT for optimal positioning
Hip Replacement, Finger Joint Replacement, and Orthopedic applications		
Earth Resources Imaging Analysis	Pixel Intensity (too many pixels)	DMT based image understanding
Hyperspectral Satellite Imaging		

[1] Data is from Greenlee et al 2001 CA Cancer Statistics 2001.
[2] Data is from typical NYUMC clinical collaborator billing.
[3] Estimated revenue linearly extrapolated from NYUMC clinical billing estimates and Cancer Statistics 2001 figures.

Application Area	Barrier	Solution
Meteorological Prediction	Isosurface modeling	DMT/SpiderWeb modeling
Craniofacial Surgery	Optimizing complex shapes	Braided DMT
Spine Surgery		
Medical Computer Graphics for Advertising, Medical and Patient Education	Expensive slow hand segmentation, excessive surface tiling, slow rendering, lack of interactivity	DMT based segmentation and surface relaxation
Medical Computer Animation for Hollywood Entertainment Applications		
Functional MRI analysis	High and Low resolution Image Fusion	DMT image fusion
Visible Human Embryo Project	Pixel Intensity (too many data pixels), Rapid Segmentation	DMT based segmentation and surface relaxation
Visible Human(s) project		
Fluid and Thermal Dynamics	Data complexity	DMT Graphing

5 National Economic Benefits

Business opportunities addressed by this proposal are the technology gap in precise and accurate surface modeling for critical surgical and radiation treatment planning, as well as many scientific applications. By using DMT technology for image and model compression, we will develop the research as an Internet based ASP. CASI will develop its core technology for applications in Radiation Treatment of Breast and Prostate cancer, as well as in neurosurgical planning.

End users and customers include any radiology practice, imaging facility, medical center, and associated individual practitioners. Patients will benefit the most from the interpretative method of CT, MRI, PET, SPECT, *etc* that currently use hand processed stacks of images in designing a treatment. Similarly, anyone attempting to spot critical surgical targets, such as in steriotactic brain surgery, by sighting by the center of blobby objects in hundreds of slices will be a customer. RT practitioners are most eager to find better methods to eliminate this drudgery, to more precisely locate tumors borders, and are project collaborators.

Competitors are scattered across various application area, using mainly volume rendering technology instead of shell surface technology. Most imaging companies are focused on one technology. Typically, these firms arise from image consulting firms working with one large customer with a specific application in petrology, histology, computer graphics, and so on. There are general-purpose visualization systems sponsored by government research labs (NCAR), and commercialization of large university programs such as ANALYZE (Mayo Clinic), 3DVIEWNIX (U. Penn). Commercial packages include Voxel View, AVS (Advanced Visualization System), Resolution3D, Khoros, Data Explorer DX (IBM) Iris Explorer, VTK tool kit (Kitware) are but a few of the more popular general packages. Some have exceptional interactivity based on their optimization to special graphics accelerator hardware, now common with the explosion of the computer game industry). Many have intricate and comprehensive facilities for hand segmentation, contouring, snake segmentation, thresholding, flood filling, edge detection, marching cubes, etc. None have the power and insight that Digital Morse Theory based segmentation can do to simplify many segmentation tasks. CASI will never manage to penetrate such a broad spread of markets, but expects that it will license its technology and that will become an important source of revenue and diffusion of our technology and theory into various industry sectors and broader national economy in ways that can barely be foreseen.

Competing RT planning software generally runs on Unix super workstations, based on a slice-by-slice hand drawn or computer assisted contouring. These installations are a department fixed resource. Packages fielded by RT hardware makers are tied to the vendors hardware. Independent RT software houses include Prism Microsystems, and RAHD Oncology planning products. Some sport names like Prowess Systems, for prostate brachytherapy (selling supplies and training through their web site) and Nomos Corporation specializes in Intensity Modulated Radiation Treatment (IMRT) with CORVUS Inverse Treatment Planning. The Radiation Physics departments, at the University of Florida, use and promote the Pinnacle3 Treatment Planning from spun out companies. Oak Ridge National Labs distributes software for RT using Visible Human Data. Most use volume visualization as an aid to review slice-by-slice layout results. None make use of 3D surface

technology because of problems with the technology that CASI solves.

None of these companies is able to directly offer their services via the Internet because of image compression issues and interactivity latency issues. All of these systems were developed before the Internet boom. It will be extremely difficult for them to reinvent themselves as competing ASP's due to the image understanding, modeling, and compression barriers that DMT IP solves.

It is CASI's plan to license its technology to other industries that can apply its technology. Among there are industrial non-destructive testing (industrial CT), meteorology, metrology, histopathology imaging, entertainment industry animation, medical illustration, commercial computer graphics for advertising, virtual reality, air traffic control, multimedia, medical education and training, simulation, topography, mapping, surveying, (not topology) fluid mechanics and dynamics modeling and visualization, hyperspectral scanner imaging, and Earth Imaging Systems (for interpreting satellite imagery).

CASI leads with new ideas that will solve hard multiple industry wide problems. CASI is behind in implementation and building a customer base. CASI will catch up by a leapfrog strategy, taking the fruits of its research directly to the customer and end user.

The core technology intellectual property is protected by US patent #5,898,793 (Karron, Cox, and Mishra, 1999), and so advanced; that there is moderate risk of failing to achieve successful commercialization goals in time.

The benefits to the public are longer life, better quality of life, through improved medical care, at reduced cost through more effective delivery and utilization of medical imagery.

CASI's case for government use of taxpayer funds are based on the large benefits outlined previously. Benefits to the nation beyond those received by CASI are better citizen health and recovery from cancer; a major national health concern and cost. CASI's opportunities in the immediate future are the development of better cancer treatments within a price that third party payers reimburse.

Broader impacts in the more distant future are the scientific discoveries enabled by better and rapid segmentation of volumetric data, and better understanding of complex data relationships where computer graphics tends to obscure intricate objects. Applications include x-ray crystallography and proteomics, advanced computer graphics.

DMT research is pathbreaking because it enables a novel method of analysis for difficult problems in hyperspectral image understanding, x-ray crystallographic determination of molecular structure, and very large data set understanding. These applications are beyond the scope of CASI's immediate research plans, but CASI is anxious to support activities in these areas by business and scientific colleagues in these areas. CASI's development plans for DMT research permit any researchers to submit image stacks of any subject for online analysis. As the usefulness of the analysis becomes clear, the CASI ASP infrastructure can support multiple industries and technologies. For example, semiconductor epiaxial ultra lithography, or the deposition of nanoscale structures in semiconductor fabrication requires modeling of the crystal front growth. Isosurfaces and level set analysis is being used as an important modeling method for this industry. DMT analysis can be adapted for investigating and modeling seed crystal growth, and the role of perturbations and faults in the crystal lattice.

CASI's research opens many pathways to economic activity, many of which we can only dimly foresee at this point. DMT is a novel approach to computational geometry analysis from image data. DMT research is a career path for many young scientists in medical imaging and computational geometry; demonstration of the economic potential will attract entrepreneurial scientists to explore applications and launch new industries outside of academia.

CASI core technology will enable fast and cheap segmentation and registration of large datasets. CASI will exploit this technology for fast and low cost radiation treatment planning, over the Internet. The time required for billable studies will be reduced by hours for faster study throughput.

The main benefit is to patients, with less morbidity from cancer treatment, and better treatment throughput for treatment planners by physicians and medical physicists. Many hospitals and private practices will benefit, as they will not need to invest in expensive computers and software licenses to use CASI technology via its ASP web browser clients.

Isosurface modeling is an important method of data analysis in many physical science areas. Isosurfaces are of major benefit to meteorology, fluid and thermal dynamics, hydrodynamics, and solid-state physics. Isosurfaces are vital in x-ray diffraction studies to establish molecular structure for many biochemical applications, including proteomics. Traditionally, these are painstaking, long studies, where the two main bottlenecks are getting an unknown substance to crystallize, and the other is to fit a molecular backbone around the electron density isosurfaces. As CASI DMT provides an index of all of the objects in a density field, this will have important spillover benefits in the physical and basic medical sciences.

Synergy will be achieved with other computational geometry groups working in level set theory and advanced computational geometry research. CASI offers a cheap and accessible embodiment of Digital Morse Theory object mapping that will promote research in other groups that may not have the computing resources to model larger data sets, or money for expensive software packages. Surface modeling is complementary to volume imaging, which is the dominant visualization technology for computer graphics.

By developing DMT technology as an ASP, it will not require extensive technical abilities for others to run sample studies. Casual web surfers can also submit images or image stacks for sample analysis and modeling.

The PI and CASI have published its research findings in both the professional literature and via the CASI corporate web site at http://www.casi.net/. Publications range from Cox, Karron, and Mishra in 1993 to Karron and Cox, Karron, and Ferdous in 2001. Additional papers and presentations are underway for other national meetings such as Medicine Meets Virtual Reality 2002.

6 Need for ATP Funding

ATP Funding is needed because CASI's goal is to make a technical forward leap with the DMT based modeling and develop a business model to rapidly bring it to market. CASI needs the funding to focus on its core technology, and then the production of anatomic modeling for RT planning. Building on preliminary results with the NIH Visible Human Project (VHP), CASI will create new markets that will be profitable within five years.

Equity markets, in general, have a cloud of uncertainty over them at this time, which translates into investors staying on the sidelines. While we observe this somewhat in publicly traded equities, it is even truer of the illiquid private equity marketplace. Generally, the current requirements, among others, for private equity investors is that:

1. Profitability can be expected within two years.
2. The technology is reduced to practice.

CASI had made a significant effort to obtain private equity funding for this activity. A number of high net worth individual investors have been approached, as well as venture capital funds and corporations with bids to Toucan Capital Corp, Global Business Network, CMMC Ventures, Inc, Sumitomo Corporation of America, Madison Partners, Bristol Meyers Squibb, Paramount Capital and the Herrick Fund. CASI's proposal was uniformly rejected mainly for the reasons cited above.

Other potential sources of funding, which are not appropriate as follows:

1. NIH clinical funding is appropriate for funding specific disease applications, but not for funding the basic core modeling technology. NIH Funding will be pursued with our clinical collaborators in this project.
2. NSF funds universities. The pursuit of widespread academic acceptance is slow, and will not solve critical medical and industrial problems. NSF SBIR grants are inadequate and too short

term.

3. Medical and other imaging companies have stake in their own products and may fund research in their specific imaging technology. CASI's experience with imaging hardware companies is that they tend to restrict the research, with unacceptable intellectual property, publication, and marketing demands. Previous corporate sponsors of this research (SGI) pulled the plug with market downturns and when individual sponsors within the corporate structure leave, so does their support.
4. DoD SBIR Funding is too small and short term, with a heavy reporting burden. CASI has experience with staccato 6-month Phase 1; halt, 18-month Phase II efforts. This is a suitable mechanism for applied development efforts of more mature technology, but not for the sustained fundamental research proposed here.

6.1 The ATP difference

No one industry or medical superspeciality has the patience and broad view to fund this effort for the general utility. Segmentation and registration issues impede progress in many disparate medical and scientific fields.

ATP can support the technical innovation and business risk of developing DMT technology into an infrastructural network resource for everyone on the Internet. This has too long of a ROI, and is too broad in its ultimate utility for private investors. ATP sponsorship will enable CASI to implement DMT algorithms for everyone on the net instead of proving them on paper for other mathematicians. DMT grew to solve the PI's painful problems doing image analysis projects for anatomic modeling. Anyone doing these studies can appreciate the utility and need for this proposed resource. CASI could win many more contracts if the facilities proposed here, were already in production. Clients feel ignored because CASI is focusing on research instead of directly applying itself to the clients' immediate problems with conventional hand editing solutions. CASI prefers not to give up the intellectual property rights. This broad risk weighed aganst broad national benefit requires a funding agency with a broad view and willingness to take a patient return on investment.

People are dying from treatment failures. Better treatment planning and evaluation will avert these deaths. Academic, industrial then commercial diffusion is too slow and ponderous; CASI will bring the fruits of its research directly and immediately to its clinical collaborators; and then to the medical and scientific public at large via its rapid ASP development plan. Working in parallel with commercial franchise implementers will further speed up the diffusion of CASI technology from a Brownian motion to a directed explosion.

6.2 ATP acceleration of the technology development

ATP's sponsorship provides not only acceleration in the rate of DMT computational geometry research, but a qualitative difference in the way this academic research is perceived. Demonstrating the economic value of this deep mathematical insight will stimulate more research to be developed by mathematically oriented scientists into economically and nationally beneficial projects.

The European Union (EU) has traditionally respected advanced mathematical concepts, as evidenced by EU investments in computer vision and graphics research. American technology development has tended to focus more on expensive hardware, and possibly neglected the benefits that a deeper understanding can bring (cheaper hardware, less overbuilt systems, better precision and accuracy).

If ATP declines to fund this project, the DMT research will limp along as a sideline to CASI image contracting and the PI's student dissertations.

Without ATP funding CASI will become a contract programming shop, hindered by its unimplemented ideas. Meanwhile the EU will move first into advanced image understanding on a theoretical level. Buggy academic software packages will follow from graduate students. New

modeling technology will appear first in Siemens medical imaging equipment, and then GE will license it. Eventually the state of the art in computational geometry will catch up to DMT. Research implementations could start appearing in 6 years, and software-containing DMT inspired package features appearing in 8 to 10 years.

CASI's goal is to leapfrog this slow, wasteful, and ponderous mechanism of incremental and diffusive scientific advancement.

6.3 CASI angel and VC private funding efforts

Mr. E. Gurfein, an early technology participant, with long experience in early technology development, was attracted to CASI. .Mr. Gurfein cannot raise private equity funding at this stage, yet he is willing to invest significant personal effort managing this project with the intent of raising private capital as CASI risk decreases sufficiently for private investment.

This research is in danger of failure caused by under-funding. CASI cannot do production contract programming and push the state of the art without adequate funding for research as well as production coders, product support, and business/marketing people.

7 Pathway to Economic Benefits: CASI commercialization strategy

CASI prospective customers are in two broad classes: Primary customers deal directly with the CASI ASP in the RT markets, while secondary customers deal with franchisors, who resell and package the CASI ASP server under their own label.

Primary customers include radiological image producers, medical imaging practices, and image consumers. They will use the CASI web services for better communication and distribution of their product with their client physicians. The technology will enable RT collaborative planning (studies with multiple drafters) at academic medical physics departments, as well as at physicians' homes, on the road, and at primary care community hospitals (which generally don't have the most sophisticated resources).

Secondary customers are customers attracted by franchisors' and CASI marketing activities for secondary application area. Example include cosmetic plastic surgeons planning craniofacial cases, implant oral surgeons planning a full mouth implant procedure, as well as computer graphics firms. Patents will demand it of their surgeons, particularly if the patients currently of patients as informed consumers, shopping for doctors. Patents increasingly want to know precisely what their surgeon will do to and for them. An emerging class of medical imaging applications is vanity radiology and imaging, particularly if the images are animated, colorful, engaging, and fun and easy to explore. Patients are doing full body scans at their own expense without any motivating clinical reason, looking for pre-clinical or subclinical problems, as part of the trend to comprehensive and expensive wellness medicine (Tuller 2001).

7.1 CASI technology development through bellwether early adopters and implementer-franchisers

Bellwether early adopters are a special class of clinical and scientific professionals who are the first to recognize and try to use early stage technology. These are technically sophisticated users willing to pay a high price for new technology and can manage to use it despite the bugs and problems. Their motivation is not profit. They are generally employed at academic medical centers and are highly respected by their peers and colleagues. Their recommendation for a new technology can catapult it into the broader market of less sophisticated users. The PI knows a number of these professionals in dentistry, endoscopic surgery, ENT, plastic surgery, craniofacial surgery, oral surgery, neurosurgery, ophthalmic, retinal, histopathology, obstetric surgery, orthopedic surgery, among others. CASI will collaborate by assisting these users in the development of CASI core technology in their specialty.

CASI will foster the business development of its technology in other application areas by working with franchisors. These are profit oriented software developers who see the utility of CASI technology in a problem area they have expertise in, and have the sophistication to write front-end browsers that address specific problems of the application area. They can be affiliated with bellwether early adopters. CASI will host private label web sites that have a special look and field given to it by its implementation franchiser. CASI will support potential implementer-franchisors by the development sample applications to stoke and demonstrate demand. Franchise fees will help fund for implementation costs. Each use of the CASI modeling technology will result in a charge to the account holder, and a credit to the franchiser. CASI technology is not specifically licensed, but leased to a franchise holder. CASI manages the back end image decomposition and segmentation, as well as billing and royalty collection. An example potential franchisor and end user is the Anatomic Travelogue (http://www.anatomicaltravel.com/), a neighboring NYC medical computer animation house.

CASI will take the major role in introducing the technology to marketplace through the CASI web site, professional marketing, communications, and commercialization activities. These consist of publication of papers in archival journals, conference presentations, and software demonstration at booths rented at major meetings. The CASI web site will provide free samples of the technology as the research emerges and becomes a working application. See the table below for representative professional outlets that the PI has presented at, is invited to present at, is publishing at, and will publish in. CASI understands the market from many perspectives, from surgical virtual reality, surgical simulation to functional neuromagnetic modeling and medical illustration/animation. The PI has observed the nature of the medical image market as a fragmented industry, with many independent minded clinical academic researchers with little cross specialty communication.

7.2 Professional Marketing Venues and Outlets

Archival Journals	Date	Action
Journal Of Mathematical Imaging and Vision	Fall 2001	Paper submitted and accepted
Graphical Models and Image Processing	Fall 2001	Paper submitted and provisionally accepted
Professional Society Meetings		
Society of Industrial and Applied Math Activity Group on Imaging Science: Imaging Science 2001 meeting	Oct 2001	Member. Invited Presentation
American Association of Physicists in Medicine 2001 Annual Meeting	July 2002,3,4	Member Presentation planned
Association for Computing Machinery (ACM) Special Interest Group on Graphics (SIGGRAPH)	Aug 2002,3,4	Member Submission, booth Planned
American College of Radiation Oncology	July 2002	Targeted society, submission planned
American Brachytherapy Society	June 2001	Targeted society, submission planned
Medical Conferences		
Medicine Meets Virtual Reality 2002	Jan 2002,3,4	Abstract submitted for presentation Booth for demos
IEEE Workshop on Scale-Space and Morphology in Computer Vision Scale-Space'02	July 2002	Senior Member Submission planned
IEEE Workshop Variational and Level Set Methods in Computer Vision	July 2002	

CASI submitted abstracts and made provisional reservations for a booth at Medicine Meets Virtual Reality 2002. CASI has standing invitations to publish in major mathematical computational geometry journals, and invitations for various specialty meetings. CASI will also publish and sponsor publication in the clinical literature, specifically in the Radiation and Oncology literature, the Neurosurgical literature, and present at various national meetings with its clinical collaborators. Bellwether academic collaborators are particularly eager for the publication opportunities CASI

presents. CASI expects to present at 12 major meetings a year by the third year of the project as PI and as collaborator.

7.3 Strength, Weaknesses, Opportunities, Competitiveness

CASI strength is its strong theoretical rubric (a broad setting bigger than just the algorithm being commercialized here) that can tie together many disparate schools of imaging science. DMT is becoming a popular idea, and students are seeking the PI as a dissertation research advisor.

CASI's weakness is the lack of widely available computer demonstrations. Currently, CASI software runs only on high-end SGI graphics workstations. This will be changed with ATP support, so that DMT analysis can be obtained from any web browser client, with the hard pixel crunching occurring on a much larger and capable server host.

CASI opportunities from a competitive standpoint are strong; there are no web based medical image to 3D modeling services in operating, or under development in the near term

CASI has no direct competition to its core technology of the indexing and segmentation of large image datasets via thin web clients in an ASP environment as of now.

The international markets on the Internet do not respect national boundaries, only cultural, intellectual, and language barriers. There is better acceptance and understanding for computational mathematics in the EU, as The PI's first isosurface papers were published in France. International diffusion will be faster in the EU as the main locations for basic R & D in medical imaging are European. This is evidenced by the sponsorship by the French Government Research Consortia INRIA and the Siemens Corporate Research and Development organization of two important research conferences in the closest related areas. These are the IEEE Workshop Variational and Level Set Methods in Computer Vision at the University of British Columbia, and Scale-Space'01: IEEE Workshop on Scale-Space and Morphology in Computer Vision in 2001, and the annual Eurographics conference

7.4 CASI plan for bringing initial application to market

CASI technology's primary application is RT planning. CASI will develop an ASP for its DMT modeling technology, and develop specialized web based front ends for RT with its clinical collaborators at NYUMC Radiation Physics. As the technology matures, users (or their patients) will begin to pay for connect hours and pixels/vertices processed, with the average case billing from $100 to $500; taking approximately 10 to 90 minutes. Physician users will keep saved cases on the server, and be able to allow patients to log in and see exactly what the clinician is proposing for the patient. This will help sell the case to the patient, and to third party payers. Additionally, records of the patient (patient electronic camera images, intraoperative photographs, patient video and audio) can be stored and fused with the radiological information to provide a comprehensive electronic patient multimedia record.

CASI's direct customers are breast cancer and prostate cancer patients, and their insurers. End users are the patients physicians, medical physicists and oncologists doing patients cancer cases. Patients, insurance companies, and other third party payers will be directly charged for CASI and / or study fees directly over the Internet B2B technology with on-line credit card charges or deposit accounts.

There are other competing image processing, virtual reality, and RT packages, as discussed above. These packages have a high capital cost, and require significant computers. None are available as ASP services due to current technology limitations in image compression and network bandwidth and latency. Established users of these packages will be attracted by CASI technology by free sample studies with their data. CASI will package its technology using emulation "skins", even emulating the features that CASI obsoletes so that users of competing packages get what they want, expect, and think they need.

CASI has an ambitious, but robust research plan. The most significant research risk is the failure to achieve acceptable interactivity for image segmentation and model manipulation over slower Internet connections of the expected of many small physician users. CASI expects that faster and cheaper Internet bandwidth will become ubiquitous, and reduce the project dependence on extreme data compression that is characteristic of most web based multimedia software. Should it become necessary, CASI will market a version of its software to run on Linux workstations with graphics accelerator cards, with traditional software licensing. Some customers may insist of this model of software as product, not service.

The next level of research risk is computational loading of the CASI server with image indexing and modeling code that bogs down the system and creates unacceptable user performance. Users who submit very large image stacks may cause problems for all users on a shared server. Significant work will be invested in optimizing the code to run in a high-level server computer environment with maximal efficiency. By the third year of this project CASI will have experience with issues of alpha tester computational loading to be able to estimate the costs of scaling the server to meet user demand growth projections. The worst case is that CASI will have to utilize supercomputers instead of server computers

Many commercially successful medical, animation, and image processing software packages do not push the state-of-the-art. Successful software packages are mainly customer driven, not research / technology driven. Software is a service industry. As long as CASI customers obtain a superior service, even before the core technology development is completed, the company can produce a useful and profitable product. CASI will have responsive and productive programmers building software for our alpha customers. CASI will build demonstrations that convince prospective clients that DMT is the way to solve their problem. It will take three years to do this. ATP funding is required to build the software services that will solve customer problems before they realize that they need it, and convince them that they cannot live without it. However, should there be problems with the PI's technology development, CASI programmers can fall back to what more conventional technology customers expect, and in the absolute worst case, produce a useful and profitable program without full utilization of DMT based modeling or ASP functionality.

CASI intellectual property protection is by PI's key US Patent #5,898,793, issued in 1999 under the old patent rules, so that the term of the patent is valid for the next 15 years. CASI technology is an ASP, and since the algorithms run on a CASI server, the algorithm is protected because it never leaves the company premises.

8 People and Organizations: Experience, Qualifications and CASI Commitment

CASI facilities and equipment consist of fully networked office space for three full time programmers, three SGI indigo2 extreme graphics super-workstations, three client PCs, a NT4 fileserver, and a Power PC PowerMac. The CASI computing and network environment is superior to many academic and medical departments, due to the PI's experience as system administrator for computer operations in various medical departments. The PI has been running the www.casi.net website for five years and it is a well-known and indexed Internet resource. The website attracts consulting clients, contract work, as well as medical and doctoral students. The site hosts the PI's academic BioInformatics graduate class web site. CASI administrative resources include online payroll processing, record keeping, accounting, and budget management and fiscal reporting. The PI has experience with the FAR and DFAR.

Subcontractors CISDD provide access to CUNY faculty, and collaborators at New York University Medical Center will provide clinical facilities, Medical Physics and clinical expertise, and medical imaging data and equipment.

The PI has entrepreneurial experience ranging from building a trucking company to East

Village NYC real estate (RE) renovation and development, all while in college. The RE financed the PI's pre-medical academic bid for medical school; that led to a job in the plastic surgery department at NYUMC. The PI also has extensive 'intrapeneurial' experience, promoting early computer networking technology within medical school in the early 80's. This is the ability to promote and launch projects inside large organizations. After earning a PhD at NYU Applied Science in Biomedical Engineering in 1993 and serving as a medical school research professor, the PI won the first of three DARPA SBIR grants and launched CASI in 1995. The PI's father was an entrepreneur, with a family manufacturing business reaching back two generations.

Mr. E. Gurfein is President and Principal of Meridian Resources and Development, Ltd in Englewood, NJ, which provides consulting and equity financing for companies and projects. He was previously with Philipp Brothers, Inc., (now Salomon Brothers), New York as Vice President for projects, performing analysis, negotiations, and financing of major international and domestic infrastructure projects involving mines, petrochemicals, metal processing, oil and gas pipelines, and power generation. He has served as Project Finance Manager for pipeline construction projects in Bolivia and Argentina from 1969 to 1972. He was a member of the Board of Directors of The Mates Fund, a mutual fund in New York from 1969 to 1974. He served as Programs Manager-Defense Department and NASA projects for Perkin-Elmer Corporation. His principal marketing responsibility was for the Hubble Telescope, among other space projects. Mr. Gurfein earned a BS at The City College of New York, a Diploma at the Industrial College of the Armed Forces, and an MBA at The University of Connecticut. Mr. Gurfein was a Captain in the US Army Ordnance Corps, serving as a ballistic missile R&D officer. Publications include "Infrastructure Project Finance" (1997) by the United Nations Department of Economic and Social Affairs, Interregional Workshop on Developing Project Financing, Bangkok.

Dr. G. Wolberg earned a BE and ME (EE) at the Cooper Union in 1985 and a PhD in Computer Science at Columbia University in 1990. He wrote "Digital Image Warping" in 1990 and the following year he was awarded a NSF Presidential Young Investigator Award.

Name	Affiliation	Effort	Project Responsibility	Relevant Experience and Expertise
To be named; three total	New England College of Medicine			designer and user interface tester, Medical Clinical Liaison

Notes on Above: Dr. Wolberg will devote part time effort to this project in the first year, increasing to full time in the second and third year, depending on the demands of the NAVY SBIR for which he is PI and will be an employee. Mr. Gurfein will devote more than half time professional effort to this project, increasing to full time in year three (not indicated in original budget). Drs. Herman, Cox, and Anshel will be funded through the CISDD subcontractor since they are full time CUNY tenured faculty working summer and part time during the academic year involvement is subject to release from teaching load by their respective departments. Non-tenured faculty are not subject to this requirement. Dr. Bookstein and Dr. Satava will be employed as a private consultant at the rate of 100$/hour for a maximum of $2000/Y, subject to change in project year maximum. Clinical Collaborators Drs. Formenti, Liebis, Dewyngaert, and Bucholz are not going to be compensated in the first year because CASI will be focusing on researching its core modeling technology, not clinical applications. CASI will be participating in obtaining NIH clinical funding that will pay for CASI clinical development and NYUMC research in alpha product development and professional commercialization. This is subject to change in the second and third project year depending on the availability of NIH funding.

9 Brief CASI history and performance

CASI incorporated in 1995, and is less than 10 years old. CASI formed while the PI was a research professor of surgery in cardiothorascic surgery at NYUMC. The PI won a DARPA Phase I SBIR (100K). The PI left NYUMC to devote full professional effort to the DARPA project. Subsequently, CASI won various small consulting subcontracts, a Phase II SBIR (650K$), Phase III (100K$), and a contract to explore Digital Morse Theory also at DARPA. The PI is President and CTO. CASI is a NY class C Corporation. The PI owns 100% of CASI, which is a small business.

Sponsored by Col (Ret) R. Satava, MD at DARPA, Tactical Audio Displays (TAD) helped launch CASI, which developed surgical navigation technology using computer music and 3D spatial sonification, enabling surgeons to navigate instruments inside the body without looking at or through a visual display. A US Patent was obtained (Wegner and Karron. 2000). The PI's effort to build or find a market for this technology has not yet achieved success. Adopters have been other university professors (E. Jovanov and M. Quinn). DNA and Protein sequence sonification was another effort to apply computer music and sonification technology.

Significant Federal R&D awards within the past five years in the same general technical area indicating feasibility of technical claims					
Agency	**Year**	**Description of the work**	**Accomplishments**	**PI**	**PM**

CASI is submitting a NAVY Phase I SBIR for "Omnidirectional surveillance of carrier flight deck activity". The proposal eliminates camera operators and TV cameras that record aircraft takeoff and recovery operations with omnidirectional video systems. The geometric distortion is corrected using computer image warping and fused using DMT technology. The PI on this project is Dr. G. Wolberg

9.1 Financial and Employment Information

Income Statement	1998	1999	2000
Revenue	250,000	100,000	32,000

Cost of Sales			
R & D Expenditures	250,000	100,000	60,000
Net Income before Taxes	0	0	0
Net Income	0	0	0
Balance Sheet			
Total Assets	100,000	200,000	200,000
Total Liabilities	65,000	40,000	20,000
Net Worth (Owners Equity)	45,000	160,000	180,000
Employment Information			
Full Time Employees	2	1	1
Part time Employees/Contractors	3	1	2
Full time R & D Personnel	2	1	1
Part time R & D Personnel	1	0	0

Fiscal and Employment Table Notes: The CASI TAD project was funded for approximately $850K in DARPA SBIR Phase I, II and III from 1996 through 1999, the bulk of which was used in 1997 and not show on this table. The company entered the technology development 'valley of death', where basic R & D funding ends and commercial funding picks up the research. The PI has decided not to further pursue TAD commercialization, and is negotiating with colleagues interested in picking up academic funding with the CASI prototype equipment. The crash in CASI income in 2000 was due to two disastrous military and academic subcontracts

12. PROPOSAL TITLE

Anatomic Computer Modeling for Precise and Accurate Therapies

13. NON-PROPRIETARY PROPOSAL ABSTRACT

Computer Aided Surgery, Inc. will develop a new computer application server that will take calibrated, encrypted raw images from a clients' medical imaging instrumentation (MRI, CT, Ultrasound, etc.), over the Internet.

Our system will rapidly generate encrypted, precise, accurate, and variable resolution three dimensional tiled models applicable for diverse applications as radiation therapy, surgical planning, intraoperative guidance, rapid manufacturing of prosthesis, verification of surgical results, robotic surgery trajectory planning, patient communication, education and other customer specific applications

The novel idea, that enables the technological leap forward is Digital Morse Theory.

The essential insight of Digital Morse Theory is that it describes the behaviour of three dimensional SpiderWeb surfaces surfaces in terms of Morse Critical features.

These surfaces are the computational building tiles of the biologically and medically important objects we wish to parse from an opaque brick of bytes that compromise a volume data set.

We can build an index of all of the objects in a volume to utilize these elements in terms of their generator critical points. Our novel geometric construction algorithms will be embodied in a network based application service provider model. The server will upload from the radiological diagnostic image producer, and download to the therapeutic consumer model. We will function as a unique, super specialty medical imaging Internet Service Provider.

14. CERTIFICATION: BY SIGNING THIS PROPOSAL COVER SHEET, I CERTIFY, TO THE BEST OF MY KNOWLEDGE AND BELIEF, THAT ALL INFORMATION IN THIS PROPOSAL IS TRUE AND CORRECT AND THAT:

A. THIS PROPOSAL IS NOT REQUESTING FUNDING FOR EXISTING OR PLANNED RESEARCH PROGRAMS THAT WOULD BE CONDUCTED IN THE SAME TIME PERIOD IN THE ABSENCE OF FINANCIAL ASSISTANCE UNDER THE ATP.

B. ALL INDIRECT COSTS PROPOSED IN THIS PROPOSAL ARE INCLUDED UNDER THE PROPOSER'S COST SHARE AND NO INDIRECT COSTS ARE INCLUDED IN THE ATP SHARE OF COSTS REQUESTED.

C. IF A LARGE BUSINESS, COST SHARING PROPOSED BY THE LARGE BUSINESS IS AT LEAST 60 PERCENT OF EACH YEAR'S TOTAL COSTS.

D. THE TOTAL VALUE OF ANY IN-KIND CONTRIBUTIONS DOES NOT EXCEED 30 PERCENT OF THE COMPANY'S TOTAL COST SHARE.

E. THE FOLLOWING QUESTIONS HAVE BEEN TRUTHFULLY ANSWERED:

		YES	NO
i.	IS THE COMPANY DELINQUENT ON ANY FEDERAL DEBT? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
ii.	WAS PROPOSAL OR VERY SIMILAR PROPOSAL SUBMITTED TO ANOTHER FEDERAL AGENCY? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
iii.	DOES THE COMPANY HAVE A PARENT COMPANY OUTSIDE THE UNITED STATES? (IF YES, IDENTIFY THE PARENT COMPANY AND ITS PLACE OF INCORPORATION IN ITEM 15, REMARKS.)	☐	☒
iv.	IS THE COMPANY MAJORITY OWNED BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
v.	IS THE COMPANY SUBJECT TO CONTROL BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
vi.	DOES THE PROPOSED R&D INVOLVE THE USE OF HUMAN SUBJECTS AND/OR HUMAN TISSUE, AND/OR HUMAN CELL LINES? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN INSTITUTIONAL REVIEW BOARD (IRB).)	☐	☒
vii.	DOES THE PROPOSED R&D INVOLVE THE USE OF VERTEBRATE ANIMALS? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN ANIMAL CARE AND USE COMMITTEE.)	☐	☒

15. REMARKS (CONTINUE ON A SEPARATE SHEET IF NECESSARY)

16. DESCRIBE WHAT EFFORTS WERE MADE, PRIOR TO APPLYING FOR ATP FUNDING, TO SECURE PRIVATE CAPITAL TO SUPPORT THIS PROJECT WHOLLY.

CASI's reputation as a basic research company has made our efforts to raise private capital for this high risk project difficult Traditional paths to commercalization financing would require many years of academic research, which private equity will not fund.

Our goal is to use ATP funding to go directly from preliminary results with a novel proven theory to market dominance ntellectual property available to all medical and scientific customers over the internet.

SUBCONTRACTS

1. NAME AND ADDRESS OF SUBCONTRACTOR

CUNY Institute for Software Design and Development
City University Of New York Graduate Center
365 5th Avenue
Room 4319
New York, New York 10016

NAME OF CONTACT: Professsor and Exec Officer Theodore Brown
TELEPHONE NUMBER: +1 (212) 817-8191
FAX NUMBER: +1 (212) 817-1510
E-MAIL ADDRESS: TBrown@gc.cuny.edu

2. TYPE OF ORGANIZATION (CHECK ALL THAT APPLY)

- [ ] PROFIT - SMALL BUSINESS
- [ ] PROFIT - LARGE BUSINESS
- [ ] PROFIT - MEDIUM BUSINESS
- [ ] FOREIGN-OWNED U.S. SUBSIDIARY
- [ ] NON-PROFIT INDEPENDENT RESEARCH ORGANIZATION
- [X] UNIVERSITY
- [ ] GOVERNMENTAL LABORATORY

3. ESTIMATED AMOUNT OF SUBCONTRACT

$ 420,000.00

4. DESCRIBE SCOPE OF WORK

Subcontractor will provide mathematical consult, software engineering and codeing services algorithm design, implementation, and optimization to prime

Subcontractor will provide point of access to CUNY faculty, pay CUNY faculty visiting scientists, PhD students Providing all fringes, overhead and ancilary costs for pass through by primt to ATP

5. IS THIS A SOLE SOURCE CONTRACT?

[X] YES (IF YES, EXPLAIN) [ ] NO

Justification for Sole Source Contract is based on the expected unique contribution of the faculty, visiting scientists, and PhD graduate students.

1. NAME AND ADDRESS OF SUBCONTRACTOR

NAME OF CONTACT:

3. ESTIMATED AMOUNT OF SUBCONTRACT

4. DESCRIBE SCOPE OF WORK

5. IS THIS A SOLE SOURCE CONTRACT?

[ ] YES (IF YES, EXPLAIN) [ ] NO

2 Executive Summary

2.1 Scientific and Technological Merit

CASI (Computer Aided Surgery, Inc.) will develop an application to upload calibrated, encrypted raw images from medical imaging instrumentation (MRI, CT, Ultrasound, etc.), over the Internet. The system will generate precise and accurate, encrypted 3D tiled models with variable Level of Detail (LOD, variable resolution) for applications including: Radiation Therapy (RT), robotic minimally invasive surgery, patient communication, education and other customer applications via the Internet.

Current technology is deficient because it is time consuming, labor intensive, not automatic, and difficult to use. Expert operators produce results for each study that vary, even with the same data reprocessed by the same operator. It is not dimensionally stable or suitably precise for critical radiation or surgical therapy. Extensive hand retouching of the images and smoothing is needed to finish the models. Current segmentation and modeling technology is currently only practiced in research medical centers, and for expensive medical illustration for advertisements.

Competing methods reformat and reorient image planes using *ad hoc* inaccurate methods. CASI's improvement will use 3D surface modeling to rapidly obtain stable measurements delivered via web browser.

2.1.1.1 Technological Innovation

The novel idea that enables this technological leap forward is Digital Morse Theory (DMT). It describes the behavior of SpiderWeb surfaces by Morse critical features. These surfaces are the computational building tiles of bio-medically important objects. The algorithm indexes all the objects in a volume and segmentation is accomplished by object selection from the index (DMT graph). These novel geometric algorithms will be embodied as a network based application service provider. CASI will function as an Application Service Provider (ASP). This enterprise will function as a computer based geometric foundry for the casting of anatomical structures for biological, surgical, and educational purposes.

CASI will deliver the product models via Virtual Reality Modeling Language (VRML). Customers will manipulate models by mouse, and other virtual reality methods. The click stream behavior of the client will be learned by neural net content personalization technology.

DMT insight enables users to select entire assemblages of components to build desired features without introducing artifacts (segmentation 'tool marks'). With novel mathematical theory, computer graphics programming experience, and clinical research experience, CASI is 4 years to market dominance in high tech medical modeling. We will offer a rapidly delivered, internet based solution for practical patient-specific, tailored requirements, resulting in better diagnosis and better therapeutic quality assurance at mass production costs.

2.1.1.2 High Technical Risk and Feasibility

The technical risk is that the medical user may have difficulty finding desired objects. For most situations, the object is selected from the DMT graph. In difficult or weak images, additional processing may be required for adjusting contrast and surfaces to suit the user requirements and retain dimensional fidelity. DMT is an innovative algorithm with an unproven ability to solve real modeling problems in a production setting. Common wisdom in the field teaches that volume imaging is the technology of choice for many applications because tiling algorithms make too many tiles, behave poorly with noisy data, and connect extraneous objects therefore confusing the resulting model. Iso- contours and surfaces are used in topographic mapping, meteorology, and other fields, so that there are spillover benefits.

The feasibility of the project is based on preliminary research sponsored by DARPA and results through subcontract with the NIH Visible Human Project (VHP).

2.2 Potential for Broad-Based Economic Benefits

CASI will leverage the large national investment in medical imaging industry by improving image understanding and the quality of decisions based on 3D image stacks. CASI will create new markets for computer biomedical modeling, and propel diffusion of this information to physicians and their patients.

There is an established industry of medical illustration by commercial medical illustrators for medical communication, education, and advertising. The market for patient specific, cheap and rapid anatomic models for critical application will be clearly much larger than diagnostic imaging and medical

illustration. CASI modeling technology, both physical and computer, real and virtual, will benefit the nation by better patient diagnosis, treatment, communication, and teaching. The technology will improve the realization of treatment plans, reduce hospital stays, and enable surgical robot motion planning for minimally invasive surgery, better radiation therapy planning, etc. Patient workups will have the artistic equivalent of an oil portrait by a master painter in the hyperrealism school drawn with the dimensional fidelity of an architectural template. The technology will draw with the accuracy of a micrometer caliper, the precision of an industrial robot, with a reasonable cost, with a market value to the patient/customer in thousands of dollars, with the speed of a Polaroid – Land instant snapshot

2.2.1 National Economic Benefits

The nation will benefit by improved health care that will prolong the quality of life. Reduced employee sick leave will decrease disability related payouts and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs. CASI will create new markets for model-based information as the core competency is established that will go beyond our initial Radiation Treatment project. As the medical imaging industry matures into the medical modeling industry, CASI will seek new markets for services, only dreamed of at present.

2.2.2 Need for ATP Funding

ATP Funding is required because CASI's goal is to make a technical forward leap with the DMT based modeling and develop a business to bring it to market. CASI needs the funding to focus on the production of anatomic models for radiation treatment planning, neurosurgery and medical computer graphics and animations. Building on the NIH Visible Human Project (VHP) preliminary results, CASI will creates new markets that will be profitable within 5-years time. The CASI vision time frame, along with no near term profit projections, is too long for conventional commercial funding.

2.2.3 Pathway to Economic Benefits

This Internet solution will grow explosively, as it is accepted in the state of the art. Internet payment systems provide the infrastructure for direct revenue recovery and interaction with customers. Insurance carriers reimburse costs of 3D reconstruction studies at the two to three hundred dollar levels. The high cost of preparing 3D renderings, and difficulty making critical decisions based on them, had made this unprofitable until CASI.

CASI's intends to become the clinical modeling resource firm. CASI will go beyond medical illustration, becoming a reference standard for dimensionally precise and accurate anatomic models. These will be used for critical treatment applications. The goal is to reduce the cost of generating these models from tens of thousands of dollars and hundreds of man-hours to pennies and the labor time to seconds - literally.

Compared to the established market for high-resolution graphical representations in the medical illustration and advertising industry, there is a much larger market for cheap patient specific diagnostic 3D models.

CASI's first market entry is Radiation Therapy. CASI will leverage many other market sectors by licensing and technical support including direct competitors, forensic image processing companies, histopathology image processing companies, surgical robotics companies, medical imaging equipment manufacturing companies, and picture archiving companies. The state of the art will benefit, in area as diverse as semiconductor process engineering to weather prediction. Any field that uses isosurfaces to understand an underlying physical process will benefit.

3 Project Narrative

3.1 Scientific and Technical Merit

CASI will build a clinical geometry "foundry" casting clinical models in simplicial complexes of triangular tiles that define intricate, real surfaces in three dimensions. Instead of plaster, palladium, or plastic we use surface modeling technology. These models will be used for solving problems as calculating trajectories for radiation beams.

CASI will do this by using a new mathematical theory Digital Morse Theory (DMT) that describes the behavior of isosurfaces. Digital Morse Criticalities are special patterns in the data values where isosurface objects appear, merge, separate, or disappear as the threshold value is varied. These criticalities are, in general, local maxima (Peaks), local minima (Pits), and various kinds of saddles (Passes) in the dataset. By building a list of the locations and values of the Criticalities, CASI software can index (tree graph) all of the objects in a volume data relative to each, in terms of objects that surround other objects (parents), peers (connected by saddles), or are enclosed by other objects (progeny). This index graph is used to enable extremely rapid segmentation and interactively build biologically salient composite surface models from the component isosurface objects.

Further, we will accomplish important image processing and model fusion operations based on matching (registration) images containing common features between models from different imaging modalities of the same anatomic region. We can track and quantify model changes during growth, pathology, and therapy. We can measure several difficult to precisely measure metrics such as surface area, volume, and various moments (center of area, center of mass, standard variability, kurtosis and so on). We can also construct various minimal space curves of trajectories for optimal surgical approaches in terms of Critical Lines (minima and maxima paths between objects), and other applications of computational geometry properties from DMT derived models.

When: We expect to have working alpha prototype systems operating on the web within two years, and beta site clients functioning in four years

We do this because many applications in medicine and the biosciences require a geometric understanding to solve problems at a fundamental level, from which to make critical therapeutic and tactical decisions. These decisions are based on critical dimensions, clearances, access trajectories, and to minimize trauma to no-go regions that must be zealously protected during invasive surgical procedures. The biomedical industry needs patient specific maps, inexpensively produced, with high fidelity for a wide range of therapies. These include radiation therapy, image guided therapy, keyhole brain surgery, minimally invasive robotic surgery, functional modeling of the brain, protein and enzyme kinetics, to cite a few. Engineering solutions to these, apparently simple binary decisions are based on biological morphology from DMT based models are an important problems. The PI's experience in the computational geometry, morphometrics, computer graphics skills, and the insight that DMT provides, propel the PI to make the fruits of DMT widely Internet accessible to physicians and patients.

This project will integrate a range of computer and engineering technologies to connect medical image generators to medical model consumers via web browser based technology. The key to the success is not in the existing technology. Success will be due to the implementation of Digital Morse Theory into a new technology, supported by these ancillary data collection and delivery technologies.

Innovation in computer anatomic modeling technology is by innovation in applied mathematical theory.

Our project is feasible because of preliminary promising results with in the NIH Visible Human Project (VHP) female "Eve" data set[1]. The PI has powerful theoretical results[2] that are just being published in the field. Our business prospects are feasible because of the CASI patent position[3]. CASI has been in business since 1995 as an advanced research and technology research firm, and benefits from the PI's long background in the surgical/medical computer graphics field with publications in the field from 1985

[2] Cox and Karron 2001
[3] Karron, Cox, and Mishra US Patent #5,898,793

A promising opportunity: The explosion of interest in digital anatomy, virtual humans, visible humans, visible embryos, and even the visible frog project has popularized the concept of computer representations of internal biological and medical anatomy. Two recent Hollywood movies were based on anatomic computer graphics special effects. Multimillion-dollar contracts are being negotiated with computer animation and medical illustration firms for major media outlets (National Geographic and the Discovery Channel). However, the state of the art has not kept up with the demand for much more than pretty pictures and stunning animations. These firms hire a large numbers of technicians to hand segment and retouch manually segmented contour rings from a very large number of slices. Various power assist algorithms are used to reduce the labor intensity of this work, but the size of the raw data sets outpaces the ability of animation staffs to segment, retouch, and render imagery. Computer graphics researchers are developing animation techniques based on this primitive and painstakingly produced geometry. Anatomists spend years developing hand tiled geometric models and animating them. US contractors are failing to meet their milestones and contract deadlines with the VHP data. Firms are leaving the field of medical based animation derived from real data because of the very high costs and long lead times for segmenting desired objects out of pixel anatomic data. Clinical researchers and biological scientists are calling for more data sets of a representative samples of the American population while others are calling for increased resolution imaging of each digitized human. With the potential for a large population of male, female, pediatric, pubescent, adult, and geriatric representatives of each ethnic group, we can expect a very large national sample terabyte scale digital humans. That is one terabyte per sample person so digitized. Clearly, new Level of Detail Management (LOD) technology is required and is a benefit of DMT technology.

This project will advance the state of the art in computer-aided design for biomedical applications, 3D computer graphics, applied computational geometry, rapid prototyping and manufacturing, and robotic surgery. When the PI started this research, the motivation was to produce "correct" isosurfaces for neuromagnetic modeling. Nagging problems with isosurfaces produced by the popular Marching Cubes algorithm of Lorensen and Cline prompted our formalization of a Digital Morse Theory from classical Morse Theory to establish a correct connectivity while moving through all values of iso-threshold. The marching cubes approach is based on a fixed look up table to build triangular tiles in a voxel (defined as boxes with data values at the box vertices). Various fixes to the apparently minor problems in the algorithm are in the computer graphics literature. The flaws were rare, and the frequently invisible in an object with hundreds of thousands of triangular tiles. The fixes solved the problems with small holes in the data in noise by tiling ambiguous cases with a consistent fixed tile orientation. However, for critical measurements and establishing topological, connectivity between objects, in noisy data, isosurface shell models are generally not considered the approach of choice.

The PI's basic research finding was that there are interstitial critical saddle points. The transition in connectivity occurs precisely at that point and threshold value. This saddle depends only on the boxel (2D box element, and voxel face) vertex corners, even for voxels (3D volume element, a 3D cube with volume with data values at the corners). A corollary of this finding is that any fixed lookup table approach to isosurface tiling in the immediate vicinity of a saddle critical point (The so-called "ambiguous" or "4 threshold crossing " tiling cases) results in connectivity errors in general with a probability of _. Saddle critical points are recognized by their characteristic pattern of high/low/high/low vertex values as we circulate around the boxel perimeter. DMT resolves these saddles by subdividing the boxel on the saddle point, effectively changing it into a vertex saddle point. This is different from tetrahedral (or other simplicial decomposition) composition of an ambiguous voxel, because there are still multiple apparently equivalent tetrahedral decompositions. Tetrahedral decomposition moves the ambiguity from the tiling to the tetrahedralization. There is no ambiguity in the DMT subdivided voxel/boxel, as it can never have hits (threshold crossings) on the added subdivision edges. Thus, the orientation of the connections changes relative to the critical value. In this way, as we sweep the iso-value through the saddle critical value, there is only one connection change, precisely at the critical value, and no other value [4]Any other change in connectivity is spurious and causes multiple connectivity jumps as we smoothly sweep through the volume

[4] Karron and Cox 1995

element. Further, the wonderful hierarchical nesting property that Jordan Manifold surfaces exhibit is those we expect in continuous Morse Theory. This important property is destroyed under any other rule set.

The PI believe that other graph based analysis of images in terms of isosurfaces or edge extraction algorithm was not successful because of the faulty nature of the surfaces. Graph based image analysis produced complex graphs that were difficult to understand. DMT graphs are by their very nature hierarchical and rooted in the image/volume.

Spillover Benefits are that isosurfaces are widely used in a number of disparate data analysis situations, *i.e.*, petrology, meteorology, forensic image analysis, hyperspectral imaging, image compression, and understanding. Scientists in other application areas will use our server to build market and problem specific application services. SpiderWeb model scan represent turbulent fluid flow shear surfaces, separation surfaces, cavitation phenomena, and other highly intricate surfaces. SpiderWeb models are noise proof, in that they properly model noise instead of breaking apart or connecting incorrectly. We can represent the relationship between intricate fluid flow structures by the DMT graph representation where computer graphics does not reveal internal structures. We expect that research into many important biophysical phenomena, such as cell membrane porosity, receptor mechanics, and enzyme mechanics will benefit from our tool and analysis. From the preceding list of spillover benefits one can see the contribution to the United States scientific and technical knowledge base, as any application that makes use of surface analysis will benefit by using our technology and ASP.

Project team qualifications; The PI formed the prime contractor company, CASI in 1995. The PI has combined expertise in plastic surgery and neuromagnetic functional imaging dating back to the 1980s (Cutting et al 1986) and advanced mathematical theory in the 1990's (Karron 1992). Our original motivation for geometric modeling was derived from research on neuromagnetic brain anatomy structural and functional modeling. The research evolved into work with cinematic cardiac modeling. The company was founded with a Phase I SBIR Grant from DARPA Advanced Biomedical Technology Grant and went on to do a Phase II grant, and a Phase III add on grant. We also obtained DARPA funding for Digital Morse Theory in the Advanced Computational and Applied Math program at the DARPA Defense Sciences Office. Dr. Karron has run the company web site and ISP since 1995. CASI was founded to be a superspeciality medical surgical ISP. Our web site has been on the air for 6 years, and is well indexed by all of the leading indexing services. This is the basis for our inspiration to run a 'computer anatomic foundry' as an ASP. Dr. J. Cox has been working on the mathematical underpinnings of DMT with Dr. Karron since its inception. Dr. Cox has extensive theoretical and practical experience in new algorithm mathematical description, proof, efficiency evaluation, optimization, and coding in C++ and derived languages. Dr. G Wolberg has many years experience in digital image warping, registration, and is an expert imaging scientist.

3.1.1 Technical Rationale

3.1.1.1 Technical rationale introduction and perspective

The goal is to build surfaces that can be used for object modeling and trajectory analysis. Users will make vital decisions based on the distances between objects, surfaces, and points. Lives will depend on these measurements. Many algorithms and technologies from computer graphics are not of high enough quality for these critical applications. Good enough for graphics display, is not good enough; too time consuming, not repeatable, or too expensive for many important medical applications. CASI requires topological surface tiling make correct connections. Geometric calibrations from the source images must be preserved, and segmentation artifacts (i.e., tool marks) must be eliminated or minimized. Where the image is manipulated, the 'cut' surfaces must be clearly marked so that the user knows what is artifact surface. Hand retouching of objects is expensive, time consuming and introduces additional warpage issues, which reduces confidence on these objects for critical measurements. By preserving calibration at the imaging equipment level, we can precisely and accurately manage warpage and coordinate system disparities between multiple data sources.

Technical challenges that display significant recognized uncertainty of success by experts in the field: Computer graphics and computer modeling are distinct fields. Good enough for computer graphics will not be good enough for our surgical and treatment applications. Measurements of biological shapes are

made difficult by the lack of best practices and standards in the field. This project will help establish best practices for this emerging field. The field biomorphometrics is contentious. Biological shapes require new technology to understand, measure, and manipulate. There are no straight reference edges, circular arcs, or fixed points on which to base a Cartesian coordinate system. Living things are constantly in motion, over time scales of seconds to years. There are a large number of parameters required to describe geometric regions, and no generally accepted theory for a complete description of an organisms shape, much less for diagnostic and therapeutic manipulations of this shape. Industrial metrology is ill suited for such complexities. We intend to extend the limits of the field

Isosurface methods are be used to provide object geometry. However, isosurface methods are not generally considered a preferred segmentation method. This is because previously we have not been able to calculate or visualize clearly exactly, where a particular isosurface object connects to other objects that we do not wish to include in our intended object (the Segmentation Problem). Indeed, the very surface from an object we wish to extract generally obscures the attachment saddle points where our desired object connects to undesired objects. This has been the major difficulty in three-dimensional isosurface based rendering. Other methods, such as volume rendering, are aesthetically pleasing but do not provide geometric rigor and insight required for future analysis and use. Refinements in volume geometry based on volume imaging do not consider topological issues. An algorithm that fit a surface around a cloud of points, or shrink-wraps a minimal area surface around a volume object, forces the topology to that of a single object. It is possible to iteratively build volume image objects into multiple objects, but it is tedious, expensive, and fraught with geometric problems. Unguided isosurface marching geometry runs amuck, covering adjacent objects and obscuring the scene. For critical applications, such as surgical anatomic modeling, we need properly connected surface geometry. Hand segmented objects contain segmentation artifacts, and do not nest properly inside superior and surround inferior objects. New thinking is required to overcome these difficulties without resorting to brute force segmentation by hand drawing slice wise rings, no matter how quickly a professional segmentor can draw rings. There are always going to be too many slices. Artifacts introduced by the illustrator's hand are unacceptable for precise analysis.

There are serious limitations of the state of the art in segmentation technology and theory. Currently, selecting objects in one slice only is a time consuming and frustrating exercise. The partial solution is that the segmentor can see a portion of the object in the image plane. With rapid 2D contouring, the user can quickly find a suitable contour ring from a seed point. This line represents the intersection of a larger surface through the seed slice pixel image plane. We then use this to seed a three dimensional surface. However, the segmentor may find that the surface may have attachments to other objects we do not wish to include in our desired object. The segmentor will need to hunt down the attachment points and do 'something' damming. This is the current state of the art in segmentation.

DMT calculates the connections (DMT Criticalities). DMT segmentation minimally perturbs the contrast at attachment points to achieve the separation we desire. In RGB space, the segmentor may find that there are attachments in one portion of color space, and a suitable segmentation surface exists in another portion of color space. The goal of the segmentor menu is to navigate a segmentation surface through color and other (CT, MRI) spaces; a task 3D interactive computer graphics does not make simple or help visualize.

Isosurface algorithms generally over-tile a surface. Each triangular tile is constructed independently of its neighbor. The size scale of the triangles is less than the voxel size, and in a large data set, the number of triangular tiles can become burdensome to manipulate and display, particularly in real time. The current state of the art is to build a marching tiled surface, then use triangle decimation to collapse almost co-planar triangular tiles into one another. This approach generates large intermediate memory consumption (bloom) of having to build a fully resolved surface then decimate it. This approach, while functional for graphic display purposes, is not deterministic. This means the resultant tiling is very different for every seed tile used to decimate a surface. Decimation changes the geometry of the decimated object in an uncontrolled and possibly unsuitable way.

Digital Morse Theory can provide a solution to these limitations in the state of the art. It can be used as a novel basis for segmentation, data fusion, and LOD management. The technical risks are than that the

algorithm has not been fully implemented, tested, power tested, and accepted in the image and modeling processing community. The algorithm may have computational bottlenecks as we scale up service to production levels on very large images. We ameliorate this risk by using a heavy-duty computer server that can manage large intermediate calculations and memory requirements.

Related topics are hot research on level set theory, isosurface methods, differential equations, and Morse theory. An exhaustive bibliography is beyond the scope and page limits of this proposal, but we refer to the work of J.A. Sethian, Jack Snoeyink, Chandrajit Bajaj, Robin Forman, Stan Osher, John Hart, Carroll K. Johnson, and others. Some of the key theoretical ideas we seeking to develop in medical modeling (Segmentation manipulation by DMT Graph) were explored by C.K. Wall in "Surgeries on Compact Manifolds" (1964, republished 1970, and 1999) by the American Mathematical Society. Marsdon Morse published "The Calculus of Variations in the Large" in 1932. Our principal contribution to the field is the realization of Morse Theory in discrete representations of the underlying continuous world. We make Morse Theory computable. Very recent applications of Braid Theory in Morse Theory have been discussed in applications as diverse as fluid flow and air traffic control avoidance trajectory planning. The intellectual atmosphere is embracing Morse Theory. CASI's computational approach in Digital Morse Theory will have wide applications that we are most keenly aware. Indeed, medical surgery can be considered changing the topology of the patient; Mathematical and computer surgery on DMT object models is the next step logical step in computer modeling of surgical procedures.

3.1.1.2 What is Digital Morse Theory?

Digital Morse Theory describes the behavior of SpiderWeb iso-valued surfaces (US Patent #5,898,793). These surfaces are composed of a simplicial complex of triangular tiles. The surface has the property of being Jordan (no holes). The surface is manifold (no Klein bottles, with consistent normal vectors, a well defined inside and outside). The surfaces within any particular family are "Morseian," (family member surfaces nest entirely inside or outside each other. As we raise or lower the threshold isovalue, the surfaces arise or disappear at well-defined Morse Criticalities. These are kinds of local maxima, local minima, and various kinds of saddles. The surfaces arise from maxima (sources), disappear at minima (sinks), and merge at saddles. Therefore, by scanning through a dataset, we can identify all these component objects by cataloging only the criticalities by their characteristic bit patterns. This is computationally very efficient.

These SpiderWeb surfaces capture essential inflections (transitions from concavity to convexity) in object geometry. Fine scale features (noise) in the geometry create excessive numbers of triangular tiles. DMT provides a method that can reduce the density of tiling by removing smaller through larger scale geometry features in the surface. This is the basis for Level of Detail (LOD) management. For example, if we are using facial features to define a patent based coordinate system, a natural fiducial point such as Nasion (the saddle point on the bridge of nose), can, shift unpredictably in triangle decimation technology. In DMT theory, the larger-scale saddle point remains stable while the smaller, noisy surface features are relaxed smaller to larger, in a hierarchical fashion.

A family of isosurfaces is the collection of surfaces that shares a "one to one" mapping for any point on any member surface to any other such member surface. At Morse criticalities, and only at criticalities, does the mapping property change. This is due to the creation of a new object, the destruction of an object, or the connection to another, object. By showing the Morseian relationship between criticalities (nesting), we establish the relationship between families of surfaces. Because the server can quickly find the Digital Morse Criticalities as bit patterns in the data, we have a new, powerful, and fast way to make topologically coherent, geometrically sound, realizable objects from an image data stack.

A Digital Morse Theory Graph (DMT Graph) is a hierarchical linked list (graph) of all of the separable objects in an image. Each object is identified by its source criticality. We cannot see all of these objects simultaneously because most of the objects are inside other objects, and therefore obscured. Computer graphics does not elucidate the relationship between objects. The hierarchical nature of the DMT Graph is derived from the isosurface families being Jordan Manifold.

There are a number of important practical uses for this insight. We can supply instructions to a rapid prototyping system for making any object or collection of objects in our images. We can rapidly

manufacture fixtures to hold patients precisely and accurately for RT beam steering. Further, we can define optimal paths between these objects, such as minimal distance paths, minimal height paths, or minimal paths subject to some other type of constraint. Constrains surfaces would include maximal avoidance from no-go regions (blood vessels, eloquent brain cortex, or some such vital structure that must not be affected by our surgical robot manipulator). Very recent applications of braid theory to these Morseian paths may be a very efficient method to calculate robotic trajectories and radiation treatment beam plans.

3.1.1.3 The Fish Tank thought experiment: Counting Islands as the water level changes

The essential insight of continuous Morse Theory can be intuited by a thought experiment. Consider a rectangular fish tank. Into this tank, we pour small quantity of sand such that we have two smoothly sloping small hills, one taller than the other. Now, we fill this tank to the brim with water. We now start a count of the number of island objects as we very slowly drain the tank. Our first observation is that there are no island features in our tank scene. As the water level drops, we observe the water level just coincident with the peak of the tallest sand hill. We notice behavior of the water at the critical peak of the hill. We get a degenerate point island contour, with zero area, zero perimeter, and infinite curvature. A vanishing small change in the water level and this point contour expand into a tiny island. We increment our island object count by +1. We continue to drain water from the tank and observe the birth of the second island at the peak of the second little hill. We again increment out island object count by +1 to two objects. As we continue to observe the drop in water level in our tank, we observe the two island contours expand and grow toward each other. As the water level reaches the level of the critical saddle point between the two hills the island contours touch at precisely the saddle point. We observe that our object count decrements by –1 to give a total island count of one. The essential feature of this rubric is that we only need to count the peaks and passes to inventory all of the object islands in our scene. This approach works even as we increase the complexity of the scene. We can use the same idea of enumerating peak, pits and pass criticalities in a very complex archipelago of island features, at any size scale, or any range of size scales, including noise at any size scale.

3.1.1.4 Why a Digital version of Morse Theory?

Morse theory works precisely because it solves the problem of singularities in data models. CASI will use its digital version of Morse Theory that works on computers with pixilated data, which will yield the same results as continuum Morse theory on analytic Morseian functions. Digital Morse Theory extends Morse Theory to discrete data, such as a digital image. Digital Morse Theory describes the behavior of SpiderWeb surfaces and objects. There has been significant research effort to build quickly computable surfaces. There is little work on technology that effectively describes all of the isosurface objects in a volume data set. No research provides a practical method of indexing all of these objects in a useful and comprehensive fashion. In order to make Morse Theory work in this digital setting, DMT adapted the notion Peaks, Pits, and Passes in subtle but important ways. We extended the idea of a Peak to include not just a point peak or pit, but plateau peaks, and pits. Criticalities can also be ridges, extremum of curvature, and umbilicus of curvature (a curvature saddle). Saddles had to be extended to include not just vertex saddles (where the saddle point is collocated on a vertex) but also the most common interstitial saddle point. This solved the so-called problem of "ambiguous" voxels. This means that the surface is completely determined, unambiguously tiled, and stable surface representation in any texture or noise.

3.1.1.5 Digital Morse Theory for rapid effective semiautomatic segmentation

The eye sees interesting objects in a 2D image and the mind would like to reach into the image and isolate (segment) that object from the surrounding pixels. If the 2D image is a slice through a stack of slices imaging a 3D volume, we can attempt to segment the entire object from the surrounding voxels, including the unseen portions above and below our planar sub-sample. If we are lucky, we can use 2D isocontours lines to estimate 3D objects. The current state of the art in segmentation is to select a seed location and use that seed to start propagating contours lines in the reference image plane and contour surfaces in the volume image stack. The problems arise where we have a likely looking contour ring object, and use that to seed a volume object surface. What may look appropriate in one slice will frequently run amuck and connect inappropriately to other extraneous objects in other slices. The segmentor needs some guidance as to where the object that we wish to segment in any one image slice will connect to other objects anywhere in the

volume image stack; including the currently visible slice, and/or in slices above or below. To make matters worse, the very surface we are seeking to grow obscures the critical features where it connects to other objects.

The current state of the art is to build pixel fences of higher valued pixels to constrain a growing surface. This is a modified kind of image retouching. We are attempting to retouch not the object, but just a vanishing distance beyond the objects' borders. It is retouching almost blindly, in hope that we are corralling our emergent surface appropriately. A lot of fencing may be used in a complicated object. While not all fence objects are required, they will change the shape of the object in the immediate vicinity. In order to guarantee that our surface won't leap over the pixel fence, we have to use a very high value, typically fully saturated white values at the upper end of the image histogram. By raising a high fence around the object, we are changing the strength of the surface. The strength of the surface is the intensity of the gradient normal to the surface. A surface can be weak if the delta intensity crossing from inside to outside is very small, or an identical surface can have a very large intensity change across the threshold value. The only way the surfaces can be independent of the strength of the surface is for the strength of the surfaces be identical at all points. Therefore, any uneven changes in the strength of the surface (which would result from hand carving or hand fencing by changing pixel values) would introduce geometric changes in the surface that we have dubbed 'tool marks'. Typically, these artifactual features are removed by post processing operations to smooth out rough spots. This makes using this technology for modeling expensive, time consuming, and requires an expert operator.

Edisonian invention vs. Advanced Math Insight: The state of the art in image segmentation is trial and error, cut and fit, iterate, and refine; reminiscent of Edison's attempts at managing the voltage drops in the early DC power distribution grids. Edison built scale models of the grid with copper wire, and measured the voltages the subscribers on the grid would see. A young scientist came to Edison looking for a job, boasting that he could calculate the voltage drops without trial and error estimation. Edison needed a hard worker, but resented the hubris of the man. Eventually Edison eventually threw Telsa out. DMT afford a way to directly map/graph the objects in a data volume at every threshold, without browsing or exploring the volume with 3D interactive computer graphics. CASI will move the state of the art out of Edisonian segmentation and into the deep insight that DMT provides; an application of advanced math to solve a multi-industry problem.

3.1.1.6 Decomposition of pixel image into DMT graph representation

The DMT graph is the first step in the analysis of an image in terms of its surface defined objects. All objects are composed of various implicit isosurface objects. This graph representation is a hierarchical index of all of the component objects in the data volume. Additional information can be encoded into the graph with the geometric shape information of each implicit object. Essentially this operation recodes the image intensity information into a system of peaks, pits and passes organized into parents, peers, and progeny (the PPP to ppp relationship). Further, each component of the object shape can be further graphed as a system of concavities, convexities, and their umbilici (the region between where the surface passes through flat. Since each object is a closed, manifold, this enforces the surprising and useful parent to progeny hierarchical organization. DMT analysis effectively turns a pixel image into a vector drawing in terms of contour line and simplicial triangular tiles.

3.1.1.7 Application of Union and Intersection operations to establish homology between images

Because each related images is a rooted tree graph, we can start matching trees by various graph-matching algorithms we will be designing with our computational geometry colleagues at the CUNY. Our algorithm design approach is based on the idea that the root of an image graph contains all of the area of the image. Each node under the root contains a normalized fraction of the image area relative to the whole of the image. In this way, the DMT graph is a completely dimensionless representation of an image in terms of area/volume fraction and Morse criticality a union image graph is all of the common image features between two related images, such as an MRI and a CT image. It is calculated by recursive descent searching into each node, then sub node. The intersection image is all of the independent features not common between two images. The novel applications of such a graph will be among the most exciting and useful new finding expected to come from this research. We believe that the brain uses this approach for steriopsis

and the synthesis of range information from two related points of view. Previous efforts at image graph decomposition were confusing and generally considered not fruitful. Because the SpiderWeb surfaces are Jordan Manifold, they decompose naturally into a tree graph (because the surfaces don't interpenetrate and join only at critical nodes), and the results are natural to understand.

3.1.1.8 Medical Illustration and Medical Modeling

Medical illustration is the communication of a medical concept from the mind of the artist to the mind of the viewer. It is intended as an educational process, not necessary as data display and analysis. Medical Modeling, as we wish to compare and contrast against, is the technology for the building of geometric models of anatomic features. Without suitable tools for the segmentation and modeling of geometry from medical images, medical modeling can become medical illustration using three dimensional computer graphics because of excessive hand retouching and smoothing. While computer graphics is an important part displaying our computer anatomy, computer graphics is not the product and imaging it not out intention. We consider this a biomedical engineering project. However, we recognize that there is a significant need and highly profitable market in medical illustration and animation industry that we can serve and derive a significant revenue stream. This is because our technology can reduce the extreme costs of preparation of high-resolution anatomic images and animations significantly.

3.1.1.9 Computer graphics and the curse of dimensionality

As technology provides us with more raw data channels, at faster rates, at greater resolution, our ability to comprehend it is limited by our ability to visualize it in three dimensions, in three primary colors, interactively. High-speed interactive computer graphics, and advanced rendering algorithms, require slow, careful, and expensive examination of the spatial nature of the data by a dedicated expert. Each channel of information may be dependent on each other. Additional resolution may not increase our understanding of the relationship between objects. We need new ways to understand higher dimensional data where computer graphics overwhelms the visual system of the observer, or requires extensive interactive exploration, observation, and analysis of an expert operator. As technology give us more channels of data, computer graphics can compound the "curse" of too many dimensions of data.

A DMT graph based topological understanding of complex higher dimensional (Color, CT, MRI, PET information dimensions) spatial relationship is our proposed "cure" for the "curse" of higher dimensional data channels. This is because a topological relationship can be represented independently of the dimensionality of the data; A ball in 3-dimensions is one node on the graph, as is a ball in 20 hyperspectral colors.

3.1.1.10 Description of technical challenges and barriers we will tackle

3.1.1.10.1 DMT for image segmentation

Segmentation for precise and accurate application requires the segmentor make no, or minimal changes in the image. For many images, we only need to find a path (segmentation plane) around an object. Where none exists, we need to 'carve' one. We require well-defined minimal 'surgical' changes in the image such that we minimize warpage in the resultant objects' geometry. We define a 'DMT Segmentation Operator' to manipulate connecting saddle values to enable wholesale connection or disconnection of objects; effectively carving (separating) and gluing (joining) objects with single mouse clicks.

In noisy data, or when segmenting in uneven difficult geometry (blood vesicles, nerves, thin bone), in order to separate an object multiply connected to its proximate objects, we have to introduce additional contrast to separate the desired object. We can restate the problem; what pixel locations with what value changes need to be applied to achieve the separation we specify. We employ a contrast mask image layer, to preserve the original pixel data values. Using the DMT graph, the user select the most proximate saddle nodes and applies the 'segment' operation to elevate or depress saddles as required to parse an object from its neighbors. We then mark this 'cut' surface so that we are aware that this is an artificial surface. As we make only the minimum changes in gradient, we minimize the introduction of 'tool marks', and maximally generate a smooth cut surface. Preliminary testing of this procedure has been most promising.

3.1.1.10.2 DMT for image registration

Image registration is any of a number of methods that translate, scale, and rotate an image such that common features in both images are made to be co-incident. The determination of the common features, or

homologous points, lines, and regions, is typically specified by a technician's eye. The popular animation effect of morphing one (somewhat) related image into another image requires a lot of human interpretation to specify which points and image regions are to be warped into another. An important application in medical imaging is the combination of multiple imaging modalities into one image representing the fusion of features between both images. Manual determination of common features, particularly in cinematic medical image series, can be time consuming and expensive. Automatic or semiautomatic methods are needed. Digital Morse Theory provides a new means of image understanding to identify common features between one or many images.

3.1.1.10.3 Registration of images by DMT union operators and digital image warping

The goal of registration is to recognize homologous features in disparate view of the same scene. Decomposition of disparate images into DMT graphs is the approach for this project. An example would be calculating range information from two closely spaced Point of View (POV) images, or varying the MRI pulse sequence progressively from one sequence to another. At very small POV disparity (in distance, or pulse sequence), we increase the disparity between the two images. We will conduct experiments where we continuously calculate the DMT scene graph from two views with increasing disparity between the views. Our aim is to validate algorithms for calculating the DMT Union and Intersection graph. With a validated algorithm for calculating the Union between two scenes, we can do fully automatic registration between scenes and solve an important problem in image fusion, automatic steriopsis, and the CASI modeling service.

We can register disparate but similar images by calculating the common features of the images (union) without the disparate features (the intersection of the images). From the union graph, we can calculate the digital affine transform required to match each homologous node to occupy the same space (An affine matrix at each Morse criticality node). We can then apply the intersection image at each parent node to generate a topologically correct but warped to fit the union fusion image that is geometrically calibrated by one of the images' calibrations.

3.1.1.10.4 Bandwidth management

DMT based representations can be used to transmit an image from large features to progressively smaller images. This will be an important spillover benefit, in that we will be able to send images efficiently through limited bandwidth by organizing the image for transmission from largest to smallest component. We will be able to transmit a pixel image without drawing any pixels. We will transmit the image as large component contours first. Successively smaller and smaller contour objects will build on the client web browser, but the essential geometry of an image will build in the first data packets of the image. We will draw the vector geometry of pixel images at significant bandwidth savings. That way the image will more quickly recognizable very early in the image build process. Optimized picture transmission over the web important for sending images echoing clients data back down to clients browser.

3.1.1.10.5 Trajectory planning for surgery: Braided Digital Morse Theory

The state of the art in Surgical Robotics is remote actuators with video and/or haptic feed back. A true robot has some algorithm and model about the environment it is attempting to navigate. Improved algorithms for navigating inside the body are required which need models from which we can calculate internal trajectories. This is a technical challenge we believe we can tackle in this project because we can calculate optimal paths between criticalities. Between two peak criticalities, there must be a saddle criticality. New Variational Calculus and Morse Theory methods can provide a "least distance" or "minimum height" path between the two. We will research new concepts in Braid theory applied to DMT (Braided Digital Morse Theory) with Braid expert Professor. M. Anshel.

3.1.1.10.6 Trajectory planning for Radiation Therapy Beams

A particularly difficult tumor location to treat with radiation or electron beams is the breast. The goal is to destroy the cancerous tissue, which may or may not be a well-defined mass inside the breast, overlaying the thorax and in dangerous proximity to the heart and lungs. Patient fixation and re-fixation during the course of radiation therapy is difficult. In the current state of the art, it is expected that collateral damage be inflicted to the heart and lungs during high-energy breast RT. CASI and its clinical collaborators at NYUMC believe that with better modeling of the breast, the tumor, and the thorax, we can design better

therapies. RT requires serial models the tumor during the course of therapy. CASI will be able to build models of critical organ geometry, design fixation jigs for the patient, and beam trajectories.

3.1.2 Assessment of success of the project approaches and alternatives

Our assessment of the success of this project is based these positive and negative features of our proposal:

3.1.2.1 PLUS

We have a comprehensive new theory that solves important problems in the state of the art in a number of fields. The theory is proven, and based on classical Morse Theory, and is a hot research topic (Braided Morse Theory, Level Set Theory, Contour Trees). The principals and faculty are world-class graphics programmers, applied mathematicians, expert in algorithm design, optimization, and complexity analysis, expert in ISP and web site management, and the DICOM Imaging Instrument interchange standard. The PI's preliminary results with 2D RGB (color) Visible Human project data are encouraging.

3.1.2.2 MINUS

The utility of our new algorithms are not established in surgical or radiological practice. The software is written as academic demonstrations and proof of concepts only. Significant work is required to make the applied math solve our customers problems. We need to educate technologists and professionals in the field, as DMT graph segmentation is based on a new paradigm. Technical superiority of a new algorithm alone will not necessarily lead to widespread acceptance. The delivery of a solution and the ease of its use can be more important to market adoption.

We must understand the biology as well as the anatomy of what we are modeling. Using only anatomic imaging to attempt to pin down issues of precision, accuracy, in a living, highly variable, perverse human population is going to fail. Intraoperative visualization is the way to get geometric feedback for accurate geometric placement, but it will not necessarily improve patient treatment results. Functional imaging may show that the source of pathology is not at the center of the anatomy. Functional imaging (functional MRI, volume impedance tomography or neuromagnetic source imaging) will ultimately be the solution. CASI DMT can manage issues of precision and accuracy in data fusion between widely disparate resolution scales typically found in functional images fusion. The biology of the pathology will most certainly complicate the geometry in novel and exciting ways.

3.1.3 Implementation details rational

The main interface to the CASI system will be by connecting to the CASI web site at http://www.casi.net/ and logging in via a secured socket level connection, with all image and model transactions encrypted to the appropriate privacy standards for patient information (HIPPA). There are two fundamental operations on the server. The first is uploading raw image data and then generating the topological decomposition and recoding into a DMT graph. The DMT graph indexes each object in a volume, and each feature in the object geometry. The graph of a volume contains the same information as the pixel data; but in a hierarchical segment able object format. The second fundamental operation is tiling from a node on the DMT graph. The model is created at a bandwidth appropriate tile density and downloaded to the user. This is possible at interactive speeds because the DMT graph is an index into the volume, enabling rapid segmentation and model generation.

The model server is the heart and soul of our effort, the "forge" through which pixels become anatomy. Raw image stacks are uploaded. A DMT graph is presented back to the user. As the user moves the mouse, tiled models are forwarded to the client for real time interactive approval or further pick, drag and drop assembly.

The radiological client user will log into their account at CASI, on a client machine on their local network, which will also connect to the imaging equipment via the radiologist facility TCP/IP net to a DICOM (Digital Image Communication) protocol for interchange of medical images that runs on all medium to high end medical imaging equipment. Each radiological facility will provide access to its imaging equipment image files. We will write code that will enable the client to push the code up to the server, or the server will be able to automatically pull client images as they are produced. The images and associated patient identifying information will be encoded and encrypted to HIPPA (Health Insurance Portability and Accountability Act of 1996.) Software features are a universal file and directory recognition

system, that can learn the format of any medical imaging instrument file format, and any popular digital image format so that installation in a client radiological site is quick and trouble free. We will also build a universal calibration service into the radiological client. Most imaging equipment has maintenance contracts and quality assurance requires that the equipment be calibrated by imaging an imaging phantom with known geometry and dimensions. We propose to provide a uniform calibration service to insure uniform model fidelity for all of our client images. In that way we can provide a cross instrument, cross instrument manufacturer, calibration standard so that our geometric models are of well defined quality, independent of the standards of instrument care the client maintenance standards call for, and meet CASI defined standards.

The design goal for the referring physician client software is to have immediate access to the imaging study and minimize the work required to do a three-dimensional work up. The referring physician, the attending surgeon and any of the consulting caregivers authorized by the referring physician, can access the images, the patient models, and any study tools, annotations, and other material. This may include medical illustrations, reference materials, annotated treatment plan models, pre, post treatment photographs, intraoperative photographs, and so on. The materials may be to educate the patient as to the upcoming procedure, document the procedure plan, report the procedure results, or even sell a prospective case to an uncertain patient. Because we are going to be doing interactive three-dimensional computer graphics on the downloaded anatomic models, we will enforce a minimum level of graphics resolution and triangle rendering speed by the client. These standards are approximately the same as available in any high-end computer video board with OpenGL support. These boards cost approximately 100 to 1,000 dollars with a polygon draw rate of at least 30 million illuminated, z buffered triangles per second. This a standard value for a PC workstation class graphics accelerator board, or a high end computer game OpenGL board

The patient client software can display study models permitted to the patient by the referring physicians' client. This is a limited functionality physician interface. In this, the physician can educate, inform, or sell the case to the patient.

We will use VHP RGB data and register the base anatomy to the CT and MRI patient specific images. We will build detailed models that contain the diagnostic information particular to the patient. Our goal is to generate a fused composite model of the patient, containing standardized anatomic data scaled and registered into the patient coordinate system, to provide color and other inferred structure detail that MRI and CT do not measure. As we validate our code, and the radiology facilities client code approaches completion, we will move to using patient specific MRI and CT source data.

Level of Detail (LOD) management is key to the commercial success of this project. The models, as built on the server will be over tiled (have more triangles than required to solve most modeling and trajectory problems). Delivery of the product models and images to the client computer must be appropriate to the available client bandwidth, display resolution, and the client computer storage capacity. Interactivity requires rapid LOD management so server downloads only enough detail to permit the client computer to display the model on its OpenGL graphics accelerator subsystem. Failure to achieve the desired bandwidth and latency by the project termination data will be offset by the expected growth in next generation Internet bandwidth and yet even faster graphics chip sets. Should hardware technology obviate the need for an extensive LOD management subsystem, we will scale back our effort in this area appropriately.

We will close the loop with our users by installing a click stream subsystem to monitor how our users interact with the selection/segmentation menu. From are able to optimize the interface to minimize the selection, and segmentation clicks required of our users. Selecting objects can require a lot of picking and selecting on a deep the DMT graph menu. We expect that most users will make canonical selections, and by monitoring patterns in the selection behaviour, we believe we can intuit users intention, taste, and desired objects after they make similar choices in different patient datasets. As our system gains experience with alpha testers ad users, we will test to see if this facility makes using our system intuitive and decreases each users number of selection clicks to find the models they wish. In this way the user interface and the speed and quality of the users' modeling effort is improved.

We will build a Radiation and Oncology Physician Client Interface that implements special features requested by our Radiation Therapy (RT) collaborators at NYUMC. We will use our core technology to segment and build models, but also track successive tumor model changes during treatment, develop beam

trajectories (via Braided DMT) through the target (the breast tumor) and no-go regions (the lungs and heart). We will develop ablation isodose isosurfaces (surfaces of dosage intensity great enough to ablate tissue), and low dose isodose surface (the surfaces of dosage intensity safe for healthy tissue), for no go region. We will build union and intersections of these organ and isodose objects using our DMT graph technology to highlight dangerous problems before the patient is hurt, and to validate treatment plans prior to treatment.

We will begin by doing breast cancer cases using the generalized physician client with the radiation oncology department at NYUMC. We will be building patient models from CT slices, and modeling tumors during the course of treatment. We will also develop isodose surface maps of total radiation absorbed as well calculating beam trajectories. Our goal is to minimize the radiation dosage in the thorax and maximize dosage in the targeted tumor. The research challenge is to do difficult beam trajectories that the department software cannot manage because of the geometric complexity or lack of critical organ models.

We will build a Neurosurgical client interface, to provide steriotactic brain surgery planning for keyhole surgery. We will incorporate features requested by our Neurosurgical colleagues at St. Louis University (SLU). We use our modeling technology to build no go regions such as articulate un-diseased brain and major blood vessels, and the target region we wish to biopsy, ablate, or deliver therapeutic agents. We can model the union of the no go regions and the access path to validate surgical plans prior to surgery. Any volume in that object class will immediately flags a problem.

3.1.4 State of the art before project:

The current state of the art for anatomic modeling is hand pixel picking or semi-automatic power hand assists (snakes, dilation / erosion operators, flooding regions, etc.), drawing contour rings, sewing a surface between rings. Marching cubes and friends tiles all objects at a threshold value, regardless of their connectivity. Various advanced techniques require hand drawing pixel "dams" to contain surfaces from spilling into inappropriate regions, or "roughing in objects" prior to contouring. These techniques distort the object geometry, are imprecise, create tool marks, and other dimensional instabilities. They require an expert operator, are not repeatable, even with the same operator on the same data. Critical radiation therapy simulation modeling for beam trajectory planning is done by the seat of the pants, line of sight, with insufficient computational geometry support on physical simulators. Robotic surgery is not; there is no theoretical, robotics technology to makes calculation of intraoperative trajectories possible without good anatomic modeling. Currently, neurosurgical trajectories are typically simple straight lines avoiding large internal obstacles (blood vesicles or eloquent cortex). Anatomic computer animation for medical or commercial illustration requires many technicians working on multiple packages doing hundreds of hours of hand editing to make seconds of finished rendered animation frames.

3.1.5 State of the art after project

Within three to four years from the start of this project, segmentation will be accomplished in seconds; simply by moving a mouse over a DMT graph (specifying a threshold value and parent criticality) browser widget, and immediately seeing the 3D object selected. If the object is not simply selectable (the desired object is has multiple connection nodes to other objects), the user can click on the graph node to have the proximate connecting nodes disconnected by changing the minimum number of pixels the minimum contrast. Surgical robots will use real time updated anatomic model information to navigate deep inside the body. Difficult to reach breast tumors will be treated with no burnt lungs. The segmented models will be precise, accurate, and suitable for Hollywood computer animation, deep brain surgery, and high school student science fair projects. The technical leverage of understanding surfaces, objects, and being able to manipulate them adroitly are manifold. Any engineering or scientific application that typically uses isosurfaces for analysis will benefit from DMT graph analysis.

3.1.6 Technical leverage into a broad spectrum of spillover benefits

The technical leverage of understanding images, surfaces, objects, and being able to manipulate them adroitly are manifold. We will be able to effectively transmit large pixel images as nested large to small contour objects. Any engineering or scientific application that typically uses isosurfaces for analysis will benefit from DMT graph analysis.

3.1.7 Technical Rational and Advancement of the State of the Art (TABLE)

Figure of Merit	Projected Technical Targets	Current State of the Art	Technical Barriers	Innovative Approach
Resolution (Distance)	No Resolution Limits	1/3 mm pixel size	Scanner device pixel size, typically, imaging devices produce too many pixels to use all of information effectively	Vector from pixels
Effort (Time)	1,2 seconds, possibly interactive speeds (1/30th second)	Hours, days, weeks	Patience of operator, excessive resolution of image data. Objects to be extracted require specifying every pixel, or every perimeter pixel.	DMT Graph specified objects are hierarchal, so groups of objects can be manipulated instead of individual pixels. Single mouse clicks segment complex objects
Cost of Professional Effort	200.00 to 500.00 / man hour	10.00 / man hour	Low productivity of current algorithms and software	
Accuracy (Standard Deviation Distance)	< 1 pixel	> 4 pixels	Segmentor technician hand work; Movement of patient during surgery, time interval from imaging to treatment cause measurements drift	Rapid modeling minimizes changes due to time delay from imaging to treatment. Real time intraoperative modeling possible
Patient Results (Percent Improvement)	95 %	45%	Precise determination of pathology location	Accurate and precise modeling preserving imaging calibration

3.2 Research and Development Plan

3.2.1 R&D Plan overview

The development strategy is a simultaneous attack on the math and implementation problem; algorithm design, and software engineering problem. The principle division of tasks is between the user interfaces (client side Java development) and the DMT image recoding, graph generation, union and intersection matching, Level of Detail (LOD) management, bandwidth management, and warping tasks (server side math and remote graphics). The PI will program the DMT decomposition and graphing code. A core algorithm research and programming team will be assembled from the faculty and PhD student pool. Dr. Wolberg will program manual and automatic image registration. CUNY faculty will do algorithm development and analysis. NYUMC RT and SLU Neurosurgery faculty will be our alpha clients. PhD students with Java and C++ experience will program the client side browser plug-ins. The math research milestones are the development of the server image graphing, matching, registration, and LOD management. CASI will launch its alpha test network based client-server image-processing services directly to the public, to imaging facilities and physicians (and their patients) even before all of the server services are functional or complete. By having the client technology base working, even at mock-up prototype functionality, CASI will transition research milestones rapidly, effectively, and explosively diffusing the technology into clients' lap (tops).

3.2.2 Technical Barriers Overcome by CASI that will yield Economic Benefits (TABLE)

Technical Barrier	New Technology	Economic Benefit
Extensive, expensive human segmentation by pixels, hand drawn contours, hand drawn pixel dams, segmentation snakes, and other current ineffective technology: Imprecise and Inaccurate	DMT critical point manipulation precisely segments objects.	Creation of new market low cost computer modeling Cheap patient specific graphics and animations,
Smoothing operations on hand segmented objects: Warps object geometry	Maximal smooth 'cut' segmentation surfaces	Reduced dependence on student and technician for retouching and smoothing
Dimensional Fidelity of segmented, smoothed objects: Inability to preserve of instrument calibrations from image to model		Increased market in patient specific imaging and modeling,
Robotic Surgical Planning: no technology to calculate in patient specific model anatomy; no way to model constraint space (no-go regions); no way to calculate optimal trajectories	Braided Digital Morse Theory for paths between features	Better surgical results, Less insurance costs, Lower hospitalization costs, Less hospital time, Less disability payout, Increased worker productivity

Radiation Treatment Planning; inability to get precise and accurate simulator models; no technology to calculate optimal beam trajectories subject to constrain spaces (no-go regions):		NO surgery required, Better treatment results, Less insurance costs, Reduced hospitalization costs, Less disability payout
Treatment Results Evaluation: repeated hand modeling of tumor or target organ during therapy too expensive, imprecise, and labor intensive	Reliable tracking of tissue morphological changes from radiation or surgery over time	Quantitative measure of treatment effect (Tumor volume shrinkage, qualitative morphology improvement, etc)

3.3 Statement of project tasks and anticipated accomplishments

3.3.1 First year project milestones

For the first project year, we will focus on algorithm development and implementation to efficiently produce and manipulate the images and models by their DMT graph node. Concurrently, the client side interface team will design, mock up, and write browser-based interfaces for our intended medical imaging shops and clients. This will demonstrate of DMT principle of producing map of objects that do not require contrast enhancement to be parsed out of their proximate objects. We will boot up our network services server on the Internet.

3.3.1.1 MILESTONE 1: Server live on Internet

We will launch our project with the purchase and configuration of the CASI project web site server.

TASK: install the project management software, and establish protocols for collaborative programming with the team members.

3.3.1.2 MILESTONE 2: Public client mock-up facility life on Internet

Publish concept mock up our system into which we will insert the real functionality as that milestone is achieved.

TASK: Design various user interfaces for radiological, RT, Neurosurgical, patient and public use classes.

3.3.1.3 MILESTONE 3: Surface tiled models from DMT graphs

Generate a tiled surface model in RGB Color image data from a user selected threshold value and a DMT graph node.

TASK: Program SpiderWeb algorithm and DMT graph decomposition

3.3.1.4 MILESTONE 4: Generate DMT graph from image stacks

Generate DMT Gray scale graph from MRI and CT from the VHP. Generate DMT graph of the color (RGB) VHP pixel data. We will use the female 'Eve' data set, and do the thorax and abdomen.

TASK:

3.3.2 Second year project milestones

The second year of the project will focus on the DMT segmentation operator and registration, then delivering them into network clients.

3.3.2.1 MILESTONE 5: Gray scale and RGB Image graph matching (registration precursor)

We will build the union graph of the RGB and one or more of the CT and MRI image stacks for manageable subset of the VHP data.

TASK:

3.3.2.2 MILESTONE 6: Segmentation functionality demonstration

Using the public VHP data, we will demonstration on the website DMT graph selection of component objects. Users will select DMT objects from the RGB, CT, or MRI data sets. DMT segmentation operator demonstration, by clicking on the DMT graph node, the user will move saddle connections up or down to connect or disconnect objects.

TASK: Write saddle criticality navigator (finds segmentation plane if possible), else edit saddle values to edit DMT graph edges.

3.3.2.3 MILESTONE 7: The Patient, RT Physician and Steriotactic Neurosurgery Client demonstration goes live

TASK

3.3.3 Third year project milestones

CASI focuses on the problem of object registration and delivery of reduced density images and models.

3.3.3.1 MILESTONE 8: Registration of models by DMT graph demonstration

We will demonstrate the union and warping of DMT graphs from selected subsets of each data set resulting in a fused model.

TASK:

3.3.3.2 MILESTONE 9: Level of Detail management 10-x reduction in tile density

We will demonstrate a minimum of 10-x reduction in tile density, with a maximum reduction of tile density of an object into a tetrahedron (4 triangular tiles).

TASK:

3.3.3.3 MILESTONE 10: Segmentation click stream learning captures segmentor insight

We will demonstrate a 10x reduction in the number of clicks to segment major components by learning patterns that will enable us to intuit objects to segment.

TASK:

3.3.4 MILESTONE PROGRESS (TABLE)

N	Major Project Tasks	Project Time			Cost in $K	Major Milestone
		Y1	Y2	Y3		
1	Server hardware installation and software configuration task				412.5	Server live on Internet
2	Public client mock up facility design task				111	Public client mock-up facility life on Internet
3	Program SpiderWeb surface tile generator task				111	Surface tiled models from DMT graphs
4	Recognize, sort Crits, connect; graph display code task				202	Generate DMT graph from image stacks
5	Write node figure of merit, sorting, matching code for Union and Intersection operator				210	Gray scale and RGB Image graph matching (registration precursor)
6	Write saddle Crit navigator and editor				210	Segmentation functionality demonstration
7	Write DICOM, upload, download compression, encryption, radiological, referring physician client				210.5	Web based upload and download of raw images and tiled models
8	Node warping code				211	Registration of CT and MRI to VHP Base Anatomy
9	Level of Detail Management				211	Level of Detail management 10-x reduction in tile density
10	Install clicks stream technology on clients; collect data from alpha users				221.5	Intuiting segmentation from users

3.4 How will our project handle technical and managerial problems we will encounter

3.4.1 Computational load problems in larger scale image stacks

There may be complexity issues as the images scale, the number of image dimensions increases (independent or dependant image channels). Scaling up to a production system may overload the server, or increases in image resolution in future CT and MRI systems may similarly overload the server. Interactivity may suffer. The NP completeness of these algorithms has not yet been analyzed. Software optimization as well as new capital to buy a larger server may required as we process more and larger alpha client datasets.

3.4.2 Computational intermediate solution memory "bloom"

Registration of large images with disjoint area may cause problems. If the two images have the same borders, then the root of the graphs will be the same and graph matching can start at the same depth levels on each graph. If the two images are disjoint, i.e., there is only a small common area between the two images, and then the graph-matching algorithm will exhaustively search for matches in the regions where no such match is possible. This unproductive searching may cause problems with excessive temporary memory requirements. Images that have no common features may produce spurious matches, perhaps matching textures and small features only, while assigning most features to the intersection list

3.4.3 Automatic registration problems: managing matching incomplete graphs

An incomplete graph is a graph of a portion of the object that we wish to register. It is important we start with a complete view of the structure we wish to register, but the algorithm should be able to find the best matching node tree segment by exhaustive searching.

The worst-case situation is that automatic graph matching cannot be made to work fully automatically to our satisfaction. In that situation, and until we can design a fully automatic graph matching algorithm, we will ask users provide a starting point on graph pairs to the matching process.

3.4.4 Segmentation of difficult images

A difficult image is an image that contains features that distort isosurfaces on a large scale, and or fine grain noise that causes a very large number of small noise objects. We can eliminate small-scale features by truncating our graph below an object size, typically on the scale of two or four pixel lengths. Large-scale distortions include bright MRI antenna fields, a 'tilted' image background, where the image is distinctly lighter on one side, and darker on another side. Other problems we have encountered are bright 'hot' spots produced by MRI pickup antennas placed directly on the patient to improve image resolution in the immediate vicinity. This causes an intense detailed and bright hot region whose brightness decays away from the antenna. For those images, we have to model and brightness compensate the antenna field.

We are prepared to do additional traditional image processing, even hand editing, as part of our technical assistance to the user, until we can design and implement automatic methods to minimize this kluge step. This experience is a necessary and unpredictable part of dealing with real images that we expect from our clients.

3.4.5 Management issues

Access to necessary research facilities by proximity; We will have access to offices of the City University of New York (CUNY) Graduate Center (GC) on 34th street and 5th Ave, a short distance from CASI on 33rd street and 2nd Avenue. Team programmers will have the option to work directly on the machine for very fast image rendering, and manipulation, or work from PC clients on site or remotely. Clinical collaborators are all well Internet connected, and mainly at New York University Medical Center (NYUMC) on 34th Street and at St. Louis University (SLU). As we move from computer modeling to clinical modeling, we expect to be working extensively on site at the Radiation Oncology facilities directly across the street from CASI. The PI has many years standing as former faculty at NYUMC and collaborations there are easy to negotiate as required.

3.4.6 Fostering a team approach and team member communications

3.4.6.1 Project Management Policies

We will establish a simple task delegation and completion policy, as well as regular weekly face-to-face meetings at CASI and at the CUNY Grad Center. A good interpersonal working environment is vital to any network based collaboration with deadlines, milestones, validation tests, release dates, and other organizational stresses. We will also sponsor bi-monthly retreat activities to relieve stress and to foster a unity of purpose. We will hold quarterly progress reviews, and in the second year, start a monthly business development meeting to focus on marketing our emerging technology and recruiting alpha test customers.

3.4.6.2 Project Management Software

Our company will use an open source development model. Open Source developers use SourceForge for network access to source code version management systems (code check-in, check out), mailing lists, bug tracking, message boards / forums, and task assignment, ownership, completion, and management. We will install the SourceForge project management software as private instance of the popular open source collaboration SourceForge.net web site. The principles behind SourceForge are use to hosts more than 12,000 open source projects.

We will support a DMT project at the CUNY Graduate Center on 34th St. and 5th, directly cross-town on is NYUMC. The CUNY Institute for Software Design and Development (CISDD) is a University Consortium that will act as the conduit for this project. The computer team is a short walk from the clinical facilities, which is crucial for fostering communication with our ultimate clients and customers.

3.4.6.3 Team members (TABLE)

Name		
Core Members	Affiliation	Role, Expertise and Task Areas

Professor D. B. Karron, PhD	CASI PI, CCNY	PI, DMT Inventor, C++, Computational Geometry, Computer Graphics, Algorithm Development, Will write DMT recoding core on server, market technology to prospective alpha customers and industries
Professor G Wolberg, PhD	CASI, CCNY	Lead Programmer. C++ programmer, algorithm development, digital image warping expert
Professor J L. Cox, PhD	CCNY	DMT developer, Theoretical computer scientist, analysis of algorithms.
Consulting Members		
Professor M. Anshel, PhD	CCNY	Encryption, Braid Theory, computational geometry, development of Braided DMT for Trajectory Planning and Analysis
Professor G. Herman, PhD	CCNY	Theory of surfaces, image segmentation, digital topology
Professor F. Bookstein, PhD	University of Michigan	Morphometrics, medical imaging and applied math
Mr. E. Gurfein, MBA	Meridian Resource and Development, Ltd.	VC fundraising for biotech, medical device, and chemistry startups; engineering venture capital, financial management and technical marketing
Clinical Participants		
Chair S. Formenti, MD PhD	NYUMC Radiation Oncology	Breast cancer warrior using radiation therapy beams.
Professor J. K. Dewyngaert, PhD	NYUMC Radiation Oncology	Radiation physicist; Specialist in prostate \cancer research using radiation and brachiotherapy
Professor and Col (Ret) R. A. Satava, MD	Yale University Medical Center Department of Surgery	Endoscopic and Virtual Reality in Medicine pioneer - got employer DARPA - still works with.
Professor L. Liebis, PhD	NYU MC	Instrumentation specialist. Statistical epidemiology,
Chair R. Bucholz MD,	St. Louis University Medical Center, Department of Neurosurgery	Endoscopic surgeon and medical technology entrepreneur company - just raised Neurosurgeon and steriotactic neurosurgery system inventor need for project. Potential alpha site
S. V. Grasso, MD,	Stevens Institute of Technology and TIMA	Technology for Medical Integration (TIMA), robotic surgery expert and promoter
Post Doc/ Visiting Scientist		
J. Patrichare, PhD (expected 2002)	Graduating from Mayo Clinic Medical Imaging PhD Program	C++ image programming registration and warping, 3D modeling,
PhD graduate students	CUNY Graduate Center	Java programmer, System administrator, Web site designer and user interface tester
To be named; 3 total		

3.5 Potential for Broad-Based Economic Benefits

The nation will benefit by improved health care that will prolong the quality of life. Reduced employee sick leave will decrease disability related payouts and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs. CASI will create new markets for model-based information as the core competency is established that will go beyond our initial Radiation Treatment project. As the medical imaging industry matures into the medical modeling industry, CASI will seek new markets for services, only dreamed of at present.

High technology medicine is widely viewed as beneficial the public, mainly because of the probability that any one of us may unexpectedly become the beneficiary of a new life saving therapies; However the costs of such technology to insurers, taxpayers, and the underinsured can be staggering. Expensive new hardware and drug offerings bombard the medical market. In a life-threatening situation, these high costs are relegated to a lower priority. When the bills have to be paid, and policymakers review galloping high technology medicine costs, they must consider the value to our society of "big iron" capital-intensive purchases such as multimillion-dollar diagnostic imaging facilities and therapeutic equipment. The value added to our nations' economy is that CASI will be a filter and conduit to increase the worth of this investment, by increasing the ability of medical diagnostic imaging to accomplish its promise: Save lives and keep us healthy.

3.5.1 National Economic Benefits

America is underutilizing the product of its diagnostic imaging capital base. The medical imaging industry is not making the best use of the mega pixels of patient data these systems generate. From an

information theoretic perspective, we estimate that 99% of that information is not contributing to the making of therapeutic decisions. We are not disseminating this information to all concerned parties rapidly and effectively. This is partly because we do not understand, use, or effectively model the important features in these images. This is because of limitations in the state of the art for understanding modeling key features, and applying this information in rapid and effective ways for broad base of radiologists, physicians, surgeons, and therapists. Further, we need to make it understandable to the ultimate customer, the patient, and / or the patients' family. New picture archiving and network distribution systems are helping to manage the raw data, the Next Generation Internet can make more of the raw data move faster, but the nation needs better technology to understand these images, make consistent precise patient specific determinations, and maximize the effective use for this data as essential insight. CASI will decrease the entropy and increase the pragmatic value of medical pixels by winnowing them down to geometric models, trajectory vectors, and critical points.

Customers include any radiologist, radiology practice, imaging facility, medical center, and associated diagnostic or therapeutic practitioner. The patient needs to be kept in the loop as the ultimate paying customer, and consumer of the therapeutic decisions based on this information. The customers that will benefit the most are any interpretative method of CT, MRI, PET, SPECT, etc. that currently is hand contouring stacks of images prefatory to designing a patient treatment, are evaluating the ongoing results of treatment. Similarly, anyone attempting to spot critical surgical targets, such as in steriotactic brain surgery, by sighting by the center of blobby objects in hundreds of slices will be a customer. Radiation Therapy (RT) practitioners were most eager to find better methods to eliminate this time consuming drudgery in their practice.

Competitors are scattered across various application area, using mainly volume rendering technology instead of shell surface technology. Most imaging companies are focused on one technology, almost to the exclusion of other application areas. Typically, these firms arise from image consulting firms working with one large customer with a specific application in petrology, histology, computer graphics, and so on. There are general-purpose visualization systems sponsored by government research labs (NCAR), and commercialization of large university programs (ANALYZE from Rich Robb's group at the Mayo Clinic), 3DVIEWNIX (From Jay Udupa's group at U. Penn). Commercial packages include Voxel View, AVS (Advanced Visualization System), Resolution3D, Khoros, IBM Data Explorer (DX), Iris Explorer, VTK tool kit (From Kitware) are but a few of the more popular general packages. Some have exceptional interactivity based on their optimization to special graphics accelerator hardware, now common with the explosion of the computer game industry). Many have intricate and comprehensive facilities for hand segmentation, contouring, snake segmentation, thresholding, flood filling, edge detection, marching cubes, and so on. None have anything that approaches the power and insight that Digital Morse Theory based segmentation can do to simplify many segmentation tasks. We will never manage to penetrate such a broad spread of markets, but we expect that we will license our technology and that will become an important source of revenue and diffusion of our technology and theory into the industry and broader national economy in ways we can barely foresee

End users are generally serviced by consultant using any of the above visualization packages. We will focus initially on the niche markets of Radiation Therapy and Neurosurgery as vehicles to develop our core technology. However, most of direct users will be software developers integrating our technology in their software packages for use by their individual specialty markets.

It is our plan to license our technology to other industries that can apply our technology are industrial non-destructive testing (industrial CT), meteorology, metrology, histopathology imaging, entertainment industry animation, medical illustration, commercial computer graphics for advertising, virtual reality, air traffic control, multimedia, medical education and training, simulation, topography, mapping, surveying, (not topology) fluid mechanics and dynamics modeling and visualization, hyperspectral scanner imaging, Earth Imaging Systems (for interpreting satellite imagery)

The benefits to the public are longer life, better quality of life, through improved medical care, at reduced cost through more effective delivery and utilization if medical imagery.

3.5.1.1 Business opportunities addressed and economic importance to proposer and the nation

Our business opportunity is the expense and time required to produce imprecise and inaccurate segmentations from which 3D models are generated for many disparate applications. There is no underlying paradigm for understanding how segmentation works. Most of the thinking current segmentation theory is *ad-hoc*, problem, and image specific, not repeatable, and requires an expert user. Discussions with robotic surgery designers and manufactures point out the problem designing robotic trajectories are bottlenecked with the patient specific modeling. Our core technology is being hailed as a breakthrough, if we can develop working systems from our concept demonstration. Alpha site customers and business interest is building as word of our possible technology circulates in our target markets. NYUMC Radiation and Oncology and St. Louis University have agreed to participate in our development effort as alpha test sites.

The economic important to CASI of this technology is based getting meaningful assistance in surgery from computer imaging. This requires 3D modeling on a rapid patient specific basis with precision, accuracy, and dimensional fidelity. This technology gap prompted the PI's research in this area and prompted our request for funding to develop this technology.

The economic importance to the nation is improving the utility and distribution of medical imaging information, and will improve the value of this expensive technology with our inexpensive, but Internet pervasive technology. Further, this is not a comparatively expensive technology in its application because we will use centralized computer servers, connected eventually, but not necessarily by Next Generation Internet or Internet II. Our value added is our intellectual property that will lead to improve health and longer life of American citizens.

3.5.1.2 Discussion of potential users of this technology

Patient specific anatomic modeling from medical imaging and true three-dimensional modeling is required by many medical specialties. The specialization of the physician based research groups and the lack of a common language and communication leads fractionation of effort. The results of style of research effort tends to degenerate the state of the art into a large collection of tricks, techniques, conflicting algorithms, and overloaded toolboxes. Most of these techniques lack an underlying mathematical rubric, uniform precision, and validation. Computer graphics has not provided the 'sound' solutions that it appears to illustrate. This is due to the lack of computational geometry and advanced math sophistication in the graphics industry. We see a wide range of medical, engineering, technical, and scientific users for our uniform approach and new technology.

CASI's DMT based technology has a number of potential users and applications. Our initial target markets are breast Radiation Therapy and neurosurgical steriotactic surgery. Once our technology has been show to be advantageous, it is expected that other specialties will utilize it. We will cultivate bellwether client collaborations in each surgical specialty, and market through their training programs with their residents and fellows, post doctoral students and visiting scientists. Expected application areas include: Cosmetic plastic surgery (modeling skin profile changes to sell cases to patients), Craniofacial surgery (model bone cuts, skin reconstruction due to trauma, birth defects, and cancer), Obstetrics (pelvis measurements are key parts of the decision to perform a caesarian), Oral surgery (tooth implants), Orthodontics (bone growth and effect of braces, selling cases to parents), Histopathology (cancer detection, cell type recognition, and cell counting), Biological shape analysis for surgical application.

3.5.1.2.1 Market estimates

At the end of this proposal, this technology will be successful for RT and Neurosurgery. At that time, for a cost of one hundred dollars the attending physician will a model of a patient's tumor, and be able to plan and demonstrate that plan for surgery or radiation.

In the RT focus area of our project, we measure the total market from cancer epidemiology. Unfortunately, we can expect an increased cancer rate in the future caused by environmental pollution. The survival rate due to better treatment technology will also increase. This increases the CASI market by an estimated 20%. CASI technology will be a part of that survival improvement.

Breast Cancer, the target of our RT collaboration at NYUMC saw ~176,300 new cases and 43,700 deaths in 1999. Prostate cancer had ~136 new cases per 100, 000 men. Surgical treatment brachiotherapy (treatment by implanting highly radioactive seed in the cancer) and RT are all require modeling and

targeting technology that is CASI's core technology.

Expected growth of markets opportunity by increased cases and increased survival of 20 % is assumed as CASI technology is embraced by medicine. Assuming a 20% market capture share, that means that in breast RT we can expect by the time of product roll out in 4 years to 42,000 cases / year. We can estimate a similar participation in prostate cancer therapy at 50,000 cases / year.

3.5.1.2.2 Markets change and new markets from new technology.

Our initial focus area is breast RT and Brain surgery. As we penetrate in these markets CASI will license its technology into other market areas; because we will need to focus the R & D effort on the generalized problem, and a few limited specific problem areas at a time. CASI will effectively franchise its technology into market application areas for maximal rapid diffusion. We estimate that we will be doing well over 10x our base RT revenue by franchising. CASI will promote bellwether researchers to adopt our technology for their specific application area by doing custom web interfaces to their spec, as CASI are developing our generalized application area.

3.5.2 Need for ATP funding

ATP funding is required to enable CASI to complete our ongoing research and make the technological leap to market of low cost, network based anatomic computer 'foundry' modeling. We will build on the progress we started making as a subcontractor on the NIH Visible Human Project (VHP) female 'Eve' dataset. The primary mission of the VHP program is to supply anatomic content for medical school education. CASI's broader therapeutic vision requires ATP development funding because the NIH mission in this area at this time is limited.

Segmentation and Registration issues impede progress in many disparate medical and scientific fields. No one industry or medical superspeciality has the patience to fund this development effort in the general case. Few programs share the vision of this technology for its broad applicability to medicine, technology, and science.

The visualization and modeling technology is not being effectively developed in the United States. The medical imaging industry is dominated by foreign owned and controlled companies such as Sony, Picker, Hitachi, Siemens, and General Electric. We believe that the market for pixel intensive hardware-accelerated graphics is wedged in the Internet last mile bottleneck. Wide diffusion for image-based information will require new thinking, not just more bandwidth. CASI will move from a "pixel based high entropy high bandwidth" representation to a "DMT based object geometry "representation with low entropy and high information theoretic pragmatic value.

3.5.2.1 Summary of efforts to get external and private funding

The CASI vision is to provide patient specific precise and accurate Level of Detail (LOD) models for diagnostic and therapeutic applications. CASI's raw input is medical images uploaded over the Internet. The time for development of this technology is too long for Venture Capitalist window of opportunity. We do not intend to become a medical computer graphics-imaging house, medical informatics consulting firm, or a surgical robotics firm. Our goal is to focus on solving the problems that are hindering the start of the art in radiation therapy, surgical robotics, 3D modeling, animation, and many other application areas. CASI's solution will become our core competency. The PI intends to aggressively grow the company into this wide-open opportunity field. CASI's broad therapeutic vision frightens private venture capitalists, and their funding. CASI is currently funded by angel investors and the PI. CASI will leap into the modeling business with ATP funding, and be able to focus on the long-term benefits of this technology.

CASI believes that it become profitable within 5 years, which is longer than the private equity market will tolerate. As we demonstrate our core technology by the third year, we expect that we will be able to rise significant private funding, but not before.

3.5.2.2 Description of how the technology will be broadly diffused

Broad diffusion of our technology will occur because of the strong need in a broad variety of medical and general scientific modeling applications. This strong gradient will pull our technology out of our lab and into commercial franchise or licensure-based adoption. Because the application runs as an ASP, anyone who can upload an image file will be able to run their image for a demonstration of the modeling facility, and see how the CASI system will solve their problems. The short time constant of internet based

technology diffuses out into the global community, and the strong needs gradient, means we can expect explosive growth in demand as we start public demonstrations and reporting our results in the literature and major scientific and medical meetings. CASI is preparing for this onslaught and will carefully not oversell its solutions and permit it to grow in managed and healthy manor for maximal benefit to the nation and for the company.

3.5.2.3 Business experience of PI and Staff

CASI was founded in 1995, while the PI was research professor of surgery at NYUMC. The PI has managed approximately one million dollars in DARPA funding, as well as such administrative tasks as running a payroll, subcontracting, DoD audits, Federal and State audits, bank audits, invoicing, collections, financing, and accounts payables with and without an administrative staff. CASI has kept meticulous records and attained a high professional standard under difficult business conditions. The PI has demonstrated fiscal responsibility managing significant federal funds responsibly. The PI has extensive technical management experience. Mr. E. Gurfein will be joining our team as our business manager, bringing his experience in scientific startup funding, finance, management, and marketing.

12. PROPOSAL TITLE

Anatomic Computer Modeling for Precise and Accurate Therapies

13. NON-PROPRIETARY PROPOSAL ABSTRACT

Computer Aided Surgery, Inc. will develop a new computer application server that will take calibrated, encrypted raw images from a clients' medical imaging instrumentation (MRI, CT, Ultrasound, etc.), over the Internet.
Our system will rapidly generate encrypted, precise, accurate, and variable resolution three dimensional tiled models applicable for diverse applications as radiation therapy, surgical planning, intraoperative guidance, rapid manufacturing of prosthesis, verification of surgical results, robotic surgery trajectory planning, patient communication, education and other customer specific applications
The novel idea, that enables the technological leap forward is Digital Morse Theory.
The essential insight of Digital Morse Theory is that it describes the behaviour of three dimensional SpiderWeb surfaces surfaces in terms of Morse Critical features.
These surfaces are the computational building tiles of the biologically and medically important objects we wish to parse from an opaque brick of bytes that compromise a volume data set.
We can build an index of all of the objects in a volume to utilize these elements in terms of their generator critical points: Our novel geometric construction algorithms will be embodied in a network based application service provider model. The server will upload from the radiological diagnostic image producer, and download to the therapeutic consumer model. We will function as a unique, super specialty medical imaging Internet Service Provider.

14. CERTIFICATION: BY SIGNING THIS PROPOSAL COVER SHEET, I CERTIFY, TO THE BEST OF MY KNOWLEDGE AND BELIEF, THAT ALL INFORMATION IN THIS PROPOSAL IS TRUE AND CORRECT AND THAT:

A. THIS PROPOSAL IS NOT REQUESTING FUNDING FOR EXISTING OR PLANNED RESEARCH PROGRA MS THAT WOULD BE CONDUCTED IN THE SAME TIME PERIOD IN THE ABSENCE OF FINANCIAL ASSISTANCE UNDER THE ATP.

B. ALL INDIRECT COSTS PROPOSED IN THIS PROPOSAL ARE INCLUDED UNDER THE PROPOSER'S COST SHARE AND NO INDIRECT COSTS ARE INCLUDED IN THE ATP SHARE OF COSTS REQUESTED.

C. IF A LARGE BUSINESS, COST SHARING PROPOSED BY THE LARGE BUSINESS IS AT LEAST 60 PERCENT OF EACH YEAR'S TOTAL COSTS.

D. THE TOTAL VALUE OF ANY IN-KIND CONTRIBUTIONS DOES NOT EXCEED 30 PERCENT OF THE COMPANY'S TOTAL COST SHARE.

E. THE FOLLOWING QUESTIONS HAVE BEEN TRUTHFULLY ANSWERED:

		YES	NO
i.	IS THE COMPANY DELINQUENT ON ANY FEDERAL DEBT? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
ii.	WAS PROPOSAL OR VERY SIMILAR PROPOSAL SUBMITTED TO ANOTHER FEDERAL AGENCY? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
iii.	DOES THE COMPANY HAVE A PARENT COMPANY OUTSIDE THE UNITED STATES? (IF YES, IDENTIFY THE PARENT COMPANY AND ITS PLACE OF INCORPORATION IN ITEM 15, REMARKS.)	☐	☒
iv.	IS THE COMPANY MAJORITY OWNED BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
v.	IS THE COMPANY SUBJECT TO CONTROL BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
vi.	DOES THE PROPOSED R&D INVOLVE THE USE OF HUMAN SUBJECTS AND/OR HUMAN TISSUE, AN D/OR HUMAN CELL LINES? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN INSTITUTIONAL REVIEW BOARD (IRB).)	☐	☒
vii.	DOES THE PROPOSED R&D INVOLVE THE USE OF VERTEBRATE ANIMALS? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN ANIMAL CARE AND USE COMMITTEE.)	☐	☒

15. REMARKS (CONTINUE ON A SEPARATE SHEET IF NECESSARY)

16. DESCRIBE WHAT EFFORTS WERE MADE, PRIOR TO APPLYING FOR ATP FUNDING, TO SEC URE PRIVATE CAPITAL TO SUPPORT THIS PROJECT WHOLLY.

CASI's reputation as a basic research company has made our efforts to raise private capital for this high risk project difficult Traditional paths to commercalization financing would require many years of academic research, which private equity will not fund.

Our goal is to use ATP funding to go directly from preliminary results with a novel proven theory to market dominance intellectual property available to all medical and scientific customers over the internet.

3 The National Opportunity

Computer Aided Surgery, Inc. (CASI) will build a new Application Service Provider (ASP) on the Internet for uploading stacks of pixel images from varied medical imaging producers and downloading to client PC's dimensionally accurate and precise 3D models. These models are for treatment planning, simulation, rehearsal, patient, and medical education. The key feature of the CASI service is that it produces a novel 'graph' or index into all of the volume objects and a 3D model, not just an image. The user manipulates the model on the client computer equipped with a 3D interactive graphics accelerator board, commonly used for computer games, via web browser plug-in software. The model is used for making critical treatment decisions, such as planning radiation beam trajectories. This is a surgical anatomic "blueprint" for treatment planning and evaluation, intended to model and demonstrate properties of patient data. Digital Morse Theory (DMT) permits rapid segmentation and converts pixels into contours enabling rapid interaction by users via the Internet.

CASI offers a unique opportunity for broad-based national benefits by improving the quality and standards of national medical care with reduced cost, patient mortality and morbidity with faster throughput in many application areas. In this proposal, CASI will target Radiation and Oncology with Radiation Treatment (RT) planning technology.

Current technology for anatomic modeling and treatment planning consumes time, labor, and is complicated to use. Currently, professional operators are producing varied results, even with the same data, reprocessed by the same operator. It is not suitably precise for critical radiation or surgical therapy. CASI's improvement will use its DMT 3D surface to rapidly obtain stable measurements delivered via web browser. CASI technology anticipates demands for trajectory planning in the emerging markets of surgical robotics, radiation treatment, and image-guided therapy. Support of these industries will reap broad societal benefits including better medical care, improved national worker productivity, and longer life.

3.1 Proposed Technological Solution

CASI will build a clinical geometry "foundry", casting clinical models in triangular tiles that define intricate, real surfaces in three dimensions. These models will be used for solving problems such as calculating trajectories for radiation beams to treat cancer. CASI's improvement will use 3D surface modeling to rapidly obtain stable measurements delivered via web browser. CASI will embody its novel geometric algorithm as a network ASP and will 'cast' anatomical structures for biological, surgical, and educational purposes. With novel mathematical theory, computer graphics programming experience, and clinical research experience, CASI will deliver in many high tech medical and non-medical modeling applications.

3.2 National Economic Benefits

The nation will benefit by improved health care that will prolong the quality of life. Reduced employee sick leave will decrease disability related payouts and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs. It will also simplify clinical care. CASI will create new markets for model-based information as the core competency is established that will go beyond the initial applications. There are many potential markets. CASI is not selling a software product. It is providing a network-based service for manipulating user pixels into useful geometric constructs. CASI's business model is of software as an Application Service Provider (Torode 2001).

The visualization and modeling industry and technology are not being effectively developed in the United States. Wide diffusion of insight from image-based information will require new thinking, not just more bandwidth. CASI will move from a 'pixel based low information representation' to a

'DMT based object geometry representation' with high pragmatic information content.

Industries benefiting from this technology include medical imaging, animation, as well as Hollywood animation, and weather prediction in meteorology. The ultimate benefit to the public is better diagnosis and treatment for various cancers, with increased quality of life.

ATP funding is required because of short ROI period demanded by private investors, the relatively long development time required for this research, and the many broad areas beyond the immediately targeted medical application. CASI opportunities are in many disparate markets. The national opportunity is in the broad diffusion into many needed applications, and the ATP program is the only funding agency that can take such a broad view of the long term and fund it significantly.

3.2.1 Pathway to Economic Benefits

The CASI Internet solution will grow explosively once released. Internet payment systems provide the infrastructure for direct revenue recovery and interaction with customers. Insurance carriers reimburse costs of 3D studies at the one to three hundred dollar levels. Compared to the established market for high-resolution graphical representations in the medical illustration and advertising industry, it is clear that there is a much larger market for inexpensive patient specific diagnostic 3D models. CASI's intends to become THE clinical modeling resource firm, going beyond medical illustration, and becoming a reference standard for dimensionally precise and accurate anatomic models. The CASI will reduce the cost of generating models from tens of thousands of dollars and hundreds of person-hours to pennies and seconds.

The PI has extensive 'intrapeneurial' experience, starting with early computer networking within medical school in the early 80's (the ability to promote and launch projects inside large organizations). The PI has managed to attract bellwether early adopters in various medical specialties for early stage research collaboration. The PI's extensive medical center experience and professional standing enables CASI to effectively collaborate with clinical departments. These skills insure the broad diffusion of national benefits from CASI research into commercial development for the long-term success of the company and the return on the government's investment.

The PI has also recruited the participation of Mr. E. Gurfein, MBA, as the CASI project manager. Mr. Gurfein has over twenty years of experience in the marketing and commercialization of R&D with companies such as Sperry Rand, Perkin-Elmer, and Engelhard.

4 Potential for Broad-Based Economic Benefits

As discussed above, the broad based economic benefit to the nation will be improved health care that will prolong and improve the quality of life, reduce employee sick leave, will decrease disability related payouts, and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs.

America is underutilizing the product of its diagnostic imaging capital base. The medical imaging industry is not making the best use of the mega pixels of patient data these systems generate. From an information theoretic perspective, CASI estimates that 99% of that information is not contributing to the making of therapeutic decisions. The diagnostic imaging industry is not disseminating this information to all concerned parties rapidly, effectively, and usefully. New picture archiving and network distribution systems are helping to manage the raw data, the Next Generation Internet can make more of the raw data move faster, but what our nation needs from this data is essential insight. CASI will increase the information content and the pragmatic value (Weinberger 2001) of medical pixels by winnowing them down to geometric models, trajectory vectors, and critical features/points. DMT solves significant practical problems in image understanding and 3D modeling, as well as information compression. This leads directly to improved diagnostic accuracy, and therapeutic precision. Analysis of medical images is expensive because of the extensive and expensive human photo interpretation, hand contouring, and guesswork that is the current practice.

Medicine needs a rapid 3D modeling capability for precision image guided therapies. This is a particular problem in medical image analysis. CASI addresses the hard problem of bringing advanced mathematical insight directly to various application markets, and improving the yield, efficiency, and cost effectiveness of image based diagnosis and therapies. For our primary example application, this is the critical measurement of accurate tumor border and surrounding anatomy geometry required for precise targeting for surgical and radiation therapy

4.1 Specific Broad Based Economic Benefit

Broad based economic benefits will result from the CASI development plan, which consists of the direct development of core technology into specialized application areas. CASI will accomplish further development by fostering a network of bellwether early adopters professionals in other areas, leading to indirect national economic benefits. CASI's leading application area is improved treatment of breast cancer, followed by the prostate.

The second greatest killer of Americans is cancer. Breast cancer continues to be the second leading cancer in women in the US, with more than 45K deaths this year (Greenlee *et al* 2001). Cancers of the prostate, colon, and rectum combined to contribute 45% of cancer deaths among men. As baby boomers mature and become more susceptible to cancers in the next 10 to 20 years, these rates are expect to increase at a rate much greater than the general population growth.

Improved treatment of breast cancer is CASI's primary application area, followed by prostate cancers

4.1.1 CASI application development areas

Radiation Treatment (RT) beam trajectory planning in collaboration with Sylvia Formenti MD, and Keith DeWyngaert PhD at New York University Medical Center will be CASI's first application area. RT is the preferred way to target many types of cancerous tumors; however, localization of therapeutic intensity without collateral damage to healthy tissue is a serious problem. Improved diagnosis and earlier treatment have produce significant reductions in mortality. CASI technology improves treatment and affects the reduction of the morbidity (symptoms) of the disease increasing the quality of life during and after treatment.

Early detection, improved surgical techniques, and aggressive systemic therapy have improved quality of life and survival for patients with less advanced breast cancer Tumor regression is the result of the targeted radiation.

The nature of prostate cancer, similar to the breast, is that more radiation produces a better cure. Better targeting technology will have a profound effect on morbidity and mortality.

However, the potential for RT of solid tumors has not been realized mainly due to the dose-limiting toxicity associated with systemic large levels of radioactivity. The technology to be developed will increase the radiation delivered precisely and accurately to the tumor site and decrease the dosage to the non-target regions, a significant improvement in the treatment outcome can be expected. Even greater improvement in treatment outcome is expected when targeting technology is coupled with a variety of methods under investigation at NYUMC to improve the tumor targeting of radioimmunoconjugates including the use of antibody fragments, recombinant single-chain antibodies, and drugs to modulate tumor vasculature. This technology will also be useful in other cancers including prostate, head and neck and colon.

Radiosurgery is the use of carefully targeted radiation instead of surgery to treat tumors, generally in the head and neck. This expensive high technology treatment can spare the patient from invasive dissection surgery, with low morbidity. Treatment planning is a vital and much larger part of these procedures, and CASI modeling technology is expected to play a significant part in reducing costs and increasing throughput (Karron 1992).

4.1.2 Specific National Economic Benefits Table

[1]Patient Population Class	New Cases in 2001	Cost Per Case in K$			Mortality, 000		Morbidity		National Cost B$ / Throughput		
		Hi	Low	Avg.	Cur.	Del	Pre	Post	Now	Save	Rate
Breast Cancers	**193,700**	25	50	35	45	-2	Fair	Good	6.8	-.29	+25%
Prostate Cancers	**198,100**	30	20	25	30	-1	Fair	Good	4.9	-.27	+25%
Radiosurgically treated cancer	**8,000**	40	30	30	10	-1	VG	Excl	.24	.016	+50%
Estimated Totals	**412,000**			**27.5**			Fair	Good	12.2	**-.59**	+20%

The principal tangible value of the CASI technology treatment improvement is in reduction patient morbidity and cost, with an increased productivity. The estimated cost savings of CASI technology in RT planning is a reduction from $1K per average with a savings of $500 in cost savings for the Medical Physics component, a reduction from $2Kper case with a savings of $1K for the Physician Oncologist Treatment Planning, and a reduction estimated of $2K for Radiosurgery. RT treatment typically bills separately for the Medical Physics and the Oncologist treatment plans, so the savings are additive. Taking these cost savings to the national caseload will result in an estimated **national total savings of approximately $.5B / year, if CASI were in production today[2]**. Judging from the response to CASI collaboration offers by various medical specialty groups, there will be strong demand for our technology. **Assuming an average study produces at a $100 charge on the server computer, a 20% capture of the 400K/year new cases for RT treatment planning market, @ 2 studies / case, CASI can reasonably expect a gross revenue of $16M per year from this application alone[3]**. Finally, as explained above above, the national cancer rate is expect to grow faster than the national population growth, given the ageing of the baby boom cohort into middle and old age, where cancer strikes the most. Because CASI will become a web 'monopoly', it will become part of the standard of care for many RT and surgical procedures, CASI can expect much greater market share, as this market opens up and matures.

There are compelling intangible reasons for CASI technology beyond national cost savings and projected CASI revenue. Improved targeting means less total radiation dosage is used. That which is used is more concentrated, thus more effective in tumor shrinkage with less systemic toxicity, and less treatment morbidity (e.g., radiation damage to the heart, and/or lungs in breast cancer treatment, or the rectum and / or bladder in prostate treatment). Benefits for the patient are due to faster treatment planning, better targeting, with less treatment morbidity, and faster recovery.

Benefits to Insurance Companies and HMO's are better quality control; better ROI for imaging studies, and cheaper, faster, and better treatment planning. Insurance pays for 3D reconstruction studies, and RT planning, but at a price that does not permit adequate recovery of capital intensive computers they run on, and expensive software licenses, much less the time and expense of a professional to draft the studies. Typically, the studies cost so much more than insurance pays for them that they are not ordered, and are considered of marginal diagnostic value.

CASI can afford to charge as little as $100 per study, and is shown above, make significant revenue at a price third party payers reimburse. Depending on the application market, CASI or its franchisors, can charge more or less and still make money by the economics of scale, and the low cost and demands on its computer clients. CASI captures benefits from broad diffusion by charging for ASP time and usage, and as such directly benefits from broad diffusion via its bellwether and franchisor commercialization plan.

Application Area	Barrier	Solution
Dental Implant Surgical Planning	Optimal anchorage in inhomogeneous bone, optimal osseointegration	Braided DMT for optimal positioning
Hip Replacement, Finger Joint Replacement, and Orthopedic applications		
Earth Resources Imaging Analysis	Pixel Intensity (too many pixels)	DMT based image understanding
Hyperspectral Satellite Imaging		

[1] Data is from Greenlee et al 2001 CA Cancer Statistics 2001.
[2] Data is from typical NYUMC clinical collaborator billing.
[3] Estimated revenue linearly extrapolated from NYUMC clinical billing estimates and Cancer Statistics 2001 figures.

Application Area	Barrier	Solution
Meteorological Prediction	Isosurface modeling	DMT/SpiderWeb modeling
Craniofacial Surgery	Optimizing complex shapes	Braided DMT
Spine Surgery		
Medical Computer Graphics for Advertising, Medical and Patient Education	Expensive, slow hand segmentation, excessive surface tiling, slow rendering, lack of interactivity	DMT based segmentation and surface relaxation
Medical Computer Animation for Hollywood Entertainment Applications		
Functional MRI analysis	High and Low resolution Image Fusion	DMT image fusion
Visible Human Embryo Project	Pixel Intensity (too many data pixels), Rapid Segmentation	DMT based segmentation and surface relaxation
Visible Human(s) project		
Fluid and Thermal Dynamics	Data complexity	DMT Graphing

5 National Economic Benefits

Business opportunities addressed by this proposal are the technology gap in precise and accurate surface modeling for critical surgical and radiation treatment planning, as well as many scientific applications. By using DMT technology for image and model compression, we will develop the research as an Internet based ASP. CASI will develop its core technology for applications in Radiation Treatment of Breast and Prostate cancer, as well as in neurosurgical planning.

End users and customers include any radiology practice, imaging facility, medical center, and associated individual practitioners. Patients will benefit the most from the interpretative method of CT, MRI, PET, SPECT, *etc* that currently use hand processed stacks of images in designing a treatment. Similarly, anyone attempting to spot critical surgical targets, such as in steriotactic brain surgery, by sighting by the center of bbbby objects in hundreds of slices will be a customer. RT practitioners are most eager to find better methods to eliminate this drudgery, to more precisely locate tumors borders, and are project collaborators.

Competitors are scattered across various application area, using mainly volume rendering technology instead of shell surface technology. Most imaging companies are focused on one technology. Typically, these firms arise from image consulting firms working with one large customer with a specific application in petrology, histology, computer graphics, and so on. There are general-purpose visualization systems sponsored by government research labs (NCAR), and commercialization of large university programs such as ANALYZE (Mayo Clinic), 3DVIEWNIX (U. Penn). Commercial packages include Voxel View, AVS (Advanced Visualization System), Resolution3D, Khoros, Data Explorer DX (IBM) Iris Explorer, VTK tool kit (Kitware) are but a few of the more popular general packages. Some have exceptional interactivit y based on their optimization to special graphics accelerator hardware, now common with the explosion of the computer game industry). Many have intricate and comprehensive facilities for hand segmentation, contouring, snake segmentation, thresholding, flood filling, edge detection, marching cubes, etc. None have the power and insight that Digital Morse Theory based segmentation can do to simplify many segmentation tasks. CASI will never manage to penetrate such a broad spread of markets, but expects that it will license its technology and that will become an important source of revenue and diffusion of our technology and theory into various industry sectors and broader national economy in ways that can barely be foreseen.

Competing RT planning software generally runs on Unix super workstations, based on a slice-by-slice hand drawn or computer assisted contouring. These installations are a department fixed resource. Packages fielded by RT hardware makers are tied to the vendors hardware. Independent RT software houses include Prism Microsystems, and RAHD Oncology planning products. Some sport names like Prowess Systems, for prostate brachytherapy (selling supplies and training through their web site) and Nomos Corporation specializes in Intensity Modulated Radiation Treatment (IMRT) with CORVUS Inverse Treatment Planning. The Radiation Physics departments, at the University of Florida, use and promote the Pinnacle3 Treatment Planning from spun out companies. Oak Ridge National Labs distributes software for RT using Visible Human Data. Most use volume visualization as an aid to review slice-by-slice layout results. None make use of 3D surface

technology because of problems with the technology that CASI solves.

None of these companies is able to directly offer their services via the Internet because of image compression issues and interactivity latency issues. All of these systems were developed before the Internet boom. It will be extremely difficult for them to reinvent themselves as competing ASP's due to the image understanding, modeling, and compression barriers that DMT IP solves.

It is CASI's plan to license its technology to other industries that can apply its technology. Among there are industrial non-destructive testing (industrial CT), meteorology, metrology, histopathology imaging, entertainment industry animation, medical illustration, commercial computer graphics for advertising, virtual reality, air traffic control, multimedia, medical education and training, simulation, topography, mapping, surveying, (not topology) fluid mechanics and dynamics modeling and visualization, hyperspectral scanner imaging, and Earth Imaging Systems (for interpreting satellite imagery).

CASI leads with new ideas that will solve hard multiple industry wide problems. CASI is behind in implementation and building a customer base. CASI will catch up by a leapfrog strategy, taking the fruits of its research directly to the customer and end user.

The core technology intellectual property is protected by US patent #5,898,793 (Karron, Cox, and Mishra, 1999), and so advanced; that there is moderate risk of failing to achieve successful commercialization goals in time.

The benefits to the public are longer life, better quality of life, through improved medical care, at reduced cost through more effective delivery and utilization of medical imagery.

CASI's case for government use of taxpayer funds are based on the large benefits outlined previously. Benefits to the nation beyond those received by CASI are better citizen health and recovery from cancer; a major national health concern and cost. CASI's opportunities in the immediate future are the development of better cancer treatments within a price that third party payers reimburse.

Broader impacts in the more distant future are the scientific discoveries enabled by better and rapid segmentation of volumetric data, and better understanding of complex data relationships where computer graphics tends to obscure intricate objects. Applications include x-ray crystallography and proteomics, advanced computer graphics.

DMT research is pathbreaking because it enables a novel method of analysis for difficult problems in hyperspectral image understanding, x-ray crystallographic determination of molecular structure, and very large data set understanding. These applications are beyond the scope of CASI's immediate research plans, but CASI is anxious to support activities in these areas by business and scientific colleagues in these areas. CASI's development plans for DMT research permit any researchers to submit image stacks of any subject for online analysis. As the usefulness of the analysis becomes clear, the CASI ASP infrastructure can support multiple industries and technologies. For example, semiconductor epiaxial ultra lithography, or the deposition of nanoscale structures in semiconductor fabrication requires modeling of the crystal front growth. Isosurfaces and level set analysis is being used as an important modeling method for this industry. DMT analysis can be adapted for investigating and modeling seed crystal growth, and the role of perturbations and faults in the crystal lattice.

CASI's research opens many pathways to economic activity, many of which we can only dimly foresee at this point. DMT is a novel approach to computational geometry analysis from image data. DMT research is a career path for many young scientists in medical imaging and computational geometry; demonstration of the economic potential will attract entrepreneurial scientists to explore applications and launch new industries outside of academia.

CASI core technology will enable fast and cheap segmentation and registration of large datasets. CASI will exploit this technology for fast and low cost radiation treatment planning, over the Internet. The time required for billable studies will be reduced by hours for faster study throughput.

The main benefit is to patients, with less morbidity from cancer treatment, and better treatment throughput for treatment planners by physicians and medical physicists. Many hospitals and private practices will benefit, as they will not need to invest in expensive computers and software licenses to use CASI technology via its ASP web browser clients.

Isosurface modeling is an important method of data analysis in many physical science areas. Isosurfaces are of major benefit to meteorology, fluid and thermal dynamics, hydrodynamics, and solid-state physics. Isosurfaces are vital in x-ray diffraction studies to establish molecular structure for many biochemical applications, including proteomics. Traditionally, these are painstaking, long studies, where the two main bottlenecks are getting an unknown substance to crystallize, and the other is to fit a molecular backbone around the electron density isosurfaces. As CASI DMT provides an index of all of the objects in a density field, this will have important spillover benefits in the physical and basic medical sciences.

Synergy will be achieved with other computational geometry groups working in level set theory and advanced computational geometry research. CASI offers a cheap and accessible embodiment of Digital Morse Theory object mapping that will promote research in other groups that may not have the computing resources to model larger data sets, or money for expensive software packages. Surface modeling is complementary to volume imaging, which is the dominant visualization technology for computer graphics.

By developing DMT technology as an ASP, it will not require extensive technical abilities for others to run sample studies. Casual web surfers can also submit images or image stacks for sample analysis and modeling.

The PI and CASI have published its research findings in both the professional literature and via the CASI corporate web site at http://www.casi.net/. Publications range from Cox, Karron, and Mishra in 1993 to Karron and Cox, Karron, and Ferdous in 2001. Additional papers and presentations are underway for other national meetings such as Medicine Meets Virtual Reality 2002.

6 Need for ATP Funding

ATP Funding is needed because CASI's goal is to make a technical forward leap with the DMT based modeling and develop a business model to rapidly bring it to market. CASI needs the funding to focus on its core technology, and then the production of anatomic modeling for RT planning. Building on preliminary results with the NIH Visible Human Project (VHP), CASI will create new markets that will be profitable within five years.

Equity markets, in general, have a cloud of uncertainty over them at this time, which translates into investors staying on the sidelines. While we observe this somewhat in publicly traded equities, it is even truer of the illiquid private equity marketplace. Generally, the current requirements, among others, for private equity investors is that:

1. Profitability can be expected within two years.
2. The technology is reduced to practice.

CASI had made a significant effort to obtain private equity funding for this activity. A number of high net worth individual investors have been approached, as well as venture capital funds and corporations with bids to Toucan Capital Corp, Global Business Network, CMMC Ventures, Inc, Sumitomo Corporation of America, Madison Partners, Bristol Meyers Squibb, Paramount Capital and the Herrick Fund. CASI's proposal was uniformly rejected mainly for the reasons cited above.

Other potential sources of funding, which are not appropriate as follows:

1. NIH clinical funding is appropriate for funding specific disease applications, but not for funding the basic core modeling technology. NIH Funding will be pursued with our clinical collaborators in this project.
2. NSF funds universities. The pursuit of widespread academic acceptance is slow, and will not solve critical medical and industrial problems. NSF SBIR grants are inadequate and too short

term.

3. Medical and other imaging companies have stake in their own products and may fund research in their specific imaging technology. CASI's experience with imaging hardware companies is that they tend to restrict the research, with unacceptable intellectual property, publication, and marketing demands. Previous corporate sponsors of this research (SGI) pulled the plug with market downturns and when individual sponsors within the corporate structure leave, so does their support.
4. DoD SBIR Funding is too small and short term, with a heavy reporting burden. CASI has experience with staccato 6-month Phase 1; halt, 18-month Phase II efforts. This is a suitable mechanism for applied development efforts of more mature technology, but not for the sustained fundamental research proposed here.

6.1 The ATP difference

No one industry or medical superspeciality has the patience and broad view to fund this effort for the general utility. Segmentation and registration issues impede progress in many disparate medical and scientific fields.

ATP can support the technical innovation and business risk of developing DMT technology into an infrastructural network resource for everyone on the Internet. This has too long of a ROI, and is too broad in its ultimate utility for private investors. ATP sponsorship will enable CASI to implement DMT algorithms for everyone on the net instead of proving them on paper for other mathematicians. DMT grew to solve the PI's painful problems doing image analysis projects for anatomic modeling. Anyone doing these studies can appreciate the utility and need for this proposed resource. CASI could win many more contracts if the facilities proposed here, were already in production. Clients feel ignored because CASI is focusing on research instead of directly applying itself to the clients' immediate problems with conventional hand editing solutions. CASI prefers not to give up the intellectual property rights. This broad risk weighed aganst broad national benefit requires a funding agency with a broad view and willingness to take a patient return on investment.

People are dying from treatment failures. Better treatment planning and evaluation will avert these deaths. Academic, industrial then commercial diffusion is too slow and ponderous; CASI will bring the fruits of its research directly and immediately to its clinical collaborators; and then to the medical and scientific public at large via its rapid ASP development plan. Working in parallel with commercial franchise implementers will further speed up the diffusion of CASI technology from a Brownian motion to a directed explosion.

6.2 ATP acceleration of the technology development

ATP's sponsorship provides not only acceleration in the rate of DMT computational geometry research, but a qualitative difference in the way this academic research is perceived. Demonstrating the economic value of this deep mathematical insight will stimulate more research to be developed by mathematically oriented scientists into economically and nationally beneficial projects.

The European Union (EU) has traditionally respected advanced mathematical concepts, as evidenced by EU investments in computer vision and graphics research. American technology development has tended to focus more on expensive hardware, and possibly neglected the benefits that a deeper understanding can bring (cheaper hardware, less overbuilt systems, better precision and accuracy).

If ATP declines to fund this project, the DMT research will limp along as a sideline to CASI image contracting and the PI's student dissertations.

Without ATP funding CASI will become a contract programming shop, hindered by its unimplemented ideas. Meanwhile the EU will move first into advanced image understanding on a theoretical level. Buggy academic software packages will follow from graduate students. New

modeling technology will appear first in Siemens medical imaging equipment, and then GE will license it. Eventually the state of the art in computational geometry will catch up to DMT. Research implementations could start appearing in 6 years, and software-containing DMT inspired package features appearing in 8 to 10 years.

CASI's goal is to leapfrog this slow, wasteful, and ponderous mechanism of incremental and diffusive scientific advancement.

6.3 CASI angel and VC private funding efforts

Mr. E. Gurfein, an early technology participant, with long experience in early technology development, was attracted to CASI. Mr. Gurfein cannot raise private equity funding at this stage, yet he is willing to invest significant personal effort managing this project with the intent of raising private capital as CASI risk decreases sufficiently for private investment.

This research is in danger of failure caused by under-funding. CASI cannot do production contract programming and push the state of the art without adequate funding for research as well as production coders, product support, and business/marketing people.

7 Pathway to Economic Benefits: CASI commercialization strategy

CASI prospective customers are in two broad classes: Primary customers deal directly with the CASI ASP in the RT markets, while secondary customers deal with franchisors, who resell and package the CASI ASP server under their own label.

Primary customers include radiological image producers, medical imaging practices, and image consumers. They will use the CASI web services for better communication and distribution of their product with their client physicians. The technology will enable RT collaborative planning (studies with multiple drafters) at academic medical physics departments, as well as at physicians' homes, on the road, and at primary care community hospitals (which generally don't have the most sophisticated resources).

Secondary customers are customers attracted by franchisors' and CASI marketing activities for secondary application area. Example include cosmetic plastic surgeons planning craniofacial cases, implant oral surgeons planning a full mouth implant procedure, as well as computer graphics firms. Patents will demand it of their surgeons, particularly if the patients currently of patients as informed consumers, shopping for doctors. Patents increasingly want to know precisely what their surgeon will do to and for them. An emerging class of medical imaging applications is vanity radiology and imaging, particularly if the images are animated, colorful, engaging, and fun and easy to explore. Patients are doing full body scans at their own expense without any motivating clinical reason, looking for pre-clinical or subclinical problems, as part of the trend to comprehensive and expensive wellness medicine (Tuller 2001).

7.1 CASI technology development through bellwether early adopters and implementer-franchisers

Bellwether early adopters are a special class of clinical and scientific professionals who are the first to recognize and try to use early stage technology. These are technically sophisticated users willing to pay a high price for new technology and can manage to use it despite the bugs and problems. Their motivation is not profit. They are generally employed at academic medical centers and are highly respected by their peers and colleagues. Their recommendation for a new technology can catapult it into the broader market of less sophisticated users. The PI knows a number of these professionals in dentistry, endoscopic surgery, ENT, plastic surgery, craniofacial surgery, oral surgery, neurosurgery, ophthalmic, retinal, histopathology, obstetric surgery, orthopedic surgery, among others. CASI will collaborate by assisting these users in the development of CASI core technology in their specialty.

CASI will foster the business development of its technology in other application areas by working with franchisors. These are profit oriented software developers who see the utility of CASI technology in a problem area they have expertise in, and have the sophistication to write front-end browsers that address specific problems of the application area. They can be affiliated with bellwether early adopters. CASI will host private label web sites that have a special look and field given to it by its implementation franchiser. CASI will support potential implementer-franchisors by the development sample applications to stoke and demonstrate demand. Franchise fees will help fund for implementation costs. Each use of the CASI modeling technology will result in a charge to the account holder, and a credit to the franchiser. CASI technology is not specifically licensed, but leased to a franchise holder. CASI manages the back end image decomposition and segmentation, as well as billing and royalty collection. An example potential franchisor and end user is the Anatomic Travelogue (http://www.anatomicaltravel.com/), a neighboring NYC medical computer animation house.

CASI will take the major role in introducing the technology to marketplace through the CASI web site, professional marketing, communications, and commercialization activities. These consist of publication of papers in archival journals, conference presentations, and software demonstration at booths rented at major meetings. The CASI web site will provide free samples of the technology as the research emerges and becomes a working application. See the table below for representative professional outlets that the PI has presented at, is invited to present at, is publishing at, and will publish in. CASI understands the market from many perspectives, from surgical virtual reality, surgical simulation to functional neuromagnetic modeling and medical illustration/animation. The PI has observed the nature of the medical image market as a fragmented industry, with many independent minded clinical academic researchers with little cross specialty communication.

7.2 Professional Marketing Venues and Outlets

Archival Journals	**Date**	**Action**
Journal Of Mathematical Imaging and Vision	Fall 2001	Paper submitted and accepted
Graphical Models and Image Processing	Fall 2001	Paper submitted and provisionally accepted
Professional Society Meetings		
Society of Industrial and Applied Math Activity Group on Imaging Science: Imaging Science 2001 meeting	Oct 2001	Member. Invited Presentation
American Association of Physicists in Medicine 2001 Annual Meeting	July 2002,3,4	Member Presentation planned
Association for Computing Machinery (ACM) Special Interest Group on Graphics (SIGGRAPH)	Aug 2002,3,4	Member Submission, booth Planned
American College of Radiation Oncology	July 2002	Targeted society, submission planned
American Brachytherapy Society	June 2001	Targeted society, submission planned
Medical Conferences		
Medicine Meets Virtual Reality 2002	Jan 2002,3,4	Abstract submitted for presentation Booth for demos
IEEE Workshop on Scale-Space and Morphology in Computer Vision Scale-Space'02	July 2002	Senior Member Submission planned
IEEE Workshop Variational and Level Set Methods in Computer Vision	July 2002	

CASI submitted abstracts and made provisional reservations for a booth at Medicine Meets Virtual Reality 2002. CASI has standing invitations to publish in major mathematical computational geometry journals, and invitations for various specialty meetings. CASI will also publish and sponsor publication in the clinical literature, specifically in the Radiation and Oncology literature, the Neurosurgical literature, and present at various national meetings with its clinical collaborators. Bellwether academic collaborators are particularly eager for the publication opportunities CASI

presents. CASI expects to present at 12 major meetings a year by the third year of the project as PI and as collaborator.

7.3 Strength, Weaknesses, Opportunities, Competitiveness

CASI strength is its strong theoretical rubric (a broad setting bigger than just the algorithm being commercialized here) that can tie together many disparate schools of imaging science. DMT is becoming a popular idea, and students are seeking the PI as a dissertation research advisor.

CASI's weakness is the lack of widely available computer demonstrations. Currently, CASI software runs only on high-end SGI graphics workstations. This will be changed with ATP support, so that DMT analysis can be obtained from any web browser client, with the hard pixel crunching occurring on a much larger and capable server host.

CASI opportunities from a competitive standpoint are strong; there are no web based medical image to 3D modeling services in operating, or under development in the near term

CASI has no direct competition to its core technology of the indexing and segmentation of large image datasets via thin web clients in an ASP environment as of now.

The international markets on the Internet do not respect national boundaries, only cultural, intellectual, and language barriers. There is better acceptance and understanding for computational mathematics in the EU, as The PI's first isosurface papers were published in France. International diffusion will be faster in the EU as the main locations for basic R & D in medical imaging are European. This is evidenced by the sponsorship by the French Government Research Consortia INRIA and the Siemens Corporate Research and Development organization of two important research conferences in the closest related areas. These are the IEEE Workshop Variational and Level Set Methods in Computer Vision at the University of British Columbia, and Scale-Space'01: IEEE Workshop on Scale-Space and Morphology in Computer Vision in 2001, and the annual Eurographics conference

7.4 CASI plan for bringing initial application to market

CASI technology's primary application is RT planning. CASI will develop an ASP for its DMT modeling technology, and develop specialized web based front ends for RT with its clinical collaborators at NYUMC Radiation Physics. As the technology matures, users (or their patients) will begin to pay for connect hours and pixels/vertices processed, with the average case billing from $100 to $500; taking approximately 10 to 90 minutes. Physician users will keep saved cases on the server, and be able to allow patients to log in and see exactly what the clinician is proposing for the patient. This will help sell the case to the patient, and to third party payers. Additionally, records of the patient (patient electronic camera images, intraoperative photographs, patient video and audio) can be stored and fused with the radiological information to provide a comprehensive electronic patient multimedia record.

CASI's direct customers are breast cancer and prostate cancer patients, and their insurers. End users are the patients physicians, medical physicists and oncologists doing patients cancer cases. Patients, insurance companies, and other third party payers will be directly charged for CASI and / or study fees directly over the Internet B2B technology with on-line credit card charges or deposit accounts.

There are other competing image processing, virtual reality, and RT packages, as discussed above. These packages have a high capital cost, and require significant computers. None are available as ASP services due to current technology limitations in image compression and network bandwidth and latency. Established users of these packages will be attracted by CASI technology by free sample studies with their data. CASI will package its technology using emulation "skins", even emulating the features that CASI obsoletes so that users of competing packages get what they want, expect, and think they need.

CASI has an ambitious, but robust research plan. The most significant research risk is the failure to achieve acceptable interactivity for image segmentation and model manipulation over slower Internet connections of the expected of many small physician users. CASI expects that faster and cheaper Internet bandwidth will become ubiquitous, and reduce the project dependence on extreme data compression that is characteristic of most web based multimedia software. Should it become necessary, CASI will market a version of its software to run on Linux workstations with graphics accelerator cards, with traditional software licensing. Some customers may insist of this model of software as product, not service.

The next level of research risk is computational loading of the CASI server with image indexing and modeling code that bogs down the system and creates unacceptable user performance. Users who submit very large image stacks may cause problems for all users on a shared server. Significant work will be invested in optimizing the code to run in a high-level server computer environment with maximal efficiency. By the third year of this project CASI will have experience with issues of alpha tester computational loading to be able to estimate the costs of scaling the server to meet user demand growth projections. The worst case is that CASI will have to utilize supercomputers instead of server computers

Many commercially successful medical, animation, and image processing software packages do not push the state-of-the-art. Successful software packages are mainly customer driven, not research / technology driven. Software is a service industry. As long as CASI customers obtain a superior service, even before the core technology development is completed, the company can produce a useful and profitable product. CASI will have responsive and productive programmers building software for our alpha customers. CASI will build demonstrations that convince prospective clients that DMT is the way to solve their problem. It will take three years to do this. ATP funding is required to build the software services that will solve customer problems before they realize that they need it, and convince them that they cannot live without it. However, should there be problems with the PI's technology development, CASI programmers can fall back to what more conventional technology customers expect, and in the absolute worst case, produce a useful and profitable program without full utilization of DMT based modeling or ASP functionality.

CASI intellectual property protection is by PI's key US Patent #5,898,793, issued in 1999 under the old patent rules, so that the term of the patent is valid for the next 15 years. CASI technology is an ASP, and since the algorithms run on a CASI server, the algorithm is protected because it never leaves the company premises.

8 People and Organizations: Experience, Qualifications and CASI Commitment

CASI facilities and equipment consist of fully networked office space for three full time programmers, three SGI indigo2 extreme graphics super-workstations, three client PCs, a NT4 fileserver, and a Power PC PowerMac. The CASI computing and network environment is superior to many academic and medical departments, due to the PI's experience as system administrator for computer operations in various medical departments. The PI has been running the www.casi.net website for five years and it is a well-known and indexed Internet resource. The website attracts consulting clients, contract work, as well as medical and doctoral students. The site hosts the PI's academic BioInformatics graduate class web site. CASI administrative resources include online payroll processing, record keeping, accounting, and budget management and fiscal reporting. The PI has experience with the FAR and DFAR.

Subcontractors CISDD provide access to CUNY faculty, and collaborators at New York University Medical Center will provide clinical facilities, Medical Physics and clinical expertise, and medical imaging data and equipment.

The PI has entrepreneurial experience ranging from building a trucking company to East

Village NYC real estate (RE) renovation and development, all while in college. The RE financed the PI's pre-medical academic bid for medical school; that led to a job in the plastic surgery department at NYUMC. The PI also has extensive 'intrapeneurial' experience, promoting early computer networking technology within medical school in the early 80's. This is the ability to promote and launch projects inside large organizations. After earning a PhD at NYU Applied Science in Biomedical Engineering in 1993 and serving as a medical school research professor, the PI won the first of three DARPA SBIR grants and launched CASI in 1995. The PI's father was an entrepreneur, with a family manufacturing business reaching back two generations.

Mr. E. Gurfein is President and Principal of Meridian Resources and Development, Ltd in Englewood, NJ, which provides consulting and equity financing for companies and projects. He was previously with Philipp Brothers, Inc., (now Salomon Brothers), New York as Vice President for projects, performing analysis, negotiations, and financing of major international and domestic infrastructure projects involving mines, petrochemicals, metal processing, oil and gas pipelines, and power generation. He has served as Project Finance Manager for pipeline construction projects in Bolivia and Argentina from 1969 to 1972. He was a member of the Board of Directors of The Mates Fund, a mutual fund in New York from 1969 to 1974. He served as Programs Manager-Defense Department and NASA projects for Perkin-Elmer Corporation. His principal marketing responsibility was for the Hubble Telescope, among other space projects. Mr. Gurfein earned a BS at The City College of New York, a Diploma at the Industrial College of the Armed Forces, and an MBA at The University of Connecticut. Mr. Gurfein was a Captain in the US Army Ordnance Corps, serving as a ballistic missile R&D officer. Publications include "Infrastructure Project Finance" (1997) by the United Nations Department of Economic and Social Affairs, Interregional Workshop on Developing Project Financing, Bangkok.

Dr. G. Wolberg earned a BE and ME (EE) at the Cooper Union in 1985 and a PhD in Computer Science at Columbia University in 1990. He wrote "Digital Image Warping" in 1990 and the following year he was awarded a NSF Presidential Young Investigator Award.

Name	Affiliation	Effort	Project Responsibility	Relevant Experience and Expertise
Core Members	CASI PI, CCNY	100%	Will write DMT core code on server, market technology	PI, DMT inventor, C++, computational geometry, computer graphics, algorithm development.
D B Karron, PhD				
G Wolberg, PhD	CUNY, CASI	75%	Server DMT Image matching code	Programmer. C++ programmer, algorithm development, digital image warping expert
Prof J L. Cox, PhD	CCNY	10%	Algorithm Development	DMT co-inventor, analysis of algorithms.
Mr. E Gurfein, MBA	Meridian Resource and Development, Ltd.	75 %	Project Management and fundraising.	VC fundraising for biotech, medical device, and chemistry startups; engineering venture capital
Consulting Members	CCNY	10%	Algorithm Development Braided DMT for Trajectory Planning	Encryption, Braid Theory, Computational Geometry
Prof M Anshel, PhD				
Prof G Herman, PhD	CCNY	10%	Algorithm Development	Theory of surfaces, image segmentation, digital topology
Prof F Bookstein, PhD	University of Michigan	10%	Algorithm Validation	Morphometrics, medical imaging and applied math
Clinical Participants	NYUMC Radiation Oncology	5%	Clinical Evaluation and Alpha testing	Breast cancer warrior using radiation therapy beams.
Chair S. Formenti, MD PhD				
Prof J K Dewyngaert, PhD	NYUMC Radiation Oncology	10%	Clinical application development	Radiation physicist; Specialist in prostate \cancer research using radiation and brachytherapy
Prof Col (Ret) R A Satava, MD	Yale University Medical Center Dept. of Surgery	5%	Clinical application development	Endoscopic and Virtual Reality in Medicine pioneer
Professor L. Liebis, PhD	NYU MC	5%	Clinical evaluation	Instrumentation specialist. Statistical epidemiology,
Chair R. Bucholz MD,	St. Louis University Med Ctr, Dept of Neurosurgery	5%	Clinical Product Development	Neurosurgeon and medical technology entrepreneur Steriotactic neurosurgery system inventor
MD and or PhD graduate students	CUNY Graduate Center		Recruited as required	Java programmer. System administrator. Web site

Name	Affiliation	Effort	Project Responsibility	Relevant Experience and Expertise
To be named; three total	New England College of Medicine			designer and user interface tester, Medical Clinical Liaison

Notes on Above: Dr. Wolberg will devote part time effort to this project in the first year, increasing to full time in the second and third year, depending on the demands of the NAVY SBIR for which he is PI and will be an employee. Mr. Gurfein will devote more than half time professional effort to this project, increasing to full time in year three (not indicated in original budget). Drs. Herman, Cox, and Anshel will be funded through the CISDD subcontractor since they are full time CUNY tenured faculty working summer and part time during the academic year involvement is subject to release from teaching load by their respective departments. Non-tenured faculty are not subject to this requirement. Dr. Bookstein and Dr. Satava will be employed as a private consultant at the rate of 100$/hour for a maximum of $2000/Y, subject to change in project year maximum. Clinical Collaborators Drs. Formenti, Liebis, Dewyngaert, and Bucholz are not going to be compensated in the first year because CASI will be focusing on researching its core modeling technology, not clinical applications. CASI will be participating in obtaining NIH clinical funding that will pay for CASI clinical development and NYUMC research in alpha product development and professional commercialization. This is subject to change in the second and third project year depending on the availability of NIH funding.

9 Brief CASI history and performance

CASI incorporated in 1995, and is less than 10 years old. CASI formed while the PI was a research professor of surgery in cardiothorascic surgery at NYUMC. The PI won a DARPA Phase I SBIR (100K). The PI left NYUMC to devote full professional effort to the DARPA project. Subsequently, CASI won various small consulting subcontracts, a Phase II SBIR (650K$), Phase III (100K$), and a contract to explore Digital Morse Theory also at DARPA. The PI is President and CTO. CASI is a NY class C Corporation. The PI owns 100% of CASI, which is a small business.

Sponsored by Col (Ret) R. Satava, MD at DARPA, Tactical Audio Displays (TAD) helped launch CASI, which developed surgical navigation technology using computer music and 3D spatial sonification, enabling surgeons to navigate instruments inside the body without looking at or through a visual display. A US Patent was obtained (Wegner and Karron. 2000). The PI's effort to build or find a market for this technology has not yet achieved success. Adopters have been other university professors (E. Jovanov and M. Quinn). DNA and Protein sequence sonification was another effort to apply computer music and sonification technology.

Significant Federal R&D awards within the past five years in the same general technical area indicating feasibility of technical claims

Agency	Year	Description of the work	Accomplishments	PI	PM
DARPA	1998 - 1999	Digital Morse Theory Exploratory Studies	Rapid 2D contouring, Critical Point identification, DMT Karron/Cox/Ferdous Dissertation and Paper	DBK	D. Healy, DARPA ACMP **dhealy@darpa.mil**
NIH VHP / U of Michigan	2000 - 2001	Segmentation for medical education content development	3D Color contouring, rapid segmentation; Karron 2001 presentation	DBK	D. Jenkins NIH **jenkins@nlm.nih.gov** T. Yoo, NIH, **yoo@nlm.nih.gov** B. Athey, U Mich **bleu@umich.edu**

CASI is submitting a NAVY Phase I SBIR for "Omnidirectional surveillance of carrier flight deck activity". The proposal eliminates camera operators and TV cameras that record aircraft takeoff and recovery operations with omnidirectional video systems. The geometric distortion is corrected using computer image warping and fused using DMT technology. The PI on this project is Dr. G. Wolberg

9.1 Financial and Employment Information

Income Statement	1998	1999	2000
Revenue	250,000	100,000	32,000

Cost of Sales			
R & D Expenditures	250,000	100,000	60,000
Net Income before Taxes	0	0	0
Net Income	0	0	0
Balance Sheet			
Total Assets	100,000	200,000	200,000
Total Liabilities	65,000	40,000	20,000
Net Worth (Owners Equity)	45,000	160,000	180,000
Employment Information			
Full Time Employees	2	1	1
Part time Employees/Contractors	3	1	2
Full time R & D Personnel	2	1	1
Part time R & D Personnel	1	0	0

Fiscal and Employment Table Notes: The CASI TAD project was funded for approximately $850K in DARPA SBIR Phase I, II and III from 1996 through 1999, the bulk of which was used in 1997 and not show on this table. The company entered the technology development 'valley of death', where basic R & D funding ends and commercial funding picks up the research. The PI has decided not to further pursue TAD commercialization, and is negotiating with colleagues interested in picking up academic funding with the CASI prototype equipment. The crash in CASI income in 2000 was due to two disastrous military and academic subcontracts

w/p summary of award + Amendments

Award 9/29/01	Year 1	Year 2	Year 3		Cost Share
ATP	800,000	600,000	600,000	2,000,000	96.39%
Cost Share	36,500	30,500	43,500	110,500	3.61%
Subtotal	836,500	630,500	643,500	2,110,500	

Amendment #1 - 10/24/01 — No money changes

Amendment # 2 - 1/4/02	Year 1	Year 2	Year 3		
ATP	800,000	600,000	600,000	2,000,000	95.64%
Cost Share	36,500	30,500	43,500	110,500	4.36%
Subtotal	836,500	630,500	643,500	2,110,500	

Amendment # 3 - 7/16/02 — No Money Changes, however, cost share changes

	Year 2	Cumulative
Cost Share - NIST	4.84%	4.57%
Cost Share - CASI	95.16%	95.43%

Amendment # 4 - 7/23/02 — No Money Changes — Puts recipient on ASAP and removes requirement for SF-272

Amendment # 5 - 12/17/02 — No Money Changes

Amendment # 6 - 6/27/03 — Suspends the award for con-compliance of Special Award # 7 - cost share

Purpose: To schedule and analyze the Financial Assistance Award and Amendments for Award Number 70NANB1H3050.

Source: Copies of the Financial Assistance Award were provided from the CASI files by Bob Barnett, the business manager, and from NIST files by Hope Snowden.

Scope: The audit period is 10/01/01 through 6/27/03.

Details / Conclusion: ASI a for-profit company, received a single company NIST ATP award # 70NANB1H3050 on 9/29/01 for $2,110,500. The first year was for $800,00 federal and 3.61% cost share. Amended #2 increased the cost share to $110,500 (4.36%). The award was amended several times and suspended by amendment #6, on 6/27/03 for non-compliance with cost share requirement.

TOTAL ESTIMATED COST	$843,000.00	$0	$0	$843,000.00

REASON(S) FOR AMENDMENT

This cooperative agreement is being amended to change the administrative contact.

This Amendment approved by the Grants Officer is issued in triplicate and constitutes an obligation of Federal funding. By signing the three documents, the Recipient agrees to comply with the Amendment provisions checked below and attached, as well as previous provisions incorporated into the Award. Upon acceptance by the Recipient, two signed Amendment documents shall be returned to the Grants Officer and the third document shall be retained by the Recipient. If not signed and returned without modification by the Recipient within 30 days of receipt, the Grants Officer may unilaterally terminate this Amendment.

Re: Lee Gurfein

Dear Ms. Hope Snowden:

This letter authorizes Mr. Lee Gurfein as administrative contact on Cooperative Agreement No 70NANB1H3050 with Computer Aided Surgery, Inc.

This authorization is valid for the period of one year from the start of the Agreement on October 1, 2001 through Sept 30. This authorization can be revoked in writing to you and him by myself at any time this authorization is in effect. Until specifically authorized to do so, Mr. Gurfein is not an officer of the corporation, and is not authorized to sign for the corporation. The authorization for Mr. Gurfein to commit the corporation will be made by separate letter authorization if the need arises.

Sincerely,

October 26, 2001

Dr. D. B. Karron

ADVANCED TECHNOLOGY PROGRAM – SINGLE RECIPIENT
COMPUTER AIDED SURGERY, INC.
COOPERATIVE AGREEMENT NO. 70NANB1H3050
AMENDMENT #02

IE FOLLOWING SPECIAL AWARD CONDITIONS ARE MENDED:

RECIPIENT ADMINISTRATOR CONTACT

ıe Recipient Administrator Contact's name, title, address, and lephone number are:

Administrative) Elisha Gurfein
Computer Aided Surgery, Inc.
300 East 33rd Street, Suite N
New York, NY 10016
Phone: (201) 569-4482
Fax: (212) 448-0261

. PROJECT DESCRIPTION

research shall be conducted in accordance with the ecipient's proposal dated 07/06/01, and all revisions/late ocumentation dated 09/20/01, including revised budget dated 2/27/01.

. FUNDING LIMITATIONS

he scope of work and budget incorporated into this award cover three-year period (referred to as the "project period") for a total mount of $2,000,000.00 in Federal funds. However, Federal unding available at this time is limited to $800,000.00 for the rst year period from 10/01/01 through 09/30/01 (referred to as ıe "budget period"). The Grants Officer may require additional larification to support the budget. If that results in changes to ıe budget or budget narrative, the Recipient shall submit, in vriting, a revised budget and/or budget narrative to the Grants)fficer for approval. Receipt of any funding beyond the first year p to the level projected under this award is contingent upon the vailability of funds from Congress, satisfactory performance, and vill be at the sole discretion of the National Institute of Standards ınd Technology (NIST). The Recipient may not obligate, incur ıny expenditure, nor engage in any activity that involves a ommitment of Federal funds under this Agreement in excess of he Federal amount presently available. No legal liability exists or vill result on the part of the Federal Government for payment of ıny portion of the remaining funds, which have not been made ıvailable under the award. If additional funds are not made ıvailable, any expenses incurred related to closeout activities t be funded from the amount already made available under award. The notice of availability or non-availability of additional funding for the second and third year(s) will be made in writing by the Grants Officer. Only the Grants Officer is authorized to obligate funds. No other verbal or written notice should be relied upon by the Recipient. In the absence of a written notice of additional funding, no assumption should be made by the Recipient that the funds will be forthcoming.

Projected budget amounts and periods:

Year 2: $600,000 (From 10/01/02 to 09/30/03)
Year 3: $600,000 (From 10/01/03 to 09/30/04)

7. COST SHARE

For the first year period, the cost sharing ratio (direct costs only) applicable to this award is the Recipient's contribution of 4.36% ($36,500) and NIST's contribution of 95.64% ($800,000).

9. REQUIREMENT OF ACCOUNTING SYSTEM CERTIFICATION

The above Special Award Condition placed in the original award document is removed, as the requirement has been satisfied.

ALL PRIOR TERMS AND CONDITIONS REMAIN THE SAME.

ESTIMATED MULTI-YEAR BUDGET - SINGLE COMPANY

OBJECT CLASS CATEGORY	YEAR ONE	YEAR TWO	YEAR THREE	TOTAL
A. Personnel Salaries/Wages	$ 325,000	$ 375,000	$ 375,000	$ 1,075,000
B. Personnel Fringe Benefits	110,500	127,500	127,500	365,500

"Dr. D. Karron." <karron@casi.net>
Subject: Request for Approval of Proposed Budget Changes

Upon review and reconsideration of the approved budget, we are submitting the following changes for your approval:

A. Personnel Salaries/Wages from $375,000 to 325,000 -$50,000

B. Personnel Fringe Benefits from $127,500 to $110,500 -$17,000

C. Travel from $4,000 to $20,000 +$16,000

D. Equipment from $120,000 to $110,000 -$10,000

E. Material from $0 to $11,000 +$11,000

F. Subcontractors from $200,000 to $250,000 +$50,000

Net Change 0

Reasons for requested budgetary changes:

A. In an effort to get more for each dollar, we intend to engage Prof. George Wolberg as a consultant for well defined assignments instead of as an employee (-$100,000). However, we are adding two employees: one Financial Control Specialist (+$25,000) and one Systems Administrator (+$25,000). Net change: (-$50,000).

B. Fringe benefits are reduced by 34% of $50,000, because of reduction of $50,000 in Personnel Salaries. Net Change:-$17,000.

C. The travel amount budgeted was much too low. Based on expected travel for giving papers, attending relevant symposia and meetings, we request an increase to $20,000. Net change: +$16,000.

D. Based on some discounts that we are negotiating, we propose to reduce the equipment costs to $110,000. Net change:-$10,000.

E. Material: Various items for equipment and data services are estimated at $11,000. Net change: +$11,000.

F. Changing George Wolberg from employee to subcontractor adds +$100,000. NYU Medical Center and CUNY are expected to be subcontracted for $50,000. With an additional total of $50,000 in subcontracts to several consultants, the revised number for subcontracts is $250,000. Net change: +$50,000.

The net change for all the above changes is zero.

Please consider these requested changes and advise at your earliest.
Sincerely,
EGurfein

RE: Accounting System Certification
Computer Aided Surgery, Inc. (CASI)

Dear Ms. Snowden,

We have conducted a survey to determine the capabilities of the accounting system to be used by Computer Aided Surgery, Inc. of New York City, New York, for recording costs under a government sponsored grant to be awarded by the National Institute of Standards and Technology (NIST).

Our evaluation has confirmed that Computer Aided Surgery, Inc. has an accounting system in place that is capable of meeting the requirements of 15 CFR Part 14.21 Standards for financial management systems, as it relates to recording and accumulating costs under a government-sponsored grant.

We conclude that the accounting system has the capability of separately recording allocable costs under the NIST grant in conformance with the applicable cost principles as contained in the Code of Federal Regulations 48, Part 31.

Our effort on this engagement was limited to the specific agreed-to procedure identified in this letter. It did not include an audit or other verification of any cost data.

Sincerely yours,

Jill C. Feldman, CPA, PC

SPECIAL AWARD CONDITIONS
ADVANCED TECHNOLOGY PROGRAM – SINGLE RECIPIENT
COMPUTER AIDED SURGERY, INC.
COOPERATIVE AGREEMENT NO. 70NANB1H3050
AMENDMENT NO. 04

HE FOLLOWING SPECIAL AWARD CONDITIONS ARE MENDED:

I. AUTOMATED STANDARD APPLICATION FOR PAYMENT /STEM (ASAP)

This SAC amends the Department of Commerce Financial ssistance Standard Terms and Conditions, dated **October 998**, Section A.02, Award Payments, and the Advanced chnology Program (ATP) General Terms and Conditions, ited **August 2001**.

The advance method of payment shall be authorized unless herwise specified in a special award condition.

Payments will be made through electronic funds transfers, ing the Department of Treasury's Automated Standard plication for Payment (ASAP) system, and in accordance he requirements of the Debt Collection Improvement Act 1996. The following information is required when making ithdrawals for this award: (1) ASAP account identification (id) award number found on the cover sheet of this award; (2) gency Location Code (ALC) = 13060001; and (3) Region ode = 01. Recipients **DO NOT** need to submit a *"Request for dvance or Reimbursement" (SF-270)* or a *"Federal Cash ansactions Report" (SF-272)* for payments relating to this ward. If you are not enrolled as an ASAP Recipient rganization you must complete the enrollment process with our Federal Reserve Bank, Regional Finance Center. rollment applications and information can be found at the llowing web site:

tp://www.fms.treas.gov/asap/handbook.html

you need a paper copy of the enrollment documentation ease contact the Grant Specialist responsible for this award.

dvances taken through the ASAP shall be limited to the inimum amounts necessary to meet immediate disbursement eeds. Advanced funds not disbursed in a timely manner must promptly returned, via an ASAP credit, to the account from hich the advanced funding was withdrawn. Advances shall for periods not to exceed 30 days.

Funds that have been withdrawn through ASAP may be turned to ASAP via the Automated Clearing House (ACH) or FEDWIRE. The ACH or FEDWIRE transaction can only be by the Recipient's financial institution. Full or partial nounts of payments received by a Payment Requestor/Recipient Organization may be returned to ASAP. All funds returned to the ASAP system will be credited to the ASAP Suspense Account. The Suspense Account allows the Regional Financial Center to monitor returned items and ensure that funds are properly credited to the correct ASAP account. Returned funds that cannot be identified and classified to an ASAP account will be dishonored and returned to the originating depositary financial institution (ODFI).

It is essential that the Payment Requestor/Recipient Organization provide its financial institution with ASAP account information (ALC, Recipient ID and Account ID) to which the return is to be credited. Additional detailed information can be found at

http://www.fms/treas.gov/asap/pay-return2.pdf.

e. This award has the following control or withdraw limits set in ASAP:

__X__ None
____ Agency Review required for all withdrawals (see explanation below)

f. Term # 7.c(3)(b) TO THE ATP General Terms and Conditions, dated **August 2001**, is deleted in its entirety to remove the requirement for a "Federal Cash Transactions Report" (SF-272).

g. Term # 14. TO THE ATP General Terms and Conditions, dated **August 2001**, is deleted in its entirety and replaced with the following:

REFUNDS

This special award condition remains in effect under this award and applies to all payments that the Recipient received outside of the ASAP system. The Recipient shall promptly submit all refund checks (including interest earned on advances) to the following address identified below and notify the Grants Office upon submission. Each check must identify on its face the NIST award number, and no more than a two-word description to identify the reason for the refund. Submit to:

National Institute of Standards and Technology

RE: Cooperative Agreement No. 70NANB1H3050
Amendment No. 04

Dear Dr. Karron:

The National Institute of Standards and Technology (NIST) started using the Department of Treasury's Automated Standard Application for Payment (ASAP) system in July 2001. This payment system allows grant and cooperative agreement recipients to withdraw funding directly from an established ASAP account for each award. Withdrawn amounts are posted directly into the bank account identified by the recipient during the enrollment process. We have identified the following award and funds available for withdrawal for cut-over to ASAP:

NIST Award Number 70NANB1H3050 $70,000.00

Enclosed are 3 copies of the above award amendment authorizing you to begin withdrawing funds from the ASAP system. In order to certify the available balance for withdrawal, please sign, date and return 2 copies immediately to:

National Institutes of Standards and Technology
Grants and Agreements Management Division
100 Bureau Drive, STOP 3580
TRF Building 411, Room A120
Gaithersburg, Maryland 20899-3580
Attention: Hope Snowden

Please retain one (1) copy for your records.

Should you have any questions concerning this amendment, you may contact me at (301) 975-6002.

Sincerely,

HCD

Hope Snowden

MEMORANDUM FOR: Shamim Shaikh, Acting Chief
Grants and Agreements Management Division
National Institute of Standards and Technology

Kathleen M. McKevitt

FROM: for William F. Bedwell, Jr.
Regional Inspector General
for Audits

SUBJECT: NIST Cooperative Agreement Number 70NANB1H3050
Computer Aided Surgery, Inc., NY
Final Report No. ATL-16095-3-0001

This report on our audit of the subject NIST Advanced Technology Program cooperative agreement with Computer Aided Surgery, Inc. is to inform NIST officials of significant findings that require their immediate attention. Based on Computer Aided Surgery's own accounting records, the company should reimburse NIST $205,126. The corporation has not contributed any of its required cost-share, which currently totals $54,068, and has drawn down $205,126 in excess of the federal share of ATP project costs identified in its accounting records. The Financial Status Reports filed with NIST are inaccurate because they show that the company contributed the required matching funds and the reports overstate ATP project expenses. We will issue a separate comprehensive audit report including questioned costs and other non-compliance issues covering the period October 1, 2001, through June 27, 2003.

We are providing a copy of this report to Computer Aided Surgery. However, we have not requested the company prepare a written response to NIST addressing the report findings or recommendations. We will include these findings in the subsequent comprehensive audit report to allow for due process. Requests from the public for copies of this report must be referred to the Office of Inspector General, Office of Compliance and Administration Publication Unit, Room 7009C, Herbert C. Hoover Building, for response under the Freedom of Information Act.

Any information or inquiry regarding this final report should be directed to me at (404) 730-2780, or Kathleen McKevitt of this office at the same number. We appreciate the cooperation and courtesies extended by NIST officials during our audit.

Introduction

In September 2001, NIST awarded a $2,110,500 Advanced Technology Program cooperative agreement to Computer Aided Surgery, Inc., a for-profit company involved in innovative composite design and engineering. The agreement was for a 3-year period with $800,000 in federal funds for the first year, $600,000 for the second year, and $600,000 in the third year. The agreement required the company provide a matching share of $36,500 for the first year, $30,500 for the second year, and $43,500 for the third year.

The purpose of the agreement was to develop and demonstrate novel computer and engineering technology based on Digital Morse Theory to enhance the quality and usability of computerized anatomic models for precise and accurate cancer treatment therapies.

Purpose and Scope of Audit

We performed the audit of the NIST award at the company's office in New York City during June 2003. NIST requested that our office conduct the audit because the grants and program officials were concerned about Computer Aided Surgery's ability to account for federal funds being spent. The purpose of the audit was to determine the financial status of the award, the reasonableness and allowability of expenses charged against the award and review compliance with applicable laws and regulations. The audit covered the period from October 1, 2001, through June 27, 2003. We examined pertinent NIST and company records, and interviewed agency and company officials as deemed necessary.

We relied on computer-processed data supplied by the company as the basis for our audit findings and recommendations. Consequently, we tested the accuracy by tracing and comparing the data to original source documents and other supporting documents. Based on our tests, we concluded that the computerized data was sufficiently reliable for use in meeting our objectives.

We conducted the audit in accordance with generally accepted government auditing standards, and performed it under the authority of the Inspector General Act of 1978, as amended, and Department Organization Order 10-13, dated May 22, 1980, as amended.

Results of the Audit

During our audit, we found significant problems that we brought to the grants officers attention with a conference call on June 24, 2003 and are documenting with this report. Computer Aided Surgery has not contributed any of its required matching funds, which currently totals $54,068. In addition, the company drew down $205,126 in excess of the federal share of ATP project costs recorded in its accounting records. Finally, the Financial Status reports filed with NIST are inaccurate because they overstate expenses to justify the excess draw-downs and include a cost-share amount that was never contributed. NIST informed us that they suspended further award payments to Computer Aided Surgery as of June 27, 2003. We are working with the company to obtain additional documentation so that we can provide a comprehensive audit of the allowability and reasonableness of ATP project expenses for the period October 1, 2001 through June 27, 2003.

$54,068 of Required Matching Funds Not Contributed

Computer Aided Surgery has not contributed any matching funds to the project even though the NIST award agreement requires a cost share of 4.57 percent. The Chief Technical Officer of Computer Aided Surgery identified the State of New York as the source of the matching funds, but the funding was not received due to the state's budget problems after September 11, 2001. While the primary owner and Chief Technical Officer of Computer Aided Surgery intends to contribute his own funds to the ATP project, none of these required funds have been contributed to date.

The matching funds required for the project based on the ATP identified expenses in the company's accounting records are shown below:

Award Amendment	Period	Required Cost-Share	ATP Project Costs Per Books	Required Cost-Share
# 2	10/01/2001 - 09/30/2002	4.36%	$ 779,905	$ 34,004
#3	10/01/2002 - 06/27/2003	4.84%	414,537	20,064
Total			$1,194,442	$ 54,068

$205,126 in Excess Drawdowns

Our audit revealed that Computer Aided Surgery drew down $205,126 of federal funds over the 21-month period in excess of the federal share of ATP expenses identified in its own accounting records. A review of the company's financial records revealed that these excess draw-downs were not spent on ATP project expenses. The amount of drawdowns in excess of the federal share of ATP project expenses for the period October 1, 2002 through June 27, 2003 is shown below:

	10/01/01 – 09/30/02	10/01/02 – 06/27/03	Cumulative
ATP Project Expenses Per Books	$ 779,905	$ 414,537	1,194,442
Federal Share of Project	95.64%	95.16%	
Federal Share of ATP Expenses	$745,901	$394,473	1,140,374
Federal Funds Drawn-down	800,000	545,500	1,345,500
Excess Draw-downs of Federal Funds	$ 54,099	$ 151,027	$ 205,126

As shown above, the company drew down $1,345,500 in federal funds between October 1, 2001 and June 27, 2003. However, a review of the company's general ledger revealed only

$1,194,442 in ATP project costs during this same 21-month period and based on the project's federal cost-share, Computer Aided Surgery was only entitled to $1,140,374. The $205,126 excess funds went to pay expenses not related to the ATP project. It appears that Computer Aided Surgery's only source of revenue during the period of the award has been the NIST funds.

The *Advanced Technology Program Special Award Conditions* Section 9. c. states:

> "Advances ... shall be limited to the minimum amounts necessary to meet immediate disbursement needs. Advanced funds not disbursed in a timely manner must be promptly returned .... Advances shall be for periods not to exceed 30 days."

Inaccurate Financial Status Reports

Computer Aided Surgery filed inaccurate Financial Status Reports (SF-269's) for each of the four quarters during the period October 1, 2001 through September 30, 2002. The erroneous reports show the amount of federal funds drawn down rather than actual federal expenditures in the box designated "federal outlays for the quarter," thereby, overstating expenditures. Additionally, Computer Aided Surgery claimed that it had contributed the required cost-share funds, when in fact; no matching funds have been contributed. The Financial Status Reports have not been completed for the periods ending December 31, 2002 or March 31, 2003.

The *Advanced Technology Program General Terms and Conditions* Section 7.c. (1) states:

> "By signing this award the Recipient agrees to ensure that only actual costs incurred will be charged to the award and that all costs will be reasonable, allocable, and allowable in accordance with the applicable Federal Cost Principles."

Additionally section 7.c. (3)(a) states:

> "The Recipient shall submit a "Financial Status Report" (SF-269) on a calendar quarter basis for the periods ending March 31, June 30, September 30, and December 31, or any portion thereof, unless otherwise specified in a special award condition. Reports are due no later than 30 days following the end of each reporting period."

Recommendations

We are recommending that NIST:

1. Continue to suspend award payments to Computer Aided Surgery, Inc., until it meets with the following requirements:

   - Reimburse NIST $205,126 for funds drawn down in excess of the federal share of ATP project expenses.

   - File the Financial Status Reports (SF-269) for the quarters ending December 31, 2002, and March 31, 2003.

2. Designate the company as a "high risk" organization and, at a minimum place it on a reimbursement basis for future drawdowns, if the suspension of award payments is removed.

Funds to Be Put to Better Use

By implementing this recommendation, $205,126 in federal funds will be put to better use by returning the funds to NIST and ensuring that the funds are used only for the NIST project.

Independent Auditor's Report
Schedule of Budgeted and Actual Fund Sources and Project Costs

To the Members of
CASI LLC

We have audited the accompanying Schedule of Budgeted and Actual Fund Sources and Project Costs (the "Schedule") of CASI LLC ("CASI") for the year ended September 30, 2002. This Schedule is the responsibility of the management of CASI. Our responsibility is to express an opinion on the Schedule based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and Government Auditing Standards issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Schedule is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the Schedule. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the Schedule. We believe that our audit provides a reasonable basis for our opinion.

The accompanying Schedule was prepared for the purpose of complying with the award requirements of the Advanced Technology Program ("ATP") Cooperative Agreement Number 70NANB1H3050 entered into by Computer Aided Surgery, Inc. (the predecessor company to CASI LLC) and the U. S. Department of Commerce as described in Note 2. The Schedule was prepared in conformance with the award requirements which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

The Schedule includes certain project costs which we questioned as allowed costs based on the standards and cost principles to which adherence is required under the terms and conditions of the ATP Cooperative Agreement. In our opinion, if these questioned costs, as described in our Schedule of Audit Findings and Questioned Costs, which also accompanies this report, are determined to be disallowed, the total direct project costs would be reduced by $178,776.

In our opinion, except for the effects to the matter discussed in the preceding paragraph, the Schedule of Budgeted and Actual Fund Sources and Project Costs referred to above presents fairly, in all material respects, the sources of funds and project costs of CASI for the year ended September 30, 2002 in conformity with the basis of accounting described in Note 4.

This report is intended solely for the information and use of the members and management of CASI and the U. S. Department of Commerce and is not intended to be and should not be used by any other parties.

CASI LLC
Notes to Schedule of Budgeted and Actual Fund Sources and Project Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

1. **Business Activities**

CASI LLC ("CASI") performs basic research to bring computer aided design and manufacture to surgical specialties and radiation-oncology. CASI's approach is to move beyond the state of the art in telerobotics and augmented reality and focus on hard mathematical issues not currently addressed by the state of the art. CASI is advancing the state of the art in applied math by forging new theorems and software technology where needed to manage biological shape segmentation and by changing the connectivity of these using a novel concept of editing the Digital Morse Theory tree. CASI's objective is to use these and other means under development to provide precise and accurate anatomic models for a variety of medical and other applications.

Computer Aided Surgery, Inc. was incorporated December 12, 1995. Effective August 30, 2002, CASI LLC, a partnership, was established in New York State, and Computer Aided Surgery, Inc. merged into CASI LLC.

2. **Cooperative Agreement**

Computer Aided Surgery, Inc. (the predecessor company to CASI LLC) was the recipient of Advanced Technology Program ("ATP") Cooperative Agreement Award Number 70NANB1H3050 (the "Agreement") for Anatomic Computer Modeling for Precise and Accurate Therapies (the "Project") granted by the National Institute of Standards and Technology (NIST) of the U. S. Department of Commerce (DOC). The scope of work and budget included in this award cover a three-year period from October 1, 2001 to September 30, 2004 for a total amount of $2,000,000 in federal funds. The funding is limited to $800,000 during the first project year, and funding for the second and third years is subject to availability and written approval by the Grants Officer.

The terms of the Agreement require CASI to provide a share of the project costs. For the year ended September 30, 2002, the cost sharing ratio is 4.36% for CASI, and the federal contribution is 95.64%.

3. **Administration Requirements**

The terms of the Agreement require adherence to 15 CFR Part 14 which defines the uniform administration requirements for agreements awarded by the DOC.

4. **Summary of Significant Accounting Policies**

Basis of Accounting Presentation
The financial statements of CASI are prepared in accordance with the requirements of the Agreement which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. Revenue is recognized upon receipt of the funds, and project costs are recognized when paid.

Project Cost Requirements
In accordance with the requirements of the Agreement, project costs must be incurred during the reporting period, be directly related to the Project, and be allowed under the:

- Federal Acquisition Regulations (FAR) System, Part 31, "Contract Cost Principles and Procedures";
- DOC Financial Assistance Standard Terms and Conditions;
- DOC Financial Assistance Award (Form CD-450) and any amendments thereto (Form CD-451); and
- ATP general terms and conditions and special award conditions of the Agreement.

Only direct costs, in accordance with applicable cost principles and award guidelines, are eligible for federal funding. Indirect costs are the responsibility of CASI and cannot be recorded as project costs.

Approved Budget
The terms of the Agreement require adherence to a budget and any budget amendments approved by NIST. The costs in any approved budget line-item that exceed 10% of the total approved budget for the year are not eligible for federal funding.

The most recent approved budget, for the year ended September 30, 2002, was dated December 27, 2001 under Amendment Number 2 to the DOC Financial Assistance Award.

Equipment
In accordance with the requirements of the Agreement, equipment is charged as a project cost when cash is disbursed for its acquisition, which is a basis other than accounting principles generally accepted in the United States of America.

Fiscal Year
The first project year was the fiscal year ended September 30, 2002.

5. Recipient's Contribution

In accordance with the requirements of the Agreement, as described in Note 2, CASI is required to provide 4.36% of the project costs for the first project year. CASI did not contribute its 4.36% share of the project costs expensed during the year ended September 30, 2002. Funding from other sources, which CASI anticipated at the inception of the Agreement, has not been awarded.

6. Direct Project Costs

Only those costs in accordance with the terms of the Agreement, as described in Note 4, are allowable as project costs and eligible for inclusion in the Schedule of Budgeted and Actual Fund Sources and Project Costs.

CASI LLC
Notes to Schedule of Budgeted and Actual Fund Sources and Project Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

7. Funds Carried Forward to the Second Project Year

As of September 30, 2002, federal funds provided for the Project exceeded the direct project costs. The excess funding was carried forward to the second project year.

8. Concentration of Risk

Since the Agreement is providing the single source of revenue for CASI, as described in Note 5, the completion of the Project is dependent upon the continuation of federal funding.

9. Related Parties

The Principal Investigator for the Project was the majority shareholder of Computer Aided Surgery, Inc. and is now the majority member of CASI LLC.

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
Project Salaries and Related Fringe Benefits	During our examination of payroll records, we noted that all of the salaries and related payroll taxes, which were paid by the award recipient during the year ended September 30, 2002, were recorded as project costs. We also noted that timesheets did not indicate the performance of services for non-project activities. Based on our employee interviews, review of individual responsibilities, and examination of contracts, we determined that three employees were compensated for services that were partly related to the ATP project and partly for non-project activities. The resulting questioned costs, which include a percentage of salaries and the related payroll taxes and other fringe benefits, are quantified below under the reporting line-items from the Schedule of Budgeted and Actual Fund Sources and Project Costs. The percentages used to determine the questioned costs were provided by the DOC Office of Inspector General auditor, as a result of her testing, and, based on our testing, appeared reasonable.	(see below)
Project Salaries - Technical	15% of the salary paid to the Principal Investigator was determined to be compensation for administrative, management, and other responsibilities not directly related to the ATP project.	$ 26,250
Project Salaries - Administrative	25% of the salary paid to the Business Manager was determined to be compensation for fundraising and other responsibilities not directly related to the ATP project. During our examination of the contract between the Business Manager and award recipient, we noted the expressed responsibilities of the Business Manager which included project related and non-project related activities.	25,000 Lee Gurfein, E
	25% of the salary paid to the ~~Administrative Assistant~~ Financial Specialist was determined to be compensation for bookkeeping, scanning, and other administrative responsibilities which were performed for the award recipient and not directly related to the ATP project.	2,337 Nicki W.
Fringe Benefits - Technical	During our examination of expenditures for fringe benefits, we noted doctor, dental, and pharmacy bills, which were paid for medical services and drugs that were in excess of the health insurance coverage provided by the award recipient. These payments were made as reimbursements to the Principal Investigator or directly to the medical and pharmacy providers. In our opinion, such payments are not allowed by FAR 31 cost principles, as they do not appear reasonable for an organization in the financial condition of the award recipient, and they are not ordinary and necessary for such an organization. We also noted that a significant portion of the medical services billed were rendered prior to the start of the ATP project. Even if these costs were considered reasonable and, consequently,	38,661 ~~$500 Lee Gurfein~~ Dental Bills Rx Electrolysis Psychologist

For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
	allowed by FAR 31, the terms of the ATP cooperative agreement require written approval from the NIST Grants Officer before costs incurred prior to the start of the project are allowed as project costs. No such documentation was provided for our review.	
	Employer payroll taxes, attributable to the salary costs for the technical employee questioned above, were determined to be not related to the ATP project, as described in the first audit finding.	1,326
	Other fringe benefits, including health insurance coverage and fitness benefits attributable to the questioned percentage of salary costs for the technical employee, as described in the first audit finding, were also determined to be not related to the ATP project.	1,047
Fringe Benefits - Administrative	During our examination of expenditures for fringe benefits, we noted that health insurance premiums were expensed for an individual who was not an employee of the award recipient. These costs were not directly attributable to the ATP project.	3,340 Brother Health Insuran
	Other fringe benefits, including health insurance coverage and child-care benefits attributable to the questioned percentage of salary costs for the administrative employees, as described in the first audit finding, were determined to be not related to the ATP project.	2,281
	Employer payroll taxes, attributable to the salary costs for administrative personnel questioned above, were also determined to be not related to the ATP project, as described in the first audit finding.	2,257
	During our examination of expenditures for fringe benefits, we also noted doctor and dental payments, for administrative personnel, for medical services that were in excess of the health insurance coverage provided by the award recipient. In our opinion, as expressed above for comparable benefits paid on behalf of a technical employee, such payments are not allowed by FAR 31 cost principles, as they do not appear reasonable for an organization in the financial condition of the award recipient, and they are not ordinary and necessary for such an organization.	707 Other employees health care besides Dan
	During our examination of expenditures for fringe benefits, we noted that transit checks were purchased for the use of employees, but documentation was not provided for our review to evidence the distribution of the transit checks to individual employees and to document the adherence of such distributions within the limits defined by Regulation 1.132-9 of the Internal Revenue Code. The	639 IRS allows $100/mo/employee in transit checks

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
	terms of the ATP cooperative agreement require adherence to federal laws before a cost can be allowed.	
	During our examination of expenditures for fringe benefits, we noted that worker compensation insurance premiums were paid for a period beyond an employee's termination. In our opinion, such premiums should be refunded by the insurance carrier and not be allowed as project costs.	130
	During our examination of expenditures for fringe benefits, we noted a penalty paid to the State of New Jersey for late filing of an employment tax return. FAR 31 cost principles do not allow payments of fines and penalties as project costs.	29
Travel and Meals	During our examination of travel expenditures, we also noted various local and long distance travel expenses which were not directly related to the ATP project.	553
	During our examination of travel expenditures, we noted the payment of a parking ticket to the New York City Department of Revenue that was recorded as project travel. As previously stated, FAR 31 cost principles do not allow the payment of fines and penalties as project costs.	55
Materials and Supplies	During our examination of expenditures for materials and supplies, we noted that bank charges, which were not directly related to the ATP project, were recorded as project costs.	133
Subcontracts - Technical	During our examination of payments to subcontractors, we noted that payments were made to Advanced Technology Group for billings which were dated prior to the start of the project. The written approval from the NIST Grants Officer, which is required for these costs to be allowed, was not provided for our review.	9,000
Subcontracts - Administrative	During our examination of payments to subcontractors, we also noted that payments which were made to an individual for services rendered to clean both the residential and business areas of the Principal Investigator's apartment were recorded as project costs. The costs related to maintenance of the business area, as may be related to the ATP project, could not be identified from the documentation provided. The terms of the ATP cooperative agreement do not allow single companies, such as the award recipient, to record indirect costs as project costs.	4,819

Other - Direct Utilities	During our examination of expenditures for direct utilities, we noted that invoices for telephone and pager bills did not provide the information to identify those costs that may be directly related to the ATP project. As stated above, the ATP cooperative agreement does not allow indirect costs.	1,375
	During our examination of expenditures for direct utilities, we also noted that a payment to Thorn for network services, which was recorded as a project cost during the first project year, was for services that were provided prior to the start of the project. The written approval from the NIST Grants Officer, which is required for these costs to be allowed, was not provided for our review.	285
Other - Professional Services	During our examination of expenditures for professional services, we noted that fees were paid and recorded as project costs for legal services that were not directly related to the ATP project.	842
	Total questioned costs for expenditures listed above	121,066
Equipment Budget	During our testing of project costs and budgeted amounts, we noted that equipment costs exceeded the budgeted amount by more than 10% of the total budget. The terms of the ATP cooperative agreement do not allow costs which exceed the budgeted amount by more than 10% of the total budget. These costs would otherwise be allowable under FAR 31 cost principles:	
	• Total equipment purchased and recorded as project costs	223,503
	• Approved equipment budget	(110,000)
	• 10% allowed excess	(83,650)
	Total questioned costs for ineligible equipment	29,853
Cost-Match	During our examination of the Schedule of Budgeted and Actual Fund Sources and Project Costs, we noted that the ATP award recipient did not contribute its matching share of project costs as specified in the ATP cooperative agreement.	
	• Cost share as specified in the ATP cooperative agreement at 4.36% of project costs reported in the Schedule of Budgeted and Actual Fund Sources and Project Costs (4.36% of $789,841)	34,437
	• Impact of all questioned costs listed above on cost-share (4.36% of $150,919)	(6,580)
	Total questioned cost-match	27,857

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
Other Uses of Federal Funds	During our examination of cancelled checks, we noted that certain expenditures of the award recipient, which were not directly related to the ATP project, were paid with federal funds provided for the ATP project. These payments were made to the Principal Investigator for rental expense, at the monthly rate of $2,000, for the use of his apartment as office space for 11 months during the first project year and for 19 months prior to the start of the project. Our examination of the Schedule of Budgeted and Actual Fund Sources and Project Costs revealed that these expenditures were not recorded as ATP project costs. However, the payment of these expenditures from federal funds has resulted in a shortfall in the ATP project bank account and, consequently, is payable to the ATP project.	60,000
	During our examination of the check register, we noted that federal funds provided for the project had been disbursed as salary advances to the Principal Investigator and loans to the award recipient with subsequent repayments from salaries, the reimbursement of business expenses, and cash deposits. The use of these funds for non-project expenditures was in excess of repayments. The terms of the ATP cooperative agreement do not allow such advances and loans, and, consequently, the balance due is payable to the ATP project.	9,651
	Total questioned costs for other uses of federal funds	69,651
	Total questioned costs	$248,427
Funds Carried Forward	The use of federal funds for non-project expenditures and loans, described above under Other Uses of Federal Funds, impacts the cash balance maintained by CASI in the ATP project's bank account as of September 30, 2002 and, consequently, the Funds Carried Forward to Second Project Year in the Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002, as follows: • Cash balance/(deficit) $(59,492) • Due from CASI for other uses of federal funds 69,651 • Funds Carried Forward to Second Project Year $ 10,159	(see above)
Procedures	During our review of operating procedures, we noted the following weaknesses: • Written procedures for the ATP project were not available for our review until such procedures were drafted by the newly appointed Business Manager subsequent to the year ended September 30, 2002. These procedures were being implemented and further developed as of the date of our report. • In our opinion, the written procedures, which were in the	n/a

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
	development phase, did not include adequate controls over timesheets, bank reconciliations, the payment of invoices which include both project and non-project items, and the engagement of subcontractors. The Business Manager agreed to enhance the procedures, as we recommended.	
	Based on our review of procedures, examination of personnel files, and interviews with management, we noted that procedures were not in place to ensure that adequate documentation is obtained and maintained in employee files. In our opinion, written procedures for human resource responsibilities should also be developed and updated, as may be necessary, on a regular basis to educate personnel who are responsible for these functions and to enable compliance. In particular, the following documents should be included, with other requirements, in personnel files: • Federal form I-9 which is required to be completed by all employees and signed by the employer. • Health insurance forms to accept or decline coverage. • Documentation to support the acceptance or refusal of other fringe benefits. • Mandated COBRA letters for terminated employees.	n/a
Budget	We observed that the effective date of the most recent approved budget was approximately nine months before the end of the first project year. Variances between approved budget amounts and actual project costs, evident in the Schedule of Budgeted and Actual Fund Sources and Project Costs, indicate significant changes since the budget was approved, and we were not provided with an updated budget that, in our opinion, realistically forecasted the remainder of the project.	n/a
Project Reporting	During our examination of reports submitted to NIST by the award recipient, we noted that reports were not properly prepared. The total ATP award funds received were used, instead of the actual project costs from the accounting records, to report cash outlays. These reports also included recipient contributions, but cost-matches had not been made from non-federal funds. The Business Manager agreed to amend reports as applicable.	n/a
Subcontractor Agreements	During our examination of subcontractor agreements, we noted that written agreements were not available for certain subcontractors and the contracts which were available did not include specific language to document the requirement that subcontractors adhere to federal laws and regulations as specified by the ATP award and the sanctions for noncompliance.	n/a

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
Summary of Questioned Costs	The summary of questioned costs, as described above, is as follows:	
	• Questioned costs from examination of specific expenditures	$121,066
	• Questioned costs for ineligible equipment	29,853
	• Questioned cost-match	27,857
	• Total questioned direct project costs	178,776
	• Questioned other uses of federal funds	69,651
	• Total questioned costs	$248,427

Independent Auditor's Report
Statement of Management's Assertions on Compliance with Specified Requirements

To the Members of
CASI LLC

We have examined Management's Assertions on Compliance with Specified Requirements that CASI LLC ("CASI") complied with certain specified requirements relative to its Schedule of Budgeted and Actual Fund Sources and Project Costs for the National Institute of Standards and Technology ("NIST") Advanced Technology Program ("ATP") Cooperative Agreement Number 70NANB1H3050 for the year ended September 30, 2002. The five specific compliance requirements are listed in our accompanying Statement of Management's Assertions on Compliance with Specified Requirements.

Management is responsible for the compliance of CASI with those requirements. Our responsibility is to express an opinion on management's assertions about its compliance based on our examination.

Our examination was conducted in accordance with Government Auditing Standards, issued by the Comptroller General of the United States, attestation standards established by the American Institute of Certified Public Accountants, and the NIST program-specific audit guidelines for ATP cooperative agreements with single companies which was issued by the U. S. Department of Commerce Office of Inspector General, dated May 1999. Accordingly, we examined, on a test basis, evidence about the compliance of CASI with those requirements and performed such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on the compliance of CASI with specified requirements.

In our opinion, management's assertions that CASI complied with the aforementioned requirements relative to its NIST ATP Cooperative Agreement Number 70NANB1H3050, during the year ended September 30, 2002, are fairly stated for one of the assertions but not fairly stated for the remaining four assertions. The accompanying Statement of Management's Assertions on Compliance with Specified Requirements provides our findings and opinion regarding each of the assertions.

This report is intended solely for the information and use of the members and management of CASI and the U. S. Department of Commerce and is not intended to be and should not be used by any other parties.

Joan M. Hayes, CPA, LLC

CASI LLC
Statement of Management's Assertions on Compliance with Specified Requirements For NIST ATP Cooperative Agreement 70NANB1H3050 For the Year Ended September 30, 2002

1. Cost-Share

Management's Assertion
The cost-share established by the budget in the Advanced Technology Program ("ATP") award has been met. The funds claimed as cost-share are not from a subcontractor or other federal sources and were not used as matching or cost-sharing funds on other federally supported activities. The funds claimed as cost-share meet the definition provided in 15 CFR Part 14, Section 23 and conform to the limitations in 15 CFR Part 295.2(1).

Examination Findings
CASI LLC ("CASI") did not contribute its cost-share, as stated in this assertion, to the project being funded by the ATP award during the year ended September 30, 2002.

Independent Auditor's Opinion
This assertion of management has not been fairly stated for the year ended September 30, 2002.

2. Equipment

Management's Assertion
Equipment acquired with the ATP funds has been accounted for in accordance with federal property management standards found in 15 CFR Part 14 Sections 30-37.

Examination Findings
Equipment acquired with ATP funds included computer and network hardware assembled from individually purchased components and configured as required for the ATP project. An inventory report was developed by CASI, and a physical inventory was taken during our audit of their Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002. The inventory report included total purchase price and a description of the equipment with identifying codes which allowed the equipment to be traced to the purchase records. Purchase records provided the source of the equipment, acquisition dates, and other detailed information required by 15 CFR Part 14 Section 34.

Independent Auditor's Opinion
This assertion of management has been fairly stated for the year ended September 30, 2002.

3. Procurement Policies

Management's Assertion
Federal procurement standards described in 15 CFR Part 14 Sections 40-48 have been incorporated into the purchasing policies and adhered to for ATP award expenditures. Contracts and subwards have not been made to any organizations or its principals listed in the "List of Parties Excluded from Federal Procurement or Nonprocurement Programs," issued by General Service Administration (the "List").

Examination Findings
Written procurement procedures, as required by 15 CFR Part 14 Section 44, were not available during the year ended September 30, 2002. During the subsequent year, management appointed a new Business Manager who developed an operating procedures guide. The updated procedures, as of June 2003, require bids, in accordance with federal standards, and written pre-approval for the procurement of equipment.

Contracts and payments to subcontractors were not made to organizations or individuals included in the List during the year ended September 30, 2002. However, the requirement to verify the omission of proposed contractors from the List was not included in the updated procedures referred to above.

Independent Auditor's Opinion
Except for contracts and payments to subcontractors not included in the List, this assertion of management has not been fairly stated for the year ended September 30, 2002. However, management has taken action to cure this finding going forward.

4. Reporting Requirements

Management's Assertion
The amounts in the quarterly financial status reports and the requests for advance or reimbursement agree with the underlying accounting records and summary records.

Examination Findings
Form 269 Financial Status Report or Form 269A Financial Status Report (short form) was provided and examined for each of the quarterly reporting periods during the year ended September 30, 2002. Each of the reports examined included a cost-match which the award recipient did not provide with non-federal funds. Each of the reports examined reported cash outlays of federal funds which agreed to the total federal funds received during the reporting period, but did not agree to the accounting records of actual cash transactions that were used to generate the Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002.

Form 270 Request for Advance or Reimbursement was provided and examined for ten of the monthly reporting periods during the year ended September 30, 2002. Reports were not provided for months ended December 31, 2001 and January 31, 2002. Each of the reports examined included a cost-match which the award recipient did not provide with non-federal funds. Each of the reports examined reported cash outlays of federal funds which agreed to the total federal funds received during the reporting period, but did not agree to the accounting records of actual cash transactions that were used to generate the Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002.

Form 272 Federal Cash Transactions Report was provided and examined for nine of the monthly reporting periods during the year ended September 30, 2002. Reports were not provided for months ended October 31, 2001, January 31, 2002, and August 31, 2002. Each of the reports examined included a cost-match which the award recipient did not provide with non-federal funds. Each of the reports examined reported cash outlays of federal funds which agreed to the total federal funds received during the reporting period, but did not agree to the accounting records of actual cash

transactions that were used to generate the Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002. In addition, the cash on hand at the end of each monthly reporting period was reported as zero instead of the actual cash balance from the accounting records of cash transactions.

Independent Auditor's Opinion
This assertion of management has not been fairly stated for the year ended September 30, 2002.

5. Subcontractor Agreements

Management's Assertion
The agreements entered into with subcontractors/subrecipients, as defined below, require that the subcontractors/subrecipients adhere to federal laws and regulations as specified by the ATP award, and sanctions are specified for the subcontractor's/subrecipient's noncompliance.

Subcontractors included: Advanced Technology Group, J. Cox (who subsequently became an employee), A. Karron (who provided a one-time service), G. Wolberg, S. Albin (who subsequently became an employee), and The Jackson Group.

Examination Findings
Written agreements with J. Cox and with G. Wolberg were provided for examination. Agreements with the other subcontractors listed above were not provided for examination. The agreements examined did not contain the specific requirement for adherence to federal laws and sanctions for noncompliance that is referenced in this assertion.

Independent Auditor's Opinion
This assertion of management has not been fairly stated for year ended September 30, 2002.

RE: Margret D. Ferrand

Dear Ms. Hayes;

This letter is in response to your telephone call of Tuesday last regarding backup documentation on D. Ferrand payments made with NIST funds in Year 1 Specifically you had asked for 12 invoices for Ferrand. Ferrand did not bill monthly. She generally was paid weekly as both a program contractor and non program contractor.

Ms. Ferrand had worked for CASI for many years in multiple capacities. She started with me at in 1995 as my office and home cleaning contractor. She qualified as a contractor because I did not provide direct supervision, she came and went as she pleased, and had keys to my office/apartment. She purchased supplies as needed and I reimbursed her for her out of pocket costs. Her tasks included cleaning and cooking. As is CASI policy, I endeavor to promote from within my staff, I have asked her to do more than housekeeping.

She is bright and has a mathematical aptitude. I soon found out she knew how to reconcile checking accounts, and she did my reconciliations and served as junior bookkeeper and bookkeeper's assistant. Further, she had some facility with the computer and learned our paperless Paperport filing software and our filing conventions. She also scanned and filed papers for CASI.

With the start of the ATP-NIST program, she was paid approximately 100$ generally every week for from NIST program as well as funds from my personal account. She would clean on weekends and would come in during the week to scan and file papers. Considering the heavy useage of my apartment due to the number of program employees here, frequently round the clock I decided that some allocation of her cleaning costs could be made.

I can provide a list of her work products, specifically directories of scanned program invoices and research papers, by date performed and items scanned and filed should you wish more detailed support.

I can also provide copies of canceled personal checks in payment of her cleaning activities.

If you need further backup, we can research the bills entered on her behalf and I can provide a list of her days of office work and her days of cleaning work, program work performed as well as non program casi work performed.

Sincerely,

Dr. Karron

Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations

AGENCIES: Department of Agriculture, Department of Energy, National Aeronautics and Space Administration, Department of Commerce, Department of State, Agency for International Development, Department of Justice, Department of Labor, Department of Defense, Department of Education, National Archives and Records Administration, Environmental Protection Agency, Department of the Interior, Department of Health and Human Services, Department of Transportation.

ACTION: Interim final rule with request for comments.

SUMMARY: This document presents an interim final revision to the agencies' codification of Office of Management and Budget (OMB) Circular A–110, "Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations." OMB issued a final revision to Circular A–110 on September 30, 1999, as required by Public Law 105–277. It was published in the **Federal Register** on October 8, 1999. The agencies' interim final rules will provide uniform administrative requirements for all grants and cooperative agreements to institutions of higher education, hospitals, and other non-profit organizations.

DATES: This interim final rule is effective April 17, 2000. Comments must be received on or before May 15, 2000.

ADDRESSES: Comments on the interim final rule should be addressed to: Charles Gale, Director, Office of Grants Management, Department of Health and Human Services, Room 517–D, Hubert H. Humphrey Building, 200 Independence Avenue, S.W., Washington, DC 20201. A copy of each communication submitted will be available for public inspection and copying during regular business hours (9:00 a.m.–5:30 p.m. eastern standard time) at the above address. The full text of Circular A–110, the text of the September 30th notice of final revision, and a chart showing where each agency has codified the Circular into regulation may be obtained by accessing OMB's home page (http://www.whitehouse.gov/omb), under the heading "Grants Management."

FOR FURTHER INFORMATION CONTACT: For general issues regarding this interim final rule, please contact Charles Gale, Director, Office of Grants Management, Department of Health and Human Services at (202) 690–6377. For agency-specific issues, please contact the individual noted in that agency's adoption below.

SUPPLEMENTARY INFORMATION:

Background

Congress included a two-sentence provision in OMB's appropriation for fiscal year 1999, contained in Public Law 105–277, directing OMB to amend Section .36 of Circular A–110 "to require Federal awarding agencies to ensure that all data produced under an award will be made available to the public through the procedures established under the Freedom of Information Act." The provision also provides for a reasonable fee to cover the costs incurred in responding to a request. Circular A–110 applies to grants and cooperative agreements to institutions of higher education, hospitals, and non-profit institutions, from all Federal agencies.

In directing OMB to revise Circular A–110, Congress entrusted OMB with the authority to resolve statutory ambiguities, the obligation to address implementation issues the statute did not address, and the discretion to balance the need for public access to research data with protections of the research process. In developing the revision, OMB sought to implement the statutory language fairly, in the context of its legislative history. This required a balanced approach that (1) furthered the interest of the public in obtaining the information needed to validate Federally-funded research findings, (2) ensured that research can continue to be conducted in accordance with the traditional scientific process, and (3) implemented a public access process that will be workable in practice.

OMB finalized the revision on September 30, 1999 (64 FR 54926, October 8, 1999). Before this, OMB published a Notice of Proposed Revision on February 4, 1999 (64 FR 5684), and a request for comments on clarifying changes to the proposed revision on August 11, 1999 (64 FR 43786). OMB received over 9,000 comments on the proposed revision and over 3,000 comments on the clarifying changes.

This interim final rule amends the agencies' codifications of Circular A–110 so they reflect OMB's recent action.

Under the provisions of section 7(o) of the Department of Housing and Urban Development Act (42 U.S.C. 3535(o)), any Department of Housing and Urban Development (HUD) proposed or interim final rule that is issued for

public comment is subject to prepublication Congressional review for a period of 15 days. Therefore, HUD is not joining in today's publication but is adopting the common amendments in a separate rulemaking.

Impact Analysis

Executive Order 12866

This is a significant regulatory action under Section 3(f)(4) of Executive Order 12866, "Regulatory Planning and Review."

Regulatory Flexibility Act of 1980

The Regulatory Flexibility Act (5 U.S.C. 605(b)) requires that, for each rule with a "significant economic impact on a substantial number of small entities," an analysis must be prepared describing the rule's impact on small entities and identifying any significant alternatives to the rule that would minimize the economic impact on small entities.

The participating agencies certify that this interim final rule will not have a significant impact on a substantial number of small entities. This rule concerns the information that Federally-funded researchers must provide in response to Freedom of Information Act requests.

Unfunded Mandates Act of 1995

The Unfunded Mandates Act of 1995 (Public Law 104–4) requires agencies to prepare several analytic statements before proposing any rule that may result in annual expenditures of $100 million by State, local, Indian Tribal governments or the private sector. Since this interim final rule will not result in expenditures of this magnitude, the participating agencies certify that such statements are not necessary.

Paperwork Reduction Act

The participating agencies certify that this interim final rule will not impose additional reporting or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Waiver of Proposed Rulemaking

Under the Administrative Procedure Act (5 U.S.C. 553) agencies generally offer interested parties the opportunity to comment on proposed regulations before they become effective. However, in this case OMB previously provided the public an opportunity to comment on the revision of Circular A–110, and this regulatory action codifies that revision. Accordingly, while the participating agencies are requesting public comment on this regulatory action, they find that soliciting further public comment with respect to adopting the revised circular, prior to the adoption becoming effective, is unnecessary and contrary to public interest under 5 U.S.C. 553(b)(B). The regulatory action is therefore being issued as an interim final rule.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996, 5 U.S.C. 804. This rule will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

Executive Order 13132: Federalism

This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with section 6 of Executive Order 13132, the participating agencies have determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

Text of the Interim Final Rule

The text of the interim final rule appears below:

PART/SUBPART—[AMENDED]

1. Section .36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) to read as follows:

§ .36 Intangible property.

* * * * *

(c) The Federal Government has the right to:

(1) Obtain, reproduce, publish or otherwise use the data first produced under an award; and

(2) Authorize others to receive, reproduce, publish, or otherwise use such data for Federal purposes.

(d) (1) In addition, in response to a Freedom of Information Act (FOIA) request for research data relating to published research findings produced under an award that were used by the Federal Government in developing an agency action that has the force and effect of law, the Federal awarding agency shall request, and the recipient shall provide, within a reasonable time, the research data so that they can be made available to the public through the procedures established under the FOIA. If the Federal awarding agency obtains the research data solely in response to a FOIA request, the agency may charge the requester a reasonable fee equaling the full incremental cost of obtaining the research data. This fee should reflect costs incurred by the agency, the recipient, and applicable subrecipients. This fee is in addition to any fees the agency may assess under the FOIA (5 U.S.C. 552(a)(4)(A)).

(2) The following definitions apply for purposes of this paragraph (d):

(i) *Research data* is defined as the recorded factual material commonly accepted in the scientific community as necessary to validate research findings, but not any of the following: preliminary analyses, drafts of scientific papers, plans for future research, peer reviews, or communications with colleagues. This "recorded" material excludes physical objects (e.g., laboratory samples). *Research data* also do not include:

(A) Trade secrets, commercial information, materials necessary to be held confidential by a researcher until they are published, or similar information which is protected under law; and

(B) Personnel and medical information and similar information the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, such as information that could be used to identify a particular person in a research study.

(ii) *Published* is defined as either when:

(A) Research findings are published in a peer-reviewed scientific or technical journal; or

(B) A Federal agency publicly and officially cites the research findings in support of an agency action that has the force and effect of law.

(iii) *Used by the Federal Government in developing an agency action that has the force and effect of law* is defined as when an agency publicly and officially cites the research findings in support of an agency action that has the force and effect of law.

* * * * *

Adoption of Interim Final Rule

The adoption of the interim final rule by the participating agencies, as modified by agency-specific text is set forth below:

DEPARTMENT OF AGRICULTURE

7 CFR Part 3019

FOR FURTHER INFORMATION CONTACT: Gerald Miske, Fiscal Policy Division, Office of the Chief Financial Officer, 202–720–1553.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Agriculture (USDA) is publishing this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section—.36 regarding the availability of data produced under an award through the Freedom of Information Act into USDA's grants administration regulation at 7 CFR Part 3019. Consistent with this Circular, this rule applies to USDA awards made to institutions of higher education, hospitals, and other non-profit organizations. It also applies to subrecipients performing work under awards if such subrecipients are institutions of higher education, hospitals, and other non-profit organizations.

List of Subjects in 7 CFR Part 3019

Accounting, Colleges and universities, Grant programs—agriculture, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: January 20, 2000.

Sally Thompson,

Chief Financial Officer.

Dated: January 21, 2000.

Dan Glickman,

Secretary of Agriculture.

For reasons stated in the preamble, the Department of Agriculture amends 7 CFR part 3019 as follows:

PART 3019—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, AND OTHER NON-PROFIT ORGANIZATIONS

1. The authority citation for part 3019 continues to read as follows:

Authority: 5 U.S.C. 301.

§ 3019.36 [Amended]

2. Section 3019.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

DEPARTMENT OF ENERGY

10 CFR Part 600

FOR FURTHER INFORMATION CONTACT: Trudy Wood, Office of Procurement and Assistance Policy (MA–51), U.S. Department of Energy, 1000 Independence Avenue, S.W., Washington, D.C.20585, telephone 202–586–5625.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Energy (DOE) is publishing this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section .36 regarding the availability of data produced under an award through the Freedom of Information Act into DOE's assistance regulations at 10 CFR Part 600. Consistent with this Circular and 10 CFR Part 600, this rule applies to DOE awards made to institutions of higher education, hospitals, other non-profit organizations and commercial organizations. The OMB notices in the **Federal Register** soliciting comments on this subject did not address the potential applicability of the revisions to OMB Circular A–110 to commercial organizations. Since the application of OMB Circular A–110 to commercial organizations is optional, 10 CFR 600.136(d) will not apply to commercial organizations.

List of Subjects in 10 CFR Part 600

Accounting, Colleges and universities, Grants programs, Hospitals, Intergovernmental relations, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: January 21, 2000.

Edward R. Simpson,

Acting Director, Office of Procurement and Assistance Management.

For the reasons stated in the preamble, the Department of Energy amends 10 CFR part 600 as follows:

PART 600—FINANCIAL ASSISTANCE RULES

1. The authority citation for part 600 continues to read as follows:

Authority: 42 U.S.C. 7254, 7256, 13525; 31 U.S.C. 6301–6308, unless otherwise noted.

Subpart B—Uniform Administrative Requirements for Grants and Cooperative Agreements With Institutions of Higher Education, Hospitals, Other Non-Profit Organizations and Commercial Organizations

§ 600.136 [Amended]

2. Section 600.136 (.36) is amended as follows:

a. Paragraph (b) is removed.

b. Paragraph (a)(2) is redesignated as new paragraph (b) and revised.

c. Paragraph (a)(3) is redesignated as paragraph (c) and revised as set forth at the end of the common preamble.

d. Newly redesignated paragraph (c) is further amended by removing the phrase "The Federal Government" in the introductory text and adding "DOE" in its place.

e. Paragraph (a)(4) is redesignated as paragraph (e) and the first sentence is revised.

f. Paragraph (a) is revised.

g. Paragraph (d) is added as set forth in the common preamble.

h. New paragraph (d) is further amended by removing the phrase "Federal awarding agency" in paragraph (d)(1) each time it appears and adding "DOE" in its place and by adding paragraph (d)(3).

The revisions and addition read as follows:

§ 600.136 Intangible property.

(a) Recipients that are institutions of higher education, hospitals, and other non-profit organizations may copyright any work that is subject to copyright and was developed, or for which ownership was purchased, under an award. DOE reserves a royalty-free, nonexclusive and irrevocable right to reproduce, publish or otherwise use the work for Federal purposes and to authorize others to do so.

(b) In addition to this section, recipients must follow the requirements set forth at 10 CFR 600.27.

* * * * *

(d) * * *

(3) This paragraph (d) applies only to recipients that are institutions of higher education, hospitals, and other non-profit organizations.

(e) For recipients that are institutions of higher education, hospitals, and other non-profit organizations, title to intangible property and debt instruments acquired under an award or subaward vests upon acquisition in the recipient. * * *

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1260

FOR FURTHER INFORMATION CONTACT: Diane Thompson, Manager, Sponsored Research Business Activity, Code HC, NASA Headquarters, Washington, DC, (202) 358–0514, e-mail: diane.thompson@hq.nasa.gov.

ADDITIONAL SUPPLEMENTARY INFORMATION: The National Aeronautics and Space Administration (NASA) is publishing this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section—.36 regarding the availability of data produced under an award through the Freedom of Information Act into NASA's grants

administration regulation at 14 CFR Part 1260. Consistent with this Circular, this rule applies to NASA awards made to institutions of higher education, hospitals and other non-profit organizations.

List of Subjects in 14 CFR 1260

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Recordkeeping and reporting requirements.

Anne Guenther,

Acting Associate Administrator for Procurement.

For the reasons stated in the preamble, the National Aeronautics and Space Administration amends 14 CFR Part 1260 as follows:

PART 1260—GRANTS AND COOPERATIVE AGREEMENTS

1. The authority citation for part 1260 is revised to read as follows:

Authority: 42 U.S.C. 2473(c)(1); Pub. L. 97–258, 96 Stat. 1003 (31 U.S.C. 6301 *et seq.*); and OMB Circular A–110 (64 FR 54926, October 8, 1999).

Subpart B—Uniform Administrative Requirements for Grants and Cooperative Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations

§ 1260.136 [Amended]

2. Section 1260.136 (—.36) is amended as follows:

a. Paragraph (c) is revised as set forth at the end of the common preamble.

b. Paragraphs (d) and (e) are redesignated as paragraphs (e) and (f).

c. Paragraph (d) is added as set forth at the end of the common preamble.

d. New paragraph (d) is further amended by removing the phrase "Federal awarding agency" in paragraph (d)(1) each time it appears and adding "NASA" in its place.

DEPARTMENT OF COMMERCE

15 CFR Part 14

FOR FURTHER INFORMATION CONTACT: Susan L. Sutherland, Director, Office of Executive Assistance Management, Telephone Number 202–482–4115.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Commerce (DoC) is publishing this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section .36 regarding the availability of data produced under an award through the Freedom of Information Act into DoC's grants administration regulation at 15 CFR Part 14. Consistent with this Circular, this rule applies to DoC awards made to institutions of higher education, hospitals, other non-profit, and commercial organizations. It also applies to such entities if they are recipients of subawards from States, and local and Indian Tribal governments administering programs under DoC awards.

List of Subjects in 15 CFR Part 14

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Susan L. Sutherland,

Director, Office of Executive Assistance Management.

For the reasons stated in the preamble, the Department of Commerce amends 15 CFR part 14 as follows:

PART 14—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, OTHER NON-PROFIT, AND COMMERCIAL ORGANIZATIONS

1. The authority citation for part 14 is revised to read as follows:

Authority: 5 U.S.C. 301; OMB Circular A–110 (64 FR 54926, October 8, 1999).

§ 14.36 [Amended]

2. Section 14.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

3. Section 14.36 is further amended by removing the phrase "Federal awarding agency" in paragraph (d)(1) each time it appears and adding "DoC" in its place.

DEPARTMENT OF STATE

22 CFR Part 145

FOR FURTHER INFORMATION CONTACT: Georgia Hubert, Director, Federal Assistance Program, Office of the Procurement Executive, U.S. Department of State, Washington, DC 20520, (703) 812–2526.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of State (DOS) is publishing this interim final rule to incorporate the provisions of OMB Circular A–110, Section —.36, regarding the availability through the Freedom of Information Act of data produced under an award, into the DOS grants uniform administrative requirements at 22 CFR Part 145. Consistent with this Circular, this rule applies to DOS awards made to institutions of higher education, hospitals and other non-profit organizations. It also applies to such entities if they are recipients of subawards from States, local and Indian Tribal governments administering programs under DOS awards. The OMB notices in the **Federal Register** soliciting comments on this subject did not address the potential applicability of the revisions to OMB Circular A–110 to commercial organizations. Since the application of OMB Circular A–110 to commercial organizations is optional, 22 CFR section 145.36(d)(1) will not apply to commercial organizations.

List of Subjects in 22 CFR Part 145

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: January 13, 2000.

Lloyd W. Pratsch,

Procurement Executive.

For the reasons stated in the preamble, the Department of State amends 22 CFR part 145 as follows:

PART 145—GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, AND OTHER NONPROFIT ORGANIZATIONS

1. The authority citation for part 145 is revised to read as follows:

Authority: 22 U.S.C. 2658.1; OMB Circular A–110 (64 FR 54926, October 8, 1999).

2. Section 145.1 is amended by revising the first sentence to read as follows:

§ 145.1 Purpose.

This regulation establishes uniform administrative requirements for Department of State grants and cooperative agreements awarded to institutions of higher-education, hospitals, other nonprofit organizations, and commercial organizations, except that § 145.36(d)(1) shall not apply to commercial organizations. * * *

§ 145.36 [Amended]

3. Section 145.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

4. Section 145.36 is further amended by adding paragraph (d)(3) to read as follows:

§ 145.36 Intangible property.

* * * * *

(d) * * *

(3) The requirements set forth in paragraph (d)(1) of this section do not apply to commercial organizations.

* * * * *

AGENCY FOR INTERNATIONAL DEVELOPMENT

22 CFR Part 226

FOR FURTHER INFORMATION CONTACT: M/OP/P, Diana Esposito, Procurement Analyst, U.S. Agency for International Development, Room 7.08–105, M/OP/P, 1300 Pennsylvania Avenue, N.W., Washington, D.C. 20523–7801, Telephone (202) 712–4163, FAX (202) 216–3395.

List of Subjects in 22 CFR Part 226

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Agency for International Development amends 22 CFR part 226 as follows:

PART 226—ADMINISTRATION OF ASSISTANCE AWARDS TO U.S. NON-GOVERNMENTAL ORGANIZATIONS

1. The authority citation for part 226 continues to read as follows:

Authority: Sec. 621, Pub. L. 87–195, 75 Stat. 445 (22 U.S.C. 2381), as amended; E.O. 12163, Sept. 29, 1979, 44 FR 56673; 3 CFR 1979 Comp., p. 435.

§ 226.36 [Amended]

2. Section 226.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

Dated: January 27, 2000.

Rodney W. Johnson,

Director, Office of Procurement.

DEPARTMENT OF JUSTICE

28 CFR Part 70

[A.G. Order No. 2289–2000]

FOR FURTHER INFORMATION CONTACT: Cynthia J. Schwimer, Comptroller & Chief Financial Officer, Office of Justice Programs, U. S. Department of Justice, (202) 307–0623.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Justice (Department) is publishing this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section—.36 regarding the availability of data produced under an award through the Freedom of Information Act into the Department's grants administration regulation at 28 CFR Part 70. Consistent with this Circular, this rule applies to awards made by the Department to institutions of higher education, hospitals and other non-profit organizations. It also applies to such entities if they are recipients of subawards from States, and local and Indian Tribal governments administering programs under Departmental awards.

List of Subjects in 28 CFR Part 70

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: February 24, 2000.

Janet Reno,

Attorney General.

For the reasons stated in the preamble, the Department of Justice amends 28 CFR part 70 as follows:

PART 70—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND AGREEMENTS (INCLUDING SUBAWARDS) WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS AND OTHER NON-PROFIT ORGANIZATIONS

1. The authority citation for part 70 is revised to read as follows:

Authority: 5 U.S.C. 301; the Omnibus Crime Control and Safe Streets Act of 1968, 42 U.S.C. 3711, *et seq.* (as amended); Juvenile Justice and Delinquency Prevention Act of 1974, 42 U.S.C. 5601, *et seq.* (as amended); Victims of Crime Act of 1984, 42 U.S.C. 10601, *et seq.* (as amended); 18 U.S.C. 4042, 4351–4353; OMB Circular A–110 (64 FR 54926, October 8, 1999).

§ 70.36 [Amended]

2. Section 70.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

3. Section 70. 36 is further amended by removing the phrase "Federal Government" in paragraph (c) introductory text and adding "Department" in its place.

4. Section 70.36 is further amended by removing the phrase "Federal awarding agency" in paragraph (d)(1) each time it appears and adding "Departmental awarding agency" in its place.

DEPARTMENT OF LABOR

29 CFR Part 95

FOR FURTHER INFORMATION CONTACT: Comments specific to the Department of Labor may be directed to Phyllis R. McMeekin, Office of the Acquisition Advocate, 202–219–9174, [fax 202–219–9440]. Mailing address: U.S. Department of Labor, 200 Constitution Avenue, NW, Room N–5425, Washington, DC 20210.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Labor (DOL) is publishing this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section .36 regarding the availability through the Freedom of Information Act of data produced under an award into DOL's grants administration regulation at 29 CFR Part 95. Consistent with this Circular, this rule applies to DOL awards made to institutions of higher education, hospitals and other non-profit organizations. It also applies to such entities if they are recipients of subawards as indicated in Subpart 95.5. The OMB notices in the **Federal Register** soliciting comments on this subject did not address the potential applicability of the revisions to OMB Circular A–110 to commercial organizations. Since the application of OMB Circular A–110 to commercial organizations is optional, 29 CFR § 95.36(d)(1) will not apply to commercial organizations.

List of Subjects in 29 CFR Part 95

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: January 27, 2000.

Alexis M. Herman,

Secretary of Labor.

For the reasons stated in the preamble, the Department of Labor amends 29 CFR part 95 as follows:

PART 95—GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, AND OTHER NON-PROFIT ORGANIZATIONS, AND WITH COMMERCIAL ORGANIZATIONS, FOREIGN GOVERNMENTS, ORGANIZATIONS UNDER THE JURISDICTION OF FOREIGN GOVERNMENTS, AND INTERNATIONAL ORGANIZATIONS

1. The authority citation for part 95 is revised to read as follows:

Authority: 5 U.S.C. 301; OMB Circular A–110 (64 FR 54926, October 8, 1999); Secretary of Labor's Order 4–76.

§ 95.36 [Amended]

2. Section 95.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

3. Section 95.36 is further amended by removing the phrase "The Federal Government" in paragraph (c) introductory text, and adding "DOL" in its place.

4. Section 95.36 is further amended by removing the phrase "Federal awarding agency" in paragraph (d)(1) each time it appears, and adding "DOL" in its place.

DEPARTMENT OF DEFENSE

32 CFR Parts 22 and 32

FOR FURTHER INFORMATION CONTACT: Mark Herbst, Office of the Deputy Under Secretary of Defense (Science and Technology), 3080 Defense Pentagon, Washington, D.C. 20301–3080.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Defense (DoD) adopts two interim final amendments to the DoD Grant and Agreement Regulations (DoDGARs). These amendments apply to awards made on or after the effective date of this regulatory change.

The principal amendment is to section 32.36 of Part 32 of the DoDGARs, which is the DoD's implementation of OMB Circular A–110. In adopting this amendment, the Office of the Secretary of Defense, the Military Departments and the Defense Agencies will maintain uniform policies on access to data produced under awards to universities and nonprofit organizations that are consistent with the policies of other Executive Departments and Agencies.

The other amendment is to Appendix C of Part 22 of the DoDGARs, to conform that appendix to the revised section 32.36 of Part 32. The change is to delete language advising DoD grants officers that an issue to be addressed in award terms and conditions is whether to waive the Government's access rights to data produced under awards. With the revision to section 32.36 of part 32, that no longer is an option. Two other technical corrections are made to the appendix, to correct citations to sections of the DoDGARs.

List of Subjects

32 CFR Part 22

Accounting, Grant programs—education, Reporting and recordkeeping requirements.

32 CFR Part 32

Accounting, Administrative practice and procedure, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, the Department of Defense amends Subchapter B of Chapter I of Title 32 of the Code of Federal Regulations as follows:

PART 22—[AMENDED]

1. The authority citation for part 22 continues to read as follows:

Authority: 5 U.S.C. 301 and 10 U.S.C. 113.

2. Appendix C to Part 22 is revised to read as follows:

BILLING CODE 3410–KS, 6450–01, 7510–01, 3510–FA, 4710–05, 6116–01, 4410–18, 4510–23, 5001–10, 4000–01, 7515–01, 6560–50, 4310–RF, 4150–24, 4910–62–P

Appendix C to Part 22—Administrative Requirements and Issues to be Addressed in Award Terms and Conditions

REQUIREMENT, IN BRIEF	SOURCE OF REQUIREMENT, FOR EACH TYPE OF RECIPIENT (WHERE DETAILS MAY BE FOUND)			ISSUES TO BE ADDRESSED IN AWARD TERMS/CONDITIONS
	University or other nonprofit	Governmental entity	For-profit entity	
Standards for Financial Management Systems. Recipients' systems to comply with:	32 CFR 32.21	32 CFR 33.20	32 CFR 34.11	For university, nonprofit, or for-profit entity, specify if want: • Bonding and insurance [32 CFR 32.21(c) or 32 CFR 34.11(b)]. • Fidelity bond [32 CFR 32.21(d) or 32 CFR 34.11(c)].
Payment. Recipients request payments and handle advances and interest in compliance with:	32 CFR 32.22	32 CFR 33.21, 33.41(d) and (e)	32 CFR 34.12	Specify: • Payment method (e.g., advance, reimbursement, working capital advance). NOTE: if predetermined payment schedule is used, must specify means to ensure that recipients don't develop large cash balances well in advance of needs for such funds (e.g., recipient submits SF-269 or SF-270 forms at regular intervals, for grants officer to review recipients' cash on hand). • Name/address of office to which recipient sends payment requests. • How frequently recipient may submit payment requests. • Whether recipient requests payment by SF-270, SF-271, or other form, or by electronic means (e.g., electronic data interchange). • Name/address of office that will make payments, and whether the recipient is to receive payments by electronic funds transfer (see §22.605(c) and §22.810(b)(2)). • Name/address of office to which recipient is to remit any interest earned, if advance payment method is to be used. If interest is to be remitted using electronic commerce, information should be provided on required format and data elements.
Allowable costs. Allowability of costs to be in accordance with:	32 CFR 32.27 and 32.28	32 CFR 33.22 and 33.23	32 CFR 34.17	
Fee/profit. None allowed.			32 CFR 34.18	
Cost share or match. If cost share or match is required, allowability and valuation are governed by:	32 CFR 32.23	32 CFR 33.24	32 CFR 34.13	Specify if want to allow inclusion of certain types of items as cost share or allow them to be valued in certain ways [32 CFR 32.23(b), (c), and (g); 32 CFR 33.24(b)(4), (b)(5), and (e)(2); 32 CFR 34.13(a)(7), (b)(1), and (b)(4)(ii)].

REQUIREMENT, IN BRIEF	SOURCE OF REQUIREMENT, FOR EACH TYPE OF RECIPIENT (WHERE DETAILS MAY BE FOUND)			ISSUES TO BE ADDRESSED IN AWARD TERMS/CONDITIONS
	University or other nonprofit	Governmental entity	For-profit entity	
Program income. Recipients account for program income in accordance with:	32 CFR 32.24	32 CFR 33.25	32 CFR 34.14	Specify: • Method for disposition [32 CFR 32.24(b), (c), and (d); 32 CFR 33.25(g); 32 CFR 34.14(d), (e), and (f)]. • If want recipient to have obligation to Government for certain types of income or for income earned after end of project period [32 CFR 32.24(e) and (h), 32 CFR 33.25(a), (d), (e), and (h), 32 CFR 34.14(b)]. • If want to allow recipient to deduct costs of generating income [32 CFR 32.24(f), 32 CFR 33.25(c), 32 CFR 34.14(c)].
Revision of budget/program plans. Recipients request prior approval for plan changes, in accordance with:	32 CFR 32.25	32 CFR 33.30	32 CFR 34.15	Specify if wish to: • Waive some prior approvals that are optional, but are in effect unless specifically waived [32 CFR 33.30(b), (c)(1), (d)(3); 32 CFR 34.15(c)(2)]. • Require some prior approvals that are optional, but are only in effect if specifically stated [32 CFR 32.25(c)(5), (d), (e), (h); 32 CFR 34.15(c)(3)]. • Waive the requirement for prior approval [32 CFR 25.25(d)(3)] for recipient to initiate one-time, no-cost extension, as long as the DoD Component judges that the recipient's doing so would not cause the DoD Component to fail to comply with DoD funding policies (e.g., the incremental programming and budgeting policy for research funding) contained in Volume 2A of the DoD Financial Management Regulation (DoD 7000.14-R).
Audit. Recipients periodically to have independent, financial and compliance audit and report to DoD, subject to provisions of:	32 CFR 32.26	32 CFR 33.26	32 CFR 34.16	Require all but for-profit entities to submit copy of OMB Circular A-133 audit reports to IG, DoD. Require for-profit entities to submit audit reports to whichever office(s) the DoD Component wishes audit reports to be sent.
Procurement. Recipients' systems for acquiring goods and services under awards are to comply with:	32 CFR 32.40 through 32.49	32 CFR 33.36	32 CFR 34.30 through 34.31	Specify if want to require recipient to make certain preaward documents available for DoD Component's review [32 CFR 32.44(e); 32 CFR 33.36(g); 32 CFR 34.31(b)].

REQUIREMENT, IN BRIEF	SOURCE OF REQUIREMENT, FOR EACH TYPE OF RECIPIENT (WHERE DETAILS MAY BE FOUND)			ISSUES TO BE ADDRESSED IN AWARD TERMS/CONDITIONS
	University or other nonprofit	Governmental entity	For-profit entity	
Subawards. Recipients flow down requirements to subawards in accordance with:	32 CFR 32.5, 32 CFR 33.37, and 32 CFR 34.1(b)(2)			
Property. Recipients manage in accordance with:	32 CFR 32.30 through 32.37	32 CFR 33.31 through 33.34	32 CFR 34.20 through 34.25	Specify if want: • To allow for-profit entities to acquire real property under awards [32 CFR 34.21(a)]. • University or other nonprofit to have any further obligation to Government for exempt property [32 CFR 32.33(b)]. • To retain right to transfer title [32 CFR 32.34(h). 32 CFR 33.32(g)]. • To allow recipients to use equipment for certain purposes [32 CFR 32.34(d) and (e); 32 CFR 33.32(c)(4); 32 CFR 34.21(d)]. • To waive data rights [32 CFR 34.25(b)(2)]. • To require recipients to record liens [32 CFR 32.37]. For research awards to certain recipients, include patents clause required by 37 CFR 401 [32 CFR 32.36(b); 32 CFR 34.25(a)].
Reports. Requirements are specified in:	32 CFR 32.51 and 32.52	32 CFR 33.40 and 33.41	32 CFR 34.41	Specify: • When recipients are to submit periodic and final performance reports [32 CFR 32.51(b) and (c); 32 CFR 33.40(b), (c), and (f); 32 CFR 34.41]. • Frequency of financial status/cash transaction reports [32 CFR 32.52(a)(1)(iii) and (a)(2)(iv); 32 CFR 33.41(b)(3) and (c); 32 CFR 34.41], or if wish to waive them under certain conditions [32 CFR 32.52(a)(1)(i) and (a)(2)(v); 32 CFR 33.41(a)(6); 32 CFR 34.41]. • Whether want reports on cash or accrual basis [32 CFR 32.52(a)(1)(ii); 32 CFR 33.41(b)(2); 32 CFR 34.41].
Records. Retention and access requirements specified in:	32 CFR 32.53	32 CFR 33.42	32 CFR 34.42	

REQUIREMENT, IN BRIEF	SOURCE OF REQUIREMENT, FOR EACH TYPE OF RECIPIENT (WHERE DETAILS MAY BE FOUND)			ISSUES TO BE ADDRESSED IN AWARD TERMS/CONDITIONS
	University or other nonprofit	Governmental entity	For-profit entity	
Termination and enforcement. Award is subject to:	32 CFR 32.61 and 32.62	32 CFR 33.43 and 33.44	32 CFR 34.51 and 34.52	
Disputes, claims, and appeals. Procedures are specified in:	32 CFR 22.815			• Include term or condition that incorporates procedures, in accordance with 32 CFR 22.815(a).
After-the-award requirements. Closeout, subsequent adjustments, continuing responsibilities, and collection of amounts due are subject to requirements in:	32 CFR 32.71 through 32.73	32 CFR 33.50 through 33.52	32 CFR 34.61 through 34.63	

BILLING CODE 3410-KS, 6450-01, 7510-01, 3510-FA, 4710-05, 6116-01, 4410-18, 4510-23, 5001-10, 4000-01, 7515-01, 8560-50, 4310-RF, 4150-24, 4910-62

PART 32—[AMENDED]

3. The authority citation for part 32 continues to read as follows:

Authority: 5 U.S.C. 301 and 10 U.S.C. 113.

§ 32.36 [Amended]

4. Section 32.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

5. Section 32.36 is further amended by removing the phrase "Federal awarding agency" in paragraph (d)(1) each time it appears, and adding "DoD Component that made the award" in its place.

Dated: January 25, 2000.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF EDUCATION

34 CFR Part 74

FOR FURTHER INFORMATION CONTACT: Arthur Stewart. Telephone: (202) 708–9049. If you use a telecommunications device for the deaf (TDD), you may call the Federal Information Relay Service at 1–800–877–8339. Individuals with disabilities may obtain this document in an alternative format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed in the preceding paragraph.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Education (ED) publishes this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section .36 regarding the availability of data produced under a grant award through the Freedom of Information Act into ED's grants administration regulations at 34 CFR Part 74. Consistent with the Circular, this rule applies to ED grant awards made to institutions of higher education, hospitals and other non-profit organizations. It also applies to those entities if they are recipients of subawards from States, and local and Indian Tribal governments administering programs under ED awards.

Invitation to Comment: In addition to any comments submitted to Charles Gale at the U.S. Department of Health and Human Services, we invite you to submit comments regarding ED's specific implementation of these interim final regulations to Arthur Stewart, Department of Education, room 3652, ROB–3, Seventh and D Streets, SW., Washington, DC 20202–4248.

During and after the comment period, you may inspect public comments submitted to ED about it's specific interim final regulations in room 3652, ROB–3, Seventh and D Streets, SW, Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Eastern time, Monday through Friday of each week except Federal holidays.

Assistance to Individuals With Disabilities in Reviewing the Rulemaking Record: On request, we will supply an appropriate aid, such as a reader or print magnifier, to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking record for these interim final regulations. If you want to schedule an appointment for this type of aid, you may call (202) 205–8113 or (202) 260–9895. If you use a TDD, you may call the Federal Information Relay Service at 1–800–877–8339.

Assessment of Educational Impact: Based on our own review, we have determined that these final regulations do not require transmission of information that any other agency or authority of the United States gathers or makes available.

Electronic Access to this Document: You may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or Adobe Portable Document Format (PDF) on the Internet at either of the following sites: http://ocfo.ed.gov.fedreg.htm, and http://www.ed.gov/news.html

To use the PDF you must have the Adobe Acrobat Reader Program with Search, which is available free at either of the previous sites. If you have questions about using the PDF, call the U.S. Government Printing Office (GPO), toll free, at 1–888–293–6498; or in the Washington, DC, area at (202) 512–1530.

The official version of this document is published in the **Federal Register.** Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available on GPO Access at: http://www.access.gpo.gov/nara/index.html

List of Subjects in 34 CFR Part 74

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: January 24, 2000.

Richard W. Riley,

Secretary of Education.

For the reasons stated in the preamble, the Secretary of Education amends 34 CFR part 74 as follows:

PART 74—ADMINISTRATION OF GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, AND OTHER NON-PROFIT ORGANIZATIONS

1. The authority citation for part 74 continues to read as follows:

Authority: 20 U.S.C. 1221e–3, 3474; OMB Circular A–110, unless otherwise noted.

§ 74.36 [Amended]

2. Section 74.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

3. Section 74.36 is further amended by removing the phrase "the Federal awarding agency" in paragraph (d)(1) each time it appears and adding "ED" in its place.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

36 CFR Part 1210

FOR FURTHER INFORMATION CONTACT: Nancy Allard at 301–713–7360, extension 226 or by fax at 301–713–7270.

ADDITIONAL SUPPLEMENTARY INFORMATION: The National Historical Publications and Records Commission (NHPRC) is the grant-making component of the National Archives and Records Administration (NARA). The NHPRC makes grants to state and local archives, colleges and universities, libraries, historical societies, and other nonprofit organizations in the U.S. to help identify, preserve, and provide public access to records, photographs, and other materials that document American history. We are publishing this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section .36 regarding the availability of data produced under an award through the Freedom of Information Act into our NHPRC grants administration regulation at 36 CFR Part 1210.

List of Subjects in 36 CFR Part 1210

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: January 11, 2000.

John W. Carlin,

Archivist of the United States.

For the reasons stated in the preamble, the National Archives and Records Administration amends 36 CFR part 1210 as follows:

PART 1210—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND AGREEMENTS TO INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, AND OTHER NON-PROFIT ORGANIZATIONS

1. The authority citation for part 1210 is revised to read as follows:

Authority: 5 U.S.C. 301; OMB Circular A–110 (64 FR 54926, October 8, 1999).

§ 1210.36 [Amended]

2. Section 1210.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding new paragraph (d) as set forth at the end of the common preamble.

3. Section 1210.36 is further amended by removing the phrase "Federal awarding agency" in paragraph (d)(1) each time it appears and adding "NHPRC" in its place.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 30

FOR FURTHER INFORMATION CONTACT: Alexandria Mincey, Grants Administration Division, Policy, Information and Training Branch, 1300 Pennsylvania Avenue, NW (3903R), Fifth Floor, Room 51288, Washington, DC 20004, (202) 564–5371.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Environmental Protection Agency (EPA) is publishing this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section .36 regarding the availability of data produced under an award through the Freedom of Information Act into EPA's grants administration regulation at 40 CFR Part 30. Consistent with this Circular, this rule applies to EPA assistance awards made to institutions of higher education, hospitals and other non-profit organizations. It also applies to such entities if they are recipients of subawards from States, local and Indian Tribal governments under EPA awards.

The Agency will implement a process for determination, assessment, collection, and reimbursement of recipients' costs.

List of Subjects in 40 CFR Part 30

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: January 13, 2000.

Carol M. Browner,

Administrator of the Environmental Protection Agency.

For the reasons stated in the preamble, the Environmental Protection Agency amends 40 CFR Part 30 as follows:

PART 30—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, AND OTHER NON-PROFIT ORGANIZATIONS

1. The heading for part 30 is revised to read as set forth above.

2. The authority citation for part 30 is revised to read as follows:

Authority: 7 U.S.C. 135 *et seq.*; 15 U.S.C. 2601 *et seq.*; 33 U.S.C. 1251 *et seq.*; 42 U.S.C. 241, 242b, 243, 246, 300f, 300j–1, 300j–2, 300j–3, 1857 *et seq.*, 6901 *et seq.*, 7401 *et seq.*, 9601 *et seq.*; OMB Circular A–110 (64 FR 54926, October 8, 1999).

§ 30.36 [Amended]

3. Section 30.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

4. Section 30.36 is further amended by removing the phrase "Federal awarding agency" in paragraph (d)(1) each time it appears and adding "EPA" in its place.

DEPARTMENT OF THE INTERIOR

43 CFR Part 12

FOR FURTHER INFORMATION CONTACT: Debra E. Sonderman, (Director, Office of Acquisition and Property Management), (202) 208–6431.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of the Interior (DOI) has implemented OMB Circular A–110 at 43 CFR Part 12, Subpart F. There is also a provision at 43 CFR Part 12, Subpart A, Section 12.2(a) which confirms that grants and cooperative agreements which are awarded by DOI to institutions of higher education, hospitals and other non-profit organizations, are governed by Subpart F and OMB Circular A–110. The regulation at Subpart A documents that OMB Circular A-110 is a part of the regulation as well as any changes made to the Circular and subsequently published in the **Federal Register**. Therefore, awards made by DOI were considered covered on the effective date of the changes published in the revised Circular, November 8, 1999.

In order to amend DOI's codification of the Circular at 43 CFR Part 12, Subpart F, DOI is participating in this joint publication so that the recent revisions made by OMB can be reflected. With the publication of this interim final rule, we are incorporating the provisions of OMB Circular A–110, Section .36 regarding the availability of data produced under an award through the Freedom of Information Act into the implementing regulation at 43 CFR Part 12, Subpart F.

Compliance With Laws, Executive Orders, and Department Policy: In addition to the certifications stated in the general preamble, DOI is including the following statements:

In accordance with Executive Order 12630, the rule does not have significant takings implications. A takings implication assessment is not required. No takings of personal property will occur as a result of this rule.

In accordance with Executive Order 12988, the Office of the Solicitor has determined that this rule does not unduly burden the judicial system and meets the requirements of sections 3(a) and 3(b)(2) of the Order.

This rule does not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the National Environmental Policy Act of 1969 is not required.

In accordance with the President's memorandum of April 29, 1994, "Government-to-Government Relations with Native American Tribal Governments" (59 FR 22951 and 512 DM 2), we have evaluated possible effects on Federally recognized Indian tribes and have determined that there are no effects on trust resources. This regulation concerns the information that federally-funded researchers must provide in response to Freedom of Information Act requests related to grants and cooperative agreements awarded to institutions of higher education, hospitals, and other non-profit organizations.

List of Subjects in 43 CFR Part 12

Accounting, Administrative practice and procedure, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: January 13, 2000.

John Berry,

Assistant Secretary-Policy, Management and Budget.

For the reasons set forth in the preamble, the Department of the Interior amends 43 CFR part 12 as follows:

PART 12—ADMINISTRATIVE AND AUDIT REQUIREMENTS AND COST PRINCIPLES FOR ASSISTANCE PROGRAMS

1. The authority for part 12 is revised to read as follows:

Authority: 5 U.S.C. 301; 31 U.S.C. 6101 note, 7501; 41 U.S.C. 252a, 701 *et seq;* Pub. L. 104–256, 110 Stat. 1396; sec. 501, Pub. L. 105–62, 111 Stat. 1338; sec. 503, Pub. L. 105–62, 111 Stat. 1339; sec. 303, Pub. L. 105–83, 111 Stat. 1589; sec. 307, Pub. L. 105–83, 111 Stat. 1590; E.O. 12549, 3 CFR, 1986 Comp., p. 189; E.O. 12674, 3 CFR, 1989 Comp., p. 215; E.O. 12689, 3 CFR, 1989 Comp., p. 235; E.O. 12731, 3 CFR, 1990 Comp., p. 306; E.O. 13043, 62 FR 19217; 3 CFR 1997 Comp., p. 195; OMB Circular A–102; OMB Circular A–110; and OMB Circular A–133.

Subpart F—Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations

§ 12.936 [Amended]

2. Section 12.936 (.36) is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Part 74

FOR FURTHER INFORMATION CONTACT: Charles Gale, Director, Office of Grants Management, 202–690–6377; for the hearing impaired only: TDD 202–690–6415.

ADDITIONAL SUPPLEMENTARY INFORMATION: The Department of Health and Human Services (HHS) is publishing this interim final rule to incorporate the provisions of OMB Circular A–110, Section —.36, regarding the availability through the Freedom of Information Act of data produced under an award, into the HHS grants administration regulation at 45 CFR Part 74. Consistent with this Circular, this rule applies to HHS awards made to institutions of higher education, hospitals and other non-profit organizations. It also applies to such entities if they are recipients of subawards from States, and local and Indian Tribal governments administering programs under HHS awards. We recognize that OMB's notices for public comment regarding this subject did not address the potential applicability to commercial organizations. Since the applicability of OMB Circular A–110 to commercial organizations is optional and 45 CFR Part 74 includes other special provisions for commercial organizations (Subpart E), we have decided to be consistent with other Federal agencies which have decided not to apply the new provision to commercial organizations.

List of Subjects in 45 CFR Part 74

Accounting, Colleges and universities, Grant programs, Hospitals, Indians, Intergovernmental relations, Nonprofit organizations, Reporting and recordkeeping requirements.

Dated: January 14, 2000.

Donna E. Shalala,

Secretary.

For the reasons stated in the preamble, the Department of Health and Human Services amends 45 CFR part 74 as follows:

PART 74—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR AWARDS AND SUBAWARDS TO INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, OTHER NONPROFIT ORGANIZATIONS, AND COMMERCIAL ORGANIZATIONS; AND CERTAIN GRANTS AND AGREEMENTS WITH STATES, LOCAL GOVERNMENTS AND INDIAN TRIBAL GOVERNMENTS

1. The authority citation for part 74 is revised to read as follows:

Authority: 5 U.S.C. 301; OMB Circular A–110 (64 FR 54926, October 8, 1999).

2. Section 74.1(a)(1) is revised to read as follows:

§ 74.1 Purpose and applicability.

(a) * * *

(1) Department of Health and Human Services' (HHS) grants and agreements awarded to institutions of higher education, hospitals, other nonprofit organizations and only to commercial organizations in instances other than those involving procedures to make data available under the Freedom of Information Act provision set forth in § 74.36(d)(1).

* * * * *

§ 74.36 [Amended]

3. Section 74.36 is amended:

a. By revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

b. By removing the phrase "Federal awarding agency" in paragraph (d)(1) each time it appears and adding "HHS Awarding Agency" in its place.

c. By adding paragraph (d)(3) to read as follows:

§ 74.36 Intangible property.

* * * * *

(d) * * *

(3) The requirements set forth in paragraph (d)(1) of this section do not apply to commercial organizations.

* * * * *

4. Section 74.83 is added to subpart E to read as follows:

§ 74.83 Effect on intangible property.

Data sharing (FOIA) requirements as set forth in § 74.36(d)(1) do not apply to commercial organizations.

DEPARTMENT OF TRANSPORTATION

49 CFR Part 19

FOR FURTHER INFORMATION CONTACT: Robert G. Taylor, U.S. Department of Transportation, Office of the Senior Procurement Executive, M–62, 400 Seventh Street, S.W., Room 7101, Washington, D.C. 20590, phone (202) 366–4289, fax (202–366–7510, e-mail robert.g.taylor@ost.dot.gov, for grant related questions. Robert I. Ross, U.S. Department of Transportation, Office of the General Counsel, C–10, 400 Seventh Street S.W., Room 10102, Washington, DC 20590, phone (202)366–9156, fax (202)366–9170, email bob.ross@ost.dot.gov, for FOIA related questions.

ADDITIONAL SUPPLEMENTAL INFORMATION: The Department of Transportation (DOT) is publishing this interim final rule in order to incorporate the provisions of OMB Circular A–110, Section .36 regarding the availability of data produced under an award through the Freedom of Information Act FOIA into DOT's grants administration regulation at 49 CFR Part 19. Additional information has been added to clarify internal DOT procedures for payments made in accordance with the OMB revisions to Section .36 of the Circular.

List of Subjects in 49 CFR Part 19

Accounting, Colleges and universities, Grant programs, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Rodney E. Slater,

Secretary of Transportation.

For the reasons stated in the preamble, the Department of Transportation amends 49 CFR part 19 as follows:

PART 19—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, AND OTHER NON-PROFIT ORGANIZATIONS

1. The authority citation for part 19 continues to read as follows:

Authority: 49 U.S.C. 322(a).

§ 19.36 [Amended]

2. Section 19.36 is amended by revising paragraph (c), redesignating paragraph (d) as paragraph (e), and adding a new paragraph (d) as set forth at the end of the common preamble.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 98-ANM-10]

Correction to Class E Airspace; Akron, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule published on August 14, 1998, that inadvertently changed the coordinates of the Akron-Washington County Airport, Akron, CO. This action corrects the final rule by reflecting the proper coordinates.

EFFECTIVE DATE: 0901 UTC, December 03, 1998.

FOR FURTHER INFORMATION CONTACT: Dennis Ripley, ANM-520.6, Federal Aviation Administration, Docket No. 98-ANM-10, 1601 Lind Avenue S.W., Renton, Washington, 98055-4056; telephone number: (425) 227-2527.

SUPPLEMENTARY INFORMATION: On August 14, 1998, the FAA published a final rule that amended the Akron, CO, Class E2 and Class E5 airspace designation (63 FR 43618). However, that action provided an inadvertent error to the coordinates of the Akron-Washington County Airport, CO. This action corrects the final rule by reflecting the proper coordinates.

Correction to Final Rule

Accordingly, pursuant to the authority delegated to me, the Class E airspace description at Akron, CO, as published in the **Federal Register** on August 14, 1998 (63 FR 43618), (**Federal Register** Document No. 98-21864) is corrected as follows:

§ 71.1 [Corrected]

On page 43618 in the third column, in the first airspace description, line 3, and in the second airspace description, line 3, correct the geographical coordinates of the Akron-Washington County Airport by removing "(Lat. 40°10'32" N, long. 103°13'20" W)" in its place.

Issued in Seattle, Washington, on August 27, 1998.

Glenn A. Adams III,

Assistant Manager, Air Traffic Division, Northwest Mountain Region.

[Docket No. 980422101-8101-01]

RIN 0605-AA09

Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, Other Non-Profit, and Commercial Organizations

AGENCY: Department of Commerce (DoC).

ACTION: Interim Final Rule.

SUMMARY: This interim final rule implements the revisions to the Office of Management and Budget (OMB) Circular A-110, "Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations" which was published in the **Federal Register** on November 29, 1993. The revised Circular was developed by an interagency task force for governmentwide use in a model rule format to facilitate regulatory adoption by executive departments and agencies. In the published revised Circular, OMB specified as "required action" that Federal agencies responsible for awarding and administering grants and other agreements to recipients described therein, shall adopt the language of the Circular unless other provisions are required by Federal statute or exceptions or deviations are approved by OMB. This interim final rule adopts the provisions of the Circular and its language to the maximum extent feasible. However, minor changes were made to update the procedures, clarify the language, and make the language apply specifically to the DoC and its operating units. No changes are intended to deviate from the substance of Circular A-110. The Circular covers both grants and cooperative agreements made by Federal agencies and subawards, unless sections of the Circular specifically exclude subrecipients from coverage. Consistent with guidance provided in the Circular, DoC will apply its provisions to grants and agreements with institutions of higher education, hospitals, other nonprofit, and commercial organizations. The provisions of the interim final rule will also apply to foreign governments, organizations under the jurisdiction of foreign governments, and international organizations when appropriate.

DATES: This regulation is effective October 1, 1998. Written and signed comments must be received on or before November 3, 1998.

ADDRESSES: Interested persons should submit written and signed comments to Docket No. 980422101-8101-01, U.S. Department of Commerce, Office of Executive Assistance Management, Room 6020, 14th and Constitution Avenue, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: John J. Phelan, III, Director, Office of Executive Assistance Management, Telephone Number 202-482-4115.

SUPPLEMENTARY INFORMATION: This interim final rule incorporates and reflects the provisions of the OMB issuance of the revised OMB Circular A-110, published at 58 FR 62992, to be codified at 15 CFR part 14 of the DoC regulatory requirements for financial assistance awards. OMB Circular A-110 was originally issued by OMB in 1976, and except for a minor revision in 1987 it remained unchanged until this revision was issued. The standards it contained were structured into 15 attachments lettered A through O. An interagency task force also reviewed the circular in 1987 and recommended that it be combined with OMB Circular A-102, "Uniform Requirements for Grants and Agreements with State and Local Governments," as a consolidated "common rule." In November 1988, a proposed consolidated "common rule" was published in the **Federal Register** (53 FR 44716) but, due to adverse concerns by some university groups and Federal agencies, it was not finalized and issued by OMB. In November 1990, another interagency task force was convened to review Circular A-110 and a revision in a "common rule" format was proposed and developed. This revision was published for comment in the **Federal Register** (57 FR 39018) in August 1992 and over 200 comments were received by OMB from many sources. All comments were considered in developing the final revision of Circular A-110 which was issued for governmentwide use in the **Federal Register** on November 29, 1993. Consequently, this rule is published as an interim final rule because of the previous request for comment process used in the development of the Circular, the large number of comments already received and considered by OMB and the Federal agencies, and the limited flexibility to revise the requirements prescribed by OMB. This interim final rule contains the following updates to procedures and clarifying language:

- Foreign governments, organizations under the jurisdiction of foreign governments, and international

organizations will be covered by this interim final rule.

- Taxpayer identification numbers will be required of applicants in accordance with the provisions of the Debt Collection Improvement Act of 1996.
- Federal payments to recipients shall be made by electronic funds transfer in accordance with the Debt Collection Improvement Act of 1996, unless waived in accordance with the provisions of the Act.
- The recipient may not transfer funds among direct cost categories or programs, functions and activities for construction or nonconstruction awards in which the cumulative amount of such transfers exceeds or is expected to exceed 10 percent of the total budget as last approved by the Grants Officer. This restriction applies to all awards, regardless of the amount of Federal funding, and it does not prohibit the recipient from requesting Grants Officer approval for revisions to the budget.
- Recipients and subrecipients that are institutions of higher education or other non-profit organizations (including hospitals) shall be subject to the requirements contained in the Single Audit Act Amendments of 1996 and OMB Circular A-133. Subrecipients that are state and local governments shall also be subject to the requirements contained in the Single Audit Act Amendments of 1996 and OMB Circular A-133. Commercial organizations, foreign governments, organizations under the jurisdiction of foreign governments, and international organizations shall be subject to the audit requirements as stipulated in the award document.
- If there is a residual inventory of supplies exceeding $5000 in total aggregate value upon termination or completion of a project or program and the supplies are not needed for any other federally-sponsored project or program, the recipient shall retain the supplies for use on non-Federally sponsored activities or sell them, but shall, in either case, compensate the Federal Government for its cost share. This encompasses a residual inventory of both used and unused supplies exceeding $5000 in total aggregate value.
- The small purchase threshold (previously $25,000) fixed at 41 U.S.C. 403 (11) reflects the simplified acquisition threshold (currently $100,000) established at 41 U.S.C. 4031 (11) by the Federal Acquisition Streamlining Act of 1994.

For purposes of this interim final rule, "DoC" is a term referring to the Department of Commerce collectively. For purposes of decision making or actions affecting outside entities, "DoC" is also an eclectic term which refers to the organizational entity exercising authority in the specific subject matter under discussion. Within the language of the rule, when the Economic Development Administration (EDA) enters into awards under which it is contemplated that the recipient will dispose of real property improved with Federal funds, EDA may impose conditions for its approval of such disposition.

Executive Orders 12866 and 12875

This interim final rule has been determined to be "significant" for purposes of Executive Order 12866, "Regulatory Planning and Review." In addition, it has been determined that, consistent with the requirements of Executive Order 12875, "Enhancing Intergovernmental Partnership," this interim final rule will not impose any unfunded mandates upon State, local, and tribal governments.

Administrative Procedure Act and Regulatory Flexibility Act

Because notice and comment is not required under 5 U.S.C. 553, or any other law, for this rule relating to public property, loans, grants benefits or contracts (5 U.S.C. 553(a)), a Regulatory Flexibility Analysis is not required and has not been prepared for this interim final rule. As stated above, this rule is based on the revised OMB Circular A-110 that was developed by an interagency task force and received extensive public comment. The revised Circular specifies that Federal agencies responsible for awarding and administering grants and other agreements to recipients described therein, shall adopt the language in the Circular unless different provisions are required by Federal statute or are approved by OMB. This interim final rule essentially adopts the provisions of the Circular word-for-word to the maximum extent feasible.

Executive Order 12612 (Federalism Assessment)

This action has been reviewed in accordance with the principles and criteria contained in Executive Order 12612. The rule primarily applies to organizations other than State and local governments, but for some programs State or local governments are required to pass on these requirements to subrecipients covered by this rule. The rule was drafted to be as consistent as possible with requirements imposed on State and local governments. Accordingly, it has been determined that this proposal does not have sufficient Federalism implications to warrant a full Federalism Assessment under the principles and criteria contained in Executive Order 12612.

Paperwork Reduction Act

These regulatory actions do not impose any new reporting or recordkeeping requirements under the Paperwork Reduction Act. Reporting and recordkeeping requirements in 15 CFR Part 14 are those required by OMB Circular A-110 and have already been cleared by OMB.

Catalog of Federal Domestic Assistance

This rule affects all of the grant and cooperative agreement programs with institutions of higher education, hospitals, other non-profit, and commercial organizations administered by DoC.

List of Subjects in 15 CFR Part 14

Accounting, Administrative practice and procedure, Colleges and universities, Grants administration, Grant programs—economic development, Grant programs—oceans and atmosphere, Grant programs—minority businesses, Grant programs—travel and tourism, Grant programs—technology, Grant programs—telecommunications, Grant programs—international, Hospitals, Nonprofit organizations, Reporting and recordkeeping requirements.

Issued this 19th day of August, 1998 at Washington, D.C.

John J. Phelan,

Director for Executive Assistance Management.

Accordingly, 15 CFR subtitle A is amended by adding part 14 to read as follows:

PART 14—UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, OTHER NON-PROFIT, AND COMMERCIAL ORGANIZATIONS

Subpart A—General

Sec.

14.1 Purpose.
14.2 Definitions.
14.3 Effect on other issuances.
14.4 Deviations.
14.5 Subawards.

Subpart B—Pre-Award Requirements

14.10 Purpose.
14.11 Pre-award policies.
14.12 Forms for applying for Federal assistance.
14.13 Debarment and suspension.
14.14 High risk special award conditions.
14.15 Metric system of measurement

14.16 Resource Conservation and Recovery Act (RCRA).
14.17 Certifications and representations.
14.18 Taxpayer identification number.

Subpart C—Post-Award Requirements

Financial and Program Management

14.20 Purpose of financial and program management.
14.21 Standards for financial management systems.
14.22 Payment.
14.23 Cost sharing or matching.
14.24 Program income.
14.25 Revision of budget and program plans.
14.26 Non-Federal audits.
14.27 Allowable costs.
14.28 Period of availability of funds.

Property Standards

14.30 Purpose of property standards.
14.31 Insurance coverage.
14.32 Real property.
14.33 Federally-owned and exempt property.
14.34 Equipment.
14.35 Supplies and other expendable property.
14.36 Intangible property.
14.37 Property trust relationship.

Procurement Standards

14.40 Purpose of procurement standards.
14.41 Recipient responsibilities.
14.42 Codes of conduct.
14.43 Competition.
14.44 Procurement procedures.
14.45 Cost and price analysis.
14.46 Procurement records.
14.47 Contract administration.
14.48 Contract provisions.

Reports and Records

14.50 Purpose of reports and records.
14.51 Monitoring and reporting program performance.
14.52 Financial reporting.
14.53 Retention and access requirements for records.

Termination and Enforcement

14.60 Purpose of termination and enforcement.
14.61 Termination.
14.62 Enforcement.

Subpart D—After-the-Award Requirements

14.70 Purpose.
14.71 Closeout procedures.
14.72 Subsequent adjustments and continuing responsibilities.
14.73 Collection of amounts due.

Appendix A to Part 14—Contract Provisions

Authority: 5 U.S.C. 301.

Subpart A—General

§ 14.1 Purpose.

This Part establishes uniform administrative requirements for Department of Commerce (DoC) grants and agreements awarded to institutions of higher education, hospitals, other non-profit, and commercial organizations. The Grants Officer shall incorporate this Part by reference into financial assistance awards made to organizations to which it will be applied. The DoC shall not impose additional or inconsistent requirements, except as provided in §§ 14.4, and 14.14 or unless specifically required by Federal statute or executive order. This part applies to grants and agreements awarded to foreign governments, organizations under the jurisdiction of foreign governments, and international organizations unless otherwise determined by the Grants Officer after coordination with the appropriate program officials. Uniform requirements for State, local, and tribal governments are in 15 CFR Part 24, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments. Non-profit organizations that implement Federal programs for the States are also subject to State requirements.

§ 14.2 Definitions.

(a) *Accrued expenditures* means the charges incurred by the recipient during a given period requiring the provision of funds for:

(1) Goods and other tangible property received;

(2) Services performed by employees, contractors, subrecipients, and other payees; and

(3) Other amounts becoming owed under programs for which no current services or performance is required.

(b) *Accrued income* means the sum of:

(1) Earnings during a given period from services performed by the recipient, and goods and other tangible property delivered to purchasers; and

(2) Amounts becoming owed to the recipient for which no current services or performance is required by the recipient.

(c) *Acquisition cost of equipment* means the net invoice price of the equipment, including the cost of modifications, attachments, accessories, or auxiliary apparatus necessary to make the property usable for the purpose for which it was acquired. Other charges, such as the cost of installation, transportation, taxes, duty or protective in-transit insurance, shall be included or excluded from the unit acquisition cost in accordance with the recipient's regular accounting practices.

(d) *Advance* means a payment made by electronic funds transfer, Treasury check, or other appropriate payment mechanism to a recipient upon its request either before outlays are made by the recipient or through the use of predetermined payment schedules.

(e) *Assistant Secretary* means the DoC Chief Financial Officer and Assistant Secretary for Administration who has been delegated by the Secretary of Commerce the responsibility for developing and implementing policies, standards, and procedures for the administration of financial assistance programs of the DoC.

(f) *Award* means financial assistance that provides support or stimulation to accomplish a public purpose. Awards include grants and other agreements in the form of money or property in lieu of money, by the Federal Government to an eligible recipient. The term does not include: technical assistance, which provides services instead of money; other assistance in the form of loans, loan guarantees, interest subsidies, or insurance; direct payments of any kind to individuals; and, contracts which are required to be entered into and administered under procurement laws and regulations.

(g) *Cash contributions* means the recipient's cash outlay, including the outlay of money contributed to the recipient by third parties.

(h) *Closeout* means the process by which the Grants Officer determines that all applicable administrative actions and all required work of the award have been completed by the recipient and the DoC.

(i) *Contract* means a procurement contract under an award or subaward, and a procurement subcontract under a recipient's or subrecipient's contract.

(j) *Cost sharing or matching* means that portion of project or program costs not borne by the Federal Government.

(k) *Date of completion* means the date on which all work under an award is completed or the date on the award document, or any supplement or amendment thereto, on which Federal sponsorship ends.

(l) *Disallowed costs* means those charges to an award that the Grants Officer determines to be unallowable, in accordance with the applicable Federal cost principles or other terms and conditions contained in the award.

(m) *DoC operating unit* means an organizational unit of the Department that has the authority to fund financial assistance awards.

(n) *Equipment* means tangible nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of $5000 or more per unit. However, consistent with recipient policy, lower limits may be established.

(o) *Excess property* means property under the control of the DoC that, as determined by the Grants Officer after

coordination with the authorized property official, is no longer required for DoC needs or the discharge of its responsibilities.

(p) *Exempt property* means tangible personal property acquired in whole or in part with Federal funds, where the DoC has statutory authority to vest title in the recipient without further obligation to the Federal Government. An example of exempt property authority is contained in the Federal Grant and Cooperative Agreement Act (31 U.S.C. 6306), for property acquired under an award to conduct basic or applied research by a non-profit institution of higher education or non-profit organization whose principal purpose is conducting scientific research.

(q) *Federal awarding agency* means the Federal agency that provides an award to the recipient.

(r) *Federal funds authorized* means the total amount of Federal funds obligated by the Federal Government for use by the recipient. This amount may include any authorized carryover of unobligated funds from prior funding periods when permitted by agency regulations or agency implementing instructions.

(s) *Federal share* of real property, equipment, or supplies means that percentage of the property's acquisition costs and any improvement expenditures paid with Federal funds.

(t) *Funding period* means the period of time when Federal funding is available for obligation by the recipient.

(u) *Grants Officer* means the DoC official with the delegated authority to award, amend, administer, closeout, suspend, and/or terminate grants and cooperative agreements and make related determinations and findings.

(v) *Intangible property and debt instruments* means, but is not limited to, trademarks, copyrights, patents and patent applications and such property as loans, notes and other debt instruments, lease agreements, stock and other instruments of property ownership, whether considered tangible or intangible.

(w) *Obligations* means the amounts of orders placed, contracts and grants awarded, services received and similar transactions during a given period that require payment by the recipient during the same or a future period.

(x) *Outlays or expenditures* means charges made to the project or program. They may be reported on a cash or accrual basis. For reports prepared on a cash basis, outlays are the sum of cash disbursements for direct charges for goods and services, the amount of indirect expense charged, the value of third party in-kind contributions applied and the amount of cash advances and payments made to subrecipients. For reports prepared on an accrual basis, outlays are the sum of cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase (or decrease) in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subrecipients and other payees and other amounts becoming owed under programs for which no current services or performance are required.

(y) *Personal property* means property of any kind except real property. It may be tangible, having physical existence, or intangible, having no physical existence, such as copyrights, patents, or securities.

(z) *Prior approval* means written approval by an authorized official evidencing prior consent.

(aa) *Program income* means gross income earned by the recipient that is directly generated by a supported activity or earned as a result of the award (see exclusions in § 14.24 (e) and (h)). Program income includes, but is not limited to, income from fees for services performed, the use or rental of real or personal property acquired under federally-funded projects, the sale of commodities or items fabricated under an award, license fees and royalties on patents and copyrights, and interest on loans made with award funds. Interest earned on advances of Federal funds is not program income. Except as otherwise provided in DoC regulations or the terms and conditions of the award, program income does not include the receipt of principal on loans, rebates, credits, discounts, etc., or interest earned on any of them.

(bb) *Project costs* means all allowable costs, as set forth in the applicable Federal cost principles, incurred by a recipient and the value of the contributions made by third parties in accomplishing the objectives of the award during the project period.

(cc) *Project period* means the period established in the award document during which Federal sponsorship begins and ends.

(dd) *Property* means, unless otherwise stated, real property, equipment, intangible property and debt instruments.

(ee) *Real property* means land, including land improvements, structures and appurtenances thereto, but excludes movable machinery and equipment.

(ff) *Recipient* means an organization receiving financial assistance directly from the DoC to carry out a project or program. The term includes public and private institutions of higher education, public and private hospitals, and other quasi-public and private non-profit organizations such as, but not limited to, community action agencies, research institutes, educational associations, and health centers. The term may include commercial organizations, foreign or international organizations (such as agencies of the United Nations) which are recipients, subrecipients, or contractors or subcontractors of recipients or subrecipients at the discretion of the DoC. The term does not include government-owned contractor-operated facilities or research centers providing continued support for mission-oriented, large-scale programs that are government-owned or controlled, or are designated as federally-funded research and development centers.

(gg) *Research and development* means all research activities, both basic and applied, and all development activities that are supported at universities, colleges, other non-profit, and commercial institutions. "Research" is defined as a systematic study directed toward fuller scientific knowledge or understanding of the subject studied. "Development" is the systematic use of knowledge and understanding gained from research directed toward the production of useful materials, devices, systems, or methods, including design and development of prototypes and processes. The term research also includes activities involving the training of individuals in research techniques where such activities utilize the same facilities as other research and development activities and where such activities are not included in the instruction function.

(hh) *Small awards* means a grant or cooperative agreement not exceeding the small purchase threshold fixed at 41 U.S.C. 403(11) (currently $100,000).

(ii) *Subaward* means an award of financial assistance in the form of money, or property in lieu of money, made under an award by a recipient to an eligible subrecipient or by a subrecipient to a lower tier subrecipient. The term includes financial assistance when provided by any legal agreement, even if the agreement is called a contract, but does not include procurement of goods and services nor does it include any form of assistance which is excluded from the definition of "award" in paragraph (f) of this section.

(jj) *Subrecipient* means the legal entity to which a subaward is made and which

is accountable to the recipient for the use of the funds provided. The term may include foreign or international organizations (such as agencies of the United Nations) at the discretion of the DoC.

(kk) *Supplies* means all personal property excluding equipment, intangible property, and debt instruments as defined in this section, and inventions of a contractor conceived or first actually reduced to practice in the performance of work under a funding agreement ("subject inventions"), as defined in 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts, and Cooperative Agreements."

(ll) *Suspension* means an action taken by the Grants Officer after coordination with the DoC operating unit that temporarily withdraws Federal sponsorship under an award, pending corrective action by the recipient or pending a decision to terminate the award by the Grants Officer. Suspension of an award is a separate action from suspension under DoC regulations at 15 CFR Part 26 implementing E.O.s 12549 and 12689, "Debarment and Suspension."

(mm) *Termination* means the cancellation by the Grants Officer of Federal sponsorship, in whole or in part, under an agreement at any time prior to the date of completion.

(nn) *Third party in-kind contributions* means the value of non-cash contributions provided by non-Federal third parties. Third party in-kind contributions may be in the form of real property, equipment, supplies and other expendable property, and the value of goods and services directly benefiting and specifically identifiable to the project or program.

(oo) *Unliquidated obligations*, for financial reports prepared on a cash basis, means the amount of obligations incurred by the recipient that have not been paid. For reports prepared on an accrued expenditure basis, they represent the amount of obligations incurred by the recipient for which an outlay has not been recorded.

(pp) *Unobligated balance* means the portion of the funds authorized by the DoC that has not been obligated by the recipient and is determined by deducting the cumulative obligations from the cumulative funds authorized.

(qq) *Unrecovered indirect cost* means the difference between the amount awarded and the amount which could have been awarded under the recipient's approved negotiated indirect cost rate.

(rr) *Working capital advance* means a procedure whereby funds are advanced to the recipient to cover its estimated disbursement needs for a given initial period.

§ 14.3 Effect on other issuances.

For awards subject to this part, all administrative requirements of codified program regulations, program manuals, handbooks and other nonregulatory materials which are inconsistent with the requirements of this part shall be superseded, except to the extent they are required by statute, or authorized in accordance with the deviations provision in § 14.4.

§ 14.4 Deviations.

The Office of Management and Budget (OMB) may grant exceptions for classes of grants or recipients subject to the requirements of this part when exceptions are not prohibited by statute. However, in the interest of maximum uniformity, exceptions from the requirements of this part shall be permitted only in unusual circumstances. The Assistant Secretary may apply more restrictive requirements to a class of recipients when approved by OMB. The Assistant Secretary may apply less restrictive requirements when awarding small awards, except for those requirements which are statutory. Exceptions on a case-by-case basis may also be made by the Assistant Secretary. An exception made on a case-by-case basis will apply to a single award.

§ 14.5 Subawards.

Unless sections of this part specifically exclude subrecipients from coverage, the provisions of this part shall be applied to subrecipients performing work under awards if such subrecipients are institutions of higher education, hospitals, other non-profit, or commercial organizations. This part also applies to subrecipients performing work under awards if the subrecipients are foreign governments, organizations under the jurisdiction of foreign governments, and international organizations unless otherwise determined by the Grants Officer. State and local government subrecipients are subject to the provisions of regulations implementing the grants management common rule, "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments," (15 CFR Part 24).

§ 14.6 Availability of OMB circulars.

OMB circulars cited in this part are available from the Office of Management and Budget (OMB) by writing to the Executive Office of the President, Publications Service, 725 17th Street, NW, Suite 200, Washington DC 20503.

Subpart B—Pre-Award Requirements

§ 14.10 Purpose.

Sections 14.11 through 14.18 prescribe forms and instructions and other pre-award matters to be used in applying for Federal awards.

§ 14.11 Pre-award policies.

(a) *Use of grants and cooperative agreements, and contracts.* In each instance, the Grants Officer after coordination with the DoC operating unit shall decide on the appropriate award instrument (i.e., grant, cooperative agreement, or contract). The Federal Grant and Cooperative Agreement Act (31 U.S.C. 6301–08) governs the use of grants, cooperative agreements and contracts. A grant or cooperative agreement shall be used only when the principal purpose of a transaction is to accomplish a public purpose of support or stimulation authorized by Federal statute. The statutory criterion for choosing between grants and cooperative agreements is that for the latter, "substantial involvement is expected between the executive agency and the State, local government, or other recipient when carrying out the activity contemplated in the agreement." Contracts shall be used when the principal purpose is acquisition of property or services for the direct benefit or use of the Federal Government.

(b) *Public notice and priority setting.* The DoC operating units shall notify the public of their intended funding priorities for discretionary grant programs, unless funding priorities are established by Federal statute. At a minimum, public notices shall be published in the **Federal Register**.

§ 14.12 Forms for applying for Federal assistance.

(a) The DoC operating units shall comply with the applicable report clearance requirements of 5 CFR part 1320, "Controlling Paperwork Burdens on the Public," with regard to all forms used by the DoC operating units in place of or as a supplement to the Standard Form 424 (SF–424) series.

(b) Applicants shall use the SF–424 series or those forms and instructions prescribed by the DoC.

(c) For Federal programs covered by E.O. 12372, "Intergovernmental Review of Federal Programs," the applicant shall complete the appropriate sections of the SF–424 (Application for Federal Assistance) indicating whether the application was subject to review by the State Single Point of Contact (SPOC

The name and address of the SPOC for a particular State can be obtained from the DoC or the *Catalog of Federal Domestic Assistance*. The SPOC shall advise the applicant whether the program for which application is made has been selected by that State for review.

(d) DoC operating units that do not use the SF-424 form should indicate whether the application is subject to review by the State under E.O. 12372.

§ 14.13 Debarment and suspension.

The DoC and recipients shall comply with the nonprocurement debarment and suspension common rule implementing E.O.s 12549 and 12689, "Debarment and Suspension," which is implemented by DoC at 15 CFR Part 26. This common rule restricts subawards and contracts with certain parties that are debarred, suspended or otherwise excluded from or ineligible for participation in Federal assistance programs or activities.

§ 14.14 High risk special award conditions.

If an applicant or recipient: has a history of poor performance, is not financially stable, has a management system that does not meet the standards prescribed in this part, has not conformed to the terms and conditions of a previous award, or is not otherwise responsible, the Grants Officer may impose additional requirements as needed, provided that such applicant or recipient is notified in writing as to: the nature of the additional requirements, the reason why the additional requirements are being imposed, the nature of the corrective action needed, the time allowed for completing the corrective actions, and the method for requesting reconsideration of the additional requirements imposed. Any special conditions shall be promptly removed once the conditions that prompted them have been corrected.

§ 14.15 Metric system of measurement.

The Metric Conversion Act, as amended by the Omnibus Trade and Competitiveness Act (15 U.S.C. 205) declares that the metric system is the preferred measurement system for U.S. trade and commerce. The Act requires each Federal agency to establish or [illegible] or date in consultation with the Secretary of Commerce, when the metric system of measurement will be used in the agency's procurements, grants, and other business-related activities. Metric implementation may take longer where the use of the system is initially impractical or likely to cause significant inefficiencies in the accomplishment of federally-funded activities. The DoC shall follow the provisions of E.O. 12770, "Metric Usage in Federal Government Programs."

§ 14.16 Resource Conservation and Recovery Act (RCRA).

Under RCRA (Pub. L. 94-580, 42 U.S.C. 6962), any State agency or agency of a political subdivision of a State which is using appropriated Federal funds must comply with section 6002. Section 6002 requires that preference be given in procurement programs to the purchase of specific products containing recycled materials identified in guidelines developed by the Environmental Protection Agency (EPA) (40 CFR parts 247-254). Accordingly, State and local institutions of higher education, hospitals, non-profit, and commercial organizations that receive direct Federal awards or other Federal funds shall give preference in their procurement programs funded with Federal funds to the purchase of recycled products pursuant to the EPA guidelines.

§ 14.17 Certifications and representations.

Unless prohibited by statute or codified regulation, Grants Officers may allow recipients to submit certifications and representations required by statute, executive order, or regulation on an annual basis, if the recipients have ongoing and continuing relationships with the agency. When authorized, annual certifications and representations shall be signed by responsible officials with the authority to ensure recipients' compliance with the pertinent requirements.

§ 14.18 Taxpayer identification number.

In accordance with the provisions of the Debt Collection Improvement Act of 1996 (31 U.S.C. 7701), the taxpayer identifying number will be required from applicants for grants and cooperative agreements funded by the DoC. This number may be used for purposes of collecting and reporting on any delinquent amounts arising from awards made under this part.

Subpart C—Post-Award Requirements

Financial and Program Management

§ 14.20 Purpose of financial and program management.

Sections 14.21 through 14.28 prescribe standards for financial management systems, methods for making payments and rules for: satisfying cost sharing and matching requirements, accounting for program income, budget revision approvals, conducting audits, determining allowability of cost, and establishing fund availability.

§ 14.21 Standards for financial management systems.

(a) The Grants Officer shall require recipients to relate financial data to performance data and develop unit cost information whenever practical.

(b) Recipients' financial management systems shall provide for the following:

(1) Accurate, current and complete disclosure of the financial results of each federally-sponsored project or program in accordance with the reporting requirements set forth in § 14.52. If the Grants Officer requires reporting on an accrual basis from a recipient that maintains its records on other than an accrual basis, the recipient shall not be required to establish an accrual accounting system. These recipients may develop such accrual data for its reports on the basis of an analysis of the documentation on hand.

(2) Records that identify adequately the source and application of funds for federally-sponsored activities. These records shall contain information pertaining to Federal awards, authorizations, obligations, unobligated balances, assets, outlays, income and interest.

(3) Effective control over and accountability for all funds, property and other assets. Recipients shall adequately safeguard all such assets and assure they are used solely for authorized purposes.

(4) Comparison of outlays with budget amounts for each award. Whenever appropriate, financial information should be related to performance and unit cost data.

(5) Written procedures to minimize the time elapsing between the transfer of funds to the recipient from the U.S. Treasury and the issuance or redemption of checks, warrants or payments by other means for program purposes by the recipient. To the extent that the provisions of the Cash Management Improvement Act (CMIA) (Pub. L. 101-453) govern, payment methods of State agencies, instrumentalities, and fiscal agents shall be consistent with CMIA Treasury-State Agreements or the CMIA default procedures codified at 31 CFR part 205 "Withdrawal of Cash from the Treasury for Advances under Federal Grant and Other Programs."

(6) Written procedures for determining the reasonableness, allocability and allowability of costs in accordance with the provisions of the applicable Federal cost principles and the terms and conditions of the award.

(7) Accounting records including cost accounting records that are supported by source documentation.

(c) Where the DoC guarantees or insures the repayment of money borrowed by the recipient, the Grants Officer may require adequate bonding and insurance if the bonding and insurance requirements of the recipient are not deemed adequate to protect the interest of the Federal Government.

(d) The Grants Officer may require adequate fidelity bond coverage where the recipient lacks sufficient coverage to protect the Federal Government's interest.

(e) Where bonds are required in the situations described above, the bonds shall be obtained from companies holding certificates of authority as acceptable sureties, as prescribed in 31 CFR part 223, "Surety Companies Doing Business with the United States."

§ 14.22 Payment.

(a) Payment methods shall minimize the time elapsing between the transfer of funds from the United States Treasury and the issuance or redemption of checks, warrants, or payment by other means by the recipients. Payment methods of State agencies or instrumentalities shall be consistent with Treasury-State CMIA agreements or default procedures codified at 31 CFR part 205. Federal payments to recipients shall be made by electronic funds transfer in accordance with the Debt Collection Improvement Act of 1996, unless waived in accordance with the provisions of this Act.

(b) Recipients are to be paid in advance, provided they maintain or demonstrate the willingness to maintain: written procedures that minimize the time elapsing between the transfer of funds and disbursement by the recipient, and financial management systems that meet the standards for fund control and accountability as established in § 14.21. Advances of funds to a recipient organization shall be limited to the minimum amounts needed and be timed to be in accordance with the actual, immediate cash requirements of the recipient organization in carrying out the purpose of the approved program or project. The timing and amount of advances of funds shall be as close as is administratively feasible to the actual disbursements by the recipient organization for direct program or project costs and the proportionate share of any allowable indirect costs.

(c) Whenever possible, advances may be consolidated to cover anticipated cash needs for all awards made by the DoC operating unit to the recipient.

(1) Advance payment mechanisms include, but are not limited to, electronic funds transfer and Treasury check when the electronic funds transfer requirement is waived.

(2) Advance payment mechanisms are subject to 31 CFR part 205.

(3) Recipients may submit requests for advances and reimbursements on a monthly basis.

(d) Requests for advance payment shall be submitted on SF-270, "Request for Advance or Reimbursement," or other forms as may be authorized by OMB. This form is not to be used when advance payments are made to the recipient automatically through the use of a predetermined payment schedule or if precluded by special DoC instructions for electronic funds transfer.

(e) Reimbursement is the preferred method when the requirements in paragraph (b) of this section cannot be met. The Grants Officer may also use this method on any construction agreement, or if the major portion of the construction project is accomplished through private market financing or Federal loans, and the Federal assistance constitutes a minor portion of the project.

(1) When the reimbursement method is used, the DoC shall make payment within 30 days after receipt of the billing, unless the billing is improper.

(2) Recipients are authorized to submit request for reimbursement at least monthly when electronic funds transfers are not used.

(f) If a recipient cannot meet the criteria for advance payments and the Grants Officer after coordination with the operating unit has determined that reimbursement is not feasible because the recipient lacks sufficient working capital, the Grants Officer may authorize payment on a working capital advance basis. Under this procedure, the Grants Officer shall provide for advancing funds to the recipient to cover its estimated disbursement needs for an initial period generally geared to the awardee's disbursing cycle. Thereafter, payments shall be provided by reimbursing the recipient for its actual cash disbursements. The working capital advance method of payment shall not be used for recipients unwilling or unable to provide timely advances to their subrecipient to meet the subrecipient's actual cash disbursements.

(g) To the extent available, recipients shall disburse funds available from repayments to and interest earned on a revolving fund, program income, rebates, refunds, contract settlements, audit recoveries and interest earned on such funds before requesting additional payments.

(h) Unless otherwise required by statute, Grants Officers shall not withhold payments for proper charges made by recipients at any time during the project period unless paragraph (h)(1) or (2) of this section apply.

(1) A recipient has failed to comply with the project objectives, the terms and conditions of the award, or Federal reporting requirements.

(2) The recipient or subrecipient is delinquent in a debt to the United States as defined in OMB Circular A-129, "Managing Federal Credit Programs." Under such conditions, the Grants Officer may, upon reasonable notice, inform the recipient that payments shall not be made for obligations incurred after a specified date until the conditions are corrected or the indebtedness to the Federal Government is liquidated.

(i) Standards governing the use of banks and other institutions as depositories of funds advanced under awards are as follows.

(1) Except for situations described in paragraph (i)(2) of this section, the DoC shall not require separate depository accounts for funds provided to a recipient or establish any eligibility requirements for depositories for funds provided to a recipient. However, recipients must be able to account for the receipt, obligation and expenditure of funds.

(2) Advances of Federal funds shall be deposited and maintained in insured accounts whenever possible.

(j) Consistent with the national goal of expanding the opportunities for women-owned and minority-owned business enterprises, recipients shall be encouraged to use women-owned and minority-owned banks (a bank which is owned at least 50 percent by women or minority group members).

(k) Recipients shall maintain advances of Federal funds in interest bearing accounts, unless paragraph (k)(1), (2) or (3) of this section apply.

(1) The recipient receives less than $120,000 in Federal awards per year.

(2) The best reasonably available interest bearing account would not be expected to earn interest in excess of $250 per year on Federal cash balances.

(3) The depository would require an average or minimum balance so high that it would not be feasible within the expected Federal and non-Federal cash resources.

(l) For those entities where CMIA and its implementing regulations do not apply, interest earned on Federal advances deposited in interest bearing accounts shall be remitted annually to

Department of Health and Human Services, Payment Management System, Rockville, MD 20852. Interest amounts up to $250 per year may be retained by the recipient for administrative expense. State universities and hospitals shall comply with CMIA, as it pertains to interest. If an entity subject to CMIA uses its own funds to pay pre-award costs for discretionary awards without prior written approval from the Grants Officer, it waives its right to recover the interest under CMIA.

(m) Except as noted elsewhere in this part, only the following forms shall be authorized for the recipients in requesting advances and reimbursements. Grants Officers shall not require more than an original and two copies of these forms.

(1) SF-270, Request for Advance or Reimbursement. DoC has adopted the SF-270 as a standard form for all nonconstruction programs when predetermined advance methods are not used. The Grants Officer, however, may waive the requirement to use the SF-270 for requesting funds under grants and cooperative agreements. Grants Officers have the option of using this form for construction programs in lieu of the SF-271, "Outlay Report and Request for Reimbursement for Construction Programs."

(2) SF-271, Outlay Report and Request for Reimbursement for Construction Programs. DoC has adopted the SF-271 as the standard form to be used for requesting reimbursement for construction programs. However, the Grants Officer may substitute the SF-270 when the Grants Officer determines that the SF-270 provides adequate information to meet Federal needs.

§ 14.23 Cost sharing or matching.

(a) All contributions, including cash and third party in-kind, shall be accepted as part of the recipient's cost sharing or matching when such contributions meet all of the following criteria:

(1) Are verifiable from the recipient's records.

(2) Are not included as contributions for any other federally-assisted project or program.

(3) Are necessary and reasonable for proper and efficient accomplishment of project or program objectives.

(4) Are allowable under the applicable cost principles.

(5) Are not paid by the Federal Government under another award, except where authorized by Federal statute to be used for cost sharing or matching.

(6) Are provided for in the approved budget.

(7) Conform to other provisions of this part, as applicable.

(b) Unrecovered indirect costs may be included as part of cost sharing or matching only with the prior approval of the Grants Officer.

(c) Values for recipient contributions of services and property shall be established in accordance with the applicable cost principles. If DoC authorizes recipients to donate buildings or land for construction/facilities acquisition projects or long-term use, the value of the donated property for cost sharing or matching shall be the lesser of paragraph (c) (1) or (2).

(1) The certified value of the remaining life of the property recorded in the recipient's accounting records at the time of donation.

(2) The current fair market value. However, when there is sufficient justification, the Grants Officer may approve the use of the current fair market value of the donated property, even if it exceeds the certified value at the time of donation to the project.

(d) Volunteer services furnished by professional and technical personnel, consultants, and other skilled and unskilled labor may be counted as cost sharing or matching if the service is an integral and necessary part of an approved project or program. Rates for volunteer services shall be consistent with those paid for similar work in the recipient's organization. In those instances in which the required skills are not found in the recipient organization, rates shall be consistent with those paid for similar work in the labor market in which the recipient competes for the kind of services involved. In either case, paid fringe benefits that are reasonable, allowable, and allocable may be included in the valuation.

(e) When an employer other than the recipient furnishes the services of an employee, these services shall be valued at the employee's regular rate of pay (plus an amount of fringe benefits that are reasonable, allowable, and allocable, but exclusive of overhead costs), provided these services are in the same skill for which the employee is normally paid.

(f) Donated supplies may include such items as expendable equipment, office supplies, laboratory supplies or workshop and classroom supplies. Value assessed to donated supplies included in the cost sharing or matching share shall be reasonable and shall not exceed the fair market value of the property at the time of the donation.

(g) The method used for determining cost sharing or matching for donated equipment, buildings and land for which title passes to the recipient may differ according to the purpose of the award, if paragraph (g) (1) or (2) of this section applies.

(1) If the purpose of the award is to assist the recipient in the acquisition of equipment, buildings or land, the total value of the donated property may be claimed as cost sharing or matching.

(2) If the purpose of the award is to support activities that require the use of equipment, buildings or land, normally only depreciation or use charges for equipment and buildings may be made. However, the full value of equipment or other capital assets and fair rental charges for land may be allowed, provided that the Grants Officer has approved the charges.

(h) The value of donated property shall be determined in accordance with the usual accounting policies of the recipient, with the following qualifications:

(1) The value of donated land and buildings shall not exceed its fair market value at the time of donation to the recipient as established by an independent appraiser (e.g., certified real property appraiser or General Services Administration representative) and certified by a responsible official of the recipient.

(2) The value of donated equipment shall not exceed the fair market value of equipment of the same age and condition at the time of donation.

(3) The value of donated space shall not exceed the fair rental value of comparable space as established by an independent appraisal of comparable space and facilities in a privately-owned building in the same locality.

(4) The value of loaned equipment shall not exceed its fair rental value.

(5) The following requirements pertain to the recipient's supporting records for in-kind contributions from third parties:

(i) Volunteer services shall be documented and, to the extent feasible, supported by the same methods used by the recipient for its own employees.

(ii) The basis for determining the valuation for personal services, materials, equipment, buildings and land shall be documented.

§ 14.24 Program income.

(a) The standards set forth in this section shall apply in requiring recipient organizations to account for program income related to projects financed in whole or in part with Federal funds.

(b) Except as provided in paragraph (h) of this section, program income earned during the project period shall be retained by the recipient and, in accordance with DoC regulations or the terms and conditions of the award, shall be used in one or more of the ways listed in the following:

(1) Added to funds committed to the project by the DoC and recipient and used to further eligible project objectives.

(2) Used to finance the non-Federal share of the project.

(3) Deducted from the total project allowable cost in determining the net allowable costs on which the Federal share of costs is based.

(c) When an agency authorizes the disposition of program income as described in paragraph (b)(1) or (b)(2) of this section, program income in excess of any limits stipulated shall be used in accordance with paragraph (b)(3) of this section.

(d) In the event that the DoC does not specify in its regulations or the terms and conditions of the award how program income is to be used, paragraph (b)(1) of this section shall apply automatically to all projects or programs.

(e) Unless DoC regulations or the terms and conditions of the award provide otherwise, recipients shall have no obligation to the Federal Government regarding program income earned after the end of the project period.

(f) Costs incident to the generation of program income may be deducted from gross income to determine program income, provided these costs have not been charged to the award.

(g) Proceeds from the sale of property shall be handled in accordance with the requirements of the Property Standards (See §§ 14.30 through 14.37).

(h) Unless DoC regulations or the terms and conditions of the award provide otherwise, recipients shall have no obligation to the Federal Government with respect to program income earned from license fees and royalties for copyrighted material, patents, patent applications, trademarks, and inventions produced under an award. However, Patent and Trademark Amendments (35 U.S.C. 18) apply to inventions made under an experimental, developmental, or research award.

§ 14.25 Revision of budget and program plans.

(a) The budget plan is the financial expression of the project or program as approved during the award process. It may include either the Federal and non-Federal share, or only the Federal share, depending upon DoC requirements. It shall be related to performance for program evaluation purposes whenever appropriate.

(b) Recipients are required to report deviations from budget and program plans, and request prior approvals for budget and program plan revisions, in accordance with this section.

(c) For nonconstruction awards, recipients shall request prior approvals from the Grants Officer for one or more of the following program or budget related reasons. Approvals will be provided in writing by the Grants Officer.

(1) Change in the scope or the objective of the project or program (even if there is no associated budget revision requiring prior written approval).

(2) Change in a key person specified in the application or award document.

(3) The absence for more than three months, or a 25 percent reduction in time devoted to the project, by the approved project director or principal investigator.

(4) The need for additional Federal funding.

(5) The transfer of amounts budgeted for indirect costs to absorb increases in direct costs, or vice versa, if approval is required by the DoC.

(6) The inclusion, unless waived by the DoC, of costs that require prior approval in accordance with OMB Circular A-21, "Cost Principles for Educational Institutions," OMB Circular A-122, "Cost Principles for Non-Profit Organizations," 45 CFR part 74 Appendix E, "Principles for Determining Costs Applicable to Research and Development under Grants and Contracts with Hospitals," or 48 CFR part 31, "Contract Cost Principles and Procedures," as applicable.

(7) The transfer of funds allotted for training allowances (direct payment to trainees) to other categories of expense.

(8) Unless described in the application and funded in the approved awards, the subaward, transfer or contracting out of any work under an award. This provision does not apply to the purchase of supplies, material, equipment or general support services.

(d) For nonconstruction awards, no other prior approval requirements for specific items may be imposed unless a deviation has been approved by OMB.

(e) Except for requirements listed in paragraphs (c)(1) and (c)(4) of this section, the Grants Officer may waive cost-related and administrative prior written approvals required by this part and OMB Circulars A-21 and A-122. Such waivers may include authorizing recipients to do any one or more of the following:

(1) Incur pre-award costs 90 calendar days prior to award or more than 90 calendar days with the prior approval of the Grants Officer after coordination with the DoC operating unit. All pre-award costs are incurred at the recipient's risk (i.e., the DoC is under no obligation to reimburse such costs if for any reason the recipient does not receive an award or if the award is less than anticipated and inadequate to cover such costs).

(2) Initiate a one-time extension of the expiration date of the award of up to 12 months unless one or more of the following conditions apply. For one-time extensions, the recipient must notify the Grants Officer in writing with the supporting reasons and revised expiration date at least 10 days before the expiration date specified in the award. This one-time extension may not be exercised merely for the purpose of using unobligated balances.

(i) The terms and conditions of award prohibit the extension.

(ii) The extension requires additional Federal funds.

(iii) The extension involves any change in the approved objectives or scope of the project.

(3) Carry forward unobligated balances to subsequent funding periods.

(4) For awards that support research, unless the DoC provides otherwise in the award or in the DoC regulations, the prior approval requirements described in paragraph (e) of this section are automatically waived (i.e., recipients need not obtain such prior approvals) unless one of the conditions included in paragraph (e)(2) of this section applies.

(f) The recipient may not transfer funds among direct cost categories or programs, functions and activities for construction or nonconstruction awards in which the cumulative amount of such transfers exceeds or is expected to exceed 10 percent of the total budget as last approved by the Grants Officer. This does not prohibit the recipient from requesting Grants Officer approval for revisions to the budget. No transfers are permitted that would cause any Federal appropriation or part thereof to be used for purposes other than those consistent with the original intent of the appropriation.

(g) All other changes to nonconstruction budgets, except for the changes described in paragraph (j) of this section, do not require prior approval.

(h) For construction awards, recipients shall request prior written approval promptly from the Grants Officer for budget revisions whenever paragraph (h) (1), (2) or (3) apply.

Approvals will be provided in writing by the Grants Officer.

(1) The revision results from changes in the scope or the objective of the project or program.

(2) The need arises for additional Federal funds to complete the project.

(3) A revision is desired which involves specific costs for which prior written approval requirements may be imposed consistent with applicable OMB cost principles listed in § 14.27.

(i) For construction awards, no other prior approval requirements for specific items may be imposed unless a deviation has been approved by OMB.

(j) When the DoC makes an award that provides support for both construction and nonconstruction work, the Grants Officer may require the recipient to request prior approval from the Grants Officer before making any fund or budget transfers between the two types of work supported. Approvals will be provided in writing by the Grants Officer.

(k) For both construction and nonconstruction awards, the DoC shall require recipients to notify the Grants Officer in writing promptly whenever the amount of Federal authorized funds is expected to exceed the needs of the recipient for the project period by more than $5000 or five percent of the Federal award, whichever is greater. This notification shall not be required if an application for additional funding is submitted for a continuation award.

(l) When requesting approval for budget revisions, recipients shall use the budget forms that were used in the application unless the Grants Officer indicates a letter of request suffices.

(m) Within 30 calendar days from the date of receipt of the request for budget revisions, DoC shall review the request and the Grants Officer shall notify the recipient in writing whether the budget revisions have been approved. If the revision is still under consideration at the end of 30 calendar days, the Grants Officer shall inform the recipient in writing of the date when the recipient may expect the decision.

§ 14.26 Non-Federal audits.

(a) Recipients and subrecipients that are institutions of higher education or other non-profit organizations (including hospitals) shall be subject to the audit requirements contained in the Single Audit Act Amendments of 1996 (31 U.S.C. 7501-7507) and revised OMB Circular A-133, "Audits of States, Local Governments, and Non-Profit Organizations."

(b) State and local governments shall be subject to the audit requirements contained in the Single Audit Act Amendments of 1996 (31 U.S.C. 7501-7507) and revised OMB Circular A-133, "Audits of States, Local Governments, and Non-Profit Organizations."

(c) For-profit hospitals not covered by the audit provisions of revised OMB Circular A-133 shall be subject to the audit requirements as stipulated in the award document.

(d) Commercial and other organizations not covered by paragraph (a), (b), or (c) of this section shall be subject to the audit requirements as stipulated in the award document or the prime recipient as stipulated in the sub-award document.

§ 14.27 Allowable costs.

For each kind of recipient, there is a set of Federal principles for determining allowable costs. Allowability of costs shall be determined in accordance with the cost principles applicable to the entity incurring the costs. Thus, allowability of costs incurred by State, local or federally-recognized Indian tribal governments is determined in accordance with the provisions of OMB Circular A-87, "Cost Principles for State, Local and Indian Tribal Governments." The allowability of costs incurred by non-profit organizations is determined in accordance with the provisions of OMB Circular A-122, "Cost Principles for Non-Profit Organizations." The allowability of costs incurred by institutions of higher education is determined in accordance with the provisions of OMB Circular A-21, "Cost Principles for Educational Institutions." The allowability of costs incurred by hospitals is determined in accordance with the provisions of Appendix E of 45 CFR part 74, "Principles for Determining Costs Applicable to Research and Development Under Grants and Contracts with Hospitals." The allowability of costs incurred by commercial organizations and those non-profit organizations listed in Attachment C to Circular A-122 is determined in accordance with the provisions of the Federal Acquisition Regulation (FAR) at 48 CFR part 31.

§ 14.28 Period of availability of funds.

Where a funding period is specified, a recipient may charge to the grant only allowable costs resulting from obligations incurred during the funding period and any pre-award costs authorized by the Grants Officer.

Property Standards

§ 14.30 Purpose of property standards.

Sections 14.31 through 14.37 set forth uniform standards governing management and disposition of property furnished by the Federal Government whose cost was charged to a project supported by a Federal award. The DoC shall require recipients to observe these standards under awards and shall not impose additional requirements, unless specifically required by Federal statute. The recipient may use its own property management standards and procedures provided it observes the provisions of §§ 14.31 through 14.37.

§ 14.31 Insurance coverage.

Recipients shall, at a minimum, provide the equivalent insurance coverage for real property and equipment acquired with Federal funds as provided to property owned by the recipient. Federally-owned property need not be insured unless required by the terms and conditions of the award.

§ 14.32 Real property.

The DoC award shall prescribe requirements for recipients concerning the use and disposition of real property acquired in whole or in part under awards. Unless otherwise provided by statute, such requirements, at a minimum, shall contain the following:

(a) Title to real property shall vest in the recipient subject to the condition that the recipient shall use the real property for the authorized purpose of the project as long as it is needed, provided that, in lieu of title, with the approval of the Grants Officer, the recipient may hold a leasehold or other interest in the property appropriate to the project purpose. The recipient shall not dispose of or encumber the property or any interest therein without approval of the Grants Officer.

(b) The recipient shall obtain written approval by the Grants Officer for the use of real property in other federally-sponsored projects when the recipient determines that the property is no longer needed for the purpose of the original project. Use in other projects shall be limited to those under federally-sponsored projects (i.e., awards) or programs that have purposes consistent with those authorized for support by the DoC.

(c) When the real property is no longer needed as provided in paragraphs (a) and (b) of this section the recipient shall request disposition instructions from the DoC or its successor Federal awarding agency. The responsible Federal agency shall observe one or more of the following disposition instructions:

(1) The recipient may be permitted to retain title without further obligation to the Federal Government after it compensates the Federal Government for that percentage of the current fair

market value of the property attributable to the Federal participation in the project.

(2) The recipient may be directed to sell the property under guidelines provided by the Grants Officer and pay the Federal Government for that percentage of the current fair market value of the property attributable to the Federal participation in the project (after deducting actual and reasonable selling and fix-up expenses, if any, from the sales proceeds). When the recipient is authorized or required to sell the property, proper sales procedures shall be established that provide for competition to the extent practicable and result in the highest possible return.

(3) The recipient may be directed to transfer title to the property to the Federal Government or to an eligible third party provided that, in such cases, the recipient shall be entitled to compensation for its attributable percentage of the current fair market value of the property.

§ 14.33 Federally-owned and exempt property.

(a) *Federally-owned property.* (1) Title to federally-owned property remains vested in the Federal Government. Recipients shall submit annually an inventory listing of federally-owned property in their custody to the DoC operating unit. Upon completion of the award or when the property is no longer needed, the recipient shall report the property to the DoC operating unit for further Federal agency utilization.

(2) If the DoC operating unit has no further need for the property, it shall be declared excess and reported to the General Services Administration, unless the DoC has statutory authority to dispose of the property by alternative methods (e.g., the authority provided by the Federal Technology Transfer Act (15 U.S.C. 3710(I)) to donate research equipment to educational and non-profit organizations in accordance with E.O. 12821, "Improving Mathematics and Science Education in Support of the National Education Goals.") Appropriate instructions shall be issued to the recipient by the Grants Officer.

(b) *Exempt property.* When statutory authority exists, the DoC has the option to vest title to property acquired with Federal funds in the recipient without further obligation to the Federal Government and under conditions the DoC considers appropriate. Such property is "exempt property." Should the DoC not establish conditions, title to exempt property upon acquisition shall vest in the recipient without further obligation to the Federal Government.

§ 14.34 Equipment.

(a) Title to equipment acquired by a recipient with Federal funds shall vest in the recipient, subject to conditions of this section.

(b) The recipient shall not use equipment acquired with Federal funds to provide services to non-Federal outside organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by Federal statute, for as long as the Federal Government retains an interest in the equipment.

(c) The recipient shall use the equipment in the project or program for which it was acquired as long as needed, whether or not the project or program continues to be supported by Federal funds and shall not encumber the property without approval of the DoC. When no longer needed for the original project or program, the recipient shall use the equipment in connection with its other federally-sponsored activities, in the following order of priority:

(1) Activities sponsored by the DoC operating unit which funded the original project;

(2) Activities sponsored by other DoC operating units; then

(3) Activities sponsored by other Federal awarding agencies.

(d) During the time that equipment is used on the project or program for which it was acquired, the recipient shall make it available for use on other projects or programs if such other use will not interfere with the work on the project or program for which the equipment was originally acquired. First preference for such other use shall be given to other projects or programs sponsored by the DoC operating unit that financed the equipment; second preference shall be given to projects or programs sponsored by other DoC operating units, and third preference shall be given to projects or programs sponsored by other Federal awarding agencies. If the equipment is owned by the Federal Government, use on other activities not sponsored by the Federal Government shall be permissible if authorized by the Grants Officer after coordination with the DoC operating unit. User charges shall be treated as program income.

(e) When acquiring replacement equipment, the recipient may use the equipment to be replaced as trade-in or sell the equipment and use the proceeds to offset the costs of the replacement equipment subject to the approval of the Grants Officer after coordination with the DoC operating unit.

(f) The recipient's property management standards for equipment acquired with Federal funds and federally-owned equipment shall include all of the following:

(1) Equipment records shall be maintained accurately and shall include the following information:

(i) A description of the equipment.

(ii) Manufacturer's serial number, model number, Federal stock number, national stock number, or other identification number.

(iii) Source of the equipment, including the award number.

(iv) Whether title vests in the recipient or the Federal Government.

(v) Acquisition date (or date received, if the equipment was furnished by the Federal Government) and cost.

(vi) Information from which one can calculate the percentage of Federal participation in the cost of the equipment (not applicable to equipment furnished by the Federal Government).

(vii) Location and condition of the equipment and the date the information was reported.

(viii) Unit acquisition cost.

(ix) Ultimate disposition data, including date of disposal and sales price or the method used to determine current fair market value where a recipient compensates the DoC for its share.

(2) Equipment owned by the Federal Government shall be identified to indicate Federal ownership.

(3) A physical inventory of equipment shall be taken and the results reconciled with the equipment records at least once every two years. Any differences between quantities determined by the physical inspection and those shown in the accounting records shall be investigated to determine the causes of the difference. The recipient shall, in connection with the inventory, verify the existence, current utilization, and continued need for the equipment.

(4) A control system shall be in effect to insure adequate safeguards to prevent loss, damage, or theft of the equipment. Any loss, damage, or theft of equipment shall be investigated and fully documented; if the equipment was owned by the Federal Government, the recipient shall promptly notify the Grants Officer.

(5) Adequate maintenance procedures shall be implemented to keep the equipment in good condition.

(6) Where the recipient is authorized or required to sell the equipment, proper sales procedures shall be established which provide for competition to the extent practicable and result in the highest possible return.

(g) When the recipient no longer needs the equipment, the equipment may be used for other activities in

accordance with the following standards. Equipment with a current per-unit fair market value of less than $5000 may be retained, sold, or otherwise disposed of with no further obligation to the awarding agency. For equipment with a current per unit fair market value of $5000 or more, the recipient may retain the equipment for other uses provided that compensation is made to the DoC operating unit or its successor. The amount of compensation shall be computed by applying the percentage of Federal participation in the cost of the original project or program to the current fair market value of the equipment. If the recipient has no need for the equipment, the recipient shall request disposition instructions from the Grants Officer. The Grants Officer shall determine whether the equipment can be used to meet the agency's requirements. If no requirement exists within that agency, the availability of the equipment shall be reported to the General Services Administration by the Grants Officer to determine whether a requirement for the equipment exists in other Federal agencies. The Grants Officer shall issue instructions to the recipient no later than 120 calendar days after the recipient's request and the following procedures shall govern:

(1) If so instructed or if disposition instructions are not issued within 120 calendar days after the recipient's request, the recipient shall sell the equipment and reimburse the DoC an amount computed by applying to the sales proceeds the percentage of Federal participation in the cost of the original project or program. However, the recipient shall be permitted to deduct and retain from the Federal share $500 or ten percent of the proceeds, whichever is less, for the recipient's selling and handling expenses.

(2) If the recipient is instructed to ship the equipment elsewhere, the recipient shall be reimbursed by the Federal Government by an amount which is computed by applying the percentage of the recipient's participation in the cost of the original project or program to the current fair market value of the equipment, plus any reasonable shipping or interim storage costs incurred.

(3) If the recipient is instructed to otherwise dispose of the equipment, the recipient shall be reimbursed by the DoC for such costs incurred in its disposition.

(h) The DoC reserves the right to transfer the title to the Federal Government or to a third party named by the Federal Government when such third party is otherwise eligible under existing statutes. Such transfer shall be subject to the following standards:

(1) The equipment shall be appropriately identified in the award or otherwise made known to the recipient in writing.

(2) The Grants Officer shall issue disposition instructions within 120 calendar days after receipt of a final inventory. The final inventory shall list all equipment acquired with grant funds and federally-owned equipment. If the Grants Officer fails to issue written disposition instructions within the 120 calendar day period, the recipient shall apply the standards of this section, as appropriate.

(3) When the DoC exercises its right to take title, the equipment shall be subject to the provisions for federally-owned equipment.

§ 14.35 Supplies and other expendable property.

(a) Title to supplies and other expendable property shall vest in the recipient upon acquisition. If there is a residual inventory of supplies exceeding $5000 in total aggregate value upon termination or completion of the project or program and the supplies are not needed for any other federally-sponsored project or program, the recipient shall retain the supplies for use on non-Federal sponsored activities or sell them, but shall, in either case, compensate the Federal Government for its share. The amount of compensation shall be computed in the same manner as for equipment.

(b) The recipient shall not use supplies acquired with Federal funds to provide services to non-Federal outside organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by Federal statute as long as the Federal Government retains an interest in the supplies.

§ 14.36 Intangible property.

(a) The recipient may copyright any work that is subject to copyright and was developed, or for which ownership was purchased, under an award. The DoC reserves a royalty-free, nonexclusive and irrevocable right to reproduce, publish, or otherwise use the work for Federal purposes, and to authorize others to do so.

(b) Recipients are subject to applicable regulations governing patents and inventions, including government-wide regulations issued by the DoC at 37 CFR part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements."

(c) Unless waived by the DoC, the Federal Government has the right to:

(1) Obtain, reproduce, publish or otherwise use the data first produced under an award; and

(2) Authorize others to receive, reproduce, publish, or otherwise use such data for Federal purposes.

(d) Title to intangible property and debt instruments acquired under an award or subaward vests upon acquisition in the recipient. The recipient shall use that property for the originally-authorized purpose, and the recipient shall not encumber the property without written approval from the Grants Officer. When no longer needed for the originally authorized purpose, disposition of the intangible property shall occur in accordance with the provisions of § 14.34(g).

§ 14.37 Property trust relationship.

Real property, equipment, intangible property and debt instruments that are acquired or improved with Federal funds shall be held in trust by the recipient as trustee for the beneficiaries of the project or program under which the property was acquired or improved. The Grants Officer may require recipients to record liens or other appropriate notices of record to indicate that personal or real property has been acquired or improved with Federal funds and that use and disposition conditions apply to the property.

Procurement Standards

§ 14.40 Purpose of procurement standards.

Sections 14.41 through 14.48 set forth standards for use by recipients in establishing procedures for the procurement of supplies and other expendable property, equipment, real property and other services with Federal funds. These standards are furnished to ensure that such materials and services are obtained in an effective manner and in compliance with the provisions of applicable Federal statutes and executive orders. No additional procurement standards or requirements shall be imposed by the DoC upon recipients, unless specifically required by Federal statute or executive order or approved by OMB.

§ 14.41 Recipient responsibilities.

The standards contained in this section do not relieve the recipient of the contractual responsibilities arising under its contract(s). The recipient is the responsible authority, without recourse to the DoC, regarding the settlement and satisfaction of all contractual and administrative issues arising out of procurements entered into

in support of an award or other agreement. This includes disputes, claims, protests of award, source evaluation or other matters of a contractual nature. Matters concerning violation of statute are to be referred to such Federal, State or local authority as may have proper jurisdiction.

§ 14.42 Codes of conduct.

The recipient shall maintain written standards of conduct governing the performance of its employees engaged in the award and administration of contracts. No employee, officer, or agent shall participate in the selection, award, or administration of a contract supported by Federal funds if a real or apparent conflict of interest would be involved. Such a conflict would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties indicated herein, has a financial or other interest in the firm selected for an award. The officers, employees, and agents of the recipient shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors, or parties to subagreements. However, recipients may set standards for situations in which the financial interest is not substantial or the gift is an unsolicited item of nominal value. The standards of conduct shall provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the recipient.

§ 14.43 Competition.

All procurement transactions shall be conducted in a manner to provide, to the maximum extent practical, open and free competition. The recipient shall be alert to organizational conflicts of interest as well as noncompetitive practices among contractors that may restrict or eliminate competition or otherwise restrain trade. In order to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, invitations for bids and/or requests for proposals shall be excluded from competing for such procurements. Awards shall be made to the bidder or offeror whose bid or offer is responsive to the solicitation and is most advantageous to the recipient, price, quality and other factors considered. Solicitations shall clearly set forth all requirements that the bidder or offeror shall fulfill in order for the bid or offer to be evaluated by the recipient. Any and all bids or offers may be rejected when it is in the recipient's interest to do so.

§ 14.44 Procurement procedures.

(a) All recipients shall establish written procurement procedures. These procedures shall provide for, at a minimum, that:

(1) Recipients avoid purchasing unnecessary items;

(2) Where appropriate, an analysis is made of lease and purchase alternatives to determine which would be the most economical and practical procurement for the Federal Government; and

(3) Solicitations for goods and services provide for all of the following:

(i) A clear and accurate description of the technical requirements for the material, product or service to be procured. In competitive procurements, such a description shall not contain features which unduly restrict competition.

(ii) Requirements which the bidder/offeror must fulfill and all other factors to be used in evaluating bids or proposals.

(iii) A description, whenever practicable, of technical requirements in terms of functions to be performed or performance required, including the range of acceptable characteristics or minimum acceptable standards.

(iv) The specific features of "brand name or equal" descriptions that bidders are required to meet when such items are included in the solicitation.

(v) The acceptance, to the extent practicable and economically feasible, of products and services dimensioned in the metric system of measurement.

(vi) Preference, to the extent practicable and economically feasible, for products and services that conserve natural resources and protect the environment and are energy efficient.

(b) Positive efforts shall be made by recipients to utilize small businesses, minority-owned firms, and women's business enterprises, whenever possible. Recipients of Federal awards shall take all of the following steps to further this goal:

(1) Ensure that small businesses, minority-owned firms, and women's business enterprises are used to the fullest extent practicable.

(2) Make information on forthcoming opportunities available and arrange time frames for purchases and contracts to encourage and facilitate participation by small businesses, minority-owned firms, and women's business enterprises.

(3) Consider in the contract process whether firms competing for larger contracts intend to subcontract with small businesses, minority-owned firms, and women's business enterprises.

(4) Encourage contracting with consortiums of small businesses, minority-owned firms and women's business enterprises when a contract is too large for one of these firms to handle individually.

(5) Use the services and assistance, as appropriate, of such organizations as the Small Business Administration and the DoC's Minority Business Development Agency in the solicitation and utilization of small businesses, minority-owned firms and women's business enterprises.

(c) The type of procuring instruments used (e.g., fixed price contracts, cost reimbursable contracts, purchase orders, and incentive contracts) shall be determined by the recipient but shall be appropriate for the particular procurement and for promoting the best interest of the program or project involved. The "cost-plus-a-percentage-of-cost" or "percentage of construction cost" methods of contracting shall not be used.

(d) Contracts shall be made only with responsible contractors who possess the potential ability to perform successfully under the terms and conditions of the proposed procurement. Consideration shall be given to such matters as contractor integrity, record of past performance, financial and technical resources or accessibility to other necessary resources. In certain circumstances, contracts with certain parties are restricted by agencies' implementation of E.O.s 12549 and 12689, "Debarment and Suspension," as implemented by DoC regulations at 15 CFR Part 26.

(e) Recipients shall, on request, make available for the Grants Officer, pre-award review and procurement documents, such as request for proposals or invitations for bids, independent cost estimates, etc., when any of the following conditions apply:

(1) A recipient's procurement procedures or operation fails to comply with the procurement standards in this part.

(2) The procurement is expected to exceed the small purchase threshold fixed at 41 U.S.C. 403 (11) (currently $100,000) and is to be awarded without competition or only one bid or offer is received in response to a solicitation.

(3) The procurement, which is expected to exceed the small purchase threshold, specifies a "brand name" product.

(4) The proposed award over the small purchase threshold is to be awarded to other than the apparent low bidder under a sealed bid procurement.

(5) A proposed contract modification changes the scope of a contract or

increases the contract amount by more than the amount of the small purchase threshold.

§ 14.45 Cost and price analysis.

Some form of cost or price analysis shall be made and documented in the procurement files in connection with every procurement action. Price analysis may be accomplished in various ways, including the comparison of price quotations submitted, market prices and similar indicia, together with discounts. Cost analysis is the review and evaluation of each element of cost to determine reasonableness, allocability and allowability.

§ 14.46 Procurement records.

Procurement records and files for purchases in excess of the small purchase threshold shall include the following at a minimum:

(a) Basis for contractor selection;

(b) Justification for lack of competition when competitive bids or offers are not obtained; and

(c) Basis for award cost or price.

§ 14.47 Contract administration.

A system for contract administration shall be maintained to ensure contractor conformance with the terms, conditions and specifications of the contract and to ensure adequate and timely follow up of all purchases. Recipients shall evaluate contractor performance and document, as appropriate, whether contractors have met the terms, conditions and specifications of the contract.

§ 14.48 Contract provisions.

The recipient shall include, in addition to provisions to define a sound and complete agreement, the following provisions in all contracts. The following provisions shall also be applied to subcontracts:

(a) Contracts in excess of the small purchase threshold shall contain contractual provisions or conditions that allow for administrative, contractual, or legal remedies in instances in which a contractor violates or breaches the contract terms, and provide for such remedial actions as may be appropriate.

(b) All contracts in excess of the small purchase threshold shall contain suitable provisions for termination by the recipient, including the manner by which termination shall be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(c) Except as otherwise required by statute, an award that requires the contracting (or subcontracting) for construction or facility improvements shall provide for the recipient to follow its own requirements relating to bid guarantees, performance bonds, and payment bonds unless the construction contract or subcontract exceeds $100,000. For those contracts or subcontracts exceeding $100,000, the DoC may accept the bonding policy and requirements of the recipient, provided the Grants Officer has made a determination that the Federal Government's interest is adequately protected. If such a determination has not been made, the minimum requirements shall be as follows:

(1) A bid guarantee from each bidder equivalent to five percent of the bid price. The "bid guarantee" shall consist of a firm commitment such as a bid bond, certified check, or other negotiable instrument accompanying a bid as assurance that the bidder shall, upon acceptance of his bid, execute such contractual documents as may be required within the time specified.

(2) A performance bond on the part of the contractor for 100 percent of the contract price. A "performance bond" is one executed in connection with a contract to secure fulfillment of all the contractor's obligations under such contract.

(3) A payment bond on the part of the contractor for 100 percent of the contract price. A "payment bond" is one executed in connection with a contract to assure payment as required by statute of all persons supplying labor and material in the execution of the work provided for in the contract.

(4) Where bonds are required in the situations described in this part, the bonds shall be obtained from companies holding certificates of authority as acceptable sureties pursuant to 31 CFR part 223, "Surety Companies Doing Business with the United States."

(d) All negotiated contracts (except those for less than the small purchase threshold) awarded by recipients shall include a provision to the effect that the recipient, the DoC, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers and records of the contractor which are directly pertinent to a specific program for the purpose of making audits, examinations, excerpts and transcriptions.

(e) All contracts, including small purchases, awarded by recipients and their contractors shall contain the procurement provisions of Appendix A to this part, as applicable.

Reports and Records

§ 14.50 Purpose of reports and records.

Sections 14.51 through 14.53 set forth the procedures for monitoring and reporting on the recipient's financial and program performance and the necessary standard reporting forms. They also set forth record retention requirements.

§ 14.51 Monitoring and reporting program performance.

(a) Recipients are responsible for managing and monitoring each project, program, subaward, function or activity supported by the award. Recipients shall monitor subawards to ensure subrecipients have met the audit requirements as delineated in § 14.26.

(b) The Grants Officer after coordination with the DoC operating unit shall prescribe the frequency with which the performance reports shall be submitted. Except as provided in paragraph (f) of this section, performance reports shall not be required more frequently than quarterly or, less frequently than annually. Annual reports shall be due 90 calendar days after the grant year; quarterly or semi-annual reports shall be due 30 days after the reporting period. The Grants Officer may require annual reports before the anniversary dates of multiple year awards in lieu of these requirements. The final performance reports are due 90 calendar days after the expiration or termination of the award.

(c) If inappropriate, a final technical or performance report shall not be required after completion of the project.

(d) When required, performance reports shall generally contain, for each award, brief information on each of the following:

(1) A comparison of actual accomplishments with the goals and objectives established for the period, the findings of the investigator, or both. Whenever appropriate and the output of programs or projects can be readily quantified, such quantitative data should be related to cost data for computation of unit costs.

(2) Reasons why established goals were not met, if appropriate.

(3) Other pertinent information including, when appropriate, analysis and explanation of cost overruns or high unit costs.

(e) Recipients shall not be required to submit more than the original and two copies of performance reports.

(f) Recipients shall immediately notify the DoC operating unit of developments that have a significant impact on the award-supported activities. Also,

notification shall be given in the case of problems, delays, or adverse conditions which materially impair the ability to meet the objectives of the award. This notification shall include a statement of the action taken or contemplated, and any assistance needed to resolve the situation.

(g) The DoC may make site visits, as needed.

(h) Federal awarding agencies shall comply with clearance requirements of 5 CFR part 1320 when requesting performance data from recipients.

§ 14.52 Financial reporting.

(a) The following forms or such other forms as may be approved by OMB are authorized for obtaining financial information from recipients:

(1) SF-269 or SF-269A, Financial Status Report.

(i) Each DoC award shall require recipients to use the SF-269 or SF-269A to report the status of funds for all nonconstruction projects or programs. The DoC, however, has the option of not requiring the SF-269 or SF-269A when the SF-270, Request for Advance or Reimbursement, or SF-272, Report of Federal Cash Transactions, is determined to provide adequate information to meet its needs, except that a final SF-269 or SF-269A shall be required at the completion of the project when the SF-270 is used only for advances.

(ii) The DoC shall prescribe whether the report shall be on a cash or accrual basis. If the DoC requires accrual information and the recipient's accounting records are not normally kept on the accrual basis, the recipient shall not be required to convert its accounting system, but shall develop such accrual information through best estimates based on an analysis of the documentation on hand.

(iii) The DoC shall determine the frequency of the Financial Status Report for each project or program, considering the size and complexity of the particular project or program. However, the report shall not be required more frequently than quarterly or less frequently than annually. A final report shall be required at the completion of the agreement.

(iv) The DoC shall require recipients to submit the SF-269 or SF-269A (an original and no more than two copies) no later than 30 days after the end of each specified reporting period for quarterly and semi-annual reports, and 90 calendar days for annual and final reports. Extensions of reporting due dates may be approved by the Grants Officer upon request of the recipient.

(2) SF-272, Report of Federal Cash Transactions.

(i) When funds are advanced to recipients the DoC shall require each recipient to submit the SF-272 and, when necessary, its continuation sheet, SF-272a. The DoC shall use this report to monitor funds advanced to recipients and to obtain disbursement information for each agreement with the recipients.

(ii) The DoC may require forecasts of Federal funds requirements in the "Remarks" section of the report.

(iii) When practical and deemed necessary, the DoC may require recipients to report in the "Remarks" section the amount of advances received in excess of three days. Recipients shall provide short narrative explanations of actions taken to reduce the excess balances.

(iv) Recipients shall be required to submit not more than the original and two copies of the SF-272 15 calendar days following the end of each quarter. The Grants Officer may require a monthly report from those recipients receiving advances totaling $1 million or more per year.

(v) The Grants Officer may waive the requirement for submission of the SF-272 for any one of the following reasons:

(A) When monthly advances do not exceed $25,000 per recipient, provided that such advances are monitored through other forms contained in this section;

(B) If, in the Grants Officer's opinion, the recipient's accounting controls are adequate to minimize excessive Federal advances; or

(C) When the electronic payment mechanisms provide adequate data.

(b) When the DoC needs additional information or more frequent reports, the following shall be observed:

(1) When additional information is needed to comply with legislative requirements, the Grants Officer shall issue instructions to require recipients to submit such information under the "Remarks" section of the reports.

(2) When the DoC determines that a recipient's accounting system does not meet the standards in § 14.21, additional pertinent information to further monitor awards may be obtained upon written notice to the recipient until such time as the system is brought up to standard. The DoC, in obtaining this information, shall comply with report clearance requirements of 5 CFR part 1320.

(3) Grants Officers are encouraged to shade out any line item on any report if not necessary.

(4) The DoC may accept the identical information from the recipients in machine readable format or computer printouts or electronic outputs in lieu of prescribed formats.

(5) The DoC may provide computer or electronic outputs to recipients when such expedites or contributes to the accuracy of reporting.

§ 14.53 Retention and access requirements for records.

(a) This section sets forth requirements for record retention and access to records for awards to recipients. The DoC shall not impose any other record retention or access requirements upon recipients.

(b) Financial records, supporting documents, statistical records, and all other records pertinent to an award shall be retained for a period of three years from the date of submission of the final expenditure report or, for awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, as authorized by the DoC. The only exceptions are the following:

(1) If any litigation, claim, or audit is started before the expiration of the 3-year period, the records shall be retained until all litigation, claims or audit findings involving the records have been resolved and final action taken.

(2) Records for real property and equipment acquired with Federal funds shall be retained for 3 years after final disposition.

(3) When records are transferred to or maintained by the DoC, the 3-year retention requirement is not applicable to the recipient.

(4) Indirect cost rate proposals, cost allocations plans, etc. as specified in paragraph (g) of this section.

(c) Copies of original records may be substituted for the original records if authorized by the DoC.

(d) The Grants Officer after coordination with the DoC operating unit shall request transfer of certain records to its custody from recipients when it determines that the records possess long term retention value. However, in order to avoid duplicate recordkeeping, a DoC operating unit or Grants Officer may make arrangements for recipients to retain any records that are continuously needed for joint use.

(e) The DoC, the Inspector General, Comptroller General of the United States, or any of their duly authorized representatives, have the right of timely and unrestricted access to any books, documents, papers, or other records of recipients that are pertinent to the awards, in order to make audits, examinations, excerpts, transcripts and copies of such documents. This right also includes timely and reasonable

access to a recipient's personnel for the purpose of interview and discussion related to such documents. The rights of access in this paragraph are not limited to the required retention period, but shall last as long as records are retained.

(f) Unless required by statute, no DoC operating unit shall place restrictions on recipients that limit public access to the records of recipients that are pertinent to an award, except when the DoC operating unit can demonstrate that such records shall be kept confidential and would have been exempted from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) if the records had belonged to the DoC operating unit.

(g) Paragraphs (g)(1) and (g)(2) of this section apply to the following types of documents, and their supporting records: indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates).

(1) If the recipient submits to the Federal awarding agency responsible for negotiating the recipient's indirect cost rate or the subrecipient submits to the recipient the proposal, plan, or other computation to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts on the date of such submission.

(2) If the recipient is not required to submit to the cognizant Federal awarding agency or the subrecipient is not required to submit to the recipient the proposal, plan, or other computation for negotiation purposes, then the 3-year retention period for the proposal, plan, or other computation and its supporting records starts at the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

Termination and Enforcement

§ 14.60 Purpose of termination and enforcement.

Sections 14.61 and 14.62 set forth uniform suspension, termination and enforcement procedures.

§ 14.61 Termination.

(a) Awards may be terminated in whole or in part only if paragraph (a)(1), (2) or (3) apply.

(1) By the Grants Officer, if a recipient materially fails to comply with the terms and conditions of an award.

(2) By the Grants Officer with the consent of the recipient, in which case the two parties shall agree upon the termination conditions, including the effective date and, in the case of partial termination, the portion to be terminated.

(3) By the recipient upon sending to the Grants Officer written notification setting forth the reasons for such termination, the effective date, and, in the case of partial termination, the portion to be terminated. However, if the Grants Officer determines in the case of partial termination that the reduced or modified portion of the grant will not accomplish the purposes for which the grant was made, it may terminate the grant in its entirety under either paragraph (a)(1) or (2).

(b) If costs are allowed under an award, the responsibilities of the recipient referred to in § 14.71(a), including those for property management as applicable, shall be considered in the termination of the award, and provision shall be made for continuing responsibilities of the recipient after termination, as appropriate.

§ 14.62 Enforcement.

(a) *Remedies for noncompliance.* If a recipient materially fails to comply with the terms and conditions of an award, whether stated in a Federal statute, regulation, assurance, application, or notice of award, the Grants Officer may, in addition to imposing any of the special conditions outlined in § 14.14, take one or more of the following actions, as appropriate in the circumstances:

(1) Temporarily withhold payments of funds pending correction of the deficiency by the recipient or more severe enforcement action by the Grants Officer after coordination with the DoC operating unit.

(2) Disallow (that is, deny both use of funds and any applicable matching credit for) all or part of the cost of the activity or action not in compliance.

(3) Wholly or partly suspend or terminate the current award.

(4) Withhold further awards for the project or program.

(5) Take other remedies that may be legally available.

(b) *Hearings and appeals.* In taking an enforcement action, the awarding agency shall provide the recipient an opportunity for hearing, appeal, or other administrative proceeding to which the recipient is entitled under any statute or regulation applicable to the action involved.

(c) *Effects of suspension and termination.* Costs of a recipient resulting from obligations incurred by the recipient during a suspension or after termination of an award are not allowable unless the awarding agency expressly authorizes them in the notice of suspension or termination or subsequently. Other recipient costs during suspension or after termination which are necessary and not reasonably avoidable are allowable if paragraphs (c)(1) and (2) of this section apply.

(1) The costs result from obligations which were properly incurred by the recipient before the effective date of suspension or termination, are not in anticipation of it, and in the case of a termination, are noncancellable.

(2) The costs would be allowable if the award were not suspended or expired normally at the end of the funding period in which the termination takes effect.

(d) *Relationship to debarment and suspension.* The enforcement remedies identified in this section, including suspension and termination, do not preclude a recipient from being subject to debarment and suspension under E.O.s 12549 and 12689 and the DoC implementing regulations (see § 14.13) at 15 CFR Part 26.

Subpart D—After-the-Award Requirements

§ 14.70 Purpose.

Sections 14.71 through 14.73 contain closeout procedures and other procedures for subsequent disallowances and adjustments.

§ 14.71 Closeout procedures.

(a) Recipients shall submit, within 90 calendar days after the date of completion of the award, all financial, performance, and other reports as required by the terms and conditions of the award. The Grants Officer may approve extensions when requested by the recipient.

(b) Unless the Grants Officer authorizes an extension, a recipient shall liquidate all obligations incurred under the award not later than 90 calendar days after the funding period or the date of completion as specified in the terms and conditions of the award or in agency implementing instructions.

(c) The Grants Officer shall authorize and the DoC shall make prompt payments to a recipient for allowable reimbursable costs under the award being closed out.

(d) The recipient shall promptly refund any balances of unobligated funds that the DoC has advanced or paid and that is not authorized to be retained by the recipient for use in other projects. OMB Circular A-129 governs unreturned amounts that become delinquent debts.

(e) When authorized by the terms and conditions of the award, the Grants

Officer shall make a settlement for any upward or downward adjustments to the Federal share of costs after closeout reports are received.

(f) The recipient shall account for any real and personal property acquired with Federal funds or received from the Federal Government in accordance with §§ 14.31 through 14.37.

(g) In the event a final audit has not been performed prior to the closeout of an award, the DoC shall retain the right to recover an appropriate amount after fully considering the recommendations on disallowed costs resulting from the final audit.

§ 14.72 Subsequent adjustments and continuing responsibilities.

(a) The closeout of an award does not affect any of the following:

(1) The right of the DoC to disallow costs and recover funds on the basis of a later audit or other review.

(2) The obligation of the recipient to return any funds due as a result of later refunds, corrections, or other transactions.

(3) Audit requirements in § 14.26.

(4) Property management requirements in §§ 14.31 through 14.37.

(5) Records retention as required in § 14.53.

(b) After closeout of an award, a relationship created under an award may be modified or ended in whole or in part with the consent of the DoC and the recipient, provided the responsibilities of the recipient referred to in § 14.73(a), including those for property management as applicable, are considered and provisions made for continuing responsibilities of the recipient, as appropriate.

§ 14.73 Collection of amounts due.

(a) Any funds paid to a recipient in excess of the amount to which the recipient is finally determined to be entitled under the terms and conditions of the award constitute a debt to the Federal Government. If not paid within a reasonable period after the demand for payment, the Grants Officer may reduce the debt by:

(1) Making an administrative offset against other requests for reimbursements;

(2) Withholding advance payments otherwise due to the recipient; or

(3) Taking other action permitted by statute.

(b) Except as otherwise provided by law, the DoC shall charge interest on an overdue debt in accordance with 4 CFR Chapter II, "Federal Claims Collection Standards."

Appendix A to Part 14—Contract Provisions

All contracts, awarded by a recipient including small purchases, shall contain the following provisions as applicable:

1. *Equal Employment Opportunity*—All contracts shall contain a provision requiring compliance with E.O. 11246, "Equal Employment Opportunity," as amended by E.O. 11375, "Amending Executive Order 11246 Relating to Equal Employment Opportunity," and as supplemented by regulations at 41 CFR part 60, "Office of Federal Contract Compliance Programs, Equal Employment Opportunity, Department of Labor."

2. *Copeland "Anti-Kickback" Act (18 U.S.C. 874 and 40 U.S.C. 276c)*—All contracts and subgrants in excess of $2000 for construction or repair awarded by recipients and subrecipients shall include a provision for compliance with the Copeland "Anti-Kickback" Act (18 U.S.C. 874), as supplemented by Department of Labor regulations (29 CFR part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or subrecipient shall be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he is otherwise entitled. The recipient shall report all suspected or reported violations to the DoC operating unit.

3. *Davis-Bacon Act, as amended (40 U.S.C. 276a to a-7)*—When required by Federal program legislation, all construction contracts awarded by the recipients and subrecipients of more than $2000 shall include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 276a to a-7) and as supplemented by Department of Labor regulations (29 CFR part 5, "Labor Standards Provisions Applicable to Contracts Governing Federally Financed and Assisted Construction"). Under this Act, contractors shall be required to pay wages to laborers and mechanics at a rate not less than the minimum wages specified in a wage determination made by the Secretary of Labor. In addition, contractors shall be required to pay wages not less than once a week. The recipient shall place a copy of the current prevailing wage determination issued by the Department of Labor in each solicitation and the award of a contract shall be conditioned upon the acceptance of the wage determination. The recipient shall report all suspected or reported violations to the DoC operating unit.

4. *Contract Work Hours and Safety Standards Act (40 U.S.C. 327-333)*—Where applicable, all contracts awarded by recipients in excess of $2000 for construction contracts and in excess of $2500 for other contracts that involve the employment of mechanics or laborers shall include a provision for compliance with Sections 102 and 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327-333), as supplemented by Department of Labor regulations (29 CFR part 5). Under Section 102 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than 1½ times the basic rate of pay for all hours worked in excess of 40 hours in the work week. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

5. *Rights to Inventions Made Under a Contract or Agreement*—Contracts or agreements for the performance of experimental, developmental, or research work shall provide for the rights of the Federal Government and the recipient in any resulting invention in accordance with 37 CFR part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

6. *Clean Air Act (42 U.S.C. 7401 et seq.)* and the Federal Water Pollution Control Act (33 U.S.C. 1251 *et seq.*), as amended—Contracts and subgrants of amounts in excess of $100,000 shall contain a provision that requires the recipient to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401 *et seq.*) and the Federal Water Pollution Control Act as amended (33 U.S.C. 1251 *et seq.*). Violations shall be reported to the DoC operating unit and the Regional Office of the Environmental Protection Agency (EPA).

7. *Byrd Anti-Lobbying Amendment (31 U.S.C. 1352)*—Contractors who apply or bid for an award of $100,000 or more shall file the required certification. Each tier certifies to the tier above that it will not and has not used Federal appropriated funds to pay any person or organization for influencing or attempting to influence an officer or employee of any agency, a member of Congress, officer or employee of Congress, or an employee of a member of Congress in connection with obtaining any Federal contract, grant or any other award covered by 31 U.S.C. 1352. Each tier shall also disclose any lobbying with non-Federal funds that takes place in connection with obtaining any Federal award. Such disclosures are forwarded from tier to tier up to the recipient.

8. *Debarment and Suspension (E.O.s 12549 and 12689)*—No contract shall be made to parties listed on the General Services Administration's List of Parties Excluded from Federal Procurement or Nonprocurement Programs in accordance with E.O.s 12549 and 12689, "Debarment and Suspension" as implemented by DoC regulations at 15 CFR Part 26. This list contains the names of parties debarred, suspended, or otherwise excluded by

agencies, and contractors declared ineligible under statutory or regulatory authority other than E.O. 12549. Contractors with awards that exceed the small purchase threshold shall provide the required certification regarding its exclusion status and that of its principal employees.

RIN 1545-AV95

Center Employee Stock Ownership Plans; Section 411(d)(6) Protected Benefits (Taxpayer Relief Act of 1997); Qualified Retirement Plan Benefits

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final and temporary regulations.

SUMMARY: This document contains final and temporary regulations providing for changes to the rules regarding qualified retirement plan benefits that are protected from reduction by plan amendment, that have been made necessary by the Taxpayer Relief Act of 1997 (TRA '97). The temporary regulations change the existing regulations to conform with the TRA '97 rules regarding in-kind distribution requirements for certain employee stock ownership plans, and specify the time period during which certain plan amendments for which relief has been granted by TRA '97 may be made without violating the prohibition against plan amendments that reduce accrued benefits. These temporary regulations affect sponsors of qualified retirement plans, employers that maintain qualified retirement plans, and qualified retirement plan participants. The final regulations amend the existing final regulations to cross-reference the temporary regulations. The text of the temporary regulations also serves as the text of the proposed regulations set forth in the notice of proposed rulemaking on this subject in the Proposed Rules section of this issue of the **Federal Register**.

DATES: These regulations are effective September 4, 1998.

FOR FURTHER INFORMATION CONTACT: Linda S.F. Marshall, (202) 622-6030 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Income Tax Regulations (26 CFR part 1) under section 411(d)(6). These temporary regulations change the rules under section 411(d)(6) regarding qualified retirement plan benefits that are protected from reduction by plan amendment, to take into account amendments made by the Taxpayer Relief Act of 1997 (TRA '97), Public Law 105-34, 111 Stat. 788 (1997). Specifically, these temporary regulations change the existing regulations to conform to the TRA '97 amendments to section 409 regarding the general requirement that employee stock ownership plans offer distributions in the form of employer securities. In addition, these temporary regulations specify the time period during which certain plan amendments for which relief has been granted by TRA '97 may be made without violating section 411(d)(6).

Explanation of Provisions

Section 411(d)(6) provides that a plan is not treated as satisfying the requirements of section 411 if the accrued benefit of a participant is decreased by a plan amendment. Under section 411(d)(6)(B), a plan amendment that eliminates an optional form of benefit is treated as reducing accrued benefits to the extent that the amendment applies to benefits accrued as of the later of the adoption date or the effective date of the amendment. Sections 1.411(d)-4, Q&A-1(b)(1) and 1.401(a)(4)-4(e) specify that different optional forms of benefit within the meaning of section 411(d)(6)(B) result from differences in the medium of a distribution (e.g., cash or in-kind) from a plan. Section 411(d)(6)(C) provides that any tax credit employee stock ownership plan or any employee stock ownership plan is not treated as failing to meet the requirements of section 411(d)(6) merely because it modifies distribution options in a nondiscriminatory manner.

Special Rules Regarding Medium of Distribution From ESOPs

Section 409(h) contains requirements relating to distributions from tax credit employee stock ownership plans. Section 4975(e)(7) extends the requirements of section 409(h) to other employee stock ownership plans as well, and section 401(a)(23) extends the requirements of section 409(h) to qualified plans that are stock bonus plans. Under section 409(h)(1)(A), an employee stock ownership plan or other stock bonus plan generally is required to make distributions available in the form of employer securities. Prior to its amendment by TRA '97, section 409(h)(2) provided an exception to this rule in the case of an employer whose charter or bylaws restrict the ownership of substantially all outstanding employer securities to employees or to a trust described in section 401(a).

Under section 1361, certain small business corporations that do not have more than 75 shareholders are eligible to elect treatment as S corporations whose tax attributes generally flow through to shareholders in accordance with the rules of subchapter S of chapter 1 of subtitle A of the Internal Revenue Code. Prior to the Small Business Job Protection Act of 1996 (SBJPA), Public Law 104-188, 110 Stat. 1755 (1996), an S corporation could not maintain an employee stock ownership plan because an S corporation could not have a qualified trust described in section 401(a) as a shareholder. SBJPA amended the requirements for S corporations, effective for tax years beginning after December 31, 1996, to permit certain tax-exempt organizations, including qualified trusts described in section 401(a), to be S corporation shareholders.

TRA '97 made an additional change to the rules governing qualified plans holding securities of an S corporation employer, to make it easier for S corporation employers to facilitate employee ownership of employer securities through qualified plans. Section 1506 of TRA '97 extends the exception of section 409(h)(2) to cover S corporations, effective for taxable years beginning after December 31, 1997. Pursuant to this change, tax credit employee stock ownership plans, employee stock ownership plans, and other stock bonus plans established and maintained by S corporation employers are not required to offer distributions in the form of employer securities.

Section 1.411(d)-4, Q&A-2(d)(2)(ii) provides an exception from the requirements of section 411(d)(6) for plan amendments that eliminate optional forms of benefit from a tax credit employee stock ownership plan, an employee stock ownership plan, or a stock bonus plan, for certain employers. Section 1.411(d)-4, Q&A-2(d)(2)(ii) applies to employers that become substantially employee-owned, if the employer otherwise meets the requirements of section 409(h)(2) with respect to restrictions on the ownership of outstanding employer stock. These temporary regulations expand this exception from the requirements of section 411(d)(6) to apply to S corporations as well, to reflect the TRA '97 changes to section 409(h).

12. PROPOSAL TITLE

Anatomic Computer Modeling for Precise and Accurate Therapies

13. NON-PROPRIETARY PROPOSAL ABSTRACT

Computer Aided Surgery, Inc. will develop a new computer application server that will take calibrated, encrypted raw images from a clients' medical imaging instrumentation (MRI, CT, Ultrasound, etc.), over the Internet.
Our system will rapidly generate encrypted, precise, accurate, and variable resolution three dimensional tiled models applicable for diverse applications as radiation therapy, surgical planning, intraoperative guidance, rapid manufacturing of prosthesis, verification of surgical results, robotic surgery trajectory planning, patient communication, education and other customer specific applications
The novel idea, that enables the technological leap forward is Digital Morse Theory.
The essential insight of Digital Morse Theory is that it describes the behaviour of three dimensional SpiderWeb surfaces surfaces in terms of Morse Critical features.
These surfaces are the computational building tiles of the biologically and medically important objects we wish to parse from an opaque brick of bytes that compromise a volume data set.
We can build an index of all of the objects in a volume to utilize these elements in terms of their generator critical points. Our novel geometric construction algorithms will be embodied in a network based application service provider model. The server will upload from the radiological diagnostic image producer, and download to the therapeutic consumer model. We will function as a unique, super specialty medical imaging Internet Service Provider.

14. CERTIFICATION: BY SIGNING THIS PROPOSAL COVER SHEET, I CERTIFY, TO THE BEST OF MY KNOWLEDGE AND BELIEF, THAT ALL INFORMATION IN THIS PROPOSAL IS TRUE AND CORRECT AND THAT:

A. THIS PROPOSAL IS NOT REQUESTING FUNDING FOR EXISTING OR PLANNED RESEARCH PROGRAMS THAT WOULD BE CONDUCTED IN THE SAME TIME PERIOD IN THE ABSENCE OF FINANCIAL ASSISTANCE UNDER THE ATP.

B. ALL INDIRECT COSTS PROPOSED IN THIS PROPOSAL ARE INCLUDED UNDER THE PROPOSER'S COST SHARE AND NO INDIRECT COSTS ARE INCLUDED IN THE ATP SHARE OF COSTS REQUESTED.

C. IF A LARGE BUSINESS, COST SHARING PROPOSED BY THE LARGE BUSINESS IS AT LEAST 60 PERCENT OF EACH YEAR'S TOTAL COSTS.

D. THE TOTAL VALUE OF ANY IN-KIND CONTRIBUTIONS DOES NOT EXCEED 30 PERCENT OF THE COMPANY'S TOTAL COST SHARE.

E. THE FOLLOWING QUESTIONS HAVE BEEN TRUTHFULLY ANSWERED:

		YES	NO
i.	IS THE COMPANY DELINQUENT ON ANY FEDERAL DEBT? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
ii.	WAS PROPOSAL OR VERY SIMILAR PROPOSAL SUBMITTED TO ANOTHER FEDERAL AGENCY? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
iii.	DOES THE COMPANY HAVE A PARENT COMPANY OUTSIDE THE UNITED STATES? (IF YES, IDENTIFY THE PARENT COMPANY AND ITS PLACE OF INCORPORATION IN ITEM 15, REMARKS.)	☐	☒
iv.	IS THE COMPANY MAJORITY OWNED BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
v.	IS THE COMPANY SUBJECT TO CONTROL BY INDIVIDUALS WHO ARE NOT CITIZENS OF THE UNITED STATES? (IF YES, EXPLAIN IN ITEM 15, REMARKS.)	☐	☒
vi.	DOES THE PROPOSED R&D INVOLVE THE USE OF HUMAN SUBJECTS AND/OR HUMAN TISSUE, AND/OR HUMAN CELL LINES? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN INSTITUTIONAL REVIEW BOARD (IRB).)	☐	☒
vii.	DOES THE PROPOSED R&D INVOLVE THE USE OF VERTEBRATE ANIMALS? (IF YES, EXPLAIN IN ITEM 15, REMARKS, AND INDICATE WHETHER OR NOT THE RESEARCH PLAN HAS BEEN REVIEWED AND APPROVED BY AN ANIMAL CARE AND USE COMMITTEE.)	☐	☒

15. REMARKS (CONTINUE ON A SEPARATE SHEET IF NECESSARY)

16. DESCRIBE WHAT EFFORTS WERE MADE, PRIOR TO APPLYING FOR ATP FUNDING, TO SECURE PRIVATE CAPITAL TO SUPPORT THIS PROJECT WHOLLY.

CASI's reputation as a basic research company has made our efforts to raise private capital for this high risk project difficult Traditional paths to commercalization financing would require many years of academic research, which private equity will not fund.

Our goal is to use ATP funding to go directly from preliminary results with a novel proven theory to market dominance intellectual property available to all medical and scientific customers over the internet.

SUBCONTRACTS

1. NAME AND ADDRESS OF SUBCONTRACTOR

CUNY Institute for Software Design and Development
City University Of New York Graduate Center
365 5th Avenue
Room 4319
New York, New York 10016

NAME OF CONTACT: Professsor and Exec Officer Theodore Brown
TELEPHONE NUMBER: +1 (212) 817-8191
FAX NUMBER: +1 (212) 817-1510
E-MAIL ADDRESS: TBrown@gc.cuny.edu

2. TYPE OF ORGANIZATION (CHECK ALL THAT APPLY)

- [ ] PROFIT - SMALL BUSINESS
- [ ] PROFIT - LARGE BUSINESS
- [ ] PROFIT - MEDIUM BUSINESS
- [ ] FOREIGN-OWNED U.S. SUBSIDIARY
- [ ] NON-PROFIT INDEPENDENT RESEARCH ORGANIZATION
- [X] UNIVERSITY
- [ ] GOVERNMENTAL LABORATORY

3. ESTIMATED AMOUNT OF SUBCONTRACT

$ 420,000.00

4. DESCRIBE SCOPE OF WORK

Subcontractor will provide mathematical consult, software engineering and codeing services
algorithm design, implementation, and optimization to prime

Subcontractor will provide point of access to CUNY faculty, pay CUNY faculty visiting scientists, PhD students
Providing all fringes, overhead and ancilary costs for pass through by primt to ATP

5. IS THIS A SOLE SOURCE CONTRACT?

- [X] YES (IF YES, EXPLAIN)
- [ ] NO

Justification for Sole Source Contract is based on the expected unique contribution
of the faculty, visiting scientists, and PhD graduate students.

2 Executive Summary

2.1 Scientific and Technological Merit

CASI (Computer Aided Surgery, Inc.) will develop an application to upload calibrated, encrypted raw images from medical imaging instrumentation (MRI, CT, Ultrasound, etc.), over the Internet. The system will generate precise and accurate, encrypted 3D tiled models with variable Level of Detail (LOD, variable resolution) for applications including: Radiation Therapy (RT), robotic minimally invasive surgery, patient communication, education and other customer applications via the Internet.

Current technology is deficient because it is time consuming, labor intensive, not automatic, and difficult to use. Expert operators produce results for each study that vary, even with the same data reprocessed by the same operator. It is not dimensionally stable or suitably precise for critical radiation or surgical therapy. Extensive hand retouching of the images and smoothing is needed to finish the models. Current segmentation and modeling technology is currently only practiced in research medical centers, and for expensive medical illustration for advertisements.

Competing methods reformat and reorient image planes using *ad hoc* inaccurate methods. CASI's improvement will use 3D surface modeling to rapidly obtain stable measurements delivered via web browser.

2.1.1.1 Technological Innovation

The novel idea that enables this technological leap forward is Digital Morse Theory (DMT). It describes the behavior of SpiderWeb surfaces by Morse critical features. These surfaces are the computational building tiles of bio-medically important objects. The algorithm indexes all the objects in a volume and segmentation is accomplished by object selection from the index (DMT graph). These novel geometric algorithms will be embodied as a network based application service provider. CASI will function as an Application Service Provider (ASP). This enterprise will function as a computer based geometric foundry for the casting of anatomical structures for biological, surgical, and educational purposes.

CASI will deliver the product models via Virtual Reality Modeling Language (VRML). Customers will manipulate models by mouse, and other virtual reality methods. The click stream behavior of the client will be learned by neural net content personalization technology.

DMT insight enables users to select entire assemblages of components to build desired features without introducing artifacts (segmentation 'tool marks'). With novel mathematical theory, computer graphics programming experience, and clinical research experience, CASI is 4 years to market dominance in high tech medical modeling. We will offer a rapidly delivered, internet based solution for practical patient-specific, tailored requirements, resulting in better diagnosis and better therapeutic quality assurance at mass production costs.

2.1.1.2 High Technical Risk and Feasibility

The technical risk is that the medical user may have difficulty finding desired objects. For most situations, the object is selected from the DMT graph. In difficult or weak images, additional processing may be required for adjusting contrast and surfaces to suit the user requirements and retain dimensional fidelity. DMT is an innovative algorithm with an unproven ability to solve real modeling problems in a production setting. Common wisdom in the field teaches that volume imaging is the technology of choice for many applications because tiling algorithms make too many tiles, behave poorly with noisy data, and connect extraneous objects therefore confusing the resulting model. Iso- contours and surfaces are used in topographic mapping, meteorology, and other fields, so that there are spillover benefits.

The feasibility of the project is based on preliminary research sponsored by DARPA and results through subcontract with the NIH Visible Human Project (VHP).

2.2 Potential for Broad-Based Economic Benefits

CASI will leverage the large national investment in medical imaging industry by improving image understanding and the quality of decisions based on 3D image stacks. CASI will create new markets for computer biomedical modeling, and propel diffusion of this information to physicians and their patients.

There is an established industry of medical illustration by commercial medical illustrators for medical communication, education, and advertising. The market for patient specific, cheap and rapid anatomic models for critical application will be clearly much larger than diagnostic imaging and medical

illustration. CASI modeling technology, both physical and computer, real and virtual, will benefit the nation by better patient diagnosis, treatment, communication, and teaching. The technology will improve the realization of treatment plans, reduce hospital stays, and enable surgical robot motion planning for minimally invasive surgery, better radiation therapy planning, etc. Patient workups will have the artistic equivalent of an oil portrait by a master painter in the hyperrealism school drawn with the dimensional fidelity of an architectural template. The technology will draw with the accuracy of a micrometer caliper, the precision of an industrial robot, with a reasonable cost, with a market value to the patient/customer in thousands of dollars, with the speed of a Polaroid – Land instant snapshot

2.2.1 National Economic Benefits

The nation will benefit by improved health care that will prolong the quality of life. Reduced employee sick leave will decrease disability related payouts and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs. CASI will create new markets for model-based information as the core competency is established that will go beyond our initial Radiation Treatment project. As the medical imaging industry matures into the medical modeling industry, CASI will seek new markets for services, only dreamed of at present.

2.2.2 Need for ATP Funding

ATP Funding is required because CASI's goal is to make a technical forward leap with the DMT based modeling and develop a business to bring it to market. CASI needs the funding to focus on the production of anatomic models for radiation treatment planning, neurosurgery and medical computer graphics and animations. Building on the NIH Visible Human Project (VHP) preliminary results, CASI will creates new markets that will be profitable within 5-years time. The CASI vision time frame, along with no near term profit projections, is too long for conventional commercial funding.

2.2.3 Pathway to Economic Benefits

This Internet solution will grow explosively, as it is accepted in the state of the art. Internet payment systems provide the infrastructure for direct revenue recovery and interaction with customers. Insurance carriers reimburse costs of 3D reconstruction studies at the two to three hundred dollar levels. The high cost of preparing 3D renderings, and difficulty making critical decisions based on them, had made this unprofitable until CASI.

CASI's intends to become the clinical modeling resource firm. CASI will go beyond medical illustration, becoming a reference standard for dimensionally precise and accurate anatomic models. These will be used for critical treatment applications. The goal is to reduce the cost of generating these models from tens of thousands of dollars and hundreds of man-hours to pennies and the labor time to seconds - literally.

Compared to the established market for high-resolution graphical representations in the medical illustration and advertising industry, there is a much larger market for cheap patient specific diagnostic 3D models.

CASI's first market entry is Radiation Therapy. CASI will leverage many other market sectors by licensing and technical support including direct competitors, forensic image processing companies, histopathology image processing companies, surgical robotics companies, medical imaging equipment manufacturing companies, and picture archiving companies. The state of the art will benefit, in area as diverse as semiconductor process engineering to weather prediction. Any field that uses isosurfaces to understand an underlying physical process will benefit.

3 Project Narrative

3.1 Scientific and Technical Merit

CASI will build a clinical geometry "foundry" casting clinical models in simplicial complexes of triangular tiles that define intricate, real surfaces in three dimensions. Instead of plaster, palladium, or plastic we use surface modeling technology. These models will be used for solving problems as calculating trajectories for radiation beams.

CASI will do this by using a new mathematical theory Digital Morse Theory (DMT) that describes the behavior of isosurfaces. Digital Morse Criticalities are special patterns in the data values where isosurface objects appear, merge, separate, or disappear as the threshold value is varied. These criticalities are, in general, local maxima (Peaks), local minima (Pits), and various kinds of saddles (Passes) in the dataset. By building a list of the locations and values of the Criticalities, CASI software can index (tree graph) all of the objects in a volume data relative to each, in terms of objects that surround other objects (parents), peers (connected by saddles), or are enclosed by other objects (progeny). This index graph is used to enable extremely rapid segmentation and interactively build biologically salient composite surface models from the component isosurface objects.

Further, we will accomplish important image processing and model fusion operations based on matching (registration) images containing common features between models from different imaging modalities of the same anatomic region. We can track and quantify model changes during growth, pathology, and therapy. We can measure several difficult to precisely measure metrics such as surface area, volume, and various moments (center of area, center of mass, standard variability, kurtosis and so on). We can also construct various minimal space curves of trajectories for optimal surgical approaches in terms of Critical Lines (minima and maxima paths between objects), and other applications of computational geometry properties from DMT derived models.

When: We expect to have working alpha prototype systems operating on the web within two years, and beta site clients functioning in four years

We do this because many applications in medicine and the biosciences require a geometric understanding to solve problems at a fundamental level, from which to make critical therapeutic and tactical decisions. These decisions are based on critical dimensions, clearances, access trajectories, and to minimize trauma to no-go regions that must be zealously protected during invasive surgical procedures. The biomedical industry needs patient specific maps, inexpensively produced, with high fidelity for a wide range of therapies. These include radiation therapy, image guided therapy, keyhole brain surgery, minimally invasive robotic surgery, functional modeling of the brain, protein and enzyme kinetics, to cite a few. Engineering solutions to these, apparently simple binary decisions are based on biological morphology from DMT based models are an important problems. The PI's experience in the computational geometry, morphometrics, computer graphics skills, and the insight that DMT provides, propel the PI to make the fruits of DMT widely Internet accessible to physicians and patients.

This project will integrate a range of computer and engineering technologies to connect medical image generators to medical model consumers via web browser based technology. The key to the success is not in the existing technology. Success will be due to the implementation of Digital Morse Theory into a new technology, supported by these ancillary data collection and delivery technologies.

Innovation in computer anatomic modeling technology is by innovation in applied mathematical theory. .

Our project is feasible because of preliminary promising results with in the NIH Visible Human Project (VHP) female "Eve" data set[1]. The PI has powerful theoretical results[2] that are just being published in the field. Our business prospects are feasible because of the CASI patent position[3]. CASI has been in business since 1995 as an advanced research and technology research firm, and benefits from the PI's long background in the surgical/medical computer graphics field with publications in the field from 1985

[1] Karron 2001
[2] Cox and Karron 2001
[3] Karron, Cox, and Mishra US Patent #5,898,793

A promising opportunity: The explosion of interest in digital anatomy, virtual humans, visible humans, visible embryos, and even the visible frog project has popularized the concept of computer representations of internal biological and medical anatomy. Two recent Hollywood movies were based on anatomic computer graphics special effects. Multimillion-dollar contracts are being negotiated with computer animation and medical illustration firms for major media outlets (National Geographic and the Discovery Channel). However, the state of the art has not kept up with the demand for much more than pretty pictures and stunning animations. These firms hire a large numbers of technicians to hand segment and retouch manually segmented contour rings from a very large number of slices. Various power assist algorithms are used to reduce the labor intensity of this work, but the size of the raw data sets outpaces the ability of animation staffs to segment, retouch, and render imagery. Computer graphics researchers are developing animation techniques based on this primitive and painstakingly produced geometry. Anatomists spend years developing hand tiled geometric models and animating them. US contractors are failing to meet their milestones and contract deadlines with the VHP data. Firms are leaving the field of medical based animation derived from real data because of the very high costs and long lead times for segmenting desired objects out of pixel anatomic data. Clinical researchers and biological scientists are calling for more data sets of a representative samples of the American population while others are calling for increased resolution imaging of each digitized human. With the potential for a large population of male, female, pediatric, pubescent, adult, and geriatric representatives of each ethnic group, we can expect a very large national sample terabyte scale digital humans. That is one terabyte per sample person so digitized. Clearly, new Level of Detail Management (LOD) technology is required and is a benefit of DMT technology.

This project will advance the state of the art in computer-aided design for biomedical applications, 3D computer graphics, applied computational geometry, rapid prototyping and manufacturing, and robotic surgery. When the PI started this research, the motivation was to produce "correct" isosurfaces for neuromagnetic modeling. Nagging problems with isosurfaces produced by the popular Marching Cubes algorithm of Lorensen and Cline prompted our formalization of a Digital Morse Theory from classical Morse Theory to establish a correct connectivity while moving through all values of iso-threshold. The marching cubes approach is based on a fixed look up table to build triangular tiles in a voxel (defined as boxes with data values at the box vertices). Various fixes to the apparently minor problems in the algorithm are in the computer graphics literature. The flaws were rare, and the frequently invisible in an object with hundreds of thousands of triangular tiles. The fixes solved the problems with small holes in the data in noise by tiling ambiguous cases with a consistent fixed tile orientation. However, for critical measurements and establishing topological, connectivity between objects, in noisy data, isosurface shell models are generally not considered the approach of choice.

The PI's basic research finding was that there are interstitial critical saddle points. The transition in connectivity occurs precisely at that point and threshold value. This saddle depends only on the boxel (2D box element, and voxel face) vertex corners, even for voxels (3D volume element, a 3D cube with volume with data values at the corners). A corollary of this finding is that any fixed lookup table approach to isosurface tiling in the immediate vicinity of a saddle critical point (The so-called "ambiguous" or "4 threshold crossing " tiling cases) results in connectivity errors in general with a probability of _. Saddle critical points are recognized by their characteristic pattern of high/low/high/low vertex values as we circulate around the boxel perimeter. DMT resolves these saddles by subdividing the boxel on the saddle point, effectively changing it into a vertex saddle point. This is different from tetrahedral (or other simplicial decomposition) composition of an ambiguous voxel, because there are still multiple apparently equivalent tetrahedral decompositions. Tetrahedral decomposition moves the ambiguity from the tiling to the tetrahedralization. There is no ambiguity in the DMT subdivided voxel/boxel, as it can never have hits (threshold crossings) on the added subdivision edges. Thus, the orientation of the connections changes relative to the critical value. In this way, as we sweep the iso-value through the saddle critical value, there is only one connection change, precisely at the critical value, and no other value [4]Any other change in connectivity is spurious and causes multiple connectivity jumps as we smoothly sweep through the volume

[4] Karron and Cox 1995

element. Further, the wonderful hierarchical nesting property that Jordan Manifold surfaces exhibit is those we expect in continuous Morse Theory. This important property is destroyed under any other rule set.

The PI believe that other graph based analysis of images in terms of isosurfaces or edge extraction algorithm was not successful because of the faulty nature of the surfaces. Graph based image analysis produced complex graphs that were difficult to understand. DMT graphs are by their very nature hierarchical and rooted in the image/volume.

Spillover Benefits are that isosurfaces are widely used in a number of disparate data analysis situations, *i.e.*, petrology, meteorology, forensic image analysis, hyperspectral imaging, image compression, and understanding. Scientists in other application areas will use our server to build market and problem specific application services. SpiderWeb model scan represent turbulent fluid flow shear surfaces, separation surfaces, cavitation phenomena, and other highly intricate surfaces. SpiderWeb models are noise proof, in that they properly model noise instead of breaking apart or connecting incorrectly. We can represent the relationship between intricate fluid flow structures by the DMT graph representation where computer graphics does not reveal internal structures. We expect that research into many important biophysical phenomena, such as cell membrane porosity, receptor mechanics, and enzyme mechanics will benefit from our tool and analysis. From the preceding list of spillover benefits one can see the contribution to the United States scientific and technical knowledge base, as any application that makes use of surface analysis will benefit by using our technology and ASP.

Project team qualifications; The PI formed the prime contractor company, CASI in 1995. The PI has combined expertise in plastic surgery and neuromagnetic functional imaging dating back to the 1980s (Cutting et al 1986) and advanced mathematical theory in the 1990's (Karron 1992). Our original motivation for geometric modeling was derived from research on neuromagnetic brain anatomy structural and functional modeling. The research evolved into work with cinematic cardiac modeling. The company was founded with a Phase I SBIR Grant from DARPA Advanced Biomedical Technology Grant and went on to do a Phase II grant, and a Phase III add on grant. We also obtained DARPA funding for Digital Morse Theory in the Advanced Computational and Applied Math program at the DARPA Defense Sciences Office. Dr. Karron has run the company web site and ISP since 1995. CASI was founded to be a superspeciality medical surgical ISP. Our web site has been on the air for 6 years, and is well indexed by all of the leading indexing services. This is the basis for our inspiration to run a 'computer anatomic foundry' as an ASP. Dr. J. Cox has been working on the mathematical underpinnings of DMT with Dr. Karron since its inception. Dr. Cox has extensive theoretical and practical experience in new algorithm mathematical description, proof, efficiency evaluation, optimization, and coding in C++ and derived languages. Dr. G Wolberg has many years experience in digital image warping, registration, and is an expert imaging scientist.

3.1.1 Technical Rationale

3.1.1.1 Technical rationale introduction and perspective

The goal is to build surfaces that can be used for object modeling and trajectory analysis. Users will make vital decisions based on the distances between objects, surfaces, and points. Lives will depend on these measurements. Many algorithms and technologies from computer graphics are not of high enough quality for these critical applications. Good enough for graphics display, is not good enough; too time consuming, not repeatable, or too expensive for many important medical applications. CASI requires topological surface tiling make correct connections. Geometric calibrations from the source images must be preserved, and segmentation artifacts (i.e., tool marks) must be eliminated or minimized. Where the image is manipulated, the 'cut' surfaces must be clearly marked so that the user knows what is artifact surface. Hand retouching of objects is expensive, time consuming and introduces additional warpage issues, which reduces confidence on these objects for critical measurements. By preserving calibration at the imaging equipment level, we can precisely and accurately manage warpage and coordinate system disparities between multiple data sources.

Technical challenges that display significant recognized uncertainty of success by experts in the field: Computer graphics and computer modeling are distinct fields. Good enough for computer graphics will not be good enough for our surgical and treatment applications. Measurements of biological shapes are

made difficult by the lack of best practices and standards in the field. This project will help establish best practices for this emerging field. The field biomorphometrics is contentious. Biological shapes require new technology to understand, measure, and manipulate. There are no straight reference edges, circular arcs, or fixed points on which to base a Cartesian coordinate system. Living things are constantly in motion, over time scales of seconds to years. There are a large number of parameters required to describe geometric regions, and no generally accepted theory for a complete description of an organisms shape, much less for diagnostic and therapeutic manipulations of this shape. Industrial metrology is ill suited for such -- complexities. We intend to extend the limits of the field

Isosurface methods are be used to provide object geometry. However, isosurface methods are not generally considered a preferred segmentation method. This is because previously we have not been able to calculate or visualize clearly exactly, where a particular isosurface object connects to other objects that we do not wish to include in our intended object (the Segmentation Problem). Indeed, the very surface from an object we wish to extract generally obscures the attachment saddle points where our desired object connects to undesired objects. This has been the major difficulty in three-dimensional isosurface based rendering. Other methods, such as volume rendering, are aesthetically pleasing but do not provide geometric rigor and insight required for future analysis and use. Refinements in volume geometry based on volume imaging do not consider topological issues. An algorithm that fit a surface around a cloud of points, or shrink-wraps a minimal area surface around a volume object, forces the topology to that of a single object. It is possible to iteratively build volume image objects into multiple objects, but it is tedious, expensive, and fraught with geometric problems. Unguided isosurface marching geometry runs amuck, covering adjacent objects and obscuring the scene. For critical applications, such as surgical anatomic modeling, we need properly connected surface geometry. Hand segmented objects contain segmentation artifacts, and do not nest properly inside superior and surround inferior objects. New thinking is required to overcome these difficulties without resorting to brute force segmentation by hand drawing slice wise rings, no matter how quickly a professional segmentor can draw rings. There are always going to be too many slices. Artifacts introduced by the illustrator's hand are unacceptable for precise analysis.

There are serious limitations of the state of the art in segmentation technology and theory. Currently, selecting objects in one slice only is a time consuming and frustrating exercise. The partial solution is that the segmentor can see a portion of the object in the image plane. With rapid 2D contouring, the user can quickly find a suitable contour ring from a seed point. This line represents the intersection of a larger surface through the seed slice pixel image plane. We then use this to seed a three dimensional surface. However, the segmentor may find that the surface may have attachments to other objects we do not wish to include in our desired object. The segmentor will need to hunt down the attachment points and do 'something' damming. This is the current state of the art in segmentation.

DMT calculates the connections (DMT Criticalities). DMT segmentation minimally perturbs the contrast at attachment points to achieve the separation we desire. In RGB space, the segmentor may find that there are attachments in one portion of color space, and a suitable segmentation surface exists in another portion of color space. The goal of the segmentor menu is to navigate a segmentation surface through color and other (CT, MRI) spaces; a task 3D interactive computer graphics does not make simple or help visualize.

Isosurface algorithms generally over-tile a surface. Each triangular tile is constructed independently of its neighbor. The size scale of the triangles is less than the voxel size, and in a large data set, the number of triangular tiles can become burdensome to manipulate and display, particularly in real time. The current state of the art is to build a marching tiled surface, then use triangle decimation to collapse almost co-planar triangular tiles into one another. This approach generates large intermediate memory consumption (bloom) of having to build a fully resolved surface then decimate it. This approach, while functional for graphic display purposes, is not deterministic. This means the resultant tiling is very different for every seed tile used to decimate a surface. Decimation changes the geometry of the decimated object in an uncontrolled and possibly unsuitable way.

Digital Morse Theory can provide a solution to these limitations in the state of the art. It can be used as a novel basis for segmentation, data fusion, and LOD management. The technical risks are than that the

algorithm has not been fully implemented, tested, power tested, and accepted in the image and modeling processing community. The algorithm may have computational bottlenecks as we scale up service to production levels on very large images. We ameliorate this risk by using a heavy-duty computer server that can manage large intermediate calculations and memory requirements.

Related topics are hot research on level set theory, isosurface methods, differential equations, and Morse theory. An exhaustive bibliography is beyond the scope and page limits of this proposal, but we refer to the work of J.A. Sethian, Jack Snoeyink, Chandrajit Bajaj, Robin Forman, Stan Osher, John Hart, Carroll K. Johnson, and others. Some of the key theoretical ideas we seeking to develop in medical modeling (Segmentation manipulation by DMT Graph) were explored by C.K. Wall in "Surgeries on Compact Manifolds" (1964, republished 1970, and 1999) by the American Mathematical Society. Marsdon Morse published "The Calculus of Variations in the Large" in 1932. Our principal contribution to the field is the realization of Morse Theory in discrete representations of the underlying continuous world. We make Morse Theory computable. Very recent applications of Braid Theory in Morse Theory have been discussed in applications as diverse as fluid flow and air traffic control avoidance trajectory planning. The intellectual atmosphere is embracing Morse Theory. CASI's computational approach in Digital Morse Theory will have wide applications that we are most keenly aware. Indeed, medical surgery can be considered changing the topology of the patient; Mathematical and computer surgery on DMT object models is the next step logical step in computer modeling of surgical procedures.

3.1.1.2 What is Digital Morse Theory?

Digital Morse Theory describes the behavior of SpiderWeb iso-valued surfaces (US Patent #5,898,793). These surfaces are composed of a simplicial complex of triangular tiles. The surface has the property of being Jordan (no holes). The surface is manifold (no Klein bottles, with consistent normal vectors, a well defined inside and outside). The surfaces within any particular family are "Morseian," (family member surfaces nest entirely inside or outside each other. As we raise or lower the threshold isovalue, the surfaces arise or disappear at well-defined Morse Criticalities. These are kinds of local maxima, local minima, and various kinds of saddles. The surfaces arise from maxima (sources), disappear at minima (sinks), and merge at saddles. Therefore, by scanning through a dataset, we can identify all these component objects by cataloging only the criticalities by their characteristic bit patterns. This is computationally very efficient.

These SpiderWeb surfaces capture essential inflections (transitions from concavity to convexity) in object geometry. Fine scale features (noise) in the geometry create excessive numbers of triangular tiles. DMT provides a method that can reduce the density of tiling by removing smaller through larger scale geometry features in the surface. This is the basis for Level of Detail (LOD) management. For example, if we are using facial features to define a patent based coordinate system, a natural fiducial point such as Nasion (the saddle point on the bridge of nose), can, shift unpredictably in triangle decimation technology. In DMT theory, the larger-scale saddle point remains stable while the smaller, noisy surface features are relaxed smaller to larger, in a hierarchical fashion.

A family of isosurfaces is the collection of surfaces that shares a "one to one" mapping for any point on any member surface to any other such member surface. At Morse criticalities, and only at criticalities, does the mapping property change. This is due to the creation of a new object, the destruction of an object, or the connection to another, object. By showing the Morseian relationship between criticalities (nesting), we establish the relationship between families of surfaces. Because the server can quickly find the Digital Morse Criticalities as bit patterns in the data, we have a new, powerful, and fast way to make topologically coherent, geometrically sound, realizable objects from an image data stack.

A Digital Morse Theory Graph (DMT Graph) is a hierarchical linked list (graph) of all of the separable objects in an image. Each object is identified by its source criticality. We cannot see all of these objects simultaneously because most of the objects are inside other objects, and therefore obscured. Computer graphics does not elucidate the relationship between objects. The hierarchical nature of the DMT Graph is derived from the isosurface families being Jordan Manifold.

There are a number of important practical uses for this insight. We can supply instructions to a rapid prototyping system for making any object or collection of objects in our images. We can rapidly

manufacture fixtures to hold patients precisely and accurately for RT beam steering. Further, we can define optimal paths between these objects, such as minimal distance paths, minimal height paths, or minimal paths subject to some other type of constraint. Constrains surfaces would include maximal avoidance from no-go regions (blood vessels, eloquent brain cortex, or some such vital structure that must not be affected by our surgical robot manipulator). Very recent applications of braid theory to these Morseian paths may be a very efficient method to calculate robotic trajectories and radiation treatment beam plans.

3.1.1.3 The Fish Tank thought experiment: Counting Islands as the water level changes

The essential insight of continuous Morse Theory can be intuited by a thought experiment. Consider a rectangular fish tank. Into this tank, we pour small quantity of sand such that we have two smoothly sloping small hills, one taller than the other. Now, we fill this tank to the brim with water. We now start a count of the number of island objects as we very slowly drain the tank. Our first observation is that there are no island features in our tank scene. As the water level drops, we observe the water level just coincident with the peak of the tallest sand hill. We notice behavior of the water at the critical peak of the hill. We get a degenerate point island contour, with zero area, zero perimeter, and infinite curvature. A vanishing small change in the water level and this point contour expand into a tiny island. We increment our island object count by +1. We continue to drain water from the tank and observe the birth of the second island at the peak of the second little hill. We again increment out island object count by +1 to two objects. As we continue to observe the drop in water level in our tank, we observe the two island contours expand and grow toward each other. As the water level reaches the level of the critical saddle point between the two hills the island contours touch at precisely the saddle point. We observe that our object count decrements by –1 to give a total island count of one. The essential feature of this rubric is that we only need to count the peaks and passes to inventory all of the object islands in our scene. This approach works even as we increase the complexity of the scene. We can use the same idea of enumerating peak, pits and pass criticalities in a very complex archipelago of island features, at any size scale, or any range of size scales, including noise at any size scale.

3.1.1.4 Why a Digital version of Morse Theory?

Morse theory works precisely because it solves the problem of singularities in data models. CASI will use its digital version of Morse Theory that works on computers with pixilated data, which will yield the same results as continuum Morse theory on analytic Morseian functions. Digital Morse Theory extends Morse Theory to discrete data, such as a digital image. Digital Morse Theory describes the behavior of SpiderWeb surfaces and objects. There has been significant research effort to build quickly computable surfaces. There is little work on technology that effectively describes all of the isosurface objects in a volume data set. No research provides a practical method of indexing all of these objects in a useful and comprehensive fashion. In order to make Morse Theory work in this digital setting, DMT adapted the notion Peaks, Pits, and Passes in subtle but important ways. We extended the idea of a Peak to include not just a point peak or pit, but plateau peaks, and pits. Criticalities can also be ridges, extremum of curvature, and umbilicus of curvature (a curvature saddle). Saddles had to be extended to include not just vertex saddles (where the saddle point is collocated on a vertex) but also the most common interstitial saddle point. This solved the so-called problem of "ambiguous" voxels. This means that the surface is completely determined, unambiguously tiled, and stable surface representation in any texture or noise.

3.1.1.5 Digital Morse Theory for rapid effective semiautomatic segmentation

The eye sees interesting objects in a 2D image and the mind would like to reach into the image and isolate (segment) that object from the surrounding pixels. If the 2D image is a slice through a stack of slices imaging a 3D volume, we can attempt to segment the entire object from the surrounding voxels, including the unseen portions above and below our planar sub-sample. If we are lucky, we can use 2D isocontours lines to estimate 3D objects. The current state of the art in segmentation is to select a seed location and use that seed to start propagating contours lines in the reference image plane and contour surfaces in the volume image stack. The problems arise where we have a likely looking contour ring object, and use that to seed a volume object surface. What may look appropriate in one slice will frequently run amuck and connect inappropriately to other extraneous objects in other slices. The segmentor needs some guidance as to where the object that we wish to segment in any one image slice will connect to other objects anywhere in the

volume image stack; including the currently visible slice, and/or in slices above or below. To make matters worse, the very surface we are seeking to grow obscures the critical features where it connects to other objects.

The current state of the art is to build pixel fences of higher valued pixels to constrain a growing surface. This is a modified kind of image retouching. We are attempting to retouch not the object, but just a vanishing distance beyond the objects' borders. It is retouching almost blindly, in hope that we are corralling our emergent surface appropriately. A lot of fencing may be used in a complicated object. While not all fence objects are required, they will change the shape of the object in the immediate vicinity. In order to guarantee that our surface won't leap over the pixel fence, we have to use a very high value, typically fully saturated white values at the upper end of the image histogram. By raising a high fence around the object, we are changing the strength of the surface. The strength of the surface is the intensity of the gradient normal to the surface. A surface can be weak if the delta intensity crossing from inside to outside is very small, or an identical surface can have a very large intensity change across the threshold value. The only way the surfaces can be independent of the strength of the surface is for the strength of the surfaces be identical at all points. Therefore, any uneven changes in the strength of the surface (which would result from hand carving or hand fencing by changing pixel values) would introduce geometric changes in the surface that we have dubbed 'tool marks'. Typically, these artifactual features are removed by post processing operations to smooth out rough spots. This makes using this technology for modeling expensive, time consuming, and requires an expert operator.

Edisonian invention vs. Advanced Math Insight: The state of the art in image segmentation is trial and error, cut and fit, iterate, and refine; reminiscent of Edison's attempts at managing the voltage drops in the early DC power distribution grids. Edison built scale models of the grid with copper wire, and measured the voltages the subscribers on the grid would see. A young scientist came to Edison looking for a job, boasting that he could calculate the voltage drops without trial and error estimation. Edison needed a hard worker, but resented the hubris of the man. Eventually Edison eventually threw Telsa out. DMT afford a way to directly map/graph the objects in a data volume at every threshold, without browsing or exploring the volume with 3D interactive computer graphics. CASI will move the state of the art out of Edisonian segmentation and into the deep insight that DMT provides; an application of advanced math to solve a multi-industry problem.

3.1.1.6 Decomposition of pixel image into DMT graph representation

The DMT graph is the first step in the analysis of an image in terms of its surface defined objects. All objects are composed of various implicit isosurface objects. This graph representation is a hierarchical index of all of the component objects in the data volume. Additional information can be encoded into the graph with the geometric shape information of each implicit object. Essentially this operation recodes the image intensity information into a system of peaks, pits and passes organized into parents, peers, and progeny (the PPP to ppp relationship). Further, each component of the object shape can be further graphed as a system of concavities, convexities, and their umbilici (the region between where the surface passes through flat. Since each object is a closed, manifold, this enforces the surprising and useful parent to progeny hierarchical organization. DMT analysis effectively turns a pixel image into a vector drawing in terms of contour line and simplicial triangular tiles.

3.1.1.7 Application of Union and Intersection operations to establish homology between images

Because each related images is a rooted tree graph, we can start matching trees by various graph-matching algorithms we will be designing with our computational geometry colleagues at the CUNY. Our algorithm design approach is based on the idea that the root of an image graph contains all of the area of the image. Each node under the root contains a normalized fraction of the image area relative to the whole of the image. In this way, the DMT graph is a completely dimensionless representation of an image in terms of area/volume fraction and Morse criticality a union image graph is all of the common image features between two related images, such as an MRI and a CT image. It is calculated by recursive descent searching into each node, then sub node. The intersection image is all of the independent features not common between two images. The novel applications of such a graph will be among the most exciting and useful new finding expected to come from this research. We believe that the brain uses this approach for steriopsis

and the synthesis of range information from two related points of view. Previous efforts at image graph decomposition were confusing and generally considered not fruitful. Because the SpiderWeb surfaces are Jordan Manifold, they decompose naturally into a tree graph (because the surfaces don't interpenetrate and join only at critical nodes), and the results are natural to understand.

3.1.1.8 Medical Illustration and Medical Modeling

Medical illustration is the communication of a medical concept from the mind of the artist to the mind of the viewer. It is intended as an educational process, not necessary as data display and analysis. Medical Modeling, as we wish to compare and contrast against, is the technology for the building of geometric models of anatomic features. Without suitable tools for the segmentation and modeling of geometry from medical images, medical modeling can become medical illustration using three dimensional computer graphics because of excessive hand retouching and smoothing. While computer graphics is an important part displaying our computer anatomy, computer graphics is not the product and imaging it not out intention. We consider this a biomedical engineering project. However, we recognize that there is a significant need and highly profitable market in medical illustration and animation industry that we can serve and derive a significant revenue stream. This is because our technology can reduce the extreme costs of preparation of high-resolution anatomic images and animations significantly.

3.1.1.9 Computer graphics and the curse of dimensionality

As technology provides us with more raw data channels, at faster rates, at greater resolution, our ability to comprehend it is limited by our ability to visualize it in three dimensions, in three primary colors, interactively. High-speed interactive computer graphics, and advanced rendering algorithms, require slow, careful, and expensive examination of the spatial nature of the data by a dedicated expert. Each channel of information may be dependent on each other. Additional resolution may not increase our understanding of the relationship between objects. We need new ways to understand higher dimensional data where computer graphics overwhelms the visual system of the observer, or requires extensive interactive exploration, observation, and analysis of an expert operator. As technology give us more channels of data, computer graphics can compound the "curse" of too many dimensions of data.

A DMT graph based topological understanding of complex higher dimensional (Color, CT, MRI, PET information dimensions) spatial relationship is our proposed "cure" for the "curse" of higher dimensional data channels. This is because a topological relationship can be represented independently of the dimensionality of the data; A ball in 3-dimensions is one node on the graph, as is a ball in 20 hyperspectral colors.

3.1.1.10 Description of technical challenges and barriers we will tackle

3.1.1.10.1 DMT for image segmentation

Segmentation for precise and accurate application requires the segmentor make no, or minimal changes in the image. For many images, we only need to find a path (segmentation plane) around an object. Where none exists, we need to 'carve' one. We require well-defined minimal 'surgical' changes in the image such that we minimize warpage in the resultant objects' geometry. We define a 'DMT Segmentation Operator' to manipulate connecting saddle values to enable wholesale connection or disconnection of objects; effectively carving (separating) and gluing (joining) objects with single mouse clicks.

In noisy data, or when segmenting in uneven difficult geometry (blood vesicles, nerves, thin bone), in order to separate an object multiply connected to its proximate objects, we have to introduce additional contrast to separate the desired object. We can restate the problem; what pixel locations with what value changes need to be applied to achieve the separation we specify. We employ a contrast mask image layer, to preserve the original pixel data values. Using the DMT graph, the user select the most proximate saddle nodes and applies the 'segment' operation to elevate or depress saddles as required to parse an object from its neighbors. We then mark this 'cut' surface so that we are aware that this is an artificial surface. As we make only the minimum changes in gradient, we minimize the introduction of 'tool marks', and maximally generate a smooth cut surface. Preliminary testing of this procedure has been most promising.

3.1.1.10.2 DMT for image registration

Image registration is any of a number of methods that translate, scale, and rotate an image such that common features in both images are made to be co-incident. The determination of the common features, or

homologous points, lines, and regions, is typically specified by a technician's eye. The popular animation effect of morphing one (somewhat) related image into another image requires a lot of human interpretation to specify which points and image regions are to be warped into another. An important application in medical imaging is the combination of multiple imaging modalities into one image representing the fusion of features between both images. Manual determination of common features, particularly in cinematic medical image series, can be time consuming and expensive. Automatic or semiautomatic methods are needed. Digital Morse Theory provides a new means of image understanding to identify common features between one or many images.

3.1.1.10.3 Registration of images by DMT union operators and digital image warping

The goal of registration is to recognize homologous features in disparate view of the same scene. Decomposition of disparate images into DMT graphs is the approach for this project. An example would be calculating range information from two closely spaced Point of View (POV) images, or varying the MRI pulse sequence progressively from one sequence to another. At very small POV disparity (in distance, or pulse sequence), we increase the disparity between the two images. We will conduct experiments where we continuously calculate the DMT scene graph from two views with increasing disparity between the views. Our aim is to validate algorithms for calculating the DMT Union and Intersection graph. With a validated algorithm for calculating the Union between two scenes, we can do fully automatic registration between scenes and solve an important problem in image fusion, automatic steriopsis, and the CASI modeling service.

We can register disparate but similar images by calculating the common features of the images (union) without the disparate features (the intersection of the images). From the union graph, we can calculate the digital affine transform required to match each homologous node to occupy the same space (An affine matrix at each Morse criticality node). We can then apply the intersection image at each parent node to generate a topologically correct but warped to fit the union fusion image that is geometrically calibrated by one of the images' calibrations.

3.1.1.10.4 Bandwidth management

DMT based representations can be used to transmit an image from large features to progressively smaller images. This will be an important spillover benefit, in that we will be able to send images efficiently through limited bandwidth by organizing the image for transmission from largest to smallest component. We will be able to transmit a pixel image without drawing any pixels. We will transmit the image as large component contours first. Successively smaller and smaller contour objects will build on the client web browser, but the essential geometry of an image will build in the first data packets of the image. We will draw the vector geometry of pixel images at significant bandwidth savings. That way the image will more quickly recognizable very early in the image build process. Optimized picture transmission over the web important for sending images echoing clients data back down to clients browser.

3.1.1.10.5 Trajectory planning for surgery: Braided Digital Morse Theory

The state of the art in Surgical Robotics is remote actuators with video and/or haptic feed back. A true robot has some algorithm and model about the environment it is attempting to navigate. Improved algorithms for navigating inside the body are required which need models from which we can calculate internal trajectories. This is a technical challenge we believe we can tackle in this project because we can calculate optimal paths between criticalities. Between two peak criticalities, there must be a saddle criticality. New Variational Calculus and Morse Theory methods can provide a "least distance" or "minimum height" path between the two. We will research new concepts in Braid theory applied to DMT (Braided Digital Morse Theory) with Braid expert Professor. M. Anshel.

3.1.1.10.6 Trajectory planning for Radiation Therapy Beams

A particularly difficult tumor location to treat with radiation or electron beams is the breast. The goal is to destroy the cancerous tissue, which may or may not be a well-defined mass inside the breast, overlaying the thorax and in dangerous proximity to the heart and lungs. Patient fixation and re-fixation during the course of radiation therapy is difficult. In the current state of the art, it is expected that collateral damage be inflicted to the heart and lungs during high-energy breast RT. CASI and its clinical collaborators at NYUMC believe that with better modeling of the breast, the tumor, and the thorax, we can design better

therapies. RT requires serial models the tumor during the course of therapy. CASI will be able to build models of critical organ geometry, design fixation jigs for the patient, and beam trajectories.

3.1.2 Assessment of success of the project approaches and alternatives

Our assessment of the success of this project is based these positive and negative features of our proposal:

3.1.2.1 PLUS

We have a comprehensive new theory that solves important problems in the state of the art in a number of fields. The theory is proven, and based on classical Morse Theory, and is a hot research topic (Braided Morse Theory, Level Set Theory, Contour Trees). The principals and faculty are world-class graphics programmers, applied mathematicians, expert in algorithm design, optimization, and complexity analysis, expert in ISP and web site management, and the DICOM Imaging Instrument interchange standard. The PI's preliminary results with 2D RGB (color) Visible Human project data are encouraging.

3.1.2.2 MINUS

The utility of our new algorithms are not established in surgical or radiological practice. The software is written as academic demonstrations and proof of concepts only. Significant work is required to make the applied math solve our customers problems. We need to educate technologists and professionals in the field, as DMT graph segmentation is based on a new paradigm. Technical superiority of a new algorithm alone will not necessarily lead to widespread acceptance. The delivery of a solution and the ease of its use can be more important to market adoption.

We must understand the biology as well as the anatomy of what we are modeling. Using only anatomic imaging to attempt to pin down issues of precision, accuracy, in a living, highly variable, perverse human population is going to fail. Intraoperative visualization is the way to get geometric feedback for accurate geometric placement, but it will not necessarily improve patient treatment results. Functional imaging may show that the source of pathology is not at the center of the anatomy. Functional imaging (functional MRI, volume impedance tomography or neuromagnetic source imaging) will ultimately be the solution. CASI DMT can manage issues of precision and accuracy in data fusion between widely disparate resolution scales typically found in functional images fusion. The biology of the pathology will most certainly complicate the geometry in novel and exciting ways.

3.1.3 Implementation details rational

The main interface to the CASI system will be by connecting to the CASI web site at http://www.casi.net/ and logging in via a secured socket level connection, with all image and model transactions encrypted to the appropriate privacy standards for patient information (HIPPA). There are two fundamental operations on the server. The first is uploading raw image data and then generating the topological decomposition and recoding into a DMT graph. The DMT graph indexes each object in a volume, and each feature in the object geometry. The graph of a volume contains the same information as the pixel data; but in a hierarchical segment able object format. The second fundamental operation is tiling from a node on the DMT graph. The model is created at a bandwidth appropriate tile density and downloaded to the user. This is possible at interactive speeds because the DMT graph is an index into the volume, enabling rapid segmentation and model generation.

The model server is the heart and soul of our effort, the "forge" through which pixels become anatomy. Raw image stacks are uploaded. A DMT graph is presented back to the user. As the user moves the mouse, tiled models are forwarded to the client for real time interactive approval or further pick, drag and drop assembly.

The radiological client user will log into their account at CASI, on a client machine on their local network, which will also connect to the imaging equipment via the radiologist facility TCP/IP net to a DICOM (Digital Image Communication) protocol for interchange of medical images that runs on all medium to high end medical imaging equipment. Each radiological facility will provide access to its imaging equipment image files. We will write code that will enable the client to push the code up to the server, or the server will be able to automatically pull client images as they are produced. The images and associated patient identifying information will be encoded and encrypted to HIPPA (Health Insurance Portability and Accountability Act of 1996.) Software features are a universal file and directory recognition

system, that can learn the format of any medical imaging instrument file format, and any popular digital image format so that installation in a client radiological site is quick and trouble free. We will also build a universal calibration service into the radiological client. Most imaging equipment has maintenance contracts and quality assurance requires that the equipment be calibrated by imaging an imaging phantom with known geometry and dimensions. We propose to provide a uniform calibration service to insure uniform model fidelity for all of our client images. In that way we can provide a cross instrument, cross instrument manufacturer, calibration standard so that our geometric models are of well defined quality, independent of the standards of instrument care the client maintenance standards call for, and meet CASI defined standards.

The design goal for the referring physician client software is to have immediate access to the imaging study and minimize the work required to do a three-dimensional work up. The referring physician, the attending surgeon and any of the consulting caregivers authorized by the referring physician, can access the images, the patient models, and any study tools, annotations, and other material. This may include medical illustrations, reference materials, annotated treatment plan models, pre, post treatment photographs, intraoperative photographs, and so on. The materials may be to educate the patient as to the upcoming procedure, document the procedure plan, report the procedure results, or even sell a prospective case to an uncertain patient. Because we are going to be doing interactive three-dimensional computer graphics on the downloaded anatomic models, we will enforce a minimum level of graphics resolution and triangle rendering speed by the client. These standards are approximately the same as available in any high-end computer video board with OpenGL support. These boards cost approximately 100 to 1,000 dollars with a polygon draw rate of at least 30 million illuminated, z buffered triangles per second. This a standard value for a PC workstation class graphics accelerator board, or a high end computer game OpenGL board

The patient client software can display study models permitted to the patient by the referring physicians' client. This is a limited functionality physician interface. In this, the physician can educate, inform, or sell the case to the patient.

We will use VHP RGB data and register the base anatomy to the CT and MRI patient specific images. We will build detailed models that contain the diagnostic information particular to the patient. Our goal is to generate a fused composite model of the patient, containing standardized anatomic data scaled and registered into the patient coordinate system, to provide color and other inferred structure detail that MRI and CT do not measure. As we validate our code, and the radiology facilities client code approaches completion, we will move to using patient specific MRI and CT source data.

Level of Detail (LOD) management is key to the commercial success of this project. The models, as built on the server will be over tiled (have more triangles than required to solve most modeling and trajectory problems). Delivery of the product models and images to the client computer must be appropriate to the available client bandwidth, display resolution, and the client computer storage capacity. Interactivity requires rapid LOD management so server downloads only enough detail to permit the client computer to display the model on its OpenGL graphics accelerator subsystem. Failure to achieve the desired bandwidth and latency by the project termination data will be offset by the expected growth in next generation Internet bandwidth and yet even faster graphics chip sets. Should hardware technology obviate the need for an extensive LOD management subsystem, we will scale back our effort in this area appropriately.

We will close the loop with our users by installing a click stream subsystem to monitor how our users interact with the selection/segmentation menu. From are able to optimize the interface to minimize the selection, and segmentation clicks required of our users. Selecting objects can require a lot of picking and selecting on a deep the DMT graph menu. We expect that most users will make canonical selections, and by monitoring patterns in the selection behaviour, we believe we can intuit users intention, taste, and desired objects after they make similar choices in different patient datasets. As our system gains experience with alpha testers ad users, we will test to see if this facility makes using our system intuitive and decreases each users number of selection clicks to find the models they wish. In this way the user interface and the speed and quality of the users' modeling effort is improved.

We will build a Radiation and Oncology Physician Client Interface that implements special features requested by our Radiation Therapy (RT) collaborators at NYUMC. We will use our core technology to segment and build models, but also track successive tumor model changes during treatment, develop beam

trajectories (via Braided DMT) through the target (the breast tumor) and no-go regions (the lungs and heart). We will develop ablation isodose isosurfaces (surfaces of dosage intensity great enough to ablate tissue), and low dose isodose surface (the surfaces of dosage intensity safe for healthy tissue), for no go region. We will build union and intersections of these organ and isodose objects using our DMT graph technology to highlight dangerous problems before the patient is hurt, and to validate treatment plans prior to treatment.

We will begin by doing breast cancer cases using the generalized physician client with the radiation oncology department at NYUMC. We will be building patient models from CT slices, and modeling tumors during the course of treatment. We will also develop isodose surface maps of total radiation absorbed as well calculating beam trajectories. Our goal is to minimize the radiation dosage in the thorax and maximize dosage in the targeted tumor. The research challenge is to do difficult beam trajectories that the department software cannot manage because of the geometric complexity or lack of critical organ models.

We will build a Neurosurgical client interface, to provide steriotactic brain surgery planning for keyhole surgery. We will incorporate features requested by our Neurosurgical colleagues at St. Louis University (SLU). We use our modeling technology to build no go regions such as articulate un-diseased brain and major blood vessels, and the target region we wish to biopsy, ablate, or deliver therapeutic agents. We can model the union of the no go regions and the access path to validate surgical plans prior to surgery. Any volume in that object class will immediately flags a problem.

3.1.4 State of the art before project:

The current state of the art for anatomic modeling is hand pixel picking or semi-automatic power hand assists (snakes, dilation / erosion operators, flooding regions, etc.), drawing contour rings, sewing a surface between rings. Marching cubes and friends tiles all objects at a threshold value, regardless of their connectivity. Various advanced techniques require hand drawing pixel "dams" to contain surfaces from spilling into inappropriate regions, or "roughing in objects" prior to contouring. These techniques distort the object geometry, are imprecise, create tool marks, and other dimensional instabilities. They require an expert operator, are not repeatable, even with the same operator on the same data. Critical radiation therapy simulation modeling for beam trajectory planning is done by the seat of the pants, line of sight, with insufficient computational geometry support on physical simulators. Robotic surgery is not; there is no theoretical, robotics technology to makes calculation of intraoperative trajectories possible without good anatomic modeling. Currently, neurosurgical trajectories are typically simple straight lines avoiding large internal obstacles (blood vesicles or eloquent cortex). Anatomic computer animation for medical or commercial illustration requires many technicians working on multiple packages doing hundreds of hours of hand editing to make seconds of finished rendered animation frames.

3.1.5 State of the art after project

Within three to four years from the start of this project, segmentation will be accomplished in seconds; simply by moving a mouse over a DMT graph (specifying a threshold value and parent criticality) browser widget, and immediately seeing the 3D object selected. If the object is not simply selectable (the desired object is has multiple connection nodes to other objects), the user can click on the graph node to have the proximate connecting nodes disconnected by changing the minimum number of pixels the minimum contrast. Surgical robots will use real time updated anatomic model information to navigate deep inside the body. Difficult to reach breast tumors will be treated with no burnt lungs. The segmented models will be precise, accurate, and suitable for Hollywood computer animation, deep brain surgery, and high school student science fair projects. The technical leverage of understanding surfaces, objects, and being able to manipulate them adroitly are manifold. Any engineering or scientific application that typically uses isosurfaces for analysis will benefit from DMT graph analysis.

3.1.6 Technical leverage into a broad spectrum of spillover benefits

The technical leverage of understanding images, surfaces, objects, and being able to manipulate them adroitly are manifold. We will be able to effectively transmit large pixel images as nested large to small contour objects. Any engineering or scientific application that typically uses isosurfaces for analysis will benefit from DMT graph analysis.

3.1.7 Technical Rational and Advancement of the State of the Art (TABLE)

Figure of Merit	Projected Technical Targets	Current State of the Art	Technical Barriers	Innovative Approach
Resolution (Distance)	No Resolution Limits	1/3 mm pixel size	Scanner device pixel size, typically, imaging devices produce too many pixels to use all of information effectively	Vector from pixels
Effort (Time)	1,2 seconds, possibly interactive speeds (1/30th second)	Hours, days, weeks	Patience of operator, excessive resolution of image data. Objects to be extracted require specifying every pixel, or every perimeter pixel.	DMT Graph specified objects are hierarchal, so groups of objects can be manipulated instead of individual pixels. Single mouse clicks segment complex objects
Cost of Professional Effort	200.00 to 500.00 / man hour	10.00 / man hour	Low productivity of current algorithms and software	
Accuracy (Standard Deviation Distance)	< 1 pixel	> 4 pixels	Segmentor technician hand work; Movement of patient during surgery, time interval from imaging to treatment cause measurements drift	Rapid modeling minimizes changes due to time delay from imaging to treatment. Real time intraoperative modeling possible
Patient Results (Percent Improvement)	95 %	45%	Precise determination of pathology location	Accurate and precise modeling preserving imaging calibration

3.2 Research and Development Plan

3.2.1 R&D Plan overview

The development strategy is a simultaneous attack on the math and implementation problem; algorithm design, and software engineering problem. The principle division of tasks is between the user interfaces (client side Java development) and the DMT image recoding, graph generation, union and intersection matching, Level of Detail (LOD) management, bandwidth management, and warping tasks (server side math and remote graphics). The PI will program the DMT decomposition and graphing code. A core algorithm research and programming team will be assembled from the faculty and PhD student pool. Dr. Wolberg will program manual and automatic image registration. CUNY faculty will do algorithm development and analysis. NYUMC RT and SLU Neurosurgery faculty will be our alpha clients. PhD students with Java and C++ experience will program the client side browser plug-ins. The math research milestones are the development of the server image graphing, matching, registration, and LOD management. CASI will launch its alpha test network based client-server image-processing services directly to the public, to imaging facilities and physicians (and their patients) even before all of the server services are functional or complete. By having the client technology base working, even at mock-up prototype functionality, CASI will transition research milestones rapidly, effectively, and explosively diffusing the technology into clients' lap (tops).

3.2.2 Technical Barriers Overcome by CASI that will yield Economic Benefits (TABLE)

Technical Barrier	New Technology	Economic Benefit
Extensive, expensive human segmentation by pixels, hand drawn contours, hand drawn pixel dams, segmentation snakes, and other current ineffective technology: Imprecise and Inaccurate	DMT critical point manipulation precisely segments objects.	Creation of new market low cost computer modeling Cheap patient specific graphics and animations,
Smoothing operations on hand segmented objects: Warps object geometry	Maximal smooth 'cut' segmentation surfaces	Reduced dependence on student and technician for retouching and smoothing
Dimensional Fidelity of segmented, smoothed objects: Inability to preserve of instrument calibrations from image to model		Increased market in patient specific imaging and modeling,
Robotic Surgical Planning: no technology to calculate in patient specific model anatomy; no way to model constraint space (no-go regions); no way to calculate optimal trajectories	Braided Digital Morse Theory for paths between features	Better surgical results, Less insurance costs, Lower hospitalization costs, Less hospital time, Less disability payout, Increased worker productivity

Radiation Treatment Planning; inability to get precise and accurate simulator models; no technology to calculate optimal beam trajectories subject to constrain spaces (no-go regions):		NO surgery required, Better treatment results, Less insurance costs, Reduced hospitalization costs, Less disability payout
Treatment Results Evaluation: repeated hand modeling of tumor or target organ during therapy too expensive, imprecise, and labor intensive	Reliable tracking of tissue morphological changes from radiation or surgery over time	Quantitative measure of treatment effect (Tumor volume shrinkage, qualitative morphology improvement, etc)

3.3 Statement of project tasks and anticipated accomplishments

3.3.1 First year project milestones

For the first project year, we will focus on algorithm development and implementation to efficiently produce and manipulate the images and models by their DMT graph node. Concurrently, the client side interface team will design, mock up, and write browser-based interfaces for our intended medical imaging shops and clients. This will demonstrate of DMT principle of producing map of objects that do not require contrast enhancement to be parsed out of their proximate objects. We will boot up our network services server on the Internet.

3.3.1.1 MILESTONE 1: Server live on Internet

We will launch our project with the purchase and configuration of the CASI project web site server.

TASK: install the project management software, and establish protocols for collaborative programming with the team members.

3.3.1.2 MILESTONE 2: Public client mock-up facility life on Internet

Publish concept mock up our system into which we will insert the real functionality as that milestone is achieved.

TASK: Design various user interfaces for radiological, RT, Neurosurgical, patient and public use classes.

3.3.1.3 MILESTONE 3: Surface tiled models from DMT graphs

Generate a tiled surface model in RGB Color image data from a user selected threshold value and a DMT graph node.

TASK: Program SpiderWeb algorithm and DMT graph decomposition

3.3.1.4 MILESTONE 4: Generate DMT graph from image stacks

Generate DMT Gray scale graph from MRI and CT from the VHP. Generate DMT graph of the color (RGB) VHP pixel data. We will use the female 'Eve' data set, and do the thorax and abdomen.

TASK:

3.3.2 Second year project milestones

The second year of the project will focus on the DMT segmentation operator and registration, then delivering them into network clients.

3.3.2.1 MILESTONE 5: Gray scale and RGB Image graph matching (registration precursor)

We will build the union graph of the RGB and one or more of the CT and MRI image stacks for manageable subset of the VHP data.

TASK:

3.3.2.2 MILESTONE 6: Segmentation functionality demonstration

Using the public VHP data, we will demonstration on the website DMT graph selection of component objects. Users will select DMT objects from the RGB, CT, or MRI data sets. DMT segmentation operator demonstration, by clicking on the DMT graph node, the user will move saddle connections up or down to connect or disconnect objects.

TASK: Write saddle criticality navigator (finds segmentation plane if possible), else edit saddle values to edit DMT graph edges.

3.3.2.3 MILESTONE 7: The Patient, RT Physician and Steriotactic Neurosurgery Client demonstration goes live

TASK

3.3.3 Third year project milestones

CASI focuses on the problem of object registration and delivery of reduced density images and models.

3.3.3.1 MILESTONE 8: Registration of models by DMT graph demonstration

We will demonstrate the union and warping of DMT graphs from selected subsets of each data set resulting in a fused model.

TASK:

3.3.3.2 MILESTONE 9: Level of Detail management 10-x reduction in tile density

We will demonstrate a minimum of 10-x reduction in tile density, with a maximum reduction of tile density of an object into a tetrahedron (4 triangular tiles).

TASK:

3.3.3.3 MILESTONE 10: Segmentation click stream learning captures segmentor insight

We will demonstrate a 10x reduction in the number of clicks to segment major components by learning patterns that will enable us to intuit objects to segment.

TASK:

3.3.4 MILESTONE PROGRESS (TABLE)

N	Major Project Tasks	Project Time Y1	Y2	Y3	Cost in $K	Major Milestone
1	Server hardware installation and software configuration task				412.5	Server live on Internet
2	Public client mock up facility design task				111	Public client mock-up facility life on Internet
3	Program SpiderWeb surface tile generator task				111	Surface tiled models from DMT graphs
4	Recognize, sort Crits, connect; graph display code task				202	Generate DMT graph from image stacks
5	Write node figure of merit, sorting, matching code for Union and Intersection operator				210	Gray scale and RGB Image graph matching (registration precursor)
6	Write saddle Crit navigator and editor				210	Segmentation functionality demonstration
7	Write DICOM, upload, download compression, encryption, radiological, referring physician client				210.5	Web based upload and download of raw images and tiled models
8	Node warping code				211	Registration of CT and MRI to VHP Base Anatomy
9	Level of Detail Management				211	Level of Detail management 10-x reduction in tile density
10	Install clicks stream technology on clients; collect data from alpha users				221.5	Intuiting segmentation from users

3.4 How will our project handle technical and managerial problems we will encounter

3.4.1 Computational load problems in larger scale image stacks

There may be complexity issues as the images scale, the number of image dimensions increases (independent or dependant image channels). Scaling up to a production system may overload the server, or increases in image resolution in future CT and MRI systems may similarly overload the server. Interactivity may suffer. The NP completeness of these algorithms has not yet been analyzed. Software optimization as well as new capital to buy a larger server may required as we process more and larger alpha client datasets.

3.4.2 Computational intermediate solution memory "bloom"

Registration of large images with disjoint area may cause problems. If the two images have the same borders, then the root of the graphs will be the same and graph matching can start at the same depth levels on each graph. If the two images are disjoint, i.e., there is only a small common area between the two images, and then the graph-matching algorithm will exhaustively search for matches in the regions where no such match is possible. This unproductive searching may cause problems with excessive temporary memory requirements. Images that have no common features may produce spurious matches, perhaps matching textures and small features only, while assigning most features to the intersection list

3.4.3 Automatic registration problems: managing matching incomplete graphs

An incomplete graph is a graph of a portion of the object that we wish to register. It is important we start with a complete view of the structure we wish to register, but the algorithm should be able to find the best matching node tree segment by exhaustive searching.

The worst-case situation is that automatic graph matching cannot be made to work fully automatically to our satisfaction. In that situation, and until we can design a fully automatic graph matching algorithm, we will ask users provide a starting point on graph pairs to the matching process.

3.4.4 Segmentation of difficult images

A difficult image is an image that contains features that distort isosurfaces on a large scale, and or fine grain noise that causes a very large number of small noise objects. We can eliminate small-scale features by truncating our graph below an object size, typically on the scale of two or four pixel lengths. Large-scale distortions include bright MRI antenna fields, a 'tilted' image background, where the image is distinctly lighter on one side, and darker on another side. Other problems we have encountered are bright 'hot' spots produced by MRI pickup antennas placed directly on the patient to improve image resolution in the immediate vicinity. This causes an intense detailed and bright hot region whose brightness decays away from the antenna. For those images, we have to model and brightness compensate the antenna field.

We are prepared to do additional traditional image processing, even hand editing, as part of our technical assistance to the user, until we can design and implement automatic methods to minimize this kluge step. This experience is a necessary and unpredictable part of dealing with real images that we expect from our clients.

3.4.5 Management issues

Access to necessary research facilities by proximity; We will have access to offices of the City University of New York (CUNY) Graduate Center (GC) on 34th street and 5th Ave, a short distance from CASI on 33rd street and 2nd Avenue. Team programmers will have the option to work directly on the machine for very fast image rendering, and manipulation, or work from PC clients on site or remotely. Clinical collaborators are all well Internet connected, and mainly at New York University Medical Center (NYUMC) on 34th Street and at St. Louis University (SLU). As we move from computer modeling to clinical modeling, we expect to be working extensively on site at the Radiation Oncology facilities directly across the street from CASI. The PI has many years standing as former faculty at NYUMC and collaborations there are easy to negotiate as required.

3.4.6 Fostering a team approach and team member communications

3.4.6.1 Project Management Policies

We will establish a simple task delegation and completion policy, as well as regular weekly face-to-face meetings at CASI and at the CUNY Grad Center. A good interpersonal working environment is vital to any network based collaboration with deadlines, milestones, validation tests, release dates, and other organizational stresses. We will also sponsor bi-monthly retreat activities to relieve stress and to foster a unity of purpose. We will hold quarterly progress reviews, and in the second year, start a monthly business development meeting to focus on marketing our emerging technology and recruiting alpha test customers.

3.4.6.2 Project Management Software

Our company will use an open source development model. Open Source developers use SourceForge for network access to source code version management systems (code check-in, check out), mailing lists, bug tracking, message boards / forums, and task assignment, ownership, completion, and management. We will install the SourceForge project management software as private instance of the popular open source collaboration SourceForge.net web site. The principles behind SourceForge are use to hosts more than 12,000 open source projects.

We will support a DMT project at the CUNY Graduate Center on 34th St. and 5th, directly cross-town on is NYUMC. The CUNY Institute for Software Design and Development (CISDD) is a University Consortium that will act as the conduit for this project. The computer team is a short walk from the clinical facilities, which is crucial for fostering communication with our ultimate clients and customers.

3.4.6.3 Team members (TABLE)

Name		
Core Members	Affiliation	Role, Expertise and Task Areas

Professor D. B. Karron, PhD	CASI PI, CCNY	PI, DMT Inventor, C++, Computational Geometry, Computer Graphics, Algorithm Development, Will write DMT recoding core on server, market technology to prospective alpha customers and industries
Professor G Wolberg, PhD	CASI, CCNY	Lead Programmer. C++ programmer, algorithm development, digital image warping expert
Professor J L. Cox, PhD	CCNY	DMT developer, Theoretical computer scientist, analysis of algorithms.
Consulting Members		
Professor M. Anshel, PhD	CCNY	Encryption, Braid Theory, computational geometry, development of Braided DMT for Trajectory Planning and Analysis
Professor G. Herman, PhD	CCNY	Theory of surfaces, image segmentation, digital topology
Professor F. Bookstein, PhD	University of Michigan	Morphometrics, medical imaging and applied math
Mr. E. Gurfein, MBA	Meridian Resource and Development, Ltd.	VC fundraising for biotech, medical device, and chemistry startups; engineering venture capital, financial management and technical marketing
Clinical Participants		
Chair S. Formenti, MD PhD	NYUMC Radiation Oncology	Breast cancer warrior using radiation therapy beams.
Professor J. K. Dewyngaert, PhD	NYUMC Radiation Oncology	Radiation physicist; Specialist in prostate \cancer research using radiation and brachiotherapy
Professor and Col (Ret) R. A. Satava, MD	Yale University Medical Center Department of Surgery	Endoscopic and Virtual Reality in Medicine pioneer
Professor L. Liebis, PhD	NYU MC	Instrumentation specialist. Statistical epidemiology,
Chair R. Bucholz MD,	St. Louis University Medical Center, Department of Neurosurgery	Endoscopic surgeon and medical technology entrepreneur Neurosurgeon and steriotactic neurosurgery system inventor
S. V. Grasso, MD,	Stevens Institute of Technology and TIMA	Technology for Medical Integration (TIMA), robotic surgery expert and promoter
Post Doc/ Visiting Scientist		
J. Patrichare, PhD (expected 2002)	Graduating from Mayo Clinic Medical Imaging PhD Program	C++ image programming registration and warping, 3D modeling,
PhD graduate students	CUNY Graduate Center	Java programmer, System administrator, Web site designer and user interface tester
To be named; 3 total		

3.5 Potential for Broad-Based Economic Benefits

The nation will benefit by improved health care that will prolong the quality of life. Reduced employee sick leave will decrease disability related payouts and reduce costs to insurers. The efficient use of medical information will produce better yield on capital in imaging technology. Better patient and physician communication, treatment results, and patient satisfaction will result in less litigation and insurance costs. CASI will create new markets for model-based information as the core competency is established that will go beyond our initial Radiation Treatment project. As the medical imaging industry matures into the medical modeling industry, CASI will seek new markets for services, only dreamed of at present.

High technology medicine is widely viewed as beneficial the public, mainly because of the probability that any one of us may unexpectedly become the beneficiary of a new life saving therapies; However the costs of such technology to insurers, taxpayers, and the underinsured can be staggering. Expensive new hardware and drug offerings bombard the medical market. In a life-threatening situation, these high costs are relegated to a lower priority. When the bills have to be paid, and policymakers review galloping high technology medicine costs, they must consider the value to our society of "big iron" capital-intensive purchases such as multimillion-dollar diagnostic imaging facilities and therapeutic equipment. The value added to our nations' economy is that CASI will be a filter and conduit to increase the worth of this investment, by increasing the ability of medical diagnostic imaging to accomplish its promise: Save lives and keep us healthy.

3.5.1 National Economic Benefits

America is underutilizing the product of its diagnostic imaging capital base. The medical imaging industry is not making the best use of the mega pixels of patient data these systems generate. From an

information theoretic perspective, we estimate that 99% of that information is not contributing to the making of therapeutic decisions. We are not disseminating this information to all concerned parties rapidly and effectively. This is partly because we do not understand, use, or effectively model the important features in these images. This is because of limitations in the state of the art for understanding modeling key features, and applying this information in rapid and effective ways for broad base of radiologists, physicians, surgeons, and therapists. Further, we need to make it understandable to the ultimate customer, the patient, and / or the patients' family. New picture archiving and network distribution systems are helping to manage the raw data, the Next Generation Internet can make more of the raw data move faster, but the nation needs better technology to understand these images, make consistent precise patient specific determinations, and maximize the effective use for this data as essential insight. CASI will decrease the entropy and increase the pragmatic value of medical pixels by winnowing them down to geometric models, trajectory vectors, and critical points.

Customers include any radiologist, radiology practice, imaging facility, medical center, and associated diagnostic or therapeutic practitioner. The patient needs to be kept in the loop as the ultimate paying customer, and consumer of the therapeutic decisions based on this information. The customers that will benefit the most are any interpretative method of CT, MRI, PET, SPECT, etc. that currently is hand contouring stacks of images prefatory to designing a patient treatment, are evaluating the ongoing results of treatment. Similarly, anyone attempting to spot critical surgical targets, such as in steriotactic brain surgery, by sighting by the center of blobby objects in hundreds of slices will be a customer. Radiation Therapy (RT) practitioners were most eager to find better methods to eliminate this time consuming drudgery in their practice.

Competitors are scattered across various application area, using mainly volume rendering technology instead of shell surface technology. Most imaging companies are focused on one technology, almost to the exclusion of other application areas. Typically, these firms arise from image consulting firms working with one large customer with a specific application in petrology, histology, computer graphics, and so on. There are general-purpose visualization systems sponsored by government research labs (NCAR), and commercialization of large university programs (ANALYZE from Rich Robb's group at the Mayo Clinic), 3DVIEWNIX (From Jay Udupa's group at U. Penn). Commercial packages include Voxel View, AVS (Advanced Visualization System), Resolution3D, Khoros, IBM Data Explorer (DX), Iris Explorer, VTK tool kit (From Kitware) are but a few of the more popular general packages. Some have exceptional interactivity based on their optimization to special graphics accelerator hardware, now common with the explosion of the computer game industry). Many have intricate and comprehensive facilities for hand segmentation, contouring, snake segmentation, thresholding, flood filling, edge detection, marching cubes, and so on. None have anything that approaches the power and insight that Digital Morse Theory based segmentation can do to simplify many segmentation tasks. We will never manage to penetrate such a broad spread of markets, but we expect that we will license our technology and that will become an important source of revenue and diffusion of our technology and theory into the industry and broader national economy in ways we can barely foresee

End users are generally serviced by consultant using any of the above visualization packages. We will focus initially on the niche markets of Radiation Therapy and Neurosurgery as vehicles to develop our core technology. However, most of direct users will be software developers integrating our technology in their software packages for use by their individual specialty markets.

It is our plan to license our technology to other industries that can apply our technology are industrial non-destructive testing (industrial CT), meteorology, metrology, histopathology imaging, entertainment industry animation, medical illustration, commercial computer graphics for advertising, virtual reality, air traffic control, multimedia, medical education and training, simulation, topography, mapping, surveying, (not topology) fluid mechanics and dynamics modeling and visualization, hyperspectral scanner imaging, Earth Imaging Systems (for interpreting satellite imagery)

The benefits to the public are longer life, better quality of life, through improved medical care, at reduced cost through more effective delivery and utilization if medical imagery.

3.5.1.1 Business opportunities addressed and economic importance to proposer and the nation

Our business opportunity is the expense and time required to produce imprecise and inaccurate segmentations from which 3D models are generated for many disparate applications. There is no underlying paradigm for understanding how segmentation works. Most of the thinking current segmentation theory is *ad-hoc*, problem, and image specific, not repeatable, and requires an expert user. Discussions with robotic surgery designers and manufactures point out the problem designing robotic trajectories are bottlenecked with the patient specific modeling. Our core technology is being hailed as a breakthrough, if we can develop working systems from our concept demonstration. Alpha site customers and business interest is building as word of our possible technology circulates in our target markets. NYUMC Radiation and Oncology and St. Louis University have agreed to participate in our development effort as alpha test sites.

The economic important to CASI of this technology is based getting meaningful assistance in surgery from computer imaging. This requires 3D modeling on a rapid patient specific basis with precision, accuracy, and dimensional fidelity. This technology gap prompted the PI's research in this area and prompted our request for funding to develop this technology.

The economic importance to the nation is improving the utility and distribution of medical imaging information, and will improve the value of this expensive technology with our inexpensive, but Internet pervasive technology. Further, this is not a comparatively expensive technology in its application because we will use centralized computer servers, connected eventually, but not necessarily by Next Generation Internet or Internet II. Our value added is our intellectual property that will lead to improve health and longer life of American citizens.

3.5.1.2 Discussion of potential users of this technology

Patient specific anatomic modeling from medical imaging and true three-dimensional modeling is required by many medical specialties. The specialization of the physician based research groups and the lack of a common language and communication leads fractionation of effort. The results of style of research effort tends to degenerate the state of the art into a large collection of tricks, techniques, conflicting algorithms, and overloaded toolboxes. Most of these techniques lack an underlying mathematical rubric, uniform precision, and validation. Computer graphics has not provided the 'sound' solutions that it appears to illustrate. This is due to the lack of computational geometry and advanced math sophistication in the graphics industry. We see a wide range of medical, engineering, technical, and scientific users for our uniform approach and new technology.

CASI's DMT based technology has a number of potential users and applications. Our initial target markets are breast Radiation Therapy and neurosurgical steriotactic surgery. Once our technology has been show to be advantageous, it is expected that other specialties will utilize it. We will cultivate bellwether client collaborations in each surgical specialty, and market through their training programs with their residents and fellows, post doctoral students and visiting scientists. Expected application areas include: Cosmetic plastic surgery (modeling skin profile changes to sell cases to patients), Craniofacial surgery (model bone cuts, skin reconstruction due to trauma, birth defects, and cancer), Obstetrics (pelvis measurements are key parts of the decision to perform a caesarian), Oral surgery (tooth implants), Orthodontics (bone growth and effect of braces, selling cases to parents), Histopathology (cancer detection, cell type recognition, and cell counting), Biological shape analysis for surgical application.

3.5.1.2.1 Market estimates

At the end of this proposal, this technology will be successful for RT and Neurosurgery. At that time, for a cost of one hundred dollars the attending physician will a model of a patient's tumor, and be able to plan and demonstrate that plan for surgery or radiation.

In the RT focus area of our project, we measure the total market from cancer epidemiology. Unfortunately, we can expect an increased cancer rate in the future caused by environmental pollution. The survival rate due to better treatment technology will also increase. This increases the CASI market by an estimated 20%. CASI technology will be a part of that survival improvement.

Breast Cancer, the target of our RT collaboration at NYUMC saw ~176,300 new cases and 43,700 deaths in 1999. Prostate cancer had ~136 new cases per 100, 000 men. Surgical treatment brachiotherapy (treatment by implanting highly radioactive seed in the cancer) and RT are all require modeling and

targeting technology that is CASI's core technology.

Expected growth of markets opportunity by increased cases and increased survival of 20 % is assumed as CASI technology is embraced by medicine. Assuming a 20% market capture share, that means that in breast RT we can expect by the time of product roll out in 4 years to 42,000 cases / year. We can estimate a similar participation in prostate cancer therapy at 50,000 cases / year.

3.5.1.2.2 Markets change and new markets from new technology.

Our initial focus area is breast RT and Brain surgery. As we penetrate in these markets CASI will license its technology into other market areas; because we will need to focus the R & D effort on the generalized problem, and a few limited specific problem areas at a time. CASI will effectively franchise its technology into market application areas for maximal rapid diffusion. We estimate that we will be doing well over 10x our base RT revenue by franchising. CASI will promote bellwether researchers to adopt our technology for their specific application area by doing custom web interfaces to their spec, as CASI are developing our generalized application area.

3.5.2 Need for ATP funding

ATP funding is required to enable CASI to complete our ongoing research and make the technological leap to market of low cost, network based anatomic computer 'foundry' modeling. We will build on the progress we started making as a subcontractor on the NIH Visible Human Project (VHP) female 'Eve' dataset. The primary mission of the VHP program is to supply anatomic content for medical school education. CASI's broader therapeutic vision requires ATP development funding because the NIH mission in this area at this time is limited.

Segmentation and Registration issues impede progress in many disparate medical and scientific fields. No one industry or medical superspeciality has the patience to fund this development effort in the general case. Few programs share the vision of this technology for its broad applicability to medicine, technology, and science.

The visualization and modeling technology is not being effectively developed in the United States. The medical imaging industry is dominated by foreign owned and controlled companies such as Sony, Picker, Hitachi, Siemens, and General Electric. We believe that the market for pixel intensive hardware-accelerated graphics is wedged in the Internet last mile bottleneck. Wide diffusion for image-based information will require new thinking, not just more bandwidth. CASI will move from a "pixel based high entropy high bandwidth" representation to a "DMT based object geometry "representation with low entropy and high information theoretic pragmatic value.

3.5.2.1 Summary of efforts to get external and private funding

The CASI vision is to provide patient specific precise and accurate Level of Detail (LOD) models for diagnostic and therapeutic applications. CASI's raw input is medical images uploaded over the Internet. The time for development of this technology is too long for Venture Capitalist window of opportunity. We do not intend to become a medical computer graphics-imaging house, medical informatics consulting firm, or a surgical robotics firm. Our goal is to focus on solving the problems that are hindering the start of the art in radiation therapy, surgical robotics, 3D modeling, animation, and many other application areas. CASI's solution will become our core competency. The PI intends to aggressively grow the company into this wide-open opportunity field. CASI's broad therapeutic vision frightens private venture capitalists, and their funding. CASI is currently funded by angel investors and the PI. CASI will leap into the modeling business with ATP funding, and be able to focus on the long-term benefits of this technology.

CASI believes that it become profitable within 5 years, which is longer than the private equity market will tolerate. As we demonstrate our core technology by the third year, we expect that we will be able to rise significant private funding, but not before.

3.5.2.2 Description of how the technology will be broadly diffused

Broad diffusion of our technology will occur because of the strong need in a broad variety of medical and general scientific modeling applications. This strong gradient will pull our technology out of our lab and into commercial franchise or licensure-based adoption. Because the application runs as an ASP, anyone who can upload an image file will be able to run their image for a demonstration of the modeling facility, and see how the CASI system will solve their problems. The short time constant of internet based

technology diffuses out into the global community, and the strong needs gradient, means we can expect explosive growth in demand as we start public demonstrations and reporting our results in the literature and major scientific and medical meetings. CASI is preparing for this onslaught and will carefully not oversell its solutions and permit it to grow in managed and healthy manor for maximal benefit to the nation and for the company.

3.5.2.3 Business experience of PI and Staff

CASI was founded in 1995, while the PI was research professor of surgery at NYUMC. The PI has managed approximately one million dollars in DARPA funding, as well as such administrative tasks as running a payroll, subcontracting, DoD audits, Federal and State audits, bank audits, invoicing, collections, financing, and accounts payables with and without an administrative staff. CASI has kept meticulous records and attained a high professional standard under difficult business conditions. The PI has demonstrated fiscal responsibility managing significant federal funds responsibly. The PI has extensive technical management experience. Mr. E. Gurfein will be joining our team as our business manager, bringing his experience in scientific startup funding, finance, management, and marketing.

Chapter V

REVIEW OF FRINGE BENEFITS

I. Introduction

Fringe benefits are allowances and services provided by the organization to its employees as compensation in addition to regular wages and salaries. Fringe benefits are appropriate charges to the extent such benefits are:

A. In accordance with established policy of the organization.

B. Required by employer/employee agreement.

C. Treated consistently.

D. Required by law.

II. Types of Fringe Benefits

A. Vacation*
B. Holiday*
C. Sick leave*
D. Bereavement leave*
E. Military leave
F. Sabbatical leave
G. Salary continuance
H. Health insurance
I. Life insurance
J. Pension plan
K. Employee welfare and recreation
L. Severance pay
M. Jury Duty
N. Tuition remission
O. Remission of hospital charges
P. Social Security taxes (FICA)*
Q. Unemployment Compensation Insurance*
R. Workman's Compensation Insurance*
S. State Disability Insurance
T. Federal Unemployment Insurance*

*See Section III below for more detailed descriptions.

III. General Description of Selected Fringe Benefits

A. Vacation is time-off provided to the employee. The normal allotted time is 2 weeks annually, but up to 20 days may be considered reasonable and appropriate. (See Note at the end of this section.)

B. Holidays are those days granted by the employer through established policy on which the employees are exempt from work. Normally, the number of holidays may vary from 6 to 10 days per year. The following are examples of the most common holidays:

New Year's Day
Memorial Day
Independence Day
Labor Day
Thanksgiving Day
Christmas Day

GENERAL TERMS AND CONDITIONS
ADVANCED TECHNOLOGY PROGRAM (ATP)

August 2001

This document applies to all Recipients of the ATP Cooperative Agreements. ATP Recipient is defined to include all single company Recipients and each individual company that is identified in the Special Award Conditions as a Joint Venture participant.

1. ORDER OF PRECEDENCE OF TERMS AND CONDITIONS OF AWARD

Where the terms of the award and proposal differ, the terms of the award shall prevail. The Recipient is obligated to bring to the attention of the Grants Specialist any perceived difference between any terms and conditions and the proposal.

2. REFERENCED REQUIREMENTS

The ATP Statute, 15 U.S.C. Sec. 278n; the ATP Rule, 15 CFR Part 295; the ATP Notice of Availability of Funds, 66 Fed. Reg. 96 (January 2001); and the ATP Proposal Preparation Kit (November 2000) are hereby incorporated into the award by reference.

3. AUTHORITY TO MODIFY

The Grants Officer is the ONLY authorized agent at NIST with the authority to bind the Federal Government, and to take actions to amend, suspend, and terminate the cooperative agreement.

4. REQUIREMENTS FOR CONTINUING FINANCIAL ASSISTANCE

a. With respect to any technology arising from assistance provided by NIST under this award, the Recipient shall promote the manufacture of products resulting from that technology within the United States and shall procure parts and materials from competitive United States suppliers to the extent practical.

b. At any time within the life of this award should the Recipient cease to have a majority control or ownership by individuals who are citizens of the United States, the ***Recipient shall notify the NIST Grants Officer of that fact, in writing, within FIFTEEN (15) days.***

c. In accordance with 15 U.S.C. 278n Sec. (d) (9) and (e), NIST may, within thirty (30) days after notice to Congress, suspend a company from continued assistance under this award if NIST determines that the company or a parent company has failed to satisfy any of the criteria contained in paragraphs a. and b. of this term, and that it is in the national interest of the United States to do so.

5. NIST PROJECT MANAGEMENT TEAM

The NIST Project Management Team (PMT) includes an ATP Project Manager, a NIST Grants Specialist, and one or more ATP technical and business specialists. The ATP Project Manager is responsible for working with the Recipient, including making recommendations to the NIST Grants Officer throughout the life of the project to ensure that the project progresses towards the objectives stated in the proposal in an optimal way. The ATP Project Manager (and other members of the PMT as appropriate) shall participate in a project start or kickoff meeting, annual reviews, and a close-out meeting prior to the expiration of the award. The ATP Project Manager is responsible for the following:

a. General oversight and project management functions associated with this cooperative agreement.

b. Arranging kickoff meetings, annual review meetings, and final closeout meetings.

c. Monitoring the project to ensure that it is executed in accordance with the proposal and this award; this includes analyzing the quarterly, annual, and final reports, and consulting with other members of the PMT to assess progress.

d. Recommending appropriate action to the NIST Grants Officer if the project is failing to meet its objectives.

6. SUBSTANTIAL INVOLVEMENT

NIST has selected a cooperative agreement as the funding instrument for this project. Accordingly, the NIST Project Management Team will be substantially involved in the following areas:

a. Approval of go/no go decision points at various project stages before subsequent stages of a project may continue, if specified in the Special Award Conditions;

b. Concurrence with sole source procurements in excess of $100,000;

c. Approval of key personnel specified in the proposal (including such positions as Financial Officer, Administrator, Principal Investigator, and/or Project Manager); and

d. Approval of changes in Joint Venture membership.

7. TECHNICAL/BUSINESS/FINANCIAL REPORTS AND PLANS

The Recipient shall provide access to information that is required to assess the project's progress throughout the project life cycle. In addition to monitoring the technical work, NIST requires business information pertaining to the project during the life of the project and for six years after its end to assess progress towards commercialization, the degree of adoption of the technology, and the impact of the project on the economy.

a. Technical Reporting:

The Recipient shall submit technical performance reports in triplicate (one original and two copies). Two copies shall be submitted to the ATP Project Manager and the original report to the Grants Officer in the same frequency as the Financial Status Report (SF-269). Technical performance reports shall contain information as prescribed in 15 CFR 14.51. (See Attachment A for an optional structure or format for the technical report.)

b. Business Reporting:

The Recipient shall submit business reports in accordance with the "Guidelines for Reporting on Business Progress and Economic Impacts" (see Attachment B).

c. Financial Reporting:

(1) Actual or Incurred Costs

By signing this award the Recipient agrees to ensure that only actual costs incurred will be charged to the award and that all costs will be reasonable, allocable, and allowable in accordance with the applicable Federal Cost Principles. See 15 CFR 14.27. The Recipient shall also ensure that all salaries/wages (technical and administrative), fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed and to be incurred under this award are consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers (exclusive of any profits or fees) of the Recipient (including its Joint Venture Partners when applicable).

(2) Cost Share

The Joint Venture (JV) Administrator is responsible for conducting a review of the financial status reports for each JV participant to ensure that the financial information is consistent with each participant's approved budget and consistent with Chapter 5, Examination Procedures, item 4. of the NIST Program-Specific Audit Guidelines for Advanced Technology Program Cooperative Agreements with Joint Ventures, dated September 1999. Any discrepancies must be resolved by the JV Administrator prior to submitting financial reports or requesting payments from NIST. The JV Administrator must ensure that the overall award cost-share requirements are met throughout the award. In addition, each JV member is responsible for meeting its cost share in accordance with its approved budget throughout the award.

(3) Submission of Financial Reports

For ATP Recipients, Article A.01 of the DoC Financial Assistance Standard Terms and Conditions dated October 1998 is revised as follows:

(a) The Recipient shall submit a "Financial Status Report" (SF-269) on a calendar quarter basis for the periods ending March 31, June 30, September 30, and December 31, or any portion thereof, unless otherwise specified in a special award condition. Reports are due no later than 30 days following the end of each reporting period. A final SF-269 shall be submitted within 90 days after the expiration date of the award.

(b) The Recipient shall submit a "Federal Cash Transactions Report" (SF-272) for each award where funds are advanced to Recipients. The SF-272 is due 15 working days following the end of each calendar quarter for awards under $1 million dollars; or 15 working days following the end of each month for awards over $1 million dollars; or unless otherwise specified in a special award condition.

(c) All financial reports shall be submitted in triplicate (one original and two copies) to the NIST Grants Office.

8. KICK-OFF MEETINGS, ANNUAL REVIEWS, CLOSEOUT MEETINGS, AND SPECIAL STUDIES

The Recipient and each Joint Venture participant, if applicable, shall participate in kick-off, annual review, and closeout meetings. The ATP Project manager will provide the Recipient with meeting instructions in advance of these meetings.

Consistent with the requirements of the Government Performance and Results Act of 1993, Recipients may be asked from time to time to participate in special economic studies or case studies. All requests for participation in such studies will be in accordance with the Paperwork Reduction Act (PRA) requirements as implemented by 5 CFR 1320, and will display a PRA approval number.

9. PRIOR APPROVAL REQUIREMENTS

The prior approval requirements in 15 CFR 14.25, paragraph (e) MAY NOT be waived automatically by the Recipient and require written approval from the Grants Officer.

In addition to the requirements specified in 15 CFR 14.25, Recipients shall obtain prior written approval from the NIST Grants Officer for the following changes:

a. The transfer of funds among direct cost categories must be approved in advance by the Grants Officer if the transfer exceeds 10% of the approved total annual budget for each single Recipient or Joint Venture participant for each approved project year. Recipients are not authorized to create new budget categories without prior approval. The Recipients are not authorized at any time to transfer amounts budgeted for direct costs to the indirect cost line item

b. Revisions to Ownership and/or Dissolution of Recipient (Recipient includes the single company or any Joint Venture participant)must be approved in advance by the Grants Officer. These changes include but are not limited to the following:

   (1) In the event that a company is acquired by, or merges with, any other company, including a foreign company, the Recipient shall include in the written notification to the NIST Grants Officer the following information: date of final acquisition or merger; name and address of any new foreign parent and amount of ownership; whether the Recipient intends to complete its assigned tasks with the same commitment and at the same location; and how this change in ownership will affect the project's projected benefits to the United States. The NIST Grants Officer reserves the right to ask for clarification and/or additional information.

   (2) When the company is no longer majority-owned by U.S. citizens, the Recipient should provide details of the change in ownership and a discussion of whether the change affects the Recipient's assigned tasks in any way.

   (3) When only two for profit companies are participating in a Joint Venture and one of them ceases participation, the Recipient shall provide details regarding the circumstances of the departure, and plans for replacing the departing company with another for-profit organization.

c. Any substitution, addition, or withdrawal of participants to a joint venture must be approved in advance by the Grants Officer. In the event there is a proposed change to the Joint Venture, all newly-proposed Joint Venture participants shall submit the following documents through the Joint Venture Administrator to the Grants Officer for review and approval: CD-511, SF-424B, NIST-1263, CD-346, SF-LLL. New participants must also satisfy the requirements of Article A.05.c of the Department of Commerce (DoC) Financial Assistance Standard Terms and Conditions. The Joint Venture Administrator must provide to the NIST Grants Officer a revised Joint Venture Agreement and documentation of the Recipient's notification to the Department of Justice and the Federal Trade Commission of the changes, additions and/or deletion of participants.

10. UNALLOWABLE PROJECT COSTS

Those costs that are designated as being unallowable in Chapter 1, Sections C.4 and C.5 of the November 2000 ATP Proposal Preparation Kit will be unallowable under this award.

11. PROGRAM INCOME

a. Program income earned during the project period shall be retained by the recipient and shall be used to finance any non-Federal share of the project.

b. Recipients shall have no obligation to the Federal Government regarding program income earned after the end of the project period.

c. Costs incidental to the generation of program income may be deducted from gross income to determine program income, provided these costs have not been charged to the award

d. Proceeds from the sale of property shall be handled in accordance with the requirements of Property Standards in 15 CFR 14.30 through 14.37.

e. Recipients shall have no obligation to the Federal Government with respect to program income earned from license fees and royalties for copyrighted material, patents, patent applications, trademarks, and inventions produced under an award.

12. EQUIPMENT

Upon expiration of the project period, the Recipient shall submit to the NIST Grants Officer an inventory of equipment acquired with Federal funds, as prescribed in 15 CFR 14.34, along with an "Equipment Disposition Certification." The

certification provides the Recipient an opportunity to request authorization to continue to utilize the equipment for the purposes of the commercialization initiative. If approved by the NIST Grants Officer, the Recipient shall report to NIST every two years the condition of the equipment as long as the current market value is more than $5,000.

For Joint Venture awards, title to any equipment purchased under the award, including intangible property that meets the definition of equipment in 15 CFR 14.2(n), that may be in the name of a departing participant, and that is vital to the project, **shall be transferred to another Joint Venture participant as instructed by the Joint Venture Administrator for continued use on the project.** The Joint Venture shall make compensation to the departing participant for its contribution to the purchase of the equipment by applying its percentage of the cost of the equipment to the current fair market value of the equipment. Should the equipment no longer be needed on the project, the departing participant shall request disposition instructions in accordance with 15 CFR 14.34.

13. NON-COMPLIANCE WITH STATUTORY PURPOSE

If NIST determines that the statutory purposes of research and development under 15 USC 278n can no longer be served (e.g., the project is no longer high-risk), the Recipient shall be deemed in material non-compliance with award requirements. As a result, NIST may terminate the award pursuant to 15 CFR 14.61.

14. REFUNDS

The Recipient shall promptly submit all refund checks (including interest earned on advances) to the DoC accounting office identified below and notify the Grants Office upon submission. Each check must identify on its face the NIST award number, and no more than a two-word description to identify the reason for the refund. Submit to:

National Institute of Standards and Technology
Accounts Receivable
100 Bureau Drive, Stop 3751
Bldg. 101, Room A820
Gaithersburg, MD 20899-3751

15. AUDITS

Project audits (of Federal and non-Federal funds) are required for all ATP Recipients except when those Recipients are required to comply with the Single Audit Act of 1996 and the audit requirements of Office of Management and Budget (OMB) Circular A-133, "Audits of States, Local Governments and Non-Profit Organizations." Subcontractors/subawardees, including universities, who receive total funding under an ATP project totaling more than **$300,000** each are also subject to the audit requirement. A subcontractor/subawardee is defined as an organization which receives a portion of the financial assistance from the recipient/awardee and assists the ATP recipient/awardee in meeting the project goals, but does not include the procurement of goods and services.

a. ALL ATP Recipients, including each Joint Venture participant (if a Joint Venture project), are required to provide sufficient funds as direct costs (unless included as indirect) in the project's multi-year budget to have project audits performed according to the Schedule shown in b. below.

b. All Recipients shall schedule audits as follows:

   (1) For awards less than 24 months, an audit is required within 90 days from the project expiration date.

   (2) For 2-, 3-, or 4-year awards, an audit is required within 90 days after the end of the first year and within 90 days from the project expiration date.

   (3) For 5-year awards, an audit is required within 90 days after the end of the first year and third year, and within 90 days from the project expiration date.

c. Audits of all Recipients shall be conducted in accordance with *Government Auditing Standards (GAS)*, issued by the Comptroller General of the United States (the Yellow Book). If an ATP Recipient is required to have an audit performed in accordance with OMB Circular A-133, "Audits of States, Local Government, and Non-Profit Organizations", the annual OMB Circular A-133 audit is deemed to meet the ATP audit requirement. If an ATP Recipient does not have an annual OMB Circular A-133 audit performed, the Recipient should follow the following project audit requirements:

   (1) Audits for single company Recipients shall be conducted using the *NIST Program-Specific Audit Guidelines for Advanced Technology Program (ATP) Cooperative Agreements with Single Companies.*

   (2) Audits for joint venture Recipients shall be conducted using the *NIST Program-Specific Audit Guidelines for Advanced Technology Program (ATP) Cooperative Agreements with Joint Ventures.*

The program specific guidelines may be useful in identifying the allowability of specific cost elements and other programmatic compliance requirements for those recipients required to have an OMB Circular A-133 audit.

d. The Recipient shall submit **two (2) copies** of each audit report, one to the address shown in Article D.01.c. of the DoC Financial Assistance Standard Terms and Conditions dated October 1998, and one copy to the

NIST Grants Officer.

16. CLOSEOUT OF COOPERATIVE AGREEMENT

a. In accordance with the guidelines established in 15 CFR 14.71 and the DoC Financial Assistance Standard Terms and Conditions dated October 1998, article number A.06, the Grants Officer will allow only those costs associated with compiling the final reports (technical, business, financial, patent/invention, equipment inventory, and closeout audit), during the ninety (90) day closeout period.

b. The final technical progress (closeout) meeting with the ATP is not considered a closeout-related activity. Therefore, the closeout (end-of-project) meeting with NIST officials must be conducted **prior to the expiration date of the award.** The Recipient must provide adequate funds in the project budget to ensure participation by all appropriate members in the closeout meeting.

17. USE OF NAME OR ENDORSEMENTS

a. The Recipient and/or its subrecipients or subcontractors shall not, without the prior approval of NIST, use the name of NIST or the Department of Commerce on any product or service which is directly or indirectly related to either this award or any patent license or assignment agreement which relates to this award.

b. By entering into this award, NIST does not directly or indirectly endorse any product or service provided or to be provided by the Recipient, its successors, assignees, or licensees. The Recipient and its subrecipients and subcontractors, shall not in any way imply that this award is an endorsement of any such product or service.

18. PUBLICATION GUIDELINES

In any publications, the Recipient shall acknowledge support of the technology development by NIST. Normally this is done by a footnote reading, "This work was performed under the support of the U.S. Department of Commerce, National Institute of Standards and Technology, Advanced Technology Program, Cooperative Agreement Number 70NANBXHXXXX," or words to that effect.

19. PROTECTION OF HUMAN SUBJECTS

Research involving human subjects is not permitted under this award unless expressly authorized by a Special Award Condition or otherwise in writing by the NIST Grants Officer.

The Federal Policy for the Protection of Human Subjects (The Common Rule), codified by the Department of Commerce at 15 CFR Part 27, requires Recipients to maintain appropriate policies and procedures for the protection of human subjects in research. The Common Rule defines a "human subject" as a living individual about whom an investigator conducting research obtains 1) data through intervention or interaction with the individual, or 2) identifiable private information. The term "research" means a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge. The Common Rule also sets forth the categories of research that may be considered exempt from this policy.

In the event it becomes evident that a human subject may be involved in this project, the Recipient shall submit appropriate documentation to the ATP Project Manager for NIST institutional review and approval. This documentation may include the following:

(1) Documentation establishing review and approval of the project by a qualified Institutional Review Board (IRB). [NOTE: Recipients must provide documentation of continuing IRB approval by the cognizant IRB at appropriate intervals as designated by the IRB, but not less than annually];

(2) Documentation to support an exemption for the project from The Common Rule [NOTE: This option is not available for activities that fall under 45 CFR Part 46 Subpart B or C];

(3) Documentation to support a request for a deferral of review for research involving human subjects beginning after year 1 of the project [NOTE: This option is not available for activities that involve the use of human subjects as defined under 45 CFR 46 subpart B, which must be approved before an award can be made]

(4) Documentation of IRB approval of any modification to an IRB-approved existing protocol or informed consent form must be submitted to the ATP Project Manager for NIST Institutional review and approval.

No work involving human subjects may be undertaken, conducted, or costs incurred and/or charged to the project, until the NIST Grants Officer approves the required appropriate documentation in writing.

20. CARE AND USE OF LIVE VERTEBRATE ANIMALS

Research involving live vertebrate animals is not permitted under this award unless expressly authorized by a Special Award Condition or otherwise in writing by the NIST Grants Officer.

The Department of Commerce requires Recipients of financial assistance awards to comply, as applicable, with the Animal Welfare Act as amended, and implementing regulations found at 7 USC 2131-2157, 9 CFR parts 1, 2, and 3.

In the event it becomes evident that live vertebrate animals may be involved in this project, the Recipient shall submit appropriate documentation to the ATP Project Manager for NIST institutional review and approval. This documentation may include the following:

(1) Documentation of the Recipient's United States Department of Agriculture (USDA) Animal Welfare Act certification, or Animal Welfare assurance from the Office of Laboratory Animal Welfare (OLAW) of the Public Health Service/National Institutes of Health (PHS/NIH), or if only using rodents, birds or fish, and the above USDA or OLAW documents have not been attained, evidence of full accreditation from the Association for the Assessment and Accreditation of Laboratory Animal Care (AAALAC);

(2) A copy of the Institutional Animal Care and Use Committee (IACUC)-approved Animal Study Protocol (ASP) that includes all signature(s) as required by the organizational IACUC. The Recipient shall provide documentation, in the ASP or a separate certification approved by the IACUC, that the Principal Investigator and other personnel involved in the care and use of the animals are trained and experienced in the procedures to be used in the Protocol in accordance with the National Research Council " Guide for the Care and Use of Laboratory Animals" (NRC Guide);

(3) A copy of the IACUC approval letter for the approved ASP. [NOTE: Documentation of continuing IACUC review by the cognizant IACUC must be submitted to the ATP Project Manager as it occurs];

(4) Documentation of IACUC approval of any modification to an IACUC-approved existing protocol must be submitted to the ATP Project Manager for NIST Institutional review and approval.

No work involving live vertebrate animals may be undertaken, conducted, and/or costs incurred and/or charged to the project, until the NIST Grants Officer approves the required appropriate documentation in writing.

21. BUREAU OF EXPORT ADMINISTRATION (BXA) CLEARANCE

a. The Recipient agrees to adhere to the U.S. Export Administration laws and regulations and shall not export or re-export, directly or indirectly, any technical data created with Government funding under this award to any country for which the United States Government or any agency thereof, at the time of such export or re-export, requires an export license or other Governmental approval without first obtaining such licenses or approval and the written clearance of the NIST Grants Officer.

b. The Bureau of Export Administration (BXA) shall conduct an annual review for any relevant information about the Recipient's compliance with U.S. export laws. NIST reserves the right to take appropriate action in accordance with 15 CFR 14.62 and Article L.01 of the Department of Commerce Financial Assistance Standard Terms and Conditions, if the BXA reports significant adverse information about the Recipient to the NIST Grants Officer.

22. NORTH AMERICAN FREE TRADE AGREEMENT PATENT NOTIFICATION PROCEDURES

Pursuant to Executive Order 12889, the DoC is required to notify the owner of any valid patent covering technology whenever the DoC or its financial assistance Recipient, without making a patent search, knows (or has demonstrable reasonable grounds to know) that technology covered by a valid United States patent has been or will be used without a license from the owner. To ensure proper notification, if the Recipient uses or has used patented technology under this award without a license or permission from the owner, the Recipient must notify the DoC Patent Counsel at the following address, with a copy to the NIST Grants Officer:

Department of Commerce
Office of Chief Counsel for Technology
Patent Counsel
14th Street and Constitution Avenue, NW
Room H-4610
Washington, DC 20230

The notification shall include the following information:

a. The award number
b. The name of the DoC awarding agency
c. A copy of the patent
d. A description of how the patented technology was used
e. The name of the Recipient contact, including an address and telephone number

23. LIABILITY

a. Property

The U.S. Government shall not be responsible for damage to or resulting from any property provided to the Recipient,

and/or its subrecipients and/or subcontractors, and/or acquired by the Recipient, and/or its subrecipients and/or subcontractors, pursuant to this award.

b. No Warranty

NIST makes no express or implied warranty as to any matter whatsoever, including the conditions of the research or any invention or product, whether tangible or intangible, made, or developed under this award, or the ownership, merchantability, or fitness for a particular purpose of the research or any invention or product made or developed under this award.

c. Disclaimer

(1) The United States expressly disclaims any and all responsibility to the Recipients or third persons for the actions of the Recipient or third persons resulting in death, bodily injury, property damage, or any other losses resulting in any way from the performance of this award or any subaward or subcontract under this award.

(2) The acceptance of this award by the Recipient does not in any way constitute an agency relationship between the United States and the Recipient.

d. Indemnification

(1) The Recipient, and/or its subrecipients and/or subcontractors, agree to indemnify and hold harmless the U.S. Government for all liabilities, demands, damages, expenses and losses arising out of the use by the Recipient, its subrecipients, subcontractors, and/or any party acting on their behalf or under their authorization, of products made by the use of technical developments arising under this agreement. This provision shall survive termination of this award.

(2) The Recipient, and/or its subrecipients and/or subcontractors, agree to indemnify and hold harmless the U.S. Government for any loss, claim, damage, or liability of any kind involving the Recipient's, subrecipient's, and/or subcontractor's employees arising in connection with this award.

e. Force Majeure

Neither party shall be liable for any unforeseeable event beyond its reasonable control not caused by the fault or negligence of such party, which causes such party to be unable to perform its obligations under this award (and which it has been unable to overcome by the exercise of due diligence), including, but not limited to: flood, drought, earthquake, storm, fire, pestilence, lightning and other natural catastrophes, epidemic, war, riot, civil disturbance or disobedience, strikes, labor dispute, or failure, threat of failure, or sabotage of the Recipient or subcontractor facilities, or any order or injunction made by a court or public agency. In the event of the occurrence of such a *force majeure* event, the party unable to perform shall promptly notify the other party. It shall further use its best efforts to resume performance as quickly as possible and shall suspend performance only for such period of time as is necessary as a result of the *force majeure* event.

24. INFORMAL COLLABORATORS

All informal collaborators in ATP awards are subject to ATP intellectual property regulations as specified in 15 CFR 295.8. Informal collaborator means any individual or organization which consults, cooperates with, or participates in the performance of this award, and is not included in the approved award budget.

25. INTELLECTUAL PROPERTY

a. Rights in Data

(1) The Government shall have certain rights to use data first produced in the performance of the award, whether or not the data is copyrighted. The Recipient may establish claim to copyright subsisting in any data first produced in the performance of the award. When claim is made to copyright, the Recipient shall affix the applicable copyright notice of 17 U.S.C. Sec. 401 or 402 and acknowledgment of Government sponsorship to the data when and if the data are delivered to the Government, are published, or are deposited for registration as a published work in the U.S. Copyright Office. The Recipient shall grant to the Government, and others acting on its behalf, a paid up, nonexclusive, irrevocable, worldwide license for all such data to reproduce, prepare derivative works, perform and display publicly, and for data other than computer software to distribute to the public by or on behalf of the Government.

(2) The licenses granted to the Government under this Term shall not be considered as a waiver of the nondisclosure requirements of 15 U.S.C. Section 278n(d)6: "Intellectual property owned or developed by any business receiving funding may not be disclosed by any officer or employee of the Federal Government except in accordance with a written agreement between the owner or developer and the Program."

b. Patent Rights

(1) Definitions

(a) "Company" means a for-profit organization, including sole proprietors, partnerships, or corporations.

(b) "Invention" means any invention or discovery which is or may be patentable or otherwise protectable under Title 35 of the United States Code.

(c) "Made" means, when used in relation to any Invention, the conception or first actual reduction to practice of such invention.

(d) "Practical Application" means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and in each case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or government regulations, available to the public on reasonable terms.

(e) "Subject Invention" means any invention of the Recipient conceived or first actually reduced to practice in the performance of work under this award.

(2) Ownership of Inventions

Pursuant to the statute that establishes the ATP (15 U.S.C. 278n(d)(11)), this paragraph takes precedence over 15 CFR 14.36 and DoC Financial Assistance Standard Terms and Conditions, dated October 1998, article C.02. The Recipient or, if appropriate, its subrecipients, contractor(s) and/or subcontractor(s), shall have the entire right, title, and interest throughout the world to each Subject Invention according to the provisions of this clause, provided that this party is a company or companies organized in the United States. Joint ventures shall provide to NIST a copy of their written agreement which defines the disposition of ownership rights among the members of the joint venture, and their contractor and/or subcontractors, as appropriate, in accordance with the second sentence of this paragraph. **However, the United States hereby reserves a nonexclusive, nontransferable, irrevocable paid-up license to have practiced for, or on behalf of, the United States, any such invention.** Title to any such invention shall not be transferred or passed, except to a company organized in the United States, until the expiration of the first patent obtained in connection with such invention.

(3) Invention Disclosure, United States License and Filing of Patent Application by Recipient

(a) The Recipient shall disclose each subject invention to NIST within **two months after the inventor discloses it** in writing to Recipient personnel responsible for patent matters. The disclosure to NIST shall be in the form of a written report and shall identify the award under which the invention was made and the inventor(s). It shall, at a minimum, contain the following information:

- the title of the invention;
- the names of all inventors;
- the name and address of the assignee (if any);
- an acknowledgement that the United States has rights in the subject invention (i.e., the Governmental Use License);
- the filing date of the present invention;
- an abstract of the disclosure;
- a description or summary of the present invention;
- the background of the present invention or the prior art;
- a description of the preferred embodiments
- what matter is claimed

One original and two copies of all patent reports shall be submitted to:

NIST
Grants and Agreements Management Division
100 Bureau Drive, MAIL STOP 3580
Building 411, Room A143
Marked FOR: Agreement Number _____
Gaithersburg, MD 20899-3580

Each report shall also include the use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to NIST, the Recipient will promptly notify NIST of acceptance of any manuscript describing the invention for publication or of any sale or public use planned by the Recipient.

(b) The Recipient shall notify NIST **within two years** of disclosure to NIST whether or not the Recipient intends to file a patent application on any subject invention.

If a patent is issued, the Recipient(s) must submit the following to the Grants Office:

- The award number under which the invention was made;
- The serial number of the patent issued;
- The date of issuance;
- A copy of the disclosure as issued (including the drawings) and;

- The name(s), address, and telephone number(s) of an assignee.

In a JV award, the administrator must submit the patent information to NIST for all participants. In order to prevent disclosure of information to the general public under the Freedom of Information Act (FOIA) or any other statute, each page of each patent report should be marked, "CONFIDENTIAL/PROPRIETARY."

(c) Requests for extension of the time for disclosure, election, and filing under paragraphs 24.b.(3)(a) and (b) of this Term may be permitted at the discretion of NIST.

(4) Recipient Action to Protect the Government's Interest

(a) The Recipient agrees to execute or to have executed and promptly deliver to NIST all instruments necessary to establish or confirm the rights the United States Government has throughout the world in those subject inventions to which the Recipient has filed a patent application in which the United States has reserved a non-exclusive license.

(b) The Recipient shall require, by written agreement, its employees, other than clerical and nontechnical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the Recipient, each subject invention made under the award in order that the Recipient can comply with the disclosure provisions of paragraph b.3. of this Term, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions. This disclosure format should require, as a minimum, the information required by b.3.(a) of this Term. The Recipient shall instruct such employees through employee agreements or other suitable education programs on the importance of reporting inventions in sufficient time to permit the filing of patent applications prior to United States or foreign statutory bars.

(c) The Recipient shall promptly notify NIST of any decisions not to continue the prosecution of a patent application, the payment of maintenance fees, or the defense in a reexamination or opposition proceeding on a patent in any country.

(d) The Recipient agrees to include, within the specification of any United States patent application and any patent issuing thereon covering a subject invention, the following statements:

This invention was made with United States Government support under (identify the cooperative agreement number) awarded by the National Institute of Standards and Technology (NIST).

The United States Government has certain rights in the invention.

(5) Subawards and Subcontracts

The Recipient shall include in all subawards and subcontracts, **regardless of tier**, for experimental, developmental, or research work, a patent rights clause, as appropriately modified, comparable to this term. However, pursuant to the statute establishing the ATP (15 U.S.C. 278n(d)(11)), if the subrecipient or subcontractor is not a company organized in the United States, the patent rights clause shall provide that title to each subject invention made by the subrecipient or subcontractor shall vest with a company or companies incorporated in the United States.

(6) Reporting on Utilization of Subject Inventions

The Recipient agrees to submit on request, no more frequently than annually, periodic reports on the utilization of a subject invention or on efforts at obtaining such utilization that are being made by the Recipient or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the Recipient, and such other data and information as NIST may reasonably specify. The Recipient also agrees to provide additional reports as may be requested by NIST in connection with any march-in proceeding undertaken by NIST in accordance with paragraph b.8. of this Term. Such information shall be treated by NIST as commercial and financial information and thus as privileged and confidential and not subject to disclosure under section 552 of Title 5 of the United States Code.

(7) Preference for United States Industry

Notwithstanding any other provision of this Term, the Recipient agrees that neither it nor any assignee will grant to any person the exclusive right to use or sell any subject inventions in the United States unless such person agrees that any products embodying the inventions will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by NIST upon a showing by the Recipient or its assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that, under the circumstances, domestic manufacture is not commercially feasible.

(8) March-in Rights

The Recipient agrees that, with respect to any subject invention in which it has acquired title, NIST has the right, in accordance with procedures in 37 CFR 401.6 and any supplemental regulations of NIST, to require the Recipient, an assignee, or an exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances. If the Recipient, assignee, or exclusive licensee refuses such a request, NIST has the right to grant such a license itself if NIST determines that:

(a) Such action is necessary because the Recipient or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(b) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the Recipient, assignee, or licensees;

(c) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the Recipient, assignee, or licensees; or

(d) Such action is necessary because the agreement required by paragraph b.7. of this Term has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of the agreement required by paragraph b.7 of this Term.

NIST ADVANCED TECHNOLOGY PROGRAM

OPTIONAL GUIDELINES FOR QUARTERLY R&D PERFORMANCE REPORTS

OVERVIEW

The Advanced Technology Program (ATP) General Terms and Conditions incorporated into the Cooperative Agreement between your organization(s) and the ATP calls for quarterly R&D performance reports that are the main source of information provided to the ATP. The content of these reports, as requested by ATP, is consistent with 15 CFR §14.51♦. A suggested structure is outlined below and is designed to not be overly burdensome to your organization. This specific structure or format is optional, but the content is required. If your organization has its own format for such reports and all the requested information is provided, ATP will accept your format.

ATP relies on these quarterly R&D performance reports to monitor technical developments in projects. In addition, these reports are used in preparing quick-response derivative reports to Congress and Executive Agencies of the Government that oversee ATP. ATP policy prohibits release of proprietary information contained in these reports and limits internal distribution to those directly involved in management and administration of the specific cooperative agreement. ATP will clear information abstracted from the reports by ATP through your organization in advance of release. The report format outlined here provides for a systematic and logical structuring of key progress elements, and promotes tracking of developments. **For each performance year, a core report is initially established, and subsequent reports simply update this core.** Besides keeping the ATP Project Manager up to date on progress, these reports will provide a history of the project over its life.

CONTENT

The quarterly R&D performance report should:

a) Identify project objectives, the initial "baseline" for tracking project developments, and milestones through the end of the current performance year;

b) Provide evidence that projects are attaining technical milestones necessary to meet the objectives of the original proposal;

♦ 15 CFR Part 14 can be found directly at http://www.doc.gov/oebam/cfr14.htm

c) Identify and explain changes in the composition, direction, or key personnel associated with the project;

d) Identify problems or special opportunities that are critical to the progress of the research, and areas which may benefit from consultation with specialists at NIST.

Two copies of each quarterly R&D performance report shall be submitted to the ATP Project Manager, and the original report to the Grants Officer. If there are technical graphics that do not copy well, please include originals in the copies of the report. Please refer to Special Award Conditions for mailing addresses.

In the following sections, each element of the quarterly R&D performance report is discussed. If you wish to submit a more extensive report of technical progress for a given quarter, you may append it to the formal report. If there is no additional progress to report under a given heading, a statement to that effect should be included for the performance period. Please date all additions and **mark each page of the report "Proprietary."**

PROJECT OBJECTIVES

The first section of the first quarterly R&D performance report should state the overall technical goal of the project and list specific objectives. These should be drawn from the proposal with amplification as required to provide **quantitative** bases for success, or additional detail. The objectives should remain unchanged throughout the project unless results dictate a shift or major technical problems require re-planning a portion of the work. Changes should be addressed in the section entitled "**Summary of Project Changes.**" If the project objectives are unchanged, they may be put in an appendix to the report.

PROJECT BASELINE

In order to contrast the state of the art before and after completion of each ATP project, establish a baseline to describe the status of key elements of the technology at the project outset. Define the baseline in the context of specific targets that are expected to constitute success, and are consistent with project objectives. These may include initial per-unit-costs, physical performance characteristics, or specific technical capabilities. If quantitative measures are not applicable, provide qualitative statements describing the state of the art at the time of project initiation. Identify any changes since the proposal was prepared. The ATP Project Manager will assist you in identifying appropriate baseline characterization as part of the project kickoff. Once established, the project baseline may be moved to an appendix to the report.

TECHNICAL MILESTONES

The quarterly reports should present appropriate milestones through the current performance year and relate the contribution of current year milestones to the overall project milestones. Current year milestones are generally presented and/or modified during the kickoff meeting, and subsequently

extended as part of each annual review. The level of detail will depend on the nature of each project, and the concurrence of the principal investigator and the ATP Project Manager. A time line chart of the current year and the overall project milestones may be included in this section with clear identification of major decision points. Once established, this list of milestones with appropriate due dates should not be changed unless technical results or new opportunities dictate. Such changes should be addressed in the section entitled "**Summary of Project Changes.**"

TECHNICAL PROGRESS AND IMPACT

This is the heart of the quarterly R&D performance report, and will occupy the majority of the text. This section includes a discussion of technical progress for the specific performance quarter against the current performance year milestones identified in the preceding section. Sufficient discussion should be provided to allow an accurate assessment of progress, and identification of both successes and technical difficulties against the milestones. Discussion of progress (and technical setbacks) should include implications for the overall objectives of the project. At the end of this section please identify the most significant technical advance to date in the project, and include a short discussion of its significance. Please list any patent applications as well as major equipment purchases.

SUMMARY OF PROJECT CHANGES

In this section, succinctly summarize substantive changes in project planning, personnel, or execution that have occurred over the reporting quarter. These should be derived from the main elements of the report as this section is intended only as a summary. If approval of a change is being requested please note that specifically. All substantive changes to the technical scope of work or budget changes must be discussed in advance with the ATP Project Manager, who must recommend an amendment to the award by the NIST Grants Officer. The criteria for obtaining 'Prior Approval' are specified in **15 CFR Part 14 and the ATP General Terms and Conditions in the award document.** Major changes can be discussed with the ATP Project Manager at ANY time; you do not have to wait to request them in a quarterly report.

PROBLEMS AND OPPORTUNITIES

This section should provide a synopsis of technical problems that must be resolved as well as developing technical and business opportunities. Please also make us aware of areas that may benefit from consultation with specialists at NIST. This information may be integrated into the above sections.

BUSINESS ISSUES

This section is for any business development, commercialization, or market issues that have arisen since your last Business Report.

UPCOMING MEETINGS

If you wish to set up a meeting at NIST, or to request the attendance of either or both of the ATP Technical or Business Project Managers at any meeting, you may use this section to make the request and to provide an overview of the meeting. It is often helpful to present a proposed project coordination meeting schedule for the year in this section, to note when subcontractors' progress will be reviewed, when input from commercialization units may occur, etc. The meeting calendar may include formal or informal meetings of the project principals or formal technical meetings where work, which is related to the project, is addressed. It should include a planned general time frame and expected location for the annual project review, which is to be scheduled during the last quarter of the project year (not the calendar year).

FINAL TECHNICAL REPORT FOR THE TOTAL PROJECT PERIOD

Provides an executive summary that could be read and understood by someone not skilled in the particular technology. The final technical report is proprietary, just like past technical quarterly reports and the original proposal.

> The summary should provide an ***overview of the technology*** that was developed and the problems that were solved and unsolved in its development.
>
> The summary should ***identify the key performance parameters*** and describe how end-of-project performance compared with beginning-of-project performance.
>
> The summary should also discuss the ***significance of the project accomplishments*** in terms of potential economic or commercial impact.
>
> Important ***remaining technical and non-technical barriers*** to commercialization should be identified.

A separate non-proprietary project overview of R&D accomplishments and potential benefits that may be used in a project closeout ATP press release should be clearly identified as part of the final technical report. The final ATP press or other publication use will be reviewed with the company prior to release.

GUIDELINES FOR REPORTING ON BUSINESS PROGRESS AND ECONOMIC IMPACTS

The following reports should be prepared by the persons with primary responsibility for developing and executing business strategies leading to commercialization of the technologies resulting from the ATP-funded project. A questionnaire format is used to facilitate efficient reporting and analysis. Because members of a joint venture have different business goals and different roles in commercialization and diffusion of the ATP-funded technology, each member of a joint venture, as well as each single applicant, has a business reporting responsibility and must file a separate report.

The Economic Assessment Office, ATP, will provide materials customized for the individual reporting organizations in time for preparation of the reports on a timely basis.

Baseline Report

When Due: Thirty days after the end of the first calendar quarter of ATP funding. If you begin your project during a calendar quarter, the Baseline Report is due thirty days after the end of that quarter.

Contents: In this report we ask you to identify potential areas of application of the technology (e.g., consumer electronics, avionics, medical devices), key attributes of the technology needed to achieve these goals (e.g., quantitative cost, size, performance characteristics) and planned strategies for commercialization (e.g., in-house production, licensing, strategic alliances, etc.); to identify strategies for protecting intellectual property; and to identify plans for dissemination of non-proprietary information.

Format: Electronic questionnaire submitted over ATP's secured website.

Quarterly Short-Form Reports

When Due: Thirty days after the end of the second, third, and fourth quarters annually. No Short-Form Report is due for the Baseline or Anniversary quarters.

Contents: In this brief report we ask you to review the organization address/telephone/contact information currently recorded in the ATP database and to report significant business developments related to the ATP project for the quarter.

Format: Hard copy, fax, or e-mail

ATTACHMENT B (continued)
August 2001

GUIDELINES FOR REPORTING ON BUSINESS PROGRESS AND ECONOMIC IMPACTS

Anniversary Report

When Due: One year after the Baseline Report and subsequently on an annual basis over the duration of the ATP project.

Contents: In this report, we ask you to update information provided in the Baseline or prior Anniversary Reports. The Anniversary Report expands upon the Baseline Report to cover progress towards implementing commercialization strategies (e.g., an agreement with company X--an end user--for testing laboratory prototypes); early economic impacts of the ATP project; collaboration experiences; attraction of new funding; new intellectual property created; dissemination of information through conferences, publications, and other mechanisms; and a summary of company financial data.

Format: Electronic questionnaire submitted over ATP's secured website.

Close-out Report

When Due: Ninety days after end of ATP project performance period.

Contents: In this part we ask you to review and update information presented in prior anniversary reports in light of your technical accomplishments. In addition, we ask you to identify anticipated remaining technical and business barriers to commercialization of the technology, to define your specific business goals related to the ATP funded technology for the five-year period following the end of ATP funding, and to consider future effects of the ATP project outside your organization.

Format: Electronic questionnaire submitted over ATP's secured website.

Post-Project Reports

When Due: Report three times--once every two years following the end of ATP funding.

Contents: In this report we ask you to report your actual progress in commercializing the technology, and the related impacts inside and outside your organization.

Format: Not yet determined (telephone survey OR electronic questionnaire submitted over ATP's secured website).

FINANCIAL STATUS REPORT

Re: Lee Gurfein

Dear Ms. Hope Snowden:

This letter authorizes Mr. Lee Gurfein as administrative contact on Cooperative Agreement No 70NANB1H3050 with Computer Aided Surgery, Inc.

This authorization is valid for the period of one year from the start of the Agreement on October 1, 2001 through Sept 30. This authorization can be revoked in writing to you and him by myself at any time this authorization is in effect. Until specifically authorized to do so, Mr. Gurfein is not an officer of the corporation, and is not authorized to sign for the corporation. The authorization for Mr. Gurfein to commit the corporation will be made by separate letter authorization if the need arises.

Sincerely,

Computer Aided Surgery, Inc.

Re: NIST ATP Grant Award Provisions

---

ear Jill, Amiee and Lee;

Here is the grant award.

Please note condition 8 and 9.

We have to nail down the personnel by 60 days, and
Jill, you need to certify the accounting system to ATP.

If you see any other special conditions in this award we need to observe, please reply back to me via e-mail, cc'ed to all.

I will scan the standard terms and conditions and distribute that later tonight. It is a thick bock of terms and conditions.

If any of you see any reason for me not to FEDEX back this contract, let me know ASAP. Otherwise, it goes out FEDEX standard tonight for Tuesday delivery.

CONTRACT BETWEEN
ELISHA (LEE) GURFEIN
AND
COMPUTER AIDED SURGERY, INC.

TELEPHONE NUMBER FOR LEE GURFEIN
800-668-0189

EMPLOYMENT AGREEMENT

THIS AGREEMENT has been entered into as of October 1, 2001, by and between **COMPUTER AIDED SURGERY, INC.** (the "Company"), a New York corporation, of 300 East 33rd Street, Suite 4N, New York, NY 10016 and **ELISHA GURFEIN** (the "Executive"), of 156 Sherwood Place, Englewood, New Jersey 07631.

RECITALS

A. The Company will develop, through new mathematical theories, a novel computer application server that will transform encrypted data from imaging instrumentations into three-dimensional applications, for use in the medical field, as well as other non-medical areas.

B. The Company has been awarded a federal Advanced Technology Program Award 70NANBIH3050 (the "Award"), effective October 1, 2001 through September 30, 2004. A copy of the Award is appended hereto as Exhibit A.

C. The Company desires to employ Executive as its Chief Operating Officer upon the following terms and conditions;

NOW, THEREFORE, in consideration of the mutual covenants and obligations contained herein, the parties agree as follows:

1. Service. The Company hires and retains Executive as its Chief Operating Officer and the Executive agrees to act in this capacity upon the terms and conditions set forth in this Agreement.

2. Term. This Agreement's term will begin on October 1, 2001 and will remain in full force and effect for one year, unless terminated by the parties in accordance with this Agreement.

3. Automatic Renewal Upon Condition. Upon the expiration of the term of this Agreement and on the condition that the Company received continued funding pursuant to the Award, or other awards, or other financing that allows for payment of this Agreement for the designated year, this Agreement shall be deemed automatically renewed for an additional one-year term, unless either party gives forty-five (45) days prior written notice to the other party, in advance of the regular termination date, of the party's decision to terminate this Agreement. This Agreement may be renewed for two one-year terms.

4. Duties. During this Agreement's term, the Executive will perform the duties and services of the Chief Operating Officer, including the following:

a) Meetings. Meet with Board of Directors at least quarterly to review progress of Company. Will prepare agenda for such meetings and propose topics for consideration. Will meet with individual directors and/or committees on a more frequent basis as necessary.

b) Fundraise. Raise funds and capital from public sector and private sector; coordinate meetings between potential investors and Company personnel; arrange and coordinate technical demonstrations, obtain booths at meetings and conferences; arrange hotel and travel plans for Company personnel.

c) Contract Administration. Obtain permission and approval from the federal government for future contracts and subcontracts; prepare Annual Reports, Quarterly Reports, and other writings on behalf of the Company.

d) Accounting System Certification. Submit to the federal government an accounting system certification issued by an independent certified public accountant within ninety days of October 1, 2001.

e) Financial Matters. Project and monitor fiscal budgets, analyze cash flow, monitor banking transactions, track time sheets and task/completion milestones, and supervise bookkeeper(s) in generating checks and making payroll payments.

f) Public relations. Promote public relations within the industry and the university communities.

g) Strategic Planning and Market Research. Write and update business plan and marketing plan.

h) Purchases and Leases. Make purchases for equipment, write purchase orders, bid out large purchases per federal acquisition rules; negotiate with vendors for Government Service Administration pricing, where appropriate; investigate state purchase contract discounts; maintain books and records for bid audits; authorize vendors, pay vendors, track deliveries; monitor accounts payable; manage discounts for prompt payment.

i) Personnel. Executive may retain, with the consent of the Company, the services of essential personnel to satisfy the responsibilities contained in paragraphs 4 (a) through (h) above. Consent herein will not be unreasonably withheld. Disputes herein will be determined by arbitration, unless resolved between the parties.

5. Other Services and Activities. Executive will devote 75% of his time to the Company's business.

6. Salary. Executive will be paid an annual salary of $100,000.00, payable in monthly installments; however, the salary is expressly conditioned upon the continued and uninterrupted payment to Company of the Award, referenced above. If payment of the Award, or other awards, or other financing that allows for the payment of this Agreement, ceases for any reason, then payment of the Executive's salary will also cease and Company will have no further obligation under this Agreement.

7. Incentive Compensation. In order to encourage Executive to pursue corporate development, Executive will receive incentive compensation in the form of shares of the corporation. At the beginning of the one-year term of this Agreement, Executive will be entitled to an amount of shares equal to three percent (3%) of the outstanding shares of the Company based upon the total issuance of one hundred thousand (100,000) shares, or 3,000 shares. In the middle of the second term of this Agreement, or after 18 months, Executive will be entitled an amount equal to three percent (3%) of the outstanding shares of the corporation based upon the total issuance of one hundred thousand shares.

8. Stock Redemption. For a period of three years, Executive will grant a right of first refusal to Company on the private sale of any stock owned by Executive. If Executive leaves the Company prior to or at the end of a term, the Company may, at its option, buy back Executive's shares at a dollar amount to be determined between the parties or by a certified public accountant or other professional. The parties agree to use their best efforts to select a certified public accountant or other professional who will be acceptable to each other. If the parties are unable to agree upon the certified public accountant or professional within a reasonable period of time, a claim under this clause shall be settled by arbitration pursuant to this Agreement. Executive agrees that at the time of the stock redemption, the shares of stock of the Company will be free and clear of all liens, pledges, encumbrances or claims.

9. Fringe Benefits. The Executive will be entitled to participate in all benefit plans or programs of the Company currently in existence or to be established including medical, dental, life insurance, retirement, pension, vacation, sick leave and holidays.

10. Expenses. The Company will reimburse Executive, upon presentment of bills, for all reasonable business expenses incurred by Executive, based upon the Company's guidelines in effect for management personnel.

11. Illness or Disability of Executive. If executive is unable to perform services for the Company for a period of more than thirty (30) continuous days, or forty-five (45) aggregate days within the course of a term, Company may terminate this Agreement upon not less than five (5) days'

written notice to Executive. In the event of such termination, all of the Company's obligations hereunder will terminate immediately. This provision will operate and take effect only in the second or third term of this Agreement and it will not be in effect during the first term of this Agreement.

12. Death of Executive. This Agreement will terminate immediately upon the death of Executive. If Executive dies during the term of this Agreement, Company will pay to Executive's estate the compensation that would otherwise be payable to Executive through the end of the month. This provision will operate and take effect only in the second or third term of this Agreement and it will not be in effect during the first term of this Agreement.

13. Termination for Cause. Company may terminate this Agreement and all of its obligations hereunder upon a determination of an occurrence, as defined below, of any one of the following events: (a) Executive's material breach of this Agreement; (b) Executive's negligent or willful misperformance of his duties; (c) Executive's conviction of a felony or any other crime involving moral turpitude or dishonesty which, in the good faith opinion of the Company, would impair Executive's ability to perform his duties or the Company's business reputation; (d) Executive's failure or refusal to comply with Company's policies, standards and regulations; and (e) Executive's unauthorized disclosure of Company's trade secrets and other confidential business information. A determination of an occurrence, as stated above, will be determined by a panel of three arbitrators no more than thirty (30) days after written notice to the breaching party. A panel will be comprised of one partisan arbitrator selected by each party and a third neutral arbitrator to be selected jointly by the two arbitrators. If the two arbitrators fail to agree upon a third arbitrator, then the American Arbitration Association will select a third neutral arbitrator. Discovery between the parties may take place prior to the case being presented to the panel. A written decision will issue upon presentment of the case, which decision will be binding upon the parties. The fees and expenses of the neutral arbitrator will be borne equally by the parties, and each party is responsible for its own costs, including legal fees, in connection with this procedure. If Executive defaults in this procedure, then Company may terminate this Agreement on its own after ten days written notice to Executive. If Company defaults in this procedure, the breach is deemed waived after ten days written notice from Executive.

14. Trade Secrets. With respect to Company's special techniques, patents, analyses, methods, forms, hardware systems, software programs, and customer lists, Executive acknowledges that this information: (a) belongs to Company; (b) contains specialized and confidential information not

generally known to the industry; (c) and constitutes Company's trade secrets. Executive recognizes and acknowledges that it is essential to Company to protect this trade information. Executive agrees to act as a trustee of this information and of any other confidential information learned in connection with the Executive's employment with Company. Executive further represents to Company that, as an inducement to Company to retain Executive, Executive will hold the information in trust and confidence for Company's sole use and benefit. During this Agreement's term, and for five (5) years thereafter, Executive agrees not to disclose this information to any person, firm, association, or other entity for any reason or purpose whatsoever unless the information has already become common knowledge or unless Executive is required to disclose it by government process.

15. Noncompetition. Company has retained Executive only for the purposes set forth in this Agreement, and the relationship to Company is that of an employee. During this Agreement's term, Executive will not enter into or take part in any business, profession, or other endeavor that competes with Company. Executive agrees not to compete either as an employee, agent, independent contractor, owner, or otherwise.

16. Restrictive Covenants. Executive agrees that for two (2) years after this Agreement's termination for any reason, with or without cause, or for a period of time equal to the length of the Executive's retention by Company if this period has been for less than six months, Executive will not directly or indirectly contact these then current Company clients and/or sponsors, including, but not limited to, the federal Defense Advance Research Projects Administration (DARPA), Advanced Technology Program (ATP), Department of Defense (DOD), or National Institute of Health (NIH), for the purpose of soliciting or servicing contracts for high technology development that competes with the Company. Executive agrees not to contact the above-mentioned clients and/or sponsors that directly compete with the Company, either on his own or on behalf of any other person, firm, company, or corporation. The parties acknowledge that they have attempted to limit the Executive from unfair competition. The parties recognize, however, that reasonable people may differ in making this determination. Consequently, the parties agree that, if the scope of enforceability of the restrictive covenant is in any way disputed at any time, a court or other trier of fact may modify and enforce the covenant to the extent that it believes to be reasonable under the circumstances existing at the time. Executive further acknowledges that in the event employment with Company terminates for any other reason, Executive will be able to earn a livelihood without violating these restrictions and that the ability to earn a living without violating these restrictions is a material condition to employment with Company.

17. Indemnification. The Company will indemnify Executive against any and all costs, expenses, losses, claims, damages, obligations or liabilities reasonably incurred by him in connection with any proceeding if, with respect to the acts or omissions of Executive which are the subject of the proceeding, Executive acted in good faith and in a manner he reasonably believed to be in the best interests of the Company and, in the case of a criminal action or proceeding, had no reasonable cause to believe Executive's conduct was unlawful. Executive shall promptly notify the Company in writing if any claim, action, suit or proceeding is brought against Executive with respect to which indemnity may be sought against the Company. The Company shall have the right to participate in and assume and control the defense thereof.

18. Breach of the Agreement. In the event of any claimed breach of this Agreement, the party claim to have committed the breach will be entitled to written notice of the alleged breach and a period of ten (10) days in which to remedy such breach.

19. Assignment. Executive agrees that this Agreement and its rights, interests, and benefits cannot be assigned, transferred, pledged or hypothecated in any way and will not be subject to execution, attachment, or similar process. Any attempt to do so contrary to the terms of this Agreement will be null and void and shall relieve Company of any liability under this Agreement.

20. Separability. If any provision, paragraph, or subparagraph of this Agreement is adjudged by any court of law to be void or unenforceable in whole or in part, the adjudication shall not be deemed to affect the validity of the remainder of the Agreement, including any other provision, paragraph, or subparagraph. Each provision, paragraph or subparagraph of this Agreement is declared to be separable from every other provision, paragraph, and subparagraph and constitutes a separate and distinct covenant.

21. Modifications. No change or modification of this Agreement will be valid unless in writing and signed by Company and Executive. No waiver of any provision of this Agreement will be valid unless in writing and signed by the person or party to be charged.

22. Binding Effect. This Agreement will be binding upon and inure to Company's benefit and be binding upon Company, Executive, and their respective successors, assigns, heirs, legal representatives, executors and administrators.

23. Arbitration. Any controversy or claim arising out of or related to this Agreement or its breach will be settled by arbitration in the City of New

York, in accordance with the governing rules of the American Arbitration Association then in effect. Judgment may be entered on the arbitrator's award in any court of competent jurisdiction.

24. Notice. All notices will be given in writing by certified mail and will be addressed to Company at its registered office in the State of New York and to Company's attorney, Frederica L. Miller, Esq., 60 East 42nd Street, Suite 2001, New York, NY 10165 and to Executive at the last known place of residence.

25. Attorney's Fees. If any party to this Agreement willfully breaches any of this Agreement's terms, then that party will pay to the nondefaulting party all of the nondefaulting party's costs and expenses, including attorney's fees, incurred by that party in enforcing this Agreement's terms. Loss to Company of the Award, and/or Company's discretionary evaluation of its employment needs is not a basis for a claim of willful breach.

26. Complete Agreement. This Agreement constitutes the entire agreement between the parties and contains all of the agreements between the parties with respect to this subject matter. This Agreement supercedes any and all other agreements, whether oral or in writing, between the parties with respect to this subject matter.

27. Governing Law. This Agreement will be subject to and governed by the laws of the State of New York.

28. Headings. The headings in this Agreement are inserted for convenience only and are not to be considered in construction of this Agreement's provisions.

IN WITNESS WHEREOF, the parties have caused this Agreement to be executed and delivered as of the date written below.

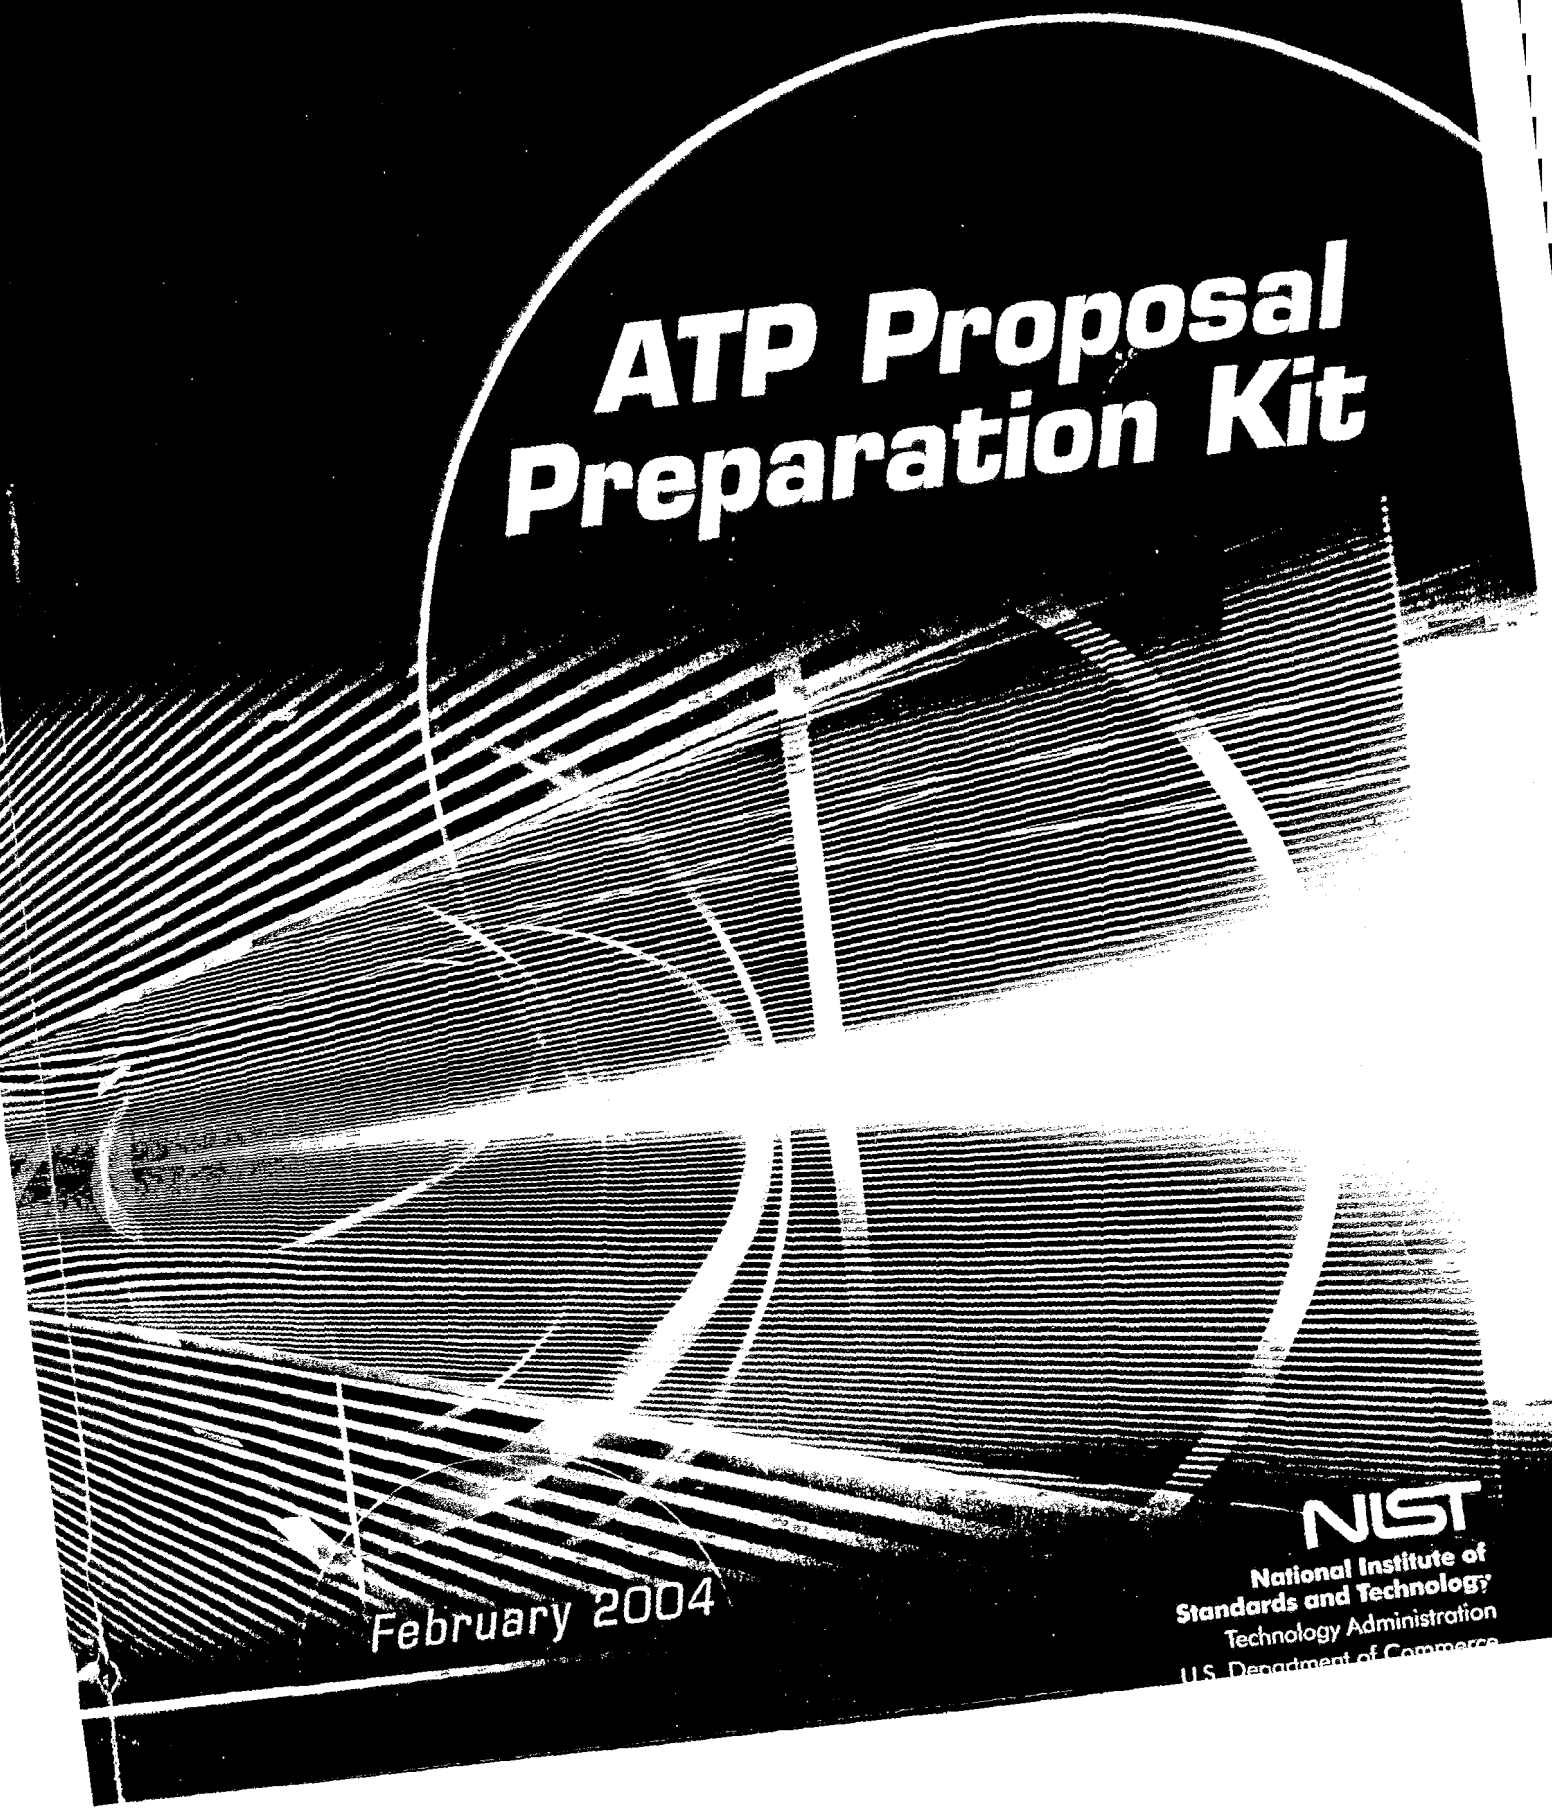
ATP Proposal Preparation Kit



February 2004

NIST
National Institute of Standards and Technology
Technology Administration
U.S. Department of Commerce

For a quick look to see if ATP is right for you and to answer the following questions:

- **What is ATP?**
- **Who may apply?**
- **How can I receive funding?**
- **When do I submit my proposal?**
- **Where do I submit my proposal?**

See Chapter 1, pages 1 through 3, in this Kit.

***Advanced Technology Program (ATP) toll-free hotline. Call to hear recorded messages about the current status of ATP and workshops being held or to request that a name be added to the ATP mailing list.**

Foreword

I am pleased to provide you with this revised version of the *ATP Proposal Preparation Kit.* This kit provides all the necessary requirements and guidelines for developing an ATP proposal during fiscal year 2004. All individuals who are currently on the ATP mailing list will receive a copy of this kit as well as any competition announcements. If you are not on our mailing list and wish to be added, call us at 1–800–287–3863 or submit an electronic request at http://www.atp.nist.gov/atp/atpform.htm. To learn more about ATP, I encourage you to visit the ATP website at http://www.atp.nist.gov. The ATP website offers general information about ATP, a searchable database of previously funded ATP projects, and much more.

As U.S. industry vies for position in the global markets of the 21st century and faces unprecedented challenges from foreign competitors, it is more important than ever to emphasize our strengths. Innovation and entrepreneurship are and will remain our best strategies in this contest—our essential edge on the competition. ATP was established to leverage those strengths, to encourage entrepreneurship in research and development, and to foster technological innovation. The path-breaking new ideas that are the essence of ATP projects can come from any industry, any company. We look forward to working with you to dramatically change the future direction of technology.

Marc G. Stanley

Director, Advanced Technology Program
National Institute of Standards and Technology

Contents

I. Questions and Answers About the Advanced Technology Program (ATP) 1

A. General Information 1

1. What is ATP? 1
2. Who may apply? 1
3. How can I receive funding? 1
4. What information is required in an ATP proposal? 1
5. How many gates are in ATP's proposal submission process? 1
6. How are proposals submitted? 2
7. Will confidential/proprietary information in my proposal be protected? 2
8. Where can I seek help with preparing my proposal? 2
9. Does ATP hold any public meetings or conferences to assist in proposal preparation? 3
10. Is there a deadline for submitting an ATP proposal? 3
11. Where do I submit proposals? 3
12. Whom do I contact if I have questions? 4

B. Eligibility 4

1. Who is eligible to apply? 4
2. Can universities, government laboratories, independent research organizations, and nonprofit organizations participate? 5
3. Can a foreign-owned company apply for ATP funding? 5
4. Is a foreign-eligibility finding required for foreign subcontractors? 6
5. Can a foreign-owned company without a U.S.-incorporated subsidiary receive an ATP award? 6
6. Can a company owned by non-U.S. citizens and without a foreign parent company receive an ATP award? 6
7. Where can I find additional information regarding foreign-owned company eligibility? 6

C. Selection Criteria and Selection Process 6

1. What selection/evaluation criteria are used to select ATP proposals for funding 6
2. How are proposals selected for funding? 7
3. What are the most common reasons that a proposal submitted to ATP is not successful? 8

D. Ineligible Projects and Ineligible Costs 8

1. What types of projects are ineligible for ATP funding? 8
2. What types of costs are ineligible/unallowable? 9
3. Can a university employee establish a company and subcontract back to his/her university? 10
4. Can an individual who has a financial or other interest in a company receive a subcontract from that company? 10
5. Will ATP fund research performed outside the United States? 10

E. Funding and Cost Sharing 10

1. How much funding can a company/organization receive, and is cost sharing required? 10
2. How does ATP define *cost sharing?* 11
3. What are direct and indirect costs? 11
4. I am a small startup company and do not have any indirect costs. If funded, the ATP project would be the only project for my company. Will ATP fund a proposal that only has direct costs? 12
5. I am a small startup company and expect to cost share direct costs through the use of state or other private investors. If those resources fall through after I receive an ATP award, will I be expected to make up the cost-share gap? 12
6. Can Cooperative Research and Development Agreement (CRADA) funds be used as cost sharing? May I count my company CRADA contribution as cost share? 12
7. Can independent research and development (IR&D) funds be used as cost sharing? 12

F. Intellectual Property 13

1. Who retains title to patentable inventions arising from an ATP-funded project? 13
2. Does the federal government have any rights to patentable inventions arising from an ATP-funded project? 13

G. Human and Animal Subjects 13
1. Will ATP fund projects involving human subjects? 13
2. We are not a biotech company. Does our research involve human subjects? ... 14
3. Will ATP fund projects involving animal subjects? 14

H. Award Requirements 14
1. If my proposal is selected for funding, what terms and conditions must I follow? 14
2. How will I receive funds if my proposal is selected for funding? 14

II. Proposal Format and Submission Requirements 15

A. Proposal Format for Submission to Gates 1 and 2 15
1. Bindings 15
2. Double-Sided Copy 15
3. E-mail Proposal Submissions 15
4. Facsimile (FAX) Proposal Submissions 15
5. Font 15
6. Line Spacing 15
7. Margins 15
8. Number of Copies 15
9. Page Limit 15

CHAPTER 1

Questions and Answers About the Advanced Technology Program (ATP)

A. General Information

1. What is ATP?

In 1990 ATP began to provide cost-shared funding to industry to accelerate the development and broad dissemination of challenging, high-risk technologies that promise significant commercial payoffs and widespread benefits for the nation. This unique government-industry partnership aids companies in accelerating the development of emerging or enabling technologies that lead to revolutionary new products and industrial processes and services that can compete in rapidly changing world markets. ATP challenges the research and development (R&D) community to take on higher technical risk projects with commensurately higher potential payoffs for the nation than they would otherwise pursue. The ATP statutory authority is 15 U.S.C. § 278n (see Appendix A or http://www.atp.nist.gov/atp/helpful.htm)[1]. The ATP implementing regulations are set forth in 15 C.F.R. Part 295 (see Appendix B or http://www.atp.nist.gov/atp/helpful.htm).

2. Who may apply?

A U.S.-owned, single, for-profit company or an industry-led joint venture may apply. See Section B of this chapter for more details.

[1]Websites listed in this publication are accurate as of the publishing date. Check www.atp.nist.gov/atp/helpful.htm for updates to websites.

3. How can I receive funding?

You must submit a proposal to ATP in response to a solicitation/request for proposal published by ATP. Notices are published in the *Federal Register* announcing the availability of ATP funds and are posted on the ATP website (http://www.atp.nist.gov).

4. What information is required in an ATP proposal?

Information requirements are discussed in detail in Chapters 2 and 3 of this *Proposal Preparation Kit.* ATP reviews proposals under a multi-stage and sequential review process; therefore, prescribed information is requested at different stages called gates.

5. How many gates are in ATP's proposal submission process?

There are four gates, as follows:

Gate 1: Detailed information addressing the scientific and technological merit selection criterion and preliminary information addressing the potential for broad-based economic benefits selection criterion are submitted. If the information is determined to meet the selection criteria, the proposer is notified that the proposal has passed the Gate 1 stage and is asked to submit the required Gate 2 information.

Gate 2: Detailed information addressing the potential for broad-based economic benefits selection criterion and the Budget Narrative are submitted. If the information submitted is determined to have high merit, the proposer is notified that the proposal has been selected as a semi-finalist and proceeds to Gate 3.

Gate 3: An invitation to the National Institute of Standards and Technology/ATP for an oral review is issued. Required forms and additional documentation are submitted, as requested by ATP. After the oral review, if ATP determines, based on all the information received, that the proposal has high merit, the proposal is considered a finalist and is recommended to the Selecting Official. If selected by the Selecting Official, the proposal proceeds to Gate 4.

Gate 4: If the proposal is selected, the final award is processed and issued and funding begins.

6. How are proposals submitted?

Proposals may be submitted either electronically or in hardcopy. Electronic submissions are encouraged and save the proposer mailing and copying fees. See Chapter 2, Section A, for format instructions and Chapter 2, Section B, for electronic submission guidance. Also visit the ATP Electronic Submission System website at http://ess.atp.nist.gov, which provides instructions and tools for submitting ATP proposals securely over the Internet.

7. Will confidential/proprietary information in my proposal be protected?

Yes. All individuals who have access to proposals must sign nondisclosure agreements. The government will protect confidential/proprietary information about business operations and trade secrets possessed by any company or participant the full extent of the law. Such information will withheld from disclosure pursuant to the followi statutes which can be found at http://www.atp.nist.gov/atp/helpful.htm.

a. ATP Statute—15 U.S.C. § 278n(d)(5).

b. Trade Secrets Act—18 U.S.C. § 1905.

c. Freedom of Information Act (FOIA)—5 U.S.C. § 552(b).

d. Economic Espionage Act—18 U.S.C. § 1832.

In view of the above, proposers are advised that proposals are unlikely to be competitive if significant technical and/or business details are omitted due to the proposer's reluctance to reveal confidential information.

8. Where can I seek help with preparing my proposal?

a. Visit the ATP Alliance Network website at http://www.atp.nist.gov/alliance/welcome.htm, which provides useful tools for creating and managing R&D partnerships. The website offers interactive forums such as the Collaboration Bulletin Board, through which potential proposers can anonymously post their interest in finding a partner, and the R&D Alliances Forum, where individuals can exchange their ideas and questions about high-risk R&D alliances.

b. Contact the NIST Manufacturing Extension Partnership (MEP), a nationwide network of locally managed extension centers whose sole purpose is to provide small- and medium-sized manufacturers with the help they need to succeed. The centers provide guidance to high-technology companies seeking resources and

teaming relationships that help with commercialization efforts. To contact a MEP center, call 1–800–MEP–4–MFG (1–800–637–4634) or visit MEP's website at http://www.mep.nist.gov.

c. Contact state agencies.

9. Does ATP hold any public meetings or conferences to assist in proposal preparation?

Yes. ATP typically holds one or more proposers' conferences per year. These meetings provide general information regarding the program, tips on preparing proposals, and the opportunity for questions and answers. Proprietary technical or business discussions about specific project ideas with NIST staff are not permitted at the public meeting(s) or at any time before submitting the proposal to ATP. Therefore, you should not expect to have proprietary issues addressed at the public meeting(s).

Attendance at ATP proposers' conferences is not required; many successful ATP recipients have not attended a proposers' conference. However, those who have attended said they found the information helpful. Information regarding dates and locations of ATP proposers' conferences is published in the *Federal Register* and posted on the ATP website. Additionally, all those on the ATP mailing list (http://www.atp.nist.gov/atp/atpform.htm) are notified when the conferences are announced.

Presentation materials from proposers' conferences will be made available on the ATP website.

NIST/ATP staff will not critique proprietary project ideas while they are being developed by a proposer. However, NIST/ATP staff will, at any time, answer questions that you may have about our project selection criteria, selection process, eligibility requirements, cost-sharing requirements, and the general characteristics of a good ATP project.

10. Is there a deadline for submitting an ATP proposal?

Yes. The deadline date(s) will be published in the *Federal Register* and posted on the ATP website. Once an ATP solicitation/request for proposal is published, proposals may be submitted until the deadline date(s). The most up-to-date information about ATP competitions is posted on the ATP website. In addition, you can have your name added to the ATP mailing list (http://www.atp.nist.gov/atp/atpform.htm) so that you are notified when a new competition is announced.

11. Where do I submit proposals?

Proposals should be submitted to either of the following locations and not directly to ATP staff:

a. Electronic: use the downloadable forms and the Forms Viewer at (http://ess.atp.nist.gov).

b. Hardcopy:

Advanced Technology Program
National Institute of Standards
and Technology
Administration Building 101, Room A413
100 Bureau Drive, Stop 4701
Gaithersburg, MD 20899–4701

12. Whom do I contact if I have questions?

Subject Area	Point of Contact
Competition process, project selection criteria, or other programmatic questions	Bettijoyce Lide Phone: 301–975–2218 Fax: 301–926–9524 E-mail: bettijoyce.lide@nist.gov
Eligibility and cost-sharing requirements, budgets, or other administrative questions	Barbara Lambis Phone: 301–975–4447 Fax: 301–869–1150 E-mail: barbara.lambis@nist.gov
Human and/or animal subjects used in research	Human and Animal Subjects Advisor Phone: 301–975–8779
Electronic proposal submission	John Garguilo Phone: 301–975–4426 Fax: 301–926–9524 E-mail: john.garguilo@nist.gov
Foreign participation as single-company proposers, joint ventures, or subcontractors	Connie Chang Phone: 301–975–4318 Fax: 301–975–4776 E-mail: connie.chang@nist.gov

B. Eligibility

1. Who is eligible to apply?

U.S.-owned, single, for-profit companies and industry-led joint ventures may apply for ATP funding. In addition, companies incorporated in the United States that have parent companies incorporated in another country may apply as discussed in Section 3 below. The term *company* means a for-profit organization, including sole proprietorships, partnerships, limited-liability companies (LLCs), and corporations (15 C.F.R. § 295.2).

a. **Single Company**—a single small, medium, or large for-profit company, including an LLC. The single company must be substantially involved in the R&D, with a leadership role in programmatically steering the project and facilitating definition of the research agend

b. **Joint Venture**—at least two separately owr for-profit companies, both of which are sut stantially involved in the R&D and both of which are contributing to the cost-sharing requirement. ATP joint ventures consist of companies that formally agree (i.e., sign a Joint Venture Agreement as discussed in Chapter 2, Section C) to collaborate on the R&D and establish an effective plan to com mercialize the technology if successful. In addition to comprising at least two separatel owned for-profit companies, a joint venture may include additional for-profit companies and other organizations that perform researc and that may or may not contribute nonfeder funds to the project.

2. Can universities, government laboratories, independent research organizations, and nonprofit organizations participate?

Yes. Universities, government laboratories (excluding NIST laboratories), independent research organizations, and nonprofit organizations may participate in an ATP project in the following two ways:

a. As subcontractors to a single company or to a joint venture.

b. As additional partners in a joint venture. In addition to a for-profit company, any one of these four types of organizations (universities, government laboratories, independent research organizations, and nonprofit organizations) can serve as the catalyst to organize a joint venture. However, of these four types of organizations, only an independent research organization or a nonprofit organization may submit a proposal on behalf of a joint venture and administer the project, provided that the following two conditions are met:

   (1) As described above, the joint venture must include at least two separately owned for-profit companies, both substantially involved in the R&D and both contributing to the cost-sharing requirement.

   (2) The joint venture must be industry led. In other words, the industrial partners must take a leadership role in programmatically steering the project, facilitate definition of the research agenda, be substantially involved in the R&D, and commit to the commercialization plans if the technology is successfully developed.

3. Can a foreign-owned company apply for ATP funding?

Yes, provided that certain requirements are met. A company incorporated in the United States that has a parent company incorporated in another country is eligible to apply for and receive an ATP award if it meets the conditions in the ATP legislation (15 U.S.C. § 278n(d)(9)) and regulations (15 C.F.R. § 295.3). Before making the final award, ATP will make a foreign-eligibility finding based on these conditions regarding the company's participation in the ATP project. The foreign eligibility finding involves the collection of evidence of whether the following conditions are met:

a. the company's participation in the ATP project is in the economic interest of the United States, and

b. the home country of the parent company provides all of the following:

   (1) comparable opportunities for U.S.-owned companies to participate in government-funded programs similar to ATP,

   (2) comparable local investment opportunities for U.S.-owned companies, and

   (3) adequate and effective protection of U.S.-owned intellectual property rights.

ATP takes responsibility for gathering information related to the above requirements. The submitting organization must provide information in the Gate 2 submission (see Chapter 2) related to the role of the foreign-owned company in the project to help address foreign eligibility requirement 3.a above. Evidence that the company's participation is in the economic interest of the United States includes the following:

a. a sound justification that the involvement by the company is necessary to achieve the technical or commercial objectives of the project;

b. documentation that the company makes investments in research, development, and manufacturing in the United States;

c. documentation that the company makes significant contributions to employment in the United States;

d. documentation that the company agrees to promote the manufacture of products within the United States resulting from ATP-supported technology and to procure supplies from competitive U.S. suppliers; and

e. other aspects relevant to the project's potential to produce broad-based economic benefits for the United States.

4. Is a foreign-eligibility finding required for foreign subcontractors?

No. The submitting organization, however, must justify the use of foreign-owned or foreign-located subcontractors or subsidiaries and explain how their participation will benefit the U.S. economy. The submitting organization should state how and why U.S. sources were judged to be unavailable and inadequate in meeting the project goals.

5. Can a foreign-owned company without a U.S.-incorporated subsidiary receive an ATP award?

No. Foreign-owned companies located outside the United States cannot receive an ATP award. According to ATP's founding legislation, only U.S.-owned companies and U.S. subsidiaries of foreign-owned companies that meet certain requirements are eligible to receive ATP funding.

6. Can a company owned by non-U.S. citizens and without a foreign parent company receive an ATP award?

No. However, a company that is incorporated in the United States and owned by one or more non-U.S. citizen green-card holders but that does not have a foreign parent company may apply for an ATP award, but it cannot receive any funding unless the ownership issue has been resolved (e.g., the owner has since become a U.S. ci or ownership has been transferred to a U.S. citizen or citizens) before final award selec Awards will not be deferred for this issue tc resolved.

7. Where can I find additional inf mation regarding foreign-owne company eligibility?

Additional information is available in the A booklet *ATP Eligibility Criteria for U.S. Subsidiaries of Foreign-Owned Companies: Legislation, Implementation, and Results,* w is available at http://www.atp.nist.gov/eao/ir-6099/contents.htm.

C. Selection Criteria and Selection Process

1. What selection/evaluation crit are used to select ATP propos for funding?

The evaluation criteria used to select a propo for funding and their respective weights are f in 15 C.F.R. § 295.6 and are listed below. No proposal will be funded unless ATP determin that it has scientific and technological merit a that the proposed technology has strong pote for broad-based economic benefits for the nat Additionally, no proposal will be funded that does not require federal support, that is produ development rather than high-risk R&D, that does not display an appropriate level of comn ment from the proposer, and that does not hav adequate technical and commercialization pla Meeting the scientific and technological merit criterion will not make up for major flaws in t potential for broad-based economic benefits selection criterion and vice versa. Detailed gu ance on how to address the selection criteria is provided in Chapter 3.

a. **Scientific and Technological Merit (50 percent).** This selection criterion has three critical components: (1) Technical Innovation, (2) Technical Risk With Evidence of Scientific Feasibility, and (3) Technical Plan.

The proposed technology must be highly innovative. The research must be challenging, with high technical risk. It must be aimed at overcoming an important problem (or problems) or exploiting a promising opportunity. The technical leverage of the technology must be adequately explained. The research must have a strong potential for advancing the state of the art and contributing significantly to the U.S. scientific and technical knowledge base. The technical plan must be clear and concise and must clearly identify the core innovation, the technical approach, the major technical hurdles, and the attendant risks, and it must clearly establish feasibility through adequately detailed plans linked to major technical barriers. The plan must address the questions of "what, how, where, when, why, and by whom" in substantial detail. ATP will assess the proposing team's relevant experience for pursuing the technical plan. The team carrying out the work must demonstrate the high level of scientific/technical expertise needed to conduct the R&D and have access to the necessary research facilities.

b. **Potential for Broad-Based Economic Benefits (50 percent).** This selection criterion has three critical components: (1) National Economic Benefits, (2) Need for ATP Funding, and (3) Pathway to Economic Benefits.

The proposed technology must have a strong potential to generate substantial benefits for the nation that extend significantly beyond the direct returns to the proposing organization(s). The proposal must explain why ATP support is needed and what difference ATP funding is expected to make in terms of what will be accomplished with the ATP funding versus without it. The pathway to economic benefits must be described, including the proposer's plan for getting the technology into commercial use as well as additional routes that might be taken to achieve broader diffusion of the technology. The proposal should identify the expected returns that the proposer expects to gain as well as returns that are expected to accrue to others—that is, spillover effects. ATP will assess the proposer's relevant experience and level of commitment to the project; the project's organizational structure and management plan, including the extent to which participation by small businesses is encouraged and is a key component in a joint venture proposal; and for large single-company proposers, the extent to which subcontractor/subrecipient teaming arrangements are featured and are a key component of the proposal.

2. How are proposals selected for funding?

All proposals are selected based on a peer-review process, as described in 15 C.F.R. § 295.4. Proposals judged through Gates 1 and 2 to have sufficient merit based on the established selection criteria receive further consideration and are referred to as *semifinalists*. Semifinalist proposers will be invited to NIST/ATP for an oral review (Gate 3) of their proposals. In some cases, site visits may be required. Semifinalist proposals are then ranked, and the Selecting Official selects funding recipients based on the ranking, the availability of funds, the adherence to ATP selection criteria, and the appropriate distribution of funds among technologies and their applications. NIST reserves the right to deny awards in any case where a reasonable doubt exists regarding a proposer's ability to comply with ATP requirements or to handle federal funds responsibly. **All funding decisions are final and cannot be appealed.** NIST/ATP reserves the right to negotiate the cost and scope of the proposed work with the proposers that have been selected to receive awards. For example, NIST/ATP may

require that the proposer delete from the scope of work a particular task that is deemed by NIST/ATP to be product development or otherwise inappropriate for ATP support.

3. What are the most common reasons that a proposal submitted to ATP is not successful?

a. Lack of clear definition of technical risks or barriers that prevent progress on the commercial front. Less competitive proposals often fail to answer the question, "What technical issue or issues are preventing you from exploiting this technology for this class of applications?"

b. Lack of an innovative technological approach—that is, the concept or end products may be innovative, but reaching the goal is based on state-of-the-art techniques that will not be advanced.

c. Lack of detail in the technical plan or failure to clearly describe how the path to innovation will be accomplished. For example:

   (1) Use of a trial-and-error approach to generate new products or processes based on state-of-the-art techniques that does not result in advancing the methodology beyond trial and error.

   (2) Risks in the project not described at the scientific level other than that the approach may not work as expected, or there is no clear identification of alternatives for various risks at each step in the R&D.

   (3) Straightforward scale-ups based on standard engineering practices and state-of-the-art techniques that will not advance scale-up methodology (e.g., faster, better, cheaper the next time).

   (4) Use of proprietary techniques that are already developed in-house to generate novel products or processes where there no expectation to move the technique(s) to a next-generation advancement.

d. A general description of the market opportunity with no specific market segment analysis of, for example, size, sales, potential customers, and competitors.

e. Lack of detail about the approach to be taken to commercialize the technology after the ATP project ends, or failure to address market opportunity.

f. Unconvincing case for the need for ATP funding, or the difference that ATP can make, and failure to describe actions taken to secure non-ATP funding (including evidence of the results of those actions).

D. Ineligible Projects and Ineligible Costs

1. What types of projects are ineligible for ATP funding?

a. Straightforward improvements of existing products or product development.

b. Projects that are basic research.

c. Projects that are Phase II, III, or IV clinical trials.

d. Pre-commercial-scale demonstration projects where the emphasis is on demonstrating that some technology works on a large scale or is economically sound rather than on R&D that extends the state of the art.

e. Projects that ATP believes would likely be completed without ATP funds in the same time frame or nearly the same time frame or with the same scale or scope.

i. Predominantly straightforward, routine data gathering (e.g., creation of voluntary consensus standards, data gathering/ handbook preparation, testing of materials, or unbounded research aimed at basic discovery science) or application of standard engineering practices.

j. Projects that are simply a follow-on or a continuation of tasks previously funded in ATP projects from essentially the same proposing team.

k. Projects in which the only risk is market oriented—that is, the risk that the end product may not be embraced by the marketplace.

2. What types of costs are ineligible/unallowable?

The following items, regardless of whether they are allowable under the federal cost principles, are unallowable under ATP:

a. Marketing, sales, or commercialization costs, unless they are included in a federally approved indirect cost rate.

b. Costs for the construction of new buildings or extensive renovations of existing laboratory buildings. However, costs for the construction of experimental research and development facilities to be located within a new or existing building are allowable provided that the equipment or facilities are essential for carrying out the proposed scientific and technical project and are approved by the NIST Grants Officer.

c. Indirect costs for single-company recipients, which must be absorbed by the company. (Note that with large businesses submitting proposals as single-company proposers, indirect costs absorbed by the large business may be used to meet the cost-sharing requirement.)

d. Bid and proposal costs, tuition costs, and costs for marketing surveys, commercialization studies, and general business planning, unless they are incorporated into a federally approved indirect cost rate. However, a university participating in an ATP project as a subcontractor or as a joint venture partner may charge ATP for tuition remission or other forms of compensation in lieu of wages paid to university students working on ATP projects but only as provided in OMB Circular A-21, Section J.41. In such cases, tuition remission would be considered a cash contribution rather than an in-kind contribution.

e. For research involving human and/or animal subjects, any costs used to secure Institutional Review Board or Institutional Animal Care and Use Committee approvals before the award or during the award.

f. Relocation costs, unless they are included in a federally approved indirect cost rate.

g. Office furniture costs, unless they are included in a federally approved indirect cost rate.

h. Costs for general purpose office equipment and supplies that are not used exclusively for the research—for example, office computers, printers, copiers, paper, pens, and toner cartridges.

i. Subcontractor expenses such as those for office supplies and conferences/workshops.

j. Patent costs and legal fees, unless they are included in a federally approved indirect cost rate.

k. Profit, management fees, interest on borrowed funds, or facilities capital cost of money.

l. Subcontracts to another part of the same company or to another company with identical or nearly identical ownership. Work proposed by another part of the same company or by another company with identical or nearly identical ownership should be shown as funded through interorganizational transfers

that do not contain profit. Interorganizational transfers should be broken down in the appropriate budget categories.

3. Can a university employee establish a company and subcontract back to his/her university?

Generally no. This would present a conflict of interest. However, under certain circumstances, for example, if the university's participation is unique and essential to the project, the subcontracting arrangement may be considered. In such a case, the organization/individual with the conflict of interest may not benefit or profit from the subcontract. For more information, see the Codes of Conduct guidance in 15 C.F.R. § 14.42 (http://www.atp.nist.gov/atp/helpful.htm).

4. Can an individual who has a financial or other interest in a company receive a subcontract from that company?

Generally no. See the answer to D.3 above.

5. Will ATP fund research performed outside the United States?

Possibly. Although ATP is not precluded from funding research performed outside the United States, proposals involving significant research outside the United States would likely be less competitive when evaluated against the ATP selection criterion related to how national economic benefits accrue to the United States. Any proposed use of a foreign subcontractor or a foreign-located organization must be justified in the proposal. This justification must include why the work or services cannot be performed equivalently or obtained in the United States.

E. Funding and Cost Sharin

1. How much funding can a compan organization receive, and is cost sharing required?

a. A **single company** can receive up to a total of $2 million for R&D activities for up to 3 years. ATP funds may only be used to pay direct costs for single-company recipients. Single-company recipients are responsible fc funding all of their indirect/overhead costs. Small- and medium-sized companies applyir as single-company proposers are not require to provide cost sharing of direct costs; however, they may pay a portion of the direct costs if they propose to, in addition to all ind rect costs throughout the project. If a single company proposes to pay direct costs, it will become a requirement of the award. The com pany will be responsible for meeting its committed cost share in accordance with its approved budget throughout the award.

Large companies applying as single-compan proposers must cost share at least 60 percent of the yearly total project costs (direct plus all of the indirect costs). A *large company* is defined as any business, including any parent company plus related subsidiaries, having annual revenues in excess of $3.043 billion. (Note that this number will likely be updated annually and will be noted in future annual announcements of availability of funds and revised editions of the *ATP Proposal Preparation Kit.*)

b. A **joint venture** can receive funds for R&D activities for up to 5 years with no funding limitation other than the announced availability of funds. Joint ventures must cost share more than 50 percent of the yearly total project costs (direct plus indirect costs).

If an award is issued to a joint venture, each joint venture participant will be responsible for meeting its committed cost share in accordance with its approved budget throughout the award. No joint venture participant will be responsible for the cost-share commitment of any other joint venture participant. However, with the agreement of the joint venture participants, along with notification to the NIST Grants Officer, a joint venture participant that has exceeded its cost-share commitment may allow its excess cost share to be applied to the cost-share deficit of another joint venture participant, so that the overall joint venture cost share is met.

2. How does ATP define *cost sharing?*

Cost sharing is that portion of the project costs not borne by the federal government and includes direct and indirect costs. Sources of revenue to satisfy the required cost share include cash and in-kind contributions. Cash contributions can be from recipient, state, county, city, or other nonfederal sources. In-kind contributions can be made by recipients or nonfederal third parties (excluding subcontractors) and can include, but are not limited to, equipment, research tools, software, and supplies. Except as specified in 15 C.F.R. § 295.25, the value of in-kind contributions shall be determined in accordance with 15 C.F.R. § 14.23. The value of in-kind contributions will be prorated according to the share of total use dedicated to the ATP project. Labor/personnel costs are not in-kind contributions; they are cash contributions. ATP limits the total value of in-kind contributions that can be used to satisfy the cost share to 30 percent of the nonfederal share of the total project costs.

Any cost sharing must be in accordance with the "cost sharing or matching" provisions of 15 C.F.R. Part 14, *Uniform Administrative Requirements for Grants and Cooperative Agreements With Institutions of Higher Education, Hospitals, Other Non-Profit, and Commercial Organizations* (http://www.atp.nist.gov/atp/helpful.htm).

Additionally, as with the federal share, any costs included as cost share must be allowable under the following applicable federal cost principles. These documents may be found at http://www.atp.nist.gov/atp/helpful.htm:

a. For-profit companies, 48 C.F.R. Part 31.

b. Universities, OMB Circular A-21.

c. Nonprofit organizations, OMB Circular A-122.

d. Hospitals, 45 C.F.R. Part 74, Appendix E.

3. What are direct and indirect costs?

Direct costs are those that are directly related to a specific, single cost objective. Examples include personnel, travel, equipment, subcontractors, and materials and supplies. An indirect cost is any cost not directly identified with a single, final cost objective but identified with two or more final cost objectives or an intermediate cost objective. After direct costs have been determined and charged directly to the project or other work, indirect costs are those remaining to be allocated to the several cost objectives. Because of diverse characteristics and accounting practices of recipient organizations, it is not possible to specify the types of costs that may be classified as indirect costs in all situations. However, typical examples of indirect costs for many organizations include general administration such as salaries and expenses of executive officers, rent, utilities, personnel administration, maintenance, library expenses, and accounting. ATP shall interpret indirect costs in accordance with applicable federal cost principles.

4. I am a small startup company and do not have any indirect costs. If funded, the ATP project would be the only project for my company. Will ATP fund a proposal that only has direct costs?

No. When the assertion is made that a company has no indirect costs, it raises the following concerns:

a. If a company claims to have no indirect costs, this suggests to ATP that either the company is inexperienced in its fiscal affairs or the company has no intention of carrying on any business other than performing research for the ATP project. On this latter point, ATP will not pay for commercialization activities in which the company may engage at some point to earn revenues.

b. ATP projects are industry/government, cost-shared projects. A company proposing to recover 100 percent of the project costs from ATP is not complying with the spirit of the ATP statute because the company has no funds of its own at risk. In addition, if the company is not sharing in the risk of the investment with ATP, it gives the appearance that it is not very committed to moving the technology into the marketplace. Therefore, a proposal claiming no indirect costs is unlikely to receive an ATP award.

5. I am a small startup company and expect to cost share direct costs through the use of state or other private investors. If those resources fall through after I receive an ATP award, will I be expected to make up the cost-share gap?

Yes. If a single-company or joint venture proposal is selected for funding, the recipient's percentage of cost sharing will be made a part of the award, and only rarely will NIST reduce it after the award is issued. NIST cannot violate ATP statutory cost-sharing requirements.

6. Can Cooperative Research and Development Agreement (CRADA) funds be used as cost sharing? May I count my company CRADA contribution as cost share?

No. Since CRADA funds derive from federal sources, they cannot be used for cost-sharing purposes. In the event that CRADA funds have been awarded in areas closely related to the ATP project, the proposer must make a clear distinction between the two projects. Recovering the proposer's cost share through a CRADA would be contrary to the kind of financial commitment expected of proposers by the ATP statute. In addition, title to any inventions arising from an ATP-funded project must be held by a for-profit company or companies incorporated or organized in the United States. Federal laboratories cannot hold title to inventions from ATP-funded research. This is another reason to keep the projects separate and distinct.

7. Can independent research and development (IR&D) funds be used as cost sharing?

The fundamental expectation for cost sharing is that the proposer's share of the ATP project cost will be funded from nonfederal sources, such as retained earnings or profits, not funds included as an indirect expense that is subsequently allocated for reimbursement under federally funded procurement contracts, grants, and other agreements. Recovering the proposer's cost share as part of its IR&D/General and Administrative (G&A) allocation to other federally funded projects would be contrary to the kind of financial commitment expected of proposers by the ATP statute.

Proposers **MAY NOT** classify the nonfederal share of the ATP project costs as an IR&D expense that is subsequently allocated, either as

a separate cost or as an element of a G&A cost pool, to federally funded procurement contracts, grants, or other agreements.

Proposers **MAY** allocate to an ATP project IR&D or G&A costs that include IR&D as an element provided that the IR&D/G&A rate applied to the ATP project is a federally approved indirect cost rate.

F. Intellectual Property

1. Who retains title to patentable inventions arising from an ATP-funded project?

Title to any inventions arising from an ATP-funded project must be held by a for-profit company, or companies, incorporated or organized in the United States. A university, government laboratory, independent research organization, or other nonprofit organization cannot retain title to patents, although such organizations can receive mutually agreeable payments (either one-time or continuing) from the company or companies holding title to the patent. However, a for-profit corporation organized by a university can be considered a for-profit company for the purpose of retaining title to patents arising from an ATP award. In such a case, documentation of the for-profit status must be provided in the proposal. If your organization is not a for-profit company but plans to be involved in an ATP project, you will not be able to retain title to any patentable inventions arising from the ATP project. Please make sure your legal department is aware that ATP cannot waive this mandated provision (15 U.S.C. § 278n(d)(11)(A) and 15 C.F.R. § 295.2). Title to any such invention shall not be transferred or passed, except to a company organized in the United States, until the expiration of the first patent obtained in connection with such invention.

2. Does the federal government have any rights to patentable inventions arising from an ATP-funded project?

Yes. The United States reserves a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States any patentable invention arising from an ATP award. The federal government shall not, however, in the exercise of such license, publicly disclose proprietary information related to the license. The federal government also has march-in rights in accordance with 37 C.F.R. § 401.14(j). Since its inception in 1990, ATP has not exercised either of these rights.

G. Human and Animal Subjects

1. Will ATP fund projects involving human subjects?

Yes. Research involving human subjects must be in compliance with applicable federal regulations and NIST policies for the protection of human subjects. Human subjects research involves interactions with live human subjects or the use of data, images, tissue, and/or cells/cell lines (including those used for control purposes) from human subjects. Research involving human subjects may include activities such as the use of image and/or audio recordings of people, taking surveys or using survey data, using databases containing personal information, and many tasks beyond those within traditional biomedical research. A Human Subjects Determination Checklist is included in **Exhibit 2** to assist you in determining whether your proposal has human subjects involvement, which would require additional documents with the Gate 1 and/or Gate 3 submission(s). Detailed information regarding the use of human subjects in research projects

and required documentation is available at http://www.atp.nist.gov/atp/kit-04/has_guide/contents.htm, or by calling 1–800–287–3863.

2. We are not a biotech company. Does our research involve human subjects?

It could. For example, manufacturing, electronic, and information technology projects may use human subjects in research that falls within the regulations. The use of human subjects in research is not limited to biologically based studies; there are numerous examples of non-medical research proposals that may use human subjects or data with personal information about people. For example, a computer software company may propose to have a new web-based curriculum reviewed by a group of volunteers and solicit feedback on such things as usability, design, and content. The use of certain types of volunteers to review the web-based system (or the curriculum in a software format) may constitute the use of human subjects as defined by federal regulations. This type of research may require the submission of certain documents to NIST.

3. Will ATP fund projects involving animal subjects?

Yes. Research involving animal subjects must be in compliance with applicable federal regulations and NIST policies for the protection of animal subjects. Vertebrate animal research involves live animals that are being cared for, euthanized, or used by the project participants to accomplish research goals or for teaching or testing. The regulations do not apply to animal tissues purchased from commercial processors or tissue banks or to uses of preexisting images of animals (e.g., a wildlife documentary or pictures of animals in newscasts). Detailed information regarding the use of animal subjects in research projects and required documentation can be obtained at http://www.atp.nist.gov/atp/kit-04/has_guide/contents.htm, or by calling 1–800–287–3863.

H. Award Requirements

1. If my proposal is selected for funding, what terms and conditions must I follow?

For your convenience, the award form for the cooperative agreement and the standard terms and conditions are available at http://www.atp.nist.gov/atp/helpful.htm.

2. How will I receive funds if my proposal is selected for funding?

Award funds are disbursed through electronic funds transfers using the Department of Treasury's Automated Standard Application for Payment (ASAP) system. Detailed information about ASAP is available at http://www.atp.nist.gov/atp/helpful.htm.

CHAPTER II

Proposal Format and Submission Requirements

NOTE: Proposals that deviate substantially from these guidelines or that omit required information may be found unresponsive and may not be considered for funding.

A. Proposal Format for Submission to Gates 1 and 2

1. **Bindings.** Bind all (including signed original) but one copy of the proposal securely. Bindings that permit the proposal to lie flat while being read are preferred. Loose-leaf ring binders or stapled copies are **not** acceptable. If you are submitting proposals electronically, paper copies are not required.
2. **Double-sided copy.** Print on both sides of the paper (front to back counts as two pages).
3. **E-mail proposal submissions.** Will **not** be accepted.
4. **Facsimile (fax) proposal submissions.** Will **not** be accepted.
5. **Font.** Times New Roman or Arial and readable (12-point minimum).
6. **Line spacing.** Single.
7. **Margins.** 1 inch top, bottom, left, and right.
8. **Number of copies.** 16 (1 original, signed, bound proposal plus 15 copies [1 unbound and 14 bound]). If the original proposal is in color, all copies must also be in color. If the proposal is submitted electronically, paper copies are not required.
9. **Page limit.** 24 pages for Gate 1 and 15 pages for Gate 2 for a single company; 35 pages for Gate 1 and 20 pages for Gate 2 for a joint venture. See **Exhibit 1** for more details.
10. **Page numbering.** Number pages sequentially.
11. **Paper size.** 21.6 by 27.9 centimeters (8½ by 11 inches).
12. **Proposal language.** English.
13. **References.** Include a list of bibliographic technical references in Gate 1 and a list of bibliographic references supporting business assertions or data in Gate 2.
14. **Table of abbreviations.** Include a table that defines abbreviations likely to be unfamiliar to the reader. Common abbreviations, for example, U.S., ATP, DoD, and cm, need not be defined.
15. **Table of contents.** Not required.
16. **Typed document.** All proposals, including forms, must be typed; handwritten proposals and forms will **not** be accepted.
17. **Use of metric/system international (SI) units.** Use metric/SI units; however, English units may be put in parentheses.

B. Electronic Proposal Submission

During open competitions, ATP encourages proposers to submit proposals electronically over the Internet via ATP's secure Electronic Submission System (ESS) (http://ess.atp.nist.gov). ESS includes all forms necessary for submitting proposals electronically, as described in this *Proposal Preparation Kit,* a downloadable Forms Viewer for filling out the forms and submitting the proposal, and a link to the application for an Access Certificates for Electronic Services (ACES) Digital Certificate.

Proposals submitted through ESS must be digitally signed using an ACES Business Representative Digital Certificate. These certificates can be obtained at no cost to the proposer, but the proposer must allow 7–10 business days between application and issuance of the certificate for identity verification. Once the digital certification is obtained, it is valid for 2 years.

The electronic proposal forms look the same as their paper counterparts. The electronic proposal attachment(s) (e.g., proposal narrative) must be readable in one of the formats described on the ESS website. The guidelines for preparing an ATP proposal are the same, except that displays, graphics, figures, and diagrams must be embedded within the file containing the project narrative. Format requirements (e.g., font, line spacing, margin, page limit, page numbering, and page size), stipulated in Section A of this chapter still apply. The ATP ESS website provides details about how to submit proposals electronically, including the following:

1. Steps to submit
2. System requirements
3. Security of the ESS
4. Frequently Asked Questions
5. ESS User's Guide

ESS also provides proposer tools needed to submit electronically, including the following:

1. Link to the ACES Digital Certificate Application
2. Downloadable Forms Viewer
3. Downloadable electronic forms

The due date for submission of electronic proposals is stipulated in the competition announcement published in the *Federal Register* and poste on the ATP website (http://www.atp.nist.gov). **Do not wait until the last minute to submit a proposal electronically.**

C. Documentation Requirements for Gates 1 and 2 Proposal, Unless Otherwise Specified

(Forms are included in this *Proposal Preparation Kit* as exhibits and are posted on the ATP website at http://www.atp.nist.gov/atp/helpful.htm.)

1. Single Company Only

a. **Form NIST-1262 (Pages 1 & 2): Single-Company Advanced Technology Program Proposal Cover Sheet (see Exhibit 3).** Page 1 of this form serves as the cover for the proposal; no other cover page should be included.

b. **Form NIST-1262 (Page 3): Estimated Multi-Year Budget—Single Company (see Exhibit 4).**

c. **Form NIST-1262 (Page 4): Subcontracts (see Exhibit 5).**

2. Joint Venture Only

a. **Form NIST-1263 (Pages 1 & 2): Joint Venture Advanced Technology Program Proposal Cover Sheet (see Exhibit 6).** Page 1 of this form serves as the cover for the proposal; no other cover page should be included.

b. **Form NIST-1263 (Page 3): Estimated Multi-Year Budget—Joint Venture (see Exhibit 7).**

c. **Form NIST-1263 (Page 4): Other Joint Venture Participants (see Exhibit 8).**

d. **NIST-1263 (Page 5): Subcontracts (see Exhibit 9).**

e. **Joint Venture Agreement (for Gate 3 submission)**—A draft Joint Venture Agreement must be submitted before an oral review. The information below is provided in advance to alert joint venture participants of the minimum requirements so that the parties may begin negotiating the Joint Venture Agreement early:

(1) Authorization for one of the joint venture participants (a legal entity, not an individual person) to serve as the Joint Venture Administrator to bind all of the other participants to the terms and conditions of the NIST/ATP award and to administer the NIST/ATP award on behalf of all of the participants.

(2) Treatment of intellectual property—that is, who will own what, including provisions granting the required licenses to the government.

(3) Agreement that the ATP award terms and conditions take priority over those in the Joint Venture Agreement.

(4) Acknowledgment of the parties of their respective cost-sharing commitment and that no party is responsible for the cost-sharing commitment of any other party.

(5) Acknowledgment that if a party is removed unilaterally by the NIST Grants Officer, that party is also removed from the Joint Venture Agreement.

Although the draft Joint Venture Agreement need not be signed at the time of an oral review, it must be finalized and signed by all joint venture participants **before an award can be made.** A sample Joint Venture Agreement and Intellectual Property Plan is available on the ATP website (http://www.atp.nist.gov/atp/jvsample.htm). The sample Joint Venture Agreement includes important information; however, it is not meant to be the sole Joint Venture Agreement model. If a joint venture wants to develop its own Joint Venture Agreement, it may do so, provided the minimum provisions mentioned above are included.

Some issues that are most often raised by company legal counsel in negotiating the Joint Venture Agreement include the following:

(1) Who will hold title to intellectual property?

(2) How are revenue streams to be divided?

(3) What indemnification provisions will be acceptable to all parties?

(4) Who will be the spokesperson for the joint venture?

(5) Who authorizes licensing agreements?

(6) Who handles the billing to NIST and brings issues to NIST's attention?

(7) What will happen during the course of the project if one party drops out and/or another party wishes to join?

(8) Who will coordinate writing the quarterly reports to be submitted to NIST/ATP?

(9) Who will track progress against technical milestones to bring issues to the attention of the joint venture and NIST/ATP?

(10) In what capacity is a government laboratory participating? If as a joint venture partner, is the government laboratory willing to execute the Joint Venture Agreement? (NOTE: If it is not willing to execute the Joint Venture Agreement, the government laboratory may participate as a subcontractor under a separate agreement [e.g., a CRADA] with the Joint Venture Administrator.)

(11) How will disputes be handled should they arise?

(12) How will project expenses be reported by joint venture participants to the Joint Venture Administrator for reporting to NIST?

(13) Will the joint venture participants be required/need to share commercialization strategies? At what level of detail to succeed?

Before investing a large effort in planning technical work for a joint venture, companies are urged to obtain a legal review of the sample Joint Venture Agreement by all participants. If it appears likely that reaching an agreement to the provisions contained in the sample Joint Venture Agreement and Intellectual Property Plan will be contentious, ATP urges you to carefully consider whether the joint venture is feasible. If there are questions, your legal staff may contact the Office of the NIST Counsel at 301–975–2803.

ATP strongly recommends that the person who signs the proposal submission be someone at a high enough level in the company to be able to deal effectively with the kinds of legal and policy concerns that are necessary to execute a successful Joint Venture Agreement. It is often helpful if this same individual signs th Joint Venture Agreement on behalf of the le company if the project is selected for fundin This individual must coordinate with top management within his/her own company ar participating companies/organizations about their commitment and proposed cost-share contribution to the proposed project.

3. Both Single Company and Joint Venture

a. **Budget Narrative (see Exhibit 10) (for Gate 2 submission).** The Budget Narrative is used by technical, business, and grants staff to determine reasonableness and allowability of costs in an ATP proposal. Proposed costs mus be reasonable, allocable, and allowable in accordance with applicable federal cost principles and ATP guidelines.

ATP recognizes that unexpected events may occur in R&D projects and that budgets may need to be changed as a project proceeds. Providing a multi-year budget beyond the first year will not lock the proposal into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. In stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated as long as you obtain the required prior approval from the NIST Grants Officer. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project and the spirit of the original proposal objective is maintained.

...is inevitable, recipi-
...to submit a revised
...ginning of each year of

...ompleteness.

b. **Foreign-Owned Company Questionnaire (see Exhibit 11) (for Gate 2 submission),** if the recipient, including any joint venture participant, is foreign owned.

c. **R&D Work Performed Outside the United States by the Recipient or Subcontractor Questionnaire (see Exhibit 12) (for Gate 1 submission),** if the recipient, including any joint venture participant, or subcontractor will perform work outside the United States.

CHAPTER III

Guidelines for Preparing Project Narrative

A. Gate 1 Project Narrative Content

Executive Summary (no more than two pages)

A one- or two-page Executive Summary briefly highlighting the major sections of the Project Narrative must be submitted at the time of the initial proposal submission (Gate 1). This Executive Summary is not included in the page count for the proposal. The Executive Summary should address the ATP selection criteria as follows:

a. Scientific and Technological Merit

   (1) Technical Innovation

   (2) High Technical Risk With Evidence of Scientific Feasibility

   (3) Detailed Technical Plan

b. Potential for Broad-Based Economic Benefits

   (1) National Economic Benefits

   (2) Need for ATP Funding

   (3) Pathway to Economic Benefits

In the Executive Summary, explicitly link the technical objectives, the eventual planned commercial application of the technology, and the expected economic benefits so that the path from the technical objectives to the benefits is clear.

Scientific and Technological Merit Project Narrative (no more than 20 pages for a single company and no more than 30 pages for a joint venture)

The Project Narrative includes the detailed information that must be provided with the Gate 1 proposal to address the scientific and technological merit selection criterion. The scientific and technological merit portion of the Project Narrative may not exceed 20 pages for a single company and 30 pages for a joint venture, out of the total page count of 24 and 35 pages, respectively (4 pages out of the 24-page limit for the single-company proposal and 5 pages out of the 35-page limit for the joint venture are to be used to address the preliminary information in response to the potential for broad-based economic benefits selection criterion). The Gate 1 submission should also include a list of bibliographic technical references. This list is not included in the page limit.

The scientific and technological merit selection criterion includes the innovations in the technical development, technical risk with evidence of scientific feasibility, and the quality of the detailed technical plan. All three items must be addressed successfully for a proposal to pass Gate 1. The proposal must clearly state or clearly describe how the proposed technology and/or the technical approach are highly innovative. The proposal must also clearly state or clearly describe how the research is challenging, with high technical risk, and what the sound scientific rationale

is for the proposed approach to overcome these risks. The research must be aimed at overcoming an important problem(s) or exploiting a promising opportunity. The research must have strong potential for advancing the state of the art and contributing significantly to the U.S. scientific and technical knowledge base. The project team must be qualified to conduct the R&D and must have access to the necessary research facilities.

The following is a detailed discussion of the key information needed in the Project Narrative for assessing the quality of the proposal against this selection criterion. While the format below is not required, to be competitive a proposal must address all of these key points. ATP reviewers are technically knowledgeable about the topics discussed in the proposal; however, the reviewers will only have what is written in the proposal to evaluate the project against the ATP criteria.

Proposals must include significant proprietary information to be competitive. ATP takes protection of that proprietary information very seriously. ATP screens reviewers for conflicts of interest and requires reviewers to sign nondisclosure agreements. In addition, proposals are securely stored and tracked to further ensure that the proprietary nature of the proposal is protected.

Following the Executive Summary, to start the Gate 1 narrative portion, it is good practice to include an introduction describing the overall problem and why others have not solved it. This overview can describe the technical problem faced by industry and the context for the innovation and/or the technical barriers that limit economic growth in the industry and prevent the problem from being solved.

Diagrams, flowcharts, and tabulated summaries are good tools to help communicate the innovation, risk, and technical plan for the proposed project. All diagrams, flowcharts, pictures, tables, and other illustrations **are** included in the page count.

NOTE: ATP does not pay for product development. Product development includes incremental or routine enhancement of existing products or processes. Product development also includes straightforward applications of existing technology or technologies in new prototypes or products.

The following information is necessary for evaluation against the criterion:

Scientific and Technological Merit Criterion: Technical Innovation—The proposal must convince expert reviewers that the project involve a high level of technical innovation. ATP defines innovation as providing a unique approach to developing new-to-the-world prototypes of products or processes. The proposed innovation may relate to the objectives of the research or to the approach to achieving those objectives, or both; innovation may be in what is to be accomplished as well as in how it will be accomplished. The innovative approach can be completely novel or a novel integration of existing or new technologies. ATP looks for technical innovation that is revolutionary, not an incremental or evolutionary next step for existing technology. This innovation should be disruptive (revolutionary) with respect to the state of the art.

- **Technical Barriers**—Describe the technical barriers that prevent technical improvement in industry in this area.
- **Proposed Solution/Technical Objectives**—Describe the proposed solution to the identified problem and describe why it is innovative. For projects involving the development of a prototype, provide schematics of the envisioned system, system diagrams, or system architecture as appropriate. Make clear how the proposed innovative solution will overcome the technical barriers.
- **Technical Targets**—Identify the measurable success criteria for the proposed technology development efforts. Provide quantifiable measures. These measures should be explained.
- **Key Factors Chart**—Summarize in a table the key technical factors (or variables) associated with the approach, the proposed quantitative

Table 1: Key Factors (Example)

Key Factors	Proposed Technical Targets	Requirement for Commercial Success	Current Practice	Associated Technical Barriers	Innovative Technical Approaches
Oxygen permeability of carbon nanotubes	10^{-5} mL per m^2 day at 25 o^C, 1 atm, & 90% RH	10^{-2} mL per m^2 day at 25 o^C, 1 atm & 90% RH	10^{-1} mL per m^2 day at 25 o^C, 1 atm, & 90% RH	Loss of oxygen barrier properties at high humidity	New composite materials
Percent of speech recognized	99.9%	99%	70%	Range of accents	New approach to recognizing inflection
Noninvasive glucose sensor	50% improvement in accuracy and precision over current method metrics	25% improvement in accuracy and precision over current methods	Invasive in vivo methods	Calibration and reliability	Noninvasive in vivo device

targets for those factors, the minimum requirements for commercial success for those factors, current practice, associated technical barriers to reaching the targets, and the innovative approach **(see Table 1).**

- **Technical Competitors**—Discuss why the proposed solution has not previously been attempted or accomplished. Show how the proposed solution is particularly innovative relative to alternative approaches being pursued by foreign and domestic competitors or elsewhere within the proposing team's organization(s). Cite relevant patents and the open literature to support this discussion. Ignoring state-of-the-art knowledge and ongoing work by others and within the proposing team's organization(s) may lead reviewers to assume that the proposer is not aware of existing work. Identifying existing efforts helps to ensure that the proposed work does not duplicate these efforts. Discuss the expected state of the proposed technology at the end of the ATP project relative to competitors' expected capabilities at that time, if the project is successful.

- **Impact on the U.S. Knowledge Base/ Technical Leverage**—Successfully accomplishing the proposed research and surmounting technical challenges should result in a dramatic change in the future direction of the technology. This "path change" should be a major leap forward, advancing the state of the art. Summarize the impact, or technical leverage, of successfully accomplishing the proposed research and overcoming the high technical risks. Technical leverage is the possibility of using the research results beyond the initial applications proposed. Describe the potential usefulness and benefits of partial results or knowledge gained from a project even if it is not completely successful.

Scientific and Technological Merit Criterion: High Technical Risk With Evidence of Scientific Feasibility—Successful proposals must effectively balance high technical risk with evidence of scientific and/or engineering feasibility for overcoming that risk. ATP funds projects that seek to overcome extremely difficult technical challenges that make success uncertain. Many proposals are

not competitive because the proposal does not discuss the specific technical risks embodied in the proposed research in sufficient detail or the proposal cites only routine risks common to all technology development efforts in a field.

- **Technical Risk**—Describe the technical challenges and assess the probability of success of the project approach(es). Characterize the major technical tasks, including those performed by subcontractors, with respect to technical risk. Identify and analyze the high-risk tasks. Risk may be high in the development of one or more single innovations, the integration of disparate technologies, or both. Surmounting the technical challenges should result in a dramatic change in the future direction of the technology. The technical risks cited should be recognizable and credible to experts in the field. Note that ATP does not consider marketplace acceptance to be a technical risk.

- **Feasibility**—Demonstrate that the technical approach is feasible by documenting that there is a sound scientific and/or engineering foundation or rationale for the proposed approach. This foundation comes from early research evidence such as a proof of concept, experimentation, or sound theoretical thinking. Cite relevant patents, the open literature, and experimental results as appropriate to support the discussion. ATP does not fund projects that are predominantly basic discovery science. In addition, ATP does not fund projects that violate sound scientific principles (e.g., the second law of thermodynamics).

Scientific and Technological Merit Criterion: Detailed Technical Plan—The technical plan must explain how the technical objectives will be reached. It should address all the anticipated technical problems and describe how these problems will be handled. ATP has only the written technical plan to evaluate how the proposed results will be achieved. Many proposals are not competitive because, although the meritorious technical goals are emphasized, the proposal provides only a vague plan on how to reach those goals. It is not adequate merely to describe the established technical barriers and provide only an overview the research path using standard scientific or engineering methods. ATP requires a more detailed technical plan to evaluate how the goals will be met. The project proposal will provide the basis for project management should an award be issued. For a proposal to be competitive, ATP must be able to track the project from initial idea to the end of the project results. A detailed technical plan is, therefore, critical for effective project management and good communications between the ATP Project Manager and the project Principal Investigator.

- **Technical Approach**—For a proposal to be competitive, the elements of the technical plan must fit together in a reasonable way to instill confidence that the proposing team can implement the proposed approach. The following plan elements are needed:

  - ☐ **Multi-Disciplinary Knowledge**—Most projects require a multi-disciplinary approach to overcome technical barriers. Discuss how the cross-disciplinary knowledge and capabilities required for the project's success will be available when needed. Describe how the views and constraints of suppliers, considerations of manufacturability, requirements of customers, regulatory concerns, safety issues, environmental impacts, and so forth will be taken into account in the technical plan. Describe how the necessary scientific, engineering, and business knowledge will be available when needed.

  - ☐ **Tasks and Subtasks**—Discuss how the work will be organized into tasks and subtasks. Provide clear descriptions. Include tasks and subtasks performed by subcontractors and clearly identify these subcontractors if known at the time of proposal submission. If the subcontractor is not known, provide the qualifications needed to perform the proposed subcontract work. Explain the technical rationale for the major tasks. Clearly link tasks to the budget and to the subcontracts (where

appropriate). Highlight major risks and innovations inherent in specific tasks and the strategies for managing unexpected results.

Interrelationship of Tasks—Discuss how the tasks link to one another, which tasks depend on others, which tasks are sequential, and which tasks would be done in parallel.

Metrics—Provide clear metrics for measuring the project's progress toward the overall technical goals. These metrics should be **quantitative and objective** and should relate to the project's technical objectives, targets, and success criteria.

Milestones—Provide appropriate interim and final milestones for each year of the technical plan and tie these to the metrics. Milestones are critical for tracking progress made in the project. Include a discussion of the testing strategy for critical milestones. An example showing the linkage between milestones, metrics, and timing is provided in **Table 2.**

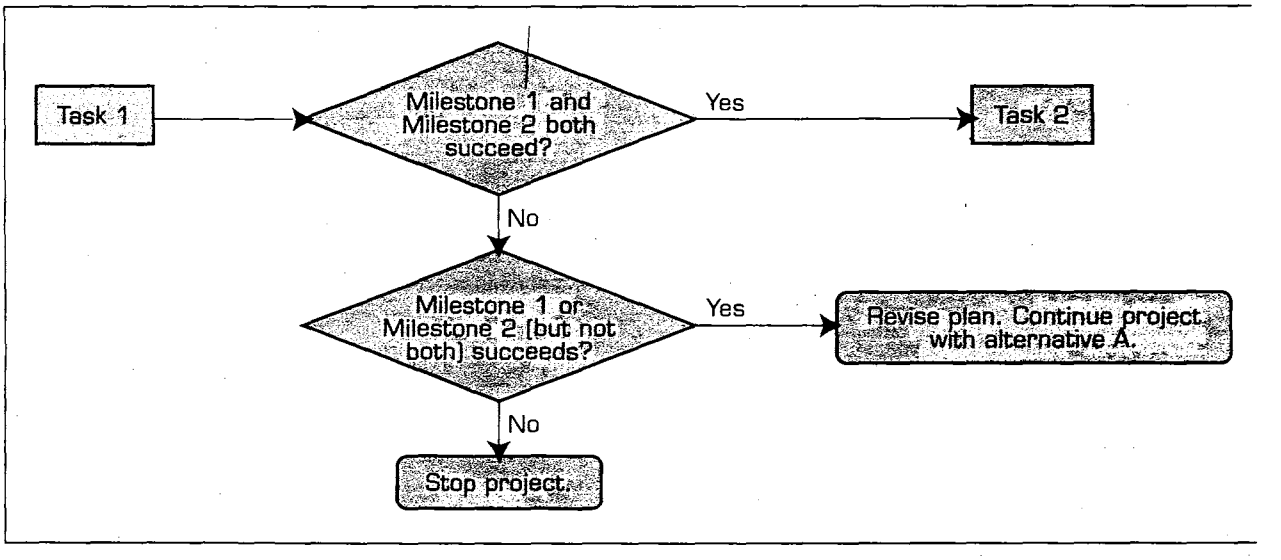
Contingency Plans/Alternate Approaches—If appropriate, discuss any contingency plans or alternative technical approaches for carrying out key portions of the technical work. Tie these approaches to the decision-point strategy that follows. Highlight the level of risk and innovation inherent in the alternatives and compare them to the preferred approach. ATP may not accept alternatives that significantly change the technical risk or level of innovation.

- **Decision-Point Strategy**—Provide go-no-go decision points for the project. These can be discussed in specific tasks or separately relative to several tasks. Decision points describe conditions, in terms of milestones and metrics, that define when it is clear that a project or line of research has succeeded or failed. For example, the technical barrier identified as a risk was overcome or could not be overcome using the proposed approach. A decision point could involve a decision to use an alternative approach or to stop the project. Projects that pursue more than one technical approach in parallel must discuss how the decision to select among those approaches will be made and when it will be made in the decision-point strategy. A good decision-point strategy identifies the first go/no-go decision points within the first year of a project. Risks, milestones, metrics, and decision points must be linked in the decision-point strategy. A decision-point tree or critical-path chart may be very helpful to communicate this information. One example of a decision-point strategy is given on page 26. There are many other ways to effectively portray the information.

Table 2: Key Milestone (Example)

Milestone	Timing	Metric	Minimum Value for Successful Result	Test Method	Decision
Handwriting recognition	End year 1	Percent of written input recognized	80%	Use of dataset: NIST hand-printed forms and characters	Continue with approach or switch to alternative

Decision-Point Strategy (Example)



- **Gantt Chart**—Include a Gantt chart showing tasks, subtasks, timing by quarter year, performers, and milestones. Performers are key personnel leading tasks and subtasks, and can be subcontractors, joint venture partners, or other team members. Indicate who will lead which task (**see Table 3**). In addition to the Gantt chart, the project tasks must be described in narrative form. It must be clear how the goals of the project will be achieved by those tasks.

- **Technical Experience and Qualifications**—Provide information about the key technical team members. Describe the quality and appropriateness of the technical staff assigned to the project, and the amount of time each individual will allocate to the project. Briefly highlight the education and experience of key personnel, including subcontractors. If a project proceeds to Gate 3, ATP may request two-page resumes or curriculum vitae (CV) from each key team member. If key staff will be hired, describe the qualifications needed for key positions not yet filled and the timeline for hiring these staff.

- **Adequacy of Facilities, Equipment, and Resources**—Discuss the research facilities and specialized equipment required. Identify what facilities, equipment, and resources already exist for use; what will be obtained through subcontracting; and what is needed even though sources are not yet identified. Provide the timeline for obtaining needed facilities, equipment, and resources.

- **Subcontracts**—Many projects include subcontracts to obtain key expertise, access to existing facilities, or specialized goods and services. Discuss what each subcontractor brings to the project. Clearly identify what each subcontractor will do and why that subcontractor was chosen. Discuss the relationship of the work to be done by the subcontractor to the technical plan. Discuss how subcontractor progress will be monitored and redirected as appropriate. Subcontracts can be used for carrying out research tasks or for the purchase of customized goods and services necessary for project participants to carry out their research tasks. ATP expects, however, that the proposer will direct and carry out key high-risk tasks. Projects with a significant portion of the work allocated to a subcontractor

ple 3: Gantt Chart (Example)

Tasks	Q 1	Q 2	Q 3	Q 4	Q 5	Q 6	Q 7	Q 8	Q 9	Q 10	Q 11	Q 12	Performers	Major Milestone and Metric
10 Task	----	----	----	----	----								Smith	
11 Subtask	----	M1											Subcontractor A	M1: Measure X must be greater than Y
12 Subtask		----	M2										Jones	M2: Material property P must be at least Z
13 Subtask		----	----	M3									Ahmed	M3: Test specific feature using described test plan
14 Subtask				----	M4								Wang	M4: Performance metric must exceed threshold
20 Task				----	----	----	----						Wilson	
21 Subtask				----	M5								Todd	M5: Component must be assembled
22 Subtask				----	M6								Jones	M6: Component must be assembled
23 Subtask						----	M7						Taylor	M7: Complete initial prototype
30 Task							----	----	----	----	----	----	Wang	
31 Subtask							----	---	----	M8			Ahmed	M8: Test system on specified dataset
32 Subtask									----	----	----	M9	Subcontractor B	M9: Complete final test scenario

may appear to be a "pass through" of funds from the proposer to subcontractors (who are not permitted to cost share) and will likely not be competitive. In system integration projects, the proposer should make clear how the proposer is involved in integrating the technologies and taking the system forward. This section should address how intellectual property issues will be handled to assure the reviewers that the proposer will be able to commercialize the system. Subcontractors can be other companies, universities, national laboratories, nonprofit organizations, or consultants. In the discussion, state the type of institution and work involved for each subcontract.

- **R&D Activities at Non-U.S. Sites**—ATP strongly discourages use of non-U.S. sites for research and development activities. In the event that the project includes work performed at a non-U.S. site, the proposer will need to provide **Exhibit 12,** R&D Work Performed Outside the United States by the Recipient or Subcontractor Questionnaire. If a portion of the project can only be carried out at a non-U.S. site because of the site's unique capabilities, explain the technical work to be done, the relationship of this work to the overall project, the cost of this work, and the unique capabilities associated with the non-U.S. site. Explain why equivalent work cannot be performed within the United States.

Potential for Broad-Based Economic Benefits—Preliminary Information (no more than four pages for a single company and no more than five pages for a joint venture)

The Gate 1 submission must fully address the scientific and technological merit selection criterion to satisfy the Gate 1 evaluation process. In addition, the Gate 1 submission must provide preliminary information addressing the potential for broad-based economic benefits criterion. Single companies are limited to four pages and joint ventures are limited to five pages for this additional information.

If ATP determines that the Gate 1 proposal has high scientific and technological merit, the proposal will advance to Gate 2. ATP will notify the proposer and ask for more detailed information to address the potential for broad-based economic benefits criterion within a prescribed time frame. Since the turnaround time is limited for the Gate 2 submission, ATP strongly encourages proposers to begin preparing this information early to ensure that sufficient time is allocated to finalize it and obtain required approval(s) within the proposing organization(s).

The proposal must clearly link the project's technical targets, commercial pathway, and economic benefits.

The Gate 1 submission should provide a brief overview of the following information required tc address the potential for broad-based economic benefits criterion:

Potential for Broad-Based Economic Benefits: National Economic Benefits

- Explain the business opportunity and identify the future users of the technology.
- Describe the economic significance of the project.
- Describe any additional benefits such as the following: quality-of-life benefits, environmental benefits, health benefits, improved security, or energy savings.
- Quantify the magnitude of the improvement over current technology. Discuss how successful commercialization will benefit the proposing company, customers, competitors, industry, and others.

Potential for Broad-Based Economic Benefits: Need for ATP Funding

- Describe the efforts that have been made to obtain funding for this project from other

sources (e.g., internal, private, or other federal agencies) and the results of those efforts.

Describe how ATP funding would change the scope, scale, and/or timing of the research effort.

Potential for Broad-Based Economic Benefits: Pathway to Economic Benefits

Describe the initial planned product incorporating the technology and the commercialization plan for bringing the technology into the marketplace.

Describe how the proposing organization(s) will ensure that the technology will be broadly diffused.

Explain the planned organizational structure for the project.

Describe the experience and qualifications of the business staff who will work toward achieving the commercialization goals. Note that salaries for the project's business staff cannot be part of the project budget, as ATP cannot fund business development, commercialization, or product development.

B. Gate 2 Project Narrative Content

Potential for Broad-Based Economic Benefits (no more than 15 pages for a single company and no more than 20 pages for a joint venture)

The Gate 1 proposal addressed the scientific and technological merit selection criterion to demonstrate the quality of the proposed research. The Gate 2 proposal addresses the potential for the broad-based economic benefits selection criterion to demonstrate the benefit for the nation beyond the returns to the proposer.

Detailed information must be provided with the Gate 2 submission to address this selection criterion. The detailed information to address the criterion must not exceed 15 pages for a single-company project and 20 pages for a joint venture project. In addition, the Gate 2 submission should also include letters of support, letters of commitment, and letters of nonfinancial support as appropriate. (This information is not included in the page count.) The Gate 2 submission should also include a list of bibliographic references supporting business assertions or data. This list is not counted in the page limit.

The mission of ATP is to fund research projects with strong potential for delivering large economic benefits for the nation, beyond the returns to the proposer. While ATP funds cannot be used for product development or for other commercialization activities, proposals must provide a commercialization plan to show how the research will lead to economic growth. ATP determines the potential for broad-based economic benefits by assessing the proposal's information about the potential national economic benefits, the project's need for ATP funding, and the proposed pathway to achieving the economic benefits.

The proposal must make a convincing case that large national economic benefits will result from successful deployment of the technology, including benefits to the proposer and, more important, benefits to other organizations, users, industries, and the general public. The proposal must also provide evidence that the project needs ATP funding and that without ATP funding these benefits would not occur in the same scale, scope, or timing. In addition, the proposal must identify a commercialization pathway that will use existing markets or develop new markets to achieve the economic benefits. The plans for commercialization and diffusion of the technology provide the critical link between the technical plan and the large economic benefits for the nation that would be enabled by the proposed project.

The following key information is needed in the Gate 2 submission to assess the project against the potential for the broad-based economic benefits selection criterion. Although ATP business reviewers are experts familiar with related technologies and industries, the reviewers will only have what is written in the proposal to evaluate the project. Competitive proposals must include significant proprietary information. ATP takes protection of that proprietary information very seriously. ATP screens reviewers for conflicts of interest and requires reviewers to sign nondisclosure agreements. In addition, proposals are securely stored and tracked to further ensure that the proprietary information is protected.

Potential for Broad-Based Economic Benefits Criterion: National Economic Benefits—ATP seeks to fund broadly enabling technologies that are path-breaking in opening up possibilities for new markets and new industries, infrastructural in addressing industrywide problems, or multi-use in having applications across a number of industries. It is important that the proposal show how the proposed technology fits one or more of these categories. A strong case for government use of taxpayer funds for the proposed research must be made by demonstrating large benefits for the nation beyond those received by the proposing organization(s).

- **Business Opportunity**—Explain the business opportunity for the technology and how the technology addresses a problem of economic importance to the nation (e.g., why the technology will remove some major impasse that has been plaguing an industry).
- **Markets for the Technology**—Discuss the users of the technology, the expected size of the markets for the technology in the immediate future and the more distant future, and the growth trends for those markets. When describing market sizes, be sure to discuss the market for this technology specifically, not just the size of the industry or broader produ markets. For technologies that could enable new industries and new markets, discuss the expected timeline and growth of these emerg ing markets and industries and what initial markets might exist. The federal government should not be the primary, or only, buyer of the technology but could be one customer or user.
- **Source of Benefits**—Show how the proposir company or joint venture will benefit from the proposed technology. Show how others, including potential customers, competitors, suppliers, and the general public, will benefit Describe any performance and quality gains and cost savings to the proposing company or joint venture and to others. Describe any health, safety, or environmental benefits. Describe any potential for synergies with wh: others are doing or with market directions.
- **Magnitude of Impact**—Quantify the magnitude of the advantage enabled by this project in terms of its economic and business benefit. For example, benefits could be lower cost per unit to manufacture, improved fuel efficiency, or reduced time to produce software. Document societal and quality-of-life benefits and quantify these, if possible. For example, a new treatment for a disease can save costs through shorter hospital stays and quicker returns to work, but it can also provide quality-of-life benefits in less painful side effects than other treatments. Be as quantitative as possible.

Be clear in the discussion about the marginal difference, or "added value," that ATP funding makes in realizing the economic benefits of the proposed project. In general, ATP cares about the specific competitive advantage of the technology and the spectrum and number of users who will benefit in addition to well-supported projections of impact.

Potential for Broad-Based Economic Benefits Criterion: Need for ATP Funding—Explain why the project needs taxpayer funds and why full

private funding is not available. Tax dollars are used for the benefit of the nation and only secondarily for the benefit of the individual company. An overview of this section should be provided in item 15 of Form NIST-1262 or Form NIST-1263 accompanying the proposal. Be sure that the answer provided in item 15 is consistent with the discussion in the Gate 2 proposal (but do not just duplicate the information given in item 15). Include at the end of the proposal any letters corroborating the proposer's efforts to secure other funding.

- **Private Sources**—Document past efforts to secure private funding. Describe attempts to obtain external private funding (e.g., venture capital, angel investment). Describe the decisionmaking process and priorities for allocating internal research funds. Provide the reason those efforts were not successful.

- **Government Sources**—Describe any other government agencies that are funding this area of technology, if known. Describe any past or current submissions to other federal agencies and the outcome or current status of those submissions. Discuss why other government sources are not available and/or why other federal funding was not sought for this project.

- **Industry Partners**—Describe any efforts made to seek full or partial funding from industry partners. Be specific in the response including specific companies that were approached and the reasons for their rejection. If industry partners were not sought, explain why.

- **Difference in the Project Due to ATP Funding**—Describe the difference ATP funding will make to the proposed research. Be specific in terms of scale, scope, and timing of the project.

- **Difference in the Economic Benefits Due to ATP Funding**—Describe how the difference in the proposed research discussed above would impact projected economic benefits. This discussion should not repeat information provided in the economic benefits section but should give supporting information as to how the changes in the research discussed above will impact the benefits stream. For example, delaying the research results could cause the project to miss a market window, or reducing the scope of the project could eliminate significant features of the technology, thereby reducing its benefit to customers.

Potential for Broad-Based Economic Benefits Criterion: Pathway to Economic Benefits—ATP expects the proposing organizations to take the lead in commercializing the technology. The proposal needs to provide a credible, complete pathway to the benefits described and must detail how the technology will be put into use.

- **Commercialization Plan**—Discuss how the technology will enter the market. ATP anticipates that the pathway to economic benefits will generally begin by entry of new/improved products, processes, and services into the marketplace. Whether a large or small company, the proposer must address commercialization, including the plan to achieve market success. For successful proposals, commercialization is planned at the outset, and business staff are involved at the proposal writing stage. For large companies, indicating that the technology will be passed to an internal sales and marketing division or providing a generic plan is not enough. The proposal must document the specific plan to commercialize the technology successfully. For small companies, include plans to build the necessary business infrastructure and alliances to be successful. Understand that a fantastic technology may capture the imagination but not necessarily the market. History has many examples of great technology losing out to an inferior competitor because of marketing failure. Path-breaking technologies may, in the long run, lead to the development of new markets and industries; however, the proposer will need to survive in the short run to achieve this long-term vision. Be sure to discuss both long-term

market development and more immediate markets that will help bring in revenues to sustain and grow the company.

- **Strategic Vision**—Describe the company's strategic vision. Indicate where the company plans to be in 5 years. The commercialization plan should fit the company and its expected resources.
- **Products and Market**—Demonstrate an understanding of the market opportunity. Identify the planned initial products, processes, or services and how these incorporate the technology. Provide the business advantage of the proposed technical approach over other competitors. Discuss potential competitors, the key drivers and players for this market, and what technology they bring to the problem. Assess strengths, weaknesses, and opportunities from a competitive standpoint. Describe company strengths for capitalizing on the advantages of the proposed new technology and overcoming challenges in confronting the current ways of doing things.
- **Window of Opportunity**—Identify the window of opportunity for the planned product. Identify when the planned product will enter the market. Indicate how long a competitive advantage can be maintained as a result of successfully developing the proposed technology. Explain to what extent this is a leap beyond what competitors will have.
- **Strategy for Bringing the Product to Market**—Describe the company's strategy for bringing the product into the market. Be as specific as possible. Some examples might be licensing to pharmaceutical companies, direct sales, or contract manufacturing.
- **Strategic Alliances and Early Adopters**—Discuss the role of strategic alliances and marketing arrangements in the commercialization plan. Identify the types of partners needed for commercializing the product. If any of these partnerships are already in place, provide letters of suppoi for the new technology at the end of the Gate 2 proposal. For partnerships that are not yet in place, identify specific needs and the timing necessary for those arrangements for the commercialization to be successful. Identify potential partners, if known.
- **Pricing and Sales**—Describe the pricing strategy for the planned product and the rationale for choosing that strategy. Indicate the magnitude of sales anticipated and the timing of those sales.
- **Investment Strategy**—Indicate what investment will be needed to commercialize the technology and from where that investment will come.

ATP recognizes that the inability to achieve full technical success, as well as unanticipatec developments in fast-moving markets, can change opportunities and alter plans. Discuss the possibility of adjustments to the commercialization plan in response to different or changing conditions. Some path-breaking technologies have the potential to lead to the development of new markets and industries. Companies commercializing these technologies have the added challenge of describing how they will foster the growth of these new markets and industries.

- **Intellectual Property Protection and Broader Diffusion**—Describe how the research results and contributions to the U.S. technology base will diffuse beyond the proposing organization while maintaining ownership of core knowledge needed to commercialize the project's technical results. Discuss the planned use of patents, copyrights, trade secrets, and any other forms of intellectual property protection. Discuss any planned strategy for publishing or

disseminating the technical results. Describe licensing strategies outside the core application areas discussed in the commercialization plan. ATP is interested in these indirect paths as well as the paths to direct customers because they often expand opportunities for intra- as well as interindustry diffusion. ATP encourages the protection of proprietary information to maintain incentives for the commercialization of the technology. ATP also expects that the proposing organization will take specific steps to diffuse the new technology broadly.

Company Commitment—Describe the company's commitment to the ATP project. This commitment includes the resources to be brought to the ATP project: financial, time commitment of key people in the organization, equipment, and dedicated facilities. Commitment can also be demonstrated in the priority this project is given relative to other company activities. Describe the relationship of this project to the company's strategic vision and direction. Provide evidence of commitment from senior management to the project. For single-company projects, a letter of commitment from an authorized senior executive of the company should be included in the letters of support at the end of the Gate 2 proposal. For joint ventures, letters of commitment verifying the availability of cost-sharing funds must be submitted from all participants in the joint venture. If there are commitments from regional, state, or local agencies or private sources of capital to contribute cost-sharing funds, indicate the nature of those arrangements and give evidence of the commitment. NOTE: Subcontractors may not provide cost share.

Organizational Structure and Project Management—Provide evidence of a solid organizational structure that makes sense for the company, project, and management plan. The role of each partner in a joint venture and each subcontractor on the project should be clear. Indicate the reporting relationships and responsibilities for technical and commercialization activities. Identify known weaknesses in organizational structure and how they will be overcome. Planning a complex joint venture or a single-company project will likely involve collaborative activities and relationships with other organizations.

- **Business Experience and Qualifications**—Describe the business staff who will be working on the commercialization activities for the technology. While ATP funds cannot be used for product development and other commercial activities, ATP funding decisions are based in part on a consideration of the opportunities for commercial success. Indicate the amount of time each individual on the business staff will allocate to the project; however, time spent on commercialization activities may not be included in the budget. Briefly highlight the education and experience of key staff. Discuss relevant past commercialization performance of the company and/or key staff and describe other unique capabilities and experience. If the proposal proceeds to Gate 3, the proposer may be asked to supply two-page resumes or CVs for the key business staff.

- **Organizational Information**—ATP needs to know about the current status of the companies involved in a project it might fund. Provide information about how the proposing organization(s) is organized, financial information, past experience, and related government work. Should the proposal proceed to Gate 3, more information will be required.

  - **Date and State of Incorporation**—Provide the date of incorporation and the state in which the company is incorporated. For startup companies, this could be information for the planned incorporation.

  - **Previous Federal Awards**—Provide a list of all previous federal R&D contracts, grants, and other awards for the previous 5 years and all pending federal awards. For example, provide a list of the Small

Business Innovative Research (SBIR) grants received for the previous 5 years. Include the name of the project, the funding agency/organization, the principal investigator, and the federal government contact's name and phone number.

- **Source of Cost Share**—Describe how the company will obtain the necessary funds to meet the direct cost match, if any, and/or the indirect costs listed in the project budget. Remember that once a cost-share rate is proposed, it cannot be decreased.
- **Financial, Employment, and Ownership Information**—Provide information about the financial status, current employees, and ownership of the proposing single company or for each member of a proposed joint venture. See **Table 4** for the required format. If the proposal is selected as a semifinalist, the proposing single company or, for a joint venture, each joint venture member will be asked to provide financial statements if it is not a public company. Public companies will be asked for copies of their most recent 10-K or annual report.

EXHIBITS

The required forms and other proposal-related documents follow this page. All of the forms and documents are available on the ATP website at http://www.atp.nist.gov/atp/helpful.htm.

1. Checklist/Reminders for Submission of an ATP Proposal
2. Human Subjects Determination Checklist
3. Form NIST-1262 (Pages 1 & 2): Single-Company Advanced Technology Program (ATP) Proposal Cover Sheet
4. Form NIST-1262 (Page 3): Estimated Multi-Year Budget—Single Company
5. Form NIST-1262 (Page 4): Subcontracts
6. Form NIST-1263 (Pages 1 & 2): Joint Venture Advanced Technology Program (ATP) Proposal Cover Sheet
7. Form NIST-1263 (Page 3): Estimated Multi-Year Budget—Joint Venture
8. Form NIST-1263 (Page 4): Other Joint Venture Participants
9. Form NIST-1263 (Page 5): Subcontracts
10. Budget Narrative
11. Foreign-Owned Company Questionnaire
12. R&D Work Performed Outside the United States by the Recipient or Subcontractor Questionnaire

CHECKLIST/REMINDERS FOR SUBMISSION OF AN ATP PROPOSAL

A. SINGLE COMPANY (also complete items under C and D below):

1. No indirect costs are included in the ATP funds requested.
2. If a large company (annual revenues in excess of $3.034 billion), cost sharing is at least 60 percent of total yearly project costs (direct plus all of the indirect costs).
3. Total project duration does not exceed 3 years.
4. Total ATP funding does not exceed $2 million.

B. JOINT VENTURE (also complete items under C and D below):

1. Cost sharing is more than 50 percent of total yearly project costs (direct plus indirect costs).
2. Total project duration does not exceed 5 years.
3. At least two separately owned, for-profit companies are substantially involved in the R&D and both are contributing to the cost share.

C. SINGLE COMPANY AND JOINT VENTURE:

1. Amounts on page 3 of NIST-1262 and NIST-1263 add up and match amounts in Budget Narrative.
2. Total value of in-kind contributions does not exceed 30 percent of nonfederal share of total project costs.
3. Information on page 4 of Form NIST-1262 and page 5 of Form NIST-1263 (Subcontracts) corresponds with information in the Project Narrative and Budget Narrative.
4. **GATE 1 AND GATE 2 SUBMISSIONS:** 16 copies of the proposal (1 original, signed, bound proposal plus 15 copies [1 unbound and 14 bound]).
5. **GATE 1 SUBMISSION:**

   ☐ a. Form NIST-1262 (all four pages) or Form NIST-1263 (all five pages).

   ☐ b. Executive Summary.

   ☐ c. Project Narrative: Scientific and Technological Merit—Detailed information addressing the scientific and technological merit selection criterion including the following:

   ☐ (1) Technical Innovation—Detailed information describing the proposed innovation, why it is innovative, technical barriers that prevent technical improvement in this

area, the technical objectives and targets of the proposed research, technical competitors, and impact on the U.S. knowledge base of the proposed research.

☐ (2) High Technical Risk With Evidence of Scientific Feasibility—Detailed information about the technical risks of the research, and the scientific foundation or rationale for the approach.

☐ (3) Detailed Technical Plan—Detailed plan explaining how the targets and objectives will be achieved, including task and subtask descriptions, task interrelationships, metrics, milestones, decision points, alternate approaches, qualifications of key personnel, information on facilities and information on subcontractors.

☐ d. Project Narrative: Potential for Broad-Based Economic Benefits—Preliminary information addressing potential for the broad-based economic benefits selection criterion.

☐ e. List of bibliographic technical references including patent citations, if applicable.

☐ f. R&D Work Performed Outside the United States by the Recipient or Subcontractor Questionnaire, if applicable.

☐ 6. **GATE 2 SUBMISSION:**

☐ a. Form NIST-1262 (all four pages) or Form NIST-1263 (all five pages).

☐ b. Budget Narrative.

☐ c. Project Narrative: Potential for Broad-Based Economic Benefits—Detailed information addressing potential for the broad-based economic benefits selection criterion including the following:

☐ (1) National Economic Benefits—Detailed information describing the potential benefit to the U.S. economy from the invention, including a discussion of the business opportunity, market for the technology, source of the economic benefit, and the magnitude of the economic impact.

☐ (2) Need for ATP Funding—Detailed information describing the company's efforts to obtain funding from other sources for the project and the difference that ATP funding would make, consistent with the information supplied in response to question 15 on Form NIST-1262 or Form NIST-1263.

☐ (3) Pathway to Economic Benefits—Detailed information describing the company's commercialization plan including its strategic vision, proposed product, window of opportunity, customers, and strategic alliances. Also, detailed information about the company's plans to protect the intellectual property and diffuse the technology, as well as the company's commitment to the project, organizational structure, business experience, and general organizational information.

☐ d. List of bibliographic references supporting business assertions or data.

☐ e. Letters of support.

☐ f. Letters of commitment.

☐ g. Letters documenting efforts to secure other funding.

☐ h. Foreign-Owned Company Questionnaire, if proposer or any joint venture participant is foreign-owned.

ADDITIONAL DOCUMENTS REQUIRED FOR GATES 1 AND 3: If the research involves human and/or animal subjects, please refer to the booklet titled *Advanced Technology Program Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects,* which can be obtained at http://www.atp.nist.gov/atp/kit-04/has_guide/contents.htm or by calling 1–800–287–3863. A Human Subjects Determination Checklist is included in this *Proposal Preparation Kit* (see **Exhibit 2**) to assist in determining whether the proposal may have human subjects involvement, which would require additional documents with the Gate 1 and/or Gate 3 submission. If the required information is not included with the proposal, the proposal may be deemed unacceptable.

NOTE: If a proposal is selected as a semifinalist, it advances to **Gate 3** and the following additional forms and documents will be required when requested by ATP and can be found at ATP's helpful resources website (http://www.atp.nist.gov/atp/helpful.htm), unless otherwise noted:

1. SF-424B, Assurances—Non-Construction Programs.
2. Form CD-511, Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying.
3. SF-LLL, Disclosure of Lobbying Activities, if applicable.
4. Form CD-346, Applicant for Funding Assistance
5. Financial Statement, if not a public company.
6. For joint ventures only, a Draft Joint Venture Agreement (http://www.atp.nist.gov/atp/jvsample.htm).
7. Budget Narrative for all subcontractors receiving $500,000 or more.

D. PAGE LIMITS:

Proposal Type	GATE 1	GATE 2
Single Company	**24 pages** (No more than **20** pages for detailed information addressing the Scientific and Technological Merit selection criterion and no more than **4** pages for preliminary information addressing the Potential for Broad-Based Economic Benefits selection criterion)	**15 pages** (detailed information addressing the Potential for Broad-Based Economic Benefits selection criterion)
Joint Venture	**35 pages** (No more than **30** pages for detailed information addressing the Scientific and Technological Merit selection criterion and no more than **5** pages for preliminary information addressing the Potential for Broad-Based Economic Benefits selection criterion)	**20 pages** (detailed information addressing the Potential for Broad-Based Economic Benefits selection criterion)

Exhibits

Page limits **EXCLUDE** Forms NIST-1262 and NIST-1263, Budget Narrative, Executive Summary, list c bibliographic technical references, list of bibliographic references supporting business assertions or data, Foreign-Owned Company Questionnaire, R&D Work Performed Outside the United States by the Recipient or Subcontractor Questionnaire, letters of commitment, letters of support, letters documenting effort to secure other funding, and any human and/or animal subjects documentation.

Page limits **INCLUDE** all text, diagrams, flowcharts, pictures, tables, illustrations, and resumes. To maximize pages for relevant technical and business information, the following suggestions are offered:

1. List data only for the key people and briefly highlight their education and experience. Do not include lengthy resumes for all people involved in the project.
2. Cite only those references that are particularly relevant to the ATP project. Do not include copies of published papers as appendices or lengthy lists of publications.
3. Do not include supplemental material not specifically requested in this *Proposal Preparation Kit,* either separate from or bound with the proposal.
4. Do not include company sales catalogs, financial statements (ATP will request these if the proposal is selected as a semifinalist), videotapes or audiotapes, presentation slides, and other marketing materials

HUMAN SUBJECTS DETERMINATION CHECKLIST

This checklist should be used to determine whether human subjects are involved in the research project and whether the research is exempt under the Department of Commerce regulations for the protection of human subjects found at 15 C.F.R. Part 27. A proposal may contain more than one research activity involving human subjects that requires different levels of review. This checklist should be used for each potential use of human subjects.

1. Is there an intervention or an interaction with a living person that would not be occurring or would be occurring in some other fashion but for this research? Examples: videotaping people, observing children using software, surveying manufacturing personnel during a pilot test of new equipment, gathering tissue or cells from human donors.

   [ ] Yes—Human subjects are involved. Go to question 3.

   [ ] No—Go to question 2.

2. a. Will data/information/specimens collected originally from people or about people be used in this research? Examples: broadcast video, Web-use logs, medical information, cells or tissues, survey questions.

      ☐ Yes—Identifiable human subjects may be involved. Go to question 2.b.

      ☐ No—Go to question 6. It appears that human subjects may not be involved in the project. However, an exemption determination may be required. Please review question 3 for additional information about research that may require an exemption determination.

   b. Does that information contain private information in a form in which the identity of the subject is or may readily be ascertained from the information? Examples: medical records, donor name or address, sales transaction records.

      ☐ Yes—Identifiable human subjects are involved. Go to question 3 to see if an exemption may apply. If you know that an exemption does not apply, proceed to question 5.

      ☐ No—Go to question 3. The research may not be within the scope of 15 C.F.R. Part 27; however, it may require an exemption determination to be made due to the use of data, recordings, or specimens that could be linked to humans without appropriate safeguards.

3. Do you think the research may either not be within the scope of 15 C.F.R. Part 27 or qualify for an exemption under 15 C.F.R. § 27.101(b)? The following questions will help you evaluate whether to request an exemption determination by ATP or provide documentation that the research may not be within the scope of 15 C.F.R. Part 27:

   a. Will the task involving human subjects use only existing data, recordings (audio or visual), or specimens? Examples: patient records, a company's customer data, Web-use logs, cells, or tissue.

      ☐ Yes—Go to question 3.d.

      ☐ No—Go to question 3.b.

b. Will the research plan involve normal educational practices such as instructional strategies or comparison of instructional techniques, curricula, or classroom management methods? Examples: observation of student-teacher interactions, video of instruction.

☐ Yes—Go to question 3.d.

☐ No—Go to question 3.c.

c. Will the research plan involve educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures, or observation of public behavior? Examples: broadcast video, software usage testing.

☐ Yes—Go to question 3.d.

☐ No—Go to question 5. This research is probably not exempt and will require Institutional Review Board (IRB) review and approval.

d. Do any of the data, recordings, specimens, or practices/procedures involve or come from a protected class? Protected classes include prisoners, children, pregnant women, human in vitro fertilization, fetuses, and nonviable fetuses or fetal sources of data, cells, or tissue. Examples: testing educational software with children, surveys of obstetric patients.

☐ Yes—Go to question 5. This research is probably not exempt and will require IRB review and approval.

☐ No—Go to question 3.e.

e. Are the data, recordings (audio or visual), or specimens publicly available? NOTE: Publicly available may include items for sale, items that are freely available to the public, or items that reside in the public domain. Examples: customer data sets, catalog orders of cells or tissues, donations of pathological specimens, shareware.

☐ Yes—Go to question 4. This research may be exempt under 15 C.F.R. § 27.101(b).

☐ No—Go to question 3.f.

f. Will the data, recordings (audio or visual), or specimens be stripped of all identifiable information that could be linked to a human subject prior to being received by the investigator?

☐ Yes—Go to question 4. This research may not be within the scope of 15 C.F.R. Part 27, or this research may be exempt under 15 C.F.R. § 27.101(b).

☐ No—Go to question 3.g.

g. Will information be recorded by the investigator in such a way that it can be linked to the human subject? Examples: Web-use logs tied to e-mail address, patient records, or specimens that include patient identifiers.

☐ Yes—Go to question 5. This research is probably not exempt and will need an IRB review.

☐ No—Go to question 4. This research may be exempt under 15 C.F.R. § 27.101(b).

4. An exemption under 15 C.F.R. § 27.101(b) may apply to the task, or the task may not be within the scope of 15 C.F.R. Part 27. In order to complete the necessary requirements for research considered exempt under 15 C.F.R § 27.101(b), please review the booklet *Advanced Technology Program Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects.* A copy of that booklet can be obtained on the ATP website at http://www.atp.nist.gov/atp/kit-04/has_guide/contents.htm or by calling 1–800–287–3863. Complete Appendix 3 and/or Appendix 4 in the booklet as required and submit with Gate 1 proposal.

5. An exemption probably does not apply to the proposed research and further documentation is required. Please review the ATP booklet *Advanced Technology Program Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects.* A copy of that booklet can be obtained on the ATP website at http://www.atp.nist.gov/atp/kit-04/has_guide/contents.htm or by calling 1–800–287–3863. See Appendix 5 in the booklet for required documentation list.

6. It appears that human subjects are not involved in this project. This checklist is only a tool for general guidance and does not constitute a final legal opinion from NIST on whether or not human subjects are involved, or whether or not an exemption determination under the regulations is needed. If upon NIST/ATP review of your proposal, it is determined that additional documentation is needed to reach a final determination, and your proposal is selected as a semifinalist (Gate 3), you will be asked to provide the additional documentation prior to an oral review.

13. CERTIFICATION: BY SIGNING THIS PROPOSAL COVER SHEET, I CERTIFY, TO THE BEST OF MY KNOWLEDGE AND BELIEF, THAT ALL INFORMATION IN PROPOSAL IS TRUE AND CORRECT AND THAT THE FOLLOWING QUESTIONS HAVE BEEN TRUTHFULLY ANSWERED:

		YES
A.	IS THIS PROPOSAL REQUESTING FUNDING FOR EXISTING OR PLANNED RESEARCH PROJECTS THAT WOULD BE CONDUCTED IN THE SAME TIME PERIOD IN THE ABSENCE OF FINANCIAL ASSISTANCE UNDER ATP?	☐
B.	IS THE COMPANY DELINQUENT ON ANY FEDERAL DEBT? (If yes, explain in item 14.)	☐
C.	WAS THIS PROPOSAL OR A VERY SIMILAR PROPOSAL SUBMITTED TO ANOTHER FEDERAL AGENCY? (If yes, explain in item 14.)	☐
D.	DOES THE PROPOSED R&D INVOLVE THE USE OF HUMAN SUBJECTS, AND/OR HUMAN TISSUE, AND/OR HUMAN CELL LINES? [If yes, explain in item 14, and indicate whether the research plan has been reviewed and approved by an Institutional Review Board (IRB).]	☐
E.	DOES THE PROPOSED R&D INVOLVE THE USE OF LIVE VERTEBRATE ANIMALS? (If yes, explain in item 14, and indicate whether the research plan has been reviewed and approved by an Animal Care and Use Committee.)	☐
F.	DOES THE COMPANY HAVE A PARENT COMPANY OUTSIDE THE UNITED STATES? (If yes, identify the parent company, its ultimate parent company, and the place of incorporation of parent company in item 14.)	☐
G.	IS THE COMPANY MAJORITY OWNED BY NON-U.S.CITIZENS? (If yes, explain in item 14.)	☐
H.	IS THE COMPANY SUBJECT TO CONTROL BY NON-U.S. CITIZENS? (If yes, explain in item 14.)	☐

14. REMARKS (Continue on a separate sheet if necessary.)

15. DESCRIBE BRIEFLY WHY FEDERAL ASSISTANCE IS NEEDED TO EMBARK ON THIS PROPOSED PROJECT. ALSO, DESCRIBE WHAT EFFORTS WERE MAD TO APPLYING FOR ATP FUNDING TO SECURE PRIVATE CAPITAL TO SUPPORT THIS PROJECT WHOLLY. NOTE: PROVIDING A GENERAL STATEMENT INDICA THE UNAVAILABILITY OF PRIVATE CAPITAL IS UNACCEPTABLE.

16. AUTHORIZED COMPANY REPRESENTATIVE (Type name and title.)	17. TELEPHONE NUMBER
18. SIGNATURE	19. DATE

INSTRUCTIONS FOR FORM NIST-1262 (Pages 1 & 2): SINGLE-COMPANY ADVANCED TECHNOLOGY PROGRAM PROPOSAL COVER SHEET

This form must be completed in its entirety and submitted with each single-company proposal. The authorized company representative who signs the form must have delegated fiduciary authority. By signing this form, the company representative certifies the company's commitment to pay all indirect costs and, if included as additional cost share, any direct costs; verifies the certification statements on the form; and attests to the accuracy of the proposal. The signature also signifies that the company representative has coordinated with top management within his/her own company about their commitment to the proposed project. Additionally, by signing the form, the company representative acknowledges that the proposal is being submitted with the agreement that ATP may use nongovernment reviewers if necessary. (Such reviewers are screened to eliminate conflicts of interest and are required to sign nondisclosure agreements.)

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to, a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number. The reason for collecting this information is for NIST to be able to perform the appropriate technical and business reviews of an ATP proposal. The information obtained will assist in determining eligibility for federal financial assistance. Responses to the collection of information are required to be considered for an ATP award. In accordance with the ATP legislation, information that is obtained by ATP or other Department of Commerce offices on a confidential basis about business operations and trade secrets possessed by any company will be protected by the government and shall be exempt from disclosure under the Freedom of Information Act.

1. Enter the competition number as stated in the *Federal Register* notice.

2. Enter your employer identification number (EIN). To obtain an EIN, see http://www.atp.nist.gov/atp/helpful.htm, or call 1–866–816–2065.

3. Enter your Dun and Bradstreet (D&B) number. To obtain a D&B number, see http://www.dnbmdd.com/mddi.

4. Enter the duration of the proposed work in years and months. **NOTE:** The maximum duration allowed for a single company is 3 years.

5. Enter the legal name, street address, city, two-letter state abbreviation, ZIP code, and website of the organization submitting the proposal. **(DO NOT USE A POST OFFICE BOX.)**

6. Enter the name, telephone number, fax number, and e-mail address of the Principal Investigator at the submitting organization who is responsible for the technical aspects of the proposal. Include the mailing address if it differs from that of the submitting organization.

7. Enter the name, telephone number, fax number, and e-mail address of the business manager at the submitting organization who is responsible for business matters. Include the mailing address if it differs from that of the submitting organization.

8. Enter the name, telephone number, fax number, and e-mail address of the grant/contract manager at the submitting organization who

is responsible for contract/grant administrative matters. Include the mailing address if it differs from that of the submitting organization.

9. Check all boxes that apply to identify the type of organization.

10. A. In each column, enter the total amount requested from ATP for each year, and enter the total in the last column. **NOTE:** The maximum amount of ATP funding to a single company is $2 million; ATP funds may only be used to fund direct costs.

10. B. In each column, enter the proposer's total cost sharing for each year, and enter the total in the last column. **NOTE:** Large companies must cost share at least 60 percent of the yearly total project costs (direct plus all of the indirect costs). Small and medium-sized companies must pay for all of their indirect costs and may elect to pay part of the direct costs.

10.C. In each column, enter the total for each year of the project, and enter the entire project total in the last column.

11. Enter the title of the proposal (90-character limit).

12. Enter a **NONPROPRIETARY** abstract of the proposed work. As part of the abstract, include a statement of the technical problem addressed in the proposal. This abstract may be used as the basis for a publicly distributed abstract should the proposal be selected for an award.

13.A. through 13.H. Answer each question by marking an "x" in the appropriate box.

A. Self-explanatory.

B. If the company is delinquent on any federal debt, including debt to the Internal Revenue Service (IRS), provide in item 14 the amount of the debt, the name of the federal agency to which the debt is owed, how old the debt is, the circumstances surrounding the establishment of the debt, and why the debt has not been paid.

C. If this proposal or a similar proposal was submitted to another federal agency, provide in item 14 the name of the federal agency, the date the proposal was sent to that federal agency, the name of the financial assistance program under which the proposal was submitted, the amount of federal funding requested, and the name and phone number of the agency contact person.

D. If the proposed R&D involves the use of human subjects, and/or human tissue, and/or human cell lines, explain in item 14 and indicate whether the research plan has been reviewed and approved by an Institutional Review Board (IRB). For further guidance, refer to the ATP Booklet *Advanced Technology Program Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects,* available at http://www.atp.nist.gov/atp/kit-04/has_guide/contents.htm.

E. If the proposed R&D involves the use of live vertebrate animals, explain in item 14 and indicate whether the research plan has been reviewed and approved by an Institutional Animal Care and Use Committee (IACUC).

F. If a company has a parent company outside the United States, identify the parent company and its place of incorporation in item 14. This includes LLCs where the ownership by foreign companies is 50 percent or more.

G. If a company is majority owned by individuals who are not citizens of the United States, explain in item 14.

H. If a company is subject to control by individuals who are not citizens of the United States, explain in item 14.

14. Provide any explanations to answers given in item 13 and any other remarks you wish to offer.

15. Describe briefly why your project needs ATP funding to embark on this project. Why is private capital not available or not possible? What efforts were made to secure internal R&D funding as well as external private capital? Be specific. **Providing a general statement indicating the unavailability of private funding is unacceptable.**

16. Enter the name and title of the authorized company representative submitting the proposal.

17. Enter the telephone number of the authorized company representative submitting the proposal.

18. The authorized company representative submitting the proposal must sign this form.

19. Enter the date the form is signed.

ESTIMATED MULTI-YEAR BUDGET—SINGLE COMPANY

	YEAR 1	YEAR 2	YEAR 3	TOTAL

G Other				
H Total direct costs (lines A thru G)				
I Total direct costs requested from ATP				
J Total direct costs shared by proposer (if any)	$	$	$	$
K Total indirect costs absorbed by proposer	$	$	$	$
L Total costs (lines H + K)	$	$	$	$
SOURCES OF FUNDS				
M ATP (same as line I)	$	$	$	$
N				
O				
P				
Q Total sources of funds (same as line L)	$	$	$	$
TASKS				
	$	$	$	$
Total costs of all tasks (same as line L)	$	$	$	$

INSTRUCTIONS FOR FORM NIST-1262 (Page 3): ESTIMATED MULTI-YEAR BUDGET—SINGLE COMPANY

Every item must be completed and reflect estimated costs for each year of the proposed project. Include a **TOTAL** budget, which consolidates all of the project years' costs.

OBJECT CLASS CATEGORY. List in each column the costs (rounded to the nearest whole dollar) associated with each object class category for each year of the proposed project. Enter the totals of the three columns in the last column.

A. **Personnel Salaries/Wages**—Enter the total salaries of full- and part-time personnel, excluding fringe benefits.

B. **Personnel Fringe Benefits**—Enter the total fringe benefits (vacation, sick leave, and military leave; health and life insurance; retirement, social security, etc.) associated with the personnel.

C. **Travel**—Enter the costs for transportation, including airfare, taxis, lodging, subsistence, and so forth.

D. **Equipment**—Enter the costs for general items of equipment. **NOTE:** ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the proposed scientific and technical project. Costs must be prorated if equipment or facilities will not be 100 percent dedicated to the ATP project during the project period.

E. **Materials/Supplies**—Enter the costs for expendable materials and supplies.

F. **Subcontracts**—Enter the costs for subcontracts. **NOTE:** Single companies may not subcontract to another part of the same company or to another company with identical ownership. Subcontractors, excluding those that provide goods and services, who receive more than $500,000 each are subject to the same audit requirements as the recipient. The cost of the subcontractor's audit should be included in the subcontracts category.

G. **Other**—Enter the costs for any other direct costs that do not fit into the direct categories above. The cost of the project audit should also be included in this category unless it is part of the indirect costs or to be performed by a cognizant federal audit agency. Audits must be performed in accordance with the *NIST Program-Specific Audit Guidelines for ATP Cooperative Agreements With Single Companies* (http://www.atp.nist.gov/atp/psag-co.htm). For nonprofit organizations subject to OMB Circular A-133, Audits of States, Local Government, and Non-Profit Organizations (http://www.atp.nist.gov/helpful.htm), the annual Circular A-133 audit is deemed to meet the ATP audit requirement. Audits must be conducted by an external auditor (CPA or a cognizant federal audit agency). For awards less than 24 months, an audit is required at the end of the project; for 2- and 3-year awards, an audit is required after the first year and at the end of the project. If a recipient has never received

federal funding from any federal agency, a certification will be required from a CPA to determine whether the recipient has a functioning financial management system that meets the provisions of 15 C.F.R. § 14.21. The CPA costs may be included in this category unless they are part of the indirect costs.

H. **Total Direct Costs**—Enter total direct costs.

I. **Total Direct Costs Requested From ATP**—Enter the amount of direct costs requested from ATP.

J. **Total Direct Costs Shared by Proposer**—Enter direct costs, if any, to be shared by the proposer.

K. **Total Indirect Costs Absorbed by Proposer**—Enter the total indirect costs to be charged to the proposed project. An indirect cost is any cost not directly identified with a single, final cost objective but identified with two or more final cost objectives or an intermediate cost objective. After direct costs have been determined and charged directly to the project or other work, indirect costs are those remaining to be allocated to the several cost objectives. Because of the diverse characteristics and accounting practices, it is not possible to specify the types of costs that may be classified as indirect costs in all situations. However, typical examples of indirect costs for many organizations include general administration, such as the salaries and expenses of executive officers; rent; utilities; personnel administration; maintenance; library expenses; and accounting. ATP shall interpret indirect costs in accordance with applicable federal cost principles.

L. **Total Costs**—Enter the total costs for the proposed R&D project.

2. **SOURCES OF FUNDS**

A.–D. List in the left-most column all sources of support (ATP first), and enter associated costs in the appropriate columns. Examples of non ATP sources of funds include company, state/local government, etc. Enter the totals of the rows in the last column.

E. **Total Sources of Funds**—Enter the total sources of funds in each column for each year (12-month period) of activity.

3. **TASKS**

A.–J. List in the left-most column all of the proposed tasks, and enter the associated costs in the appropriate rows. Enter the totals of the rows in the last column. Tasks should be a high-level aggregation of subtasks that have costs that can be easily updated as a group on an annual basis. ATP does not prescribe the appropriate number of tasks. If you have more tasks than the lines provide, make additional copies of this sheet to show the additional tasks. Task names and amounts must correspond with those in the Gantt chart in the R&D plan discussion.

K. **Total Costs of All Tasks**—Enter the total costs of all of the tasks in each of the columns for each year of activity.

SUBCONTRACTS

1. NAME AND ADDRESS OF SUBCONTRACTOR

NAME OF CONTACT:
TELEPHONE NUMBER:
FAX NUMBER:
E-MAIL ADDRESS:

2. ORGANIZATION TYPE (Mark one in column 1 and any that apply in column 2)

- ☐ PROFIT—SMALL BUSINESS
- ☐ PROFIT—MEDIUM BUSINESS
- ☐ PROFIT—LARGE BUSINESS
- ☐ NONPROFIT ORGANIZATION
- ☐ UNIVERSITY
- ☐ GOVERNMENT LABORATORY
- ☐ PUBLIC COMPANY (Ticker symbol _____)
- ☐ FOREIGN-OWNED, U.S.-LOCATED COMPAN
- ☐ FOREIGN-LOCATED ORGANIZATION

3. ESTIMATED AMOUNT OF SUBCONTRACT

4. DESCRIBE SCOPE OF WORK AND IDENTIFY WHICH TASK OR TASKS IN R&D PLAN REQUIRE SUBCONTRACTOR'S INVOLVEMENT.

5. IS THIS A SOLE-SOURCE SUBCONTRACT?

NO ☐ ES (If yes, explain why this subcontractor is the only one that can perform the work and the nature of its unique capability/experience.)

6. DOES THE SUBCONTRACTOR HAVE ANY FINANCIAL OR OTHER INTEREST IN THE SUBMITTNG ORGANIZATION?

NO ☐ ES (If yes, briefly explain what type and how much.)

7. DOES THE SUBMITTING ORGANIZATION HAVE ANY FINANCIAL OR OTHER INTEREST IN THE SUBCONTRACTOR?

NO ☐ ES (If yes, briefly explain what type and how much.)

1. NAME AND ADDRESS OF SUBCONTRACTOR

NAME OF CONTACT:
TELEPHONE NUMBER:
FAX NUMBER:
E-MAIL ADDRESS:

2. ORGANIZATION TYPE (Mark one in column 1 and any that apply in column 2)

- ☐ PROFIT—SMALL BUSINESS
- ☐ PROFIT—MEDIUM BUSINESS
- ☐ PROFIT—LARGE BUSINESS
- ☐ NONPROFIT ORGANIZATION
- ☐ UNIVERSITY
- ☐ GOVERNMENT LABORATORY
- ☐ PUBLIC COMPANY (Ticker symbol _____)
- ☐ FOREIGN-OWNED, U.S.-LOCATED COMPAN
- ☐ FOREIGN-LOCATED ORGANIZATION

3. ESTIMATED AMOUNT OF SUBCONTRACT

4. DESCRIBE SCOPE OF WORK AND IDENTIFY WHICH TASK OR TASKS IN R&D PLAN REQUIRE SUBCONTRACTOR'S INVOLVEMENT.

5. IS THIS A SOLE-SOURCE SUBCONTRACT?

NO ☐ ES (If yes, explain why this subcontractor is the only one that can perform the work and the nature of its unique capability/experience.)

6. DOES THE SUBCONTRACTOR HAVE ANY FINANCIAL OR OTHER INTEREST IN THE SUBMITTNG ORGANIZATION?

NO ☐ YES (If yes, briefly explain what type and how much.)

7. DOES THE SUBMITTING ORGANIZATION HAVE ANY FINANCIAL OR OTHER INTEREST IN THE SUBCONTRACTOR?

NO ☐ YES (If yes, briefly explain what type and how much.)

INSTRUCTIONS FOR FORM NIST-1262 (Page 4): SUBCONTRACTS

This form must be submitted with each proposal to identify each subcontract. This form may be duplicated, as necessary, if there are additional subcontractors.

1. Enter the name, street address, city, two-letter state abbreviation, and ZIP code of the subcontractor. Also enter the name, telephone number, fax number, and e-mail address of the individual in the subcontractor organization to be contacted regarding technical aspects of the proposal. If the subcontractor's identity is still undetermined, enter "Undetermined."
2. Mark an "x" in the appropriate box or boxes that apply to the subcontractor.
3. Enter the estimated total subcontractor costs.
4. Briefly describe the scope of work to be performed by the subcontractor.
5. Mark an "x" in the appropriate box regarding whether the subcontractor will be selected on a sole-source basis. Subcontractors should be selected on a competitive basis. If "YES" is marked, that is, if a subcontractor is selected on a sole-source basis, provide a brief justification for selection on a noncompetitive basis. Explain why this subcontractor is the only one that can perform the work and the nature of its unique capability/experience.
6. If the subcontractor has any financial or other interest in the submitting organization, briefly explain what type and how much.
7. If the submitting organization has any financial or other interest in the subcontractor, briefly explain what type and how much.

INSTRUCTIONS FOR FORM NIST-1263 (Pages 1 & 2): JOINT VENTURE ADVANCED TECHNOLOGY PROGRAM PROPOSAL COVER SHEET

This form must be completed in its entirety and submitted with each joint venture proposal. The authorized company representative who signs the form must have delegated fiduciary authority. By signing this form, the company representative certifies the commitment of cost sharing, verifies the certification statements on the form, and attests to the accuracy of the proposal. The signature also signifies that the company representative has coordinated with top management within his/her own company and with all companies/organizations described as joint venture partners about their commitment and cost sharing to the proposed project. Additionally, by signing the form, the company representative acknowledges that the proposal is being submitted with the agreement that ATP may use nongovernment reviewers if necessary. (Such reviewers are screened to eliminate conflicts of interest and are required to sign nondisclosure agreements.)

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to, a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB Control Number. The reason for collecting this information is for NIST to be able to perform the appropriate technical and business reviews of an ATP proposal. The information obtained will assist in determining eligibility for federal financial assistance. Responses to the collection of information are required to be considered for an ATP award. In accordance with the ATP legislation, information that is obtained by ATP or other Department of Commerce offices on a confidential basis about business operations and trade secrets possessed by any company will be protected by the government and shall be exempt from disclosure under the Freedom of Information Act.

1. Enter the competition number as stated in the *Federal Register* notice.

2. Enter your employer identification number (EIN). To obtain an EIN, see http://www.atp.nist.gov/atp/helpful.htm, or call 1–866–816–2065.

3. Enter your Dun and Bradstreet (D&B) number. To obtain a D&B number, see http://www.dnbmdd.com/mddi.

4. Enter the duration of the proposed work in years and months. **NOTE:** The maximum duration allowed for a joint venture is 5 years.

5. Enter the legal name, street address, city, two-letter state abbreviation, ZIP code, and website of the organization submitting the proposal. **(DO NOT USE A POST OFFICE BOX.) NOTE:** The names and information on the other joint venture participants should be identified on Form NIST-1263 (Page 4), Other Joint Venture Participants.

6. Enter the name, telephone number, fax number, and e-mail address of the Principal Investigator at the submitting organization who is responsible for the technical aspects of the proposal. Include the mailing address if it differs from that of the submitting organization.

7. Enter the name, telephone number, fax number, and e-mail address of the business manager at the submitting organization who is responsible for business matters. Include

the mailing address if it differs from that of the submitting organization.

8. Enter the name, telephone number, fax number, and e-mail address of the grant/contract manager at the submitting organization responsible for contract/grant administrative matters. Include the mailing address if it differs from that of the submitting organization.

9. Check all boxes that apply to identify the type of organization.

10.A. In each column, enter total amounts requested from ATP for each year, and enter the total in the last column. **NOTE:** The ATP funding requested must be less than 50 percent of the total project costs.

10.B. In each column, enter the proposer's (joint venture's) total cost sharing for each year, and enter the total in the last column. **NOTE:** Joint ventures must provide more than 50 percent of each year's total costs.

10.C. In each column, enter the total for each year of the project, and enter the entire project total in the last column.

11. Enter the title of the proposal (90-character limit).

12. Enter a **NONPROPRIETARY** abstract of the proposed work. As part of the abstract, include a statement of the technical problem addressed in the proposal. This abstract may be used as the basis for a publicly distributed abstract should the proposal be selected for an award.

13.A. through 13.H. Answer each question by marking an "x" in the appropriate box.

A. Self-explanatory.

B. If any of the joint venture participants is delinquent on any federal debt, including debt to the Internal Revenue Service, provide in item 14 the amount of the debt, the name of the federal agency to which the debt is owed, how old the debt is, the circumstances surrounding the establishment of the debt, and why the debt has not been paid.

C. If this proposal or a similar proposal was submitted to another federal agency, provide in item 14 the name of the federal agency, the date the proposal was sent to that federal agency, the name of the financial assistance program under which the proposal was submitted, the amount of federal funding requested, and the name and phone number of the agency contact person.

D. If the proposed R&D involves the use of human subjects, and/or human tissue, and/or human cell lines, explain in item 14 and indicate whether the research plan has been reviewed and approved by an Institutional Review Board (IRB). For further guidance, refer to the ATP Booklet *Advanced Technology Program Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects,* available at http://www.atp.nist.gov/atp/kit-04/has_guide/contents.htm.

E. If the proposed R&D involves the use of live vertebrate animals, explain in item 14 and indicate whether the research plan has been reviewed and approved by an Institutional Animal Care and Use Committee (IACUC).

F. If any joint venture partner has a parent company outside the United States, identify the parent company or companies and their place of incorporation in item 14. This includes LLCs where the ownership by foreign companies is 50 percent or more.

G. If any joint venture partner is majority owned by individuals who are not citizens of the United States, explain in item 14.

H. If any joint venture partner is subject to control by individuals who are not citizens of the United States, explain in item 14.

14. Provide any explanations to answers given in item 13 and any other remarks you wish to offer.

15. Describe why your project needs ATP funding for the industry to form a joint venture or why an existing joint venture requires federal assistance to embark on this project. Why is private capital not available or not possible? What efforts were made to secure internal R&D funding as well as external private capital? Be specific. **Providing a general statement indicating the unavailability of private funding is unacceptable.**

16. Enter the name and title of the authorized company representative submitting the proposal on behalf of the joint venture.

17. Enter the telephone number of the authorized company representative submitting the proposal on behalf of the joint venture.

18. The authorized company representative submitting the proposal must sign this form.

19. Enter the date the form is signed.

ESTIMATED MULTI-YEAR BUDGET—JOINT VENTURE

YEAR: _____

11 Total costs of all tasks (same as line J)	$	$	$	$	$	$

INSTRUCTIONS FOR FORM NIST-1263 (Page 3): ESTIMATED MULTI-YEAR BUDGET— JOINT VENTURE

Every item must be completed and reflect estimated costs for each year of the proposed project. This form may be duplicated, as necessary, depending on the duration of the project and the number of participants. Specify the year on each page at the top right-hand block as noted and the name of each participant at the top of each column. Include a **TOTAL** budget, which consolidates all of the project years' costs.

1. **OBJECT CLASS CATEGORY.** List in each column the costs (rounded to the nearest whole dollar) associated with each object class category for each year of the proposed project. Enter the totals of the five columns in the last column.

   A. **Personnel Salaries/Wages**—Enter the total salaries of full- and part-time personnel, excluding fringe benefits.

   B. **Personnel Fringe Benefits**—Enter the total fringe benefits (vacation, sick leave, and military leave; health and life insurance; retirement, social security, etc.) associated with the personnel.

   C. **Travel**—Enter the costs for transportation, including airfare, taxis, lodging, subsistence, and so forth.

   D. **Equipment**—Enter the costs for general items of equipment. **NOTE:** ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the proposed scientific and technical project. Costs must be prorated if equipment or facilities will not be 100 percent dedicated to the ATP project during the project period.

   E. **Materials/Supplies**—Enter the costs for expendable materials and supplies.

   F. **Subcontracts**—Enter the costs for subcontracts. **NOTE:** Joint venture participants may not subcontract to another part of the same company or to another company with identical ownership. Subcontractors, excluding those that provide goods and services, who receive more than $500,000 each are subject to the same audit requirements as the recipient. The cost of the subcontractor's audit should be included in the subcontracts category.

   G. **Other**—Enter the costs for any other direct costs that do not fit into the direct categories above. The cost of the project audit should also be included in this category unless it is part of the indirect costs or to be performed by a cognizant federal audit agency. Audits must be performed in accordance with the *NIST Program-Specific Audit Guidelines for the ATP Cooperative Agreements With Joint Ventures* (http://www.atp.nist.gov/atp/psag-jv.htm). For nonprofit organizations subject to OMB Circular A-133, Audits of States, Local Government, and Non-Profit Organizations (http://www.atp.nist.gov/atp/helpful.htm), the annual Circular A-133 audit is deemed to meet the ATP audit requirement. Audits must be conducted by an external auditor (CPA or cognizant federal audit agency). For awards of less than 24 months, an audit is required at the end

of the project; for 2-, 3-, or 4-year awards, an audit is required after the first year and at the end of the project; for 5-year awards, an audit is required after the first year and the third year and at the end of the project. If a recipient has never received federal funding from any federal agency, a certification will be required from a CPA to determine whether the recipient has a functioning financial management system that meets the provisions of 15 C.F.R. § 14.21. The CPA costs may be included in this category unless they are part of the indirect costs.

H. **Total Direct Costs**—Enter total direct costs.

I. **Total Indirect Costs**—Enter the total indirect costs to be charged to the proposed project. An indirect cost is any cost not directly identified with a single, final cost objective but identified with two or more final cost objectives or an intermediate cost objective. After direct costs have been determined and charged directly to the project or other work, indirect costs are those remaining to be allocated to the several cost objectives. Because of the diverse characteristics and accounting practices it is not possible to specify the types of costs that may be classified as indirect costs in all situations. However, typical examples of indirect costs for many organizations include general administration, such as the salaries and expenses of executive officers; rent; utilities; personnel administration; maintenance; library expenses; and accounting. ATP shall interpret indirect costs in accordance with applicable federal cost principles.

J. **Total Costs**—Enter the total costs for the proposed R&D project.

K. **Non-ATP Funds**—Enter the total non-ATP funds (i.e., funds provided by each participant, state/local sources, and other private sources). **NOTE:** The total non-ATP funds must be more than 50 percent of the total project costs for each year's total costs.

L. **ATP Funds Requested**—Enter the total amount requested from ATP. **NOTE:** The ATP funding requested must be less than 50 percent of the total project costs for each year's total costs.

2. **SOURCES OF FUNDS**

A.–D. List in the left-most column all sources of support individually (ATP first), and enter associated costs in the appropriate columns. Examples of non ATP sources of funds include each participant, state/local government, etc. Enter totals of the rows in the last column.

E. **Total Sources of Funds**—Enter the total sources of funds in each column for each year (12-month period) of activity.

3. **TASKS**

A.–J. List in the left-most column all of the proposed tasks, and enter the associated costs in the appropriate columns. Enter the totals of the rows in the last column. Tasks should be a high-level aggregation of subtasks that have costs that can be easily updated as a group on an annual basis. ATP does not prescribe the appropriate number of tasks. If you have more tasks than the lines provide, make additional copies of this sheet to show the additional tasks. Task names and amounts must correspond with those in the Gantt chart in the R&D plan discussion.

K. **Total Costs of All Tasks**—Enter the total costs of all of the tasks in each of the columns for each year of activity.

OTHER JOINT VENTURE PARTICIPANTS DO NOT INCLUDE SUBMITTING ORGANIZATION

1. LEGAL NAME, ADDRESS AND WEBSITE OF PARTICIPANT	2. ORGANIZATION TYPE (Mark one in column 1 and any that apply in column 2.)

INSTRUCTIONS FOR FORM NIST-1263 (Page 4): OTHER JOINT VENTURE PARTICIPANTS

This form must be submitted with each joint venture proposal to identify the joint venture participants (excluding the organization submitting the proposal since that information is provided on page 1 of the Form NIST-1263). This form may be duplicated, as necessary, if there are additional participating organizations. Categories of joint venture participants are not adequate identification. For example, do not list a "manufacturing company," a "university," or a "hospital." You must provide the legal name and contact information of each joint venture participant. Include only those organizations to be bound by the Joint Venture Agreement. Do not list subcontractors on this form, as information about proposed subcontractors should be provided on page 5 of NIST-1263. Additionally, do not list informal collaborators.

1. Enter the legal name and street address, city, two-letter state abbreviation, ZIP code, and website of the participant. **(DO NOT USE A POST OFFICE BOX.)** Also enter the name, telephone number, fax number, and e-mail address of the individual in the participant's organization to be contacted regarding the technical aspects of the proposal.
2. Check all the boxes that apply to identify the type of organization.
3. Enter your employer identification number (EIN). To obtain an EIN, see http://www.atp.nist.gov/atp/helpful.htm, or call 1–866–816–2065.
4. Enter your Dun and Bradstreet (D&B) number. To obtain a D&B number, see http://www.dnbmdd.com/mddi.

SUBCONTRACTS

AME AND ADDRESS OF SUBCONTRACTOR

E OF CONTACT:

INSTRUCTIONS FOR FORM NIST-1263 (Page 5): SUBCONTRACTS

This form must be submitted with each proposal to identify each subcontract. This form may be duplicated, as necessary, if there are additional subcontractors.

1. Enter the name, street address, city, two-letter state abbreviation, and ZIP code of the subcontractor. Also enter the name, telephone number, fax number, and e-mail address of the individual in the subcontractor organization to be contacted regarding technical aspects of the proposal. If a subcontractor's identity is still undetermined, enter "Undetermined."
2. Mark an "x" in the appropriate box or boxes that apply to the subcontractor.
3. Enter the estimated total subcontractor costs.
4. Briefly describe the scope of work and identify which task(s) in the R&D plan will be performed by the subcontractor.
5. Mark an "x" in the appropriate box regarding whether the subcontractor will be selected on a sole-source basis. Subcontractors should be selected on a competitive basis. If "YES" is marked, that is, if the subcontractor is selected on a sole-source basis, provide a brief justification for selection on a noncompetitive basis. Explain why this subcontractor is the only one that can perform the work and the nature of its unique capability/experience.
6. If the subcontractor has any financial or other interest in any joint venture members, briefly explain what type and how much.
7. If the submitting organization has any financial or other interest in the subcontractor, briefly explain what type and how much.

BUDGET NARRATIVE

NOTE: All proposed direct and indirect costs must be consistent with costs incurred for like or similar items on all other federal and nonfederal projects or cost centers. Provide a Budget Narrative for each year of the project and for each joint venture participant. All figures must be rounded to the nearest dollar and correspond with those on the NIST-1262 or NIST-1263. Be sure arithmetic is correct. This form should not be altered. If additional space is needed, indicate "continued on next page," and attach additional sheets following the same format of specific item.

Proposal Number:
Name of Company _____ **Year** _____

A. Personnel—List each position by name of employee and title, if available. Show the annual salary and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in item 1.A. (page 3) of Form NIST-1262 or Form NIST-1263. Escalation rates for the out-years should be reasonable. ATP recognizes that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, use "to be determined." Information about consultants should NOT be included in this category but included more appropriately in Section F ("Subcontract") of this form and described on Form NIST-1262 or Form NIST-1263, pages 4 and 5, respectively.

Name and Position Title	Annual Salary	Percentage of Time on Project	Cost

TOTAL _____

B. Fringe Benefits—Identify percentage rate; if greater than 35 percent, provide a breakdown of what makes up the fringe benefits (vacation, sick leave, military leave; health and life insurance; retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and the appropriate line checked below.

Percentage Rate: _____ **Check here if included in indirect cost rate:**_____

If percentage rate exceeds 35 percent, provide breakdown:

TOTAL _____

C. **Travel**—Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item multiplied by number of people multiplied by number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as coach rather than first-class accommodations. Do not include travel to NIST for project review meetings, because these meetings are held at the funded organization. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification for how it is directly related to the R&D activities of the ATP project. Likewise, conference costs are not considered R&D-related expenses and should not be included. If attendance is critical to performing the R&D, an explanation of how the conference(s) specifically relates to the R&D is required.

Purpose of Travel	Destination	Item (mode of transportation, lodging, and subsistence)	Computation	Cost

Travel justification for foreign travel and conferences:

TOTAL _____

D. **Equipment**—Identify each item of equipment and the methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item multiplied by number of items), and cost. Budget estimates for each equipment item exceeding $100,000 must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification. General purpose office equipment, e.g., office computers, printers, copiers, etc., are normally included in indirect costs and therefore should not be budgeted as direct costs. If they are not included in indirect costs, they can be considered direct costs; however, they must be used exclusively for the ATP project, and a justification and explanation must be provided. Office furniture is unallowable.

Item	Methodology	Computation	Cost

Justification for each equipment item exceeding $100,000, and/or any construction costs:

TOTAL _____

E. **Materials/Supplies**—Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item multiplied by number of items), and cost. Office supplies, e.g., paper, pens, toner cartridges, etc. are normally included in indirect costs and should not be included here. If they are not included in indirect costs, they must be used exclusively for the ATP project, and a justification and explanation must be provided.

Item	Methodology	Computation	Cost

TOTAL _____

F. Subcontracts—For each subcontractor identified on Form NIST-1262 (page 4) or Form NIST-1263 (page 5), enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost

If subcontractor's fees are in excess of $450 per day, justify here:

Subtotal _____

Subcontractor Expenses: List any expenses to be paid from the award to the individual subcontractors in addition to their fees. Office supplies and conferences/workshops are unallowable. Subcontractors, excluding those that provide goods and services, who receive more than $500,000 each are subject to the same audit requirements as the recipient (see Section G); however, the audit costs for these subcontractors should be listed in Section F.

Item	Location	Computation	Cost

Subtotal _____

TOTAL _____

G. Other—Identify and provide a detailed description of any other direct costs that do not fall into the object cost categories above, basis of computation (i.e., cost per item multiplied by number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs or to be performed by a cognizant federal audit agency. If it is part of the indirect costs, indicate it as such. Each joint venture participant should budget for an audit. Audits must be performed in accordance with the *NIST Program-Specific Audit Guidelines for ATP Cooperative Agreements With Single Companies* or the *NIST Program-Specific Audit Guidelines for ATP Cooperative Agreements With Joint Ventures*. For nonprofit organizations subject to OMB Circular A-133, Audits of States, Local Government, and Non-Profit Organizations, the annual Circular A-133 audit is deemed to meet the ATP audit requirement. All of these documents may be found at http://www.atp.nist.gov/atp/helpful.htm. Audits must be conducted by an external auditor (CPA or cognizant federal audit agency). For awards less than 24 months, an audit is required at the end of the project; for 2-, 3-, or 4-year awards, an audit is required after the first year and at the end of the project; for 5-year awards, an audit is required after the first year and the third year and at the end of the project. If a recipient has never received federal funding from any federal agency, a certification will be required from a CPA to determine whether the recipient has a functioning financial management system that meets the provisions of 15 C.F.R. § 14.21.

Description	Computation	Cost
Audit		

TOTAL _____

H. Indirect Costs—Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant federal agency, include a copy of the approved negotiated agreement.

Percentage Rate: _____

☐ **Check here if negotiated indirect cost rate agreement is attached.**

☐ **Check here if indirect cost rate has not been established by a cognizant federal agency.**

TOTAL _____

COST SHARING COMPOSITION—Identify the total source of funding by cash and in-kind contributions.

Cash:_____ In-kind: _____ (In-kind contributions cannot exceed 30 percent of the nonfederal share of the total project costs. Additionally, except as specified in 15 C.F.R. § 295.25, the value of in-kind contributions should be determined in accordance with 15 C.F.R. § 14.23.)

Identify type of in-kind contribution (e.g., equipment, research tools, software, supplies, etc.) and associated amount(s) below:

TOTAL COST SHARE _____

FOREIGN-OWNED COMPANY QUESTIONNAIRE

Complete answers to all questions must be provided for each foreign-owned company participating in the proposed ATP project. Submit additional documentation, if necessary.

Proposal Number:
Name of Submitting Organization:

1. Is the foreign-owned company incorporated in the United States, or is the LLC, partnership, or sole proprietorship with foreign ownership organized in the United States? (NOTE: A company, LLC, partnership, or sole proprietorship is considered foreign owned if it is majority owned or controlled by a non-U.S. entity, and the non-U.S. entity, or its ultimate parent, if any, is incorporated outside the United States.)

   ☐ No. You are ineligible for an ATP award. Do not continue.
   ☐ Yes. Please continue.

2. Name of foreign-owned company and U.S. address where research for the project will be conducted.

3. Name of ultimate foreign parent, address, and country of incorporation. Also provide percentage of ownership.

4. What is the type of participation of the foreign-owned company?

   ☐ Single company ☐ Joint venture lead company ☐ Joint venture participant

5. What is the role of the foreign-owned company? (Check all that apply)

   ☐ Key contributor to the high-risk tasks of the project
   ☐ Minor contributor to the high-risk tasks of the project
   ☐ Supplier of materials, equipment, or software services
   ☐ Manufacturer
   ☐ Other. Please explain.

6. What skills, capabilities, and resources does the foreign-owned company bring to the project? How will the company's role affect project milestones and the plan for commercialization?

7. Provide a brief description (including location, square footage, special equipment) of the facility or facilities where project activities will be carried out.

8. How many employees will be dedicated to the project?

9. Provide the names, titles, and main responsibilities of key project staff.

10. Will there be any activities performed outside the United States?

    ☐ No.

    ☐ Yes. a. Please be specific and explain below what the activities are in terms of project tasks, when they will be performed, and where they will be performed. Explain impact to the project if activities were required to be performed in the United States. Describe the process used to determine whether or not a U.S.-based organization could perform the work.

    b. State dollar amount of the total activity.

11. Does the foreign-owned company expect to develop any new products or apply any new processes to its product lines incorporating the ATP supported technology?

    ☐ No.

    ☐ Yes. a. For each new product or process, when will it first occur?
    b. Where?
    c. If in the United States, which facility?
    d. Which U.S. product line?
    e. Other? Please explain.

12. a. Provide investments that the foreign-owned company has made in research, development, manufacturing, distribution, sales, and marketing during the past 3 years.

    b. State approximate dollar value.

13. Describe the relationship between the foreign-owned company and its ultimate foreign parent. Include financial arrangements, intercompany research agreements, and intellectual property arrangements.

R&D WORK PERFORMED OUTSIDE THE UNITED STATES BY THE RECIPIENT OR SUBCONTRACTOR QUESTIONNAIRE

Title of Proposal:
Name of Submitting Organization:
Name of Company To Perform R&D Work Outside the United States:
Country Where Work Will Be Performed:

1. Is the work to be performed outside the United States less technically challenging and lower risk relative to the work carried out in the United States? If no, please explain.

2. Describe the impact on the economic benefits with and without the R&D being performed outside the United States.

3. What is the percentage of the total ATP project for R&D performed outside the United States?

4. What are the total dollars by organization for R&D performed outside the United States?

5. a. Explain how your organization made a good faith effort to identify alternatives to having this particular work performed outside the United States.

   b. Explain why those alternatives were less attractive (e.g., cost, schedule, insufficient interest, or commitment).

6. Would the projected economic benefits to the United States be less likely to occur if the work outside the United States were not carried out at all, or if ATP insisted that the work be performed in the United States? Explain why.

7. Does the facility proposing to carry out the work outside the United States bring to the project special expertise, extra resources, or other factors that would represent a substantial loss to the project were they not there? Explain.

8. a. Is the company proposing to do work outside the United States U.S. owned? ☐ Yes ☐ No

   b. Does the company also have R&D and manufacturing facilities in the United States that would benefit from the project? Please describe.

   c. Who else would benefit?

9. Will the company performing the work outside the United States agree to surrender intellectual property resulting from the work to a company incorporated in the United States?

APPENDICES

The ATP statute and rule follow this page. These documents are also available on the ATP website at http://www.atp.nist.gov/atp/helpful.htm.

B. Appendix B. ATP Rule—15 C.F.R. Part 295

Appendix A

ATP Statute

NOTE: The ATP statute originated in the Omnibus Trade and Competitiveness Act of 1988 (Pub. L. 100-418, 15 U.S.C. § 278n) but was amended by the American Technology Preeminence Act of 1991 (Pub. L. 102-245). This law has been codified at 15 U.S.C. § 278n.

Sec. 278n. Advanced Technology Program

(a) There is established in the Institute an Advanced Technology Program (hereafter in this Act referred to as the "Program") for the purpose of assisting United States businesses in creating and applying the generic technology and research results necessary to—

(1) commercialize significant new scientific discoveries and technologies rapidly; and

(2) refine manufacturing technologies.

The Secretary, acting through the Director, shall assure that the Program focuses on improving the competitive position of the United States and its businesses, gives preference to discoveries and to technologies that have great economic potential, and avoids providing undue advantage to specific companies. In operating the Program, the Secretary and Director shall, as appropriate, be guided by the findings and recommendations of the Biennial National Critical Technology Reports prepared pursuant to section 603 of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. § 6683).

(b) Under the Program established in subsection (a), and consistent with the mission and policies of the Institute, the Secretary, acting through the Director, and subject to subsections (c) and (d), may—

(1) aid industry-led United States joint research and development ventures (hereafter in this section referred to as "joint ventures") (which may also include universities and independent research organizations), including those involving collaborative technology demonstration projects which develop and test prototype equipment and processes, through—

(A) provision of organizational and technical advice; and

(B) participation in such joint ventures by means of grants, cooperative agreements, or contracts, if the Secretary, acting through the Director, determines participation to be appropriate, which may include (i) partial startup funding, (ii) provision of a minority share of the cost of such joint ventures for up to 5 years, and (iii) making available equipment, facilities, and personnel, provided that emphasis is placed on areas where the Institute has scientific or technological expertise, on solving generic problems of specific industries, and on making those industries more competitive in world markets;

(2) provide grants to and enter into contracts and cooperative agreements with United States businesses (especially small businesses), provided that emphasis is placed on applying the Institute's research, research techniques, and expertise to those organizations' research programs;

(3) involve the Federal laboratories in the Program, where appropriate, using among other authorities the cooperative research and development agreements provided for under section 12 of the Stevenson-Wydler Technology Innovation Act of 1980; and

(4) carry out, in a manner consistent with the provisions of this section, such other cooperative research activities with joint ventures as may be authorized by law or assigned to the Program by the Secretary.

(c) The Secretary, acting through the Director, is authorized to take all actions necessary and appropriate to establish and operate the Program, including—

(1) publishing in the *Federal Register* draft criteria and, no later than six months after the date of the enactment of this section, following a public comment period, final criteria, for the selection of recipients of assistance under subsection (b)(1) and (2);

(2) monitoring how technologies developed in its research program are used, and reporting annually to the Congress on the extent of any overseas transfer of these technologies;

(3) establishing procedures regarding financial reporting and auditing to ensure that contracts and awards are used for the purposes specified in this section, are in accordance with sound accounting practices, and are not funding existing or planned research programs that would be conducted in the same time period in the absence of financial assistance under the Program;

(4) assuring that the advice of the Committee established under section 10 is considered routinely in carrying out the responsibilities of the Institute; and

(5) providing for appropriate dissemination of Program research results.

(d) When entering into contracts or making awards under subsection (b), the following shall apply:

(1) No contract or award may be made until the research project in question has been subject to a merit review, and has, in the opinion of the reviewers appointed by the Director and the Secretary, acting through the Director, been shown to have scientific and technical merit.

(2) In the case of joint ventures, the Program shall not make an award unless the award will facilitate the formation of a joint venture or the initiation of a new research and development project by an existing joint venture.

(3) No Federal contract or cooperative agreement under subsection (b)(2) shall exceed $2,000,000 over 3 years, or be for more than 3 years unless a full and complete explanation of such proposed award, including reasons for exceeding these limits, is submitted in writing by the Secretary to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science, Space, and Technology of the House of Representatives. The proposed contract or cooperative agreement may be executed only after 30 calendar days on which both Houses of Congress are in session have elapsed since such submission. Federal funds made available under subsection (b)(2) shall be used only for direct costs and not for indirect costs, profits, or management fees of the contractor.

(4) In determining whether to make an award to a particular joint venture, the Program shall consider whether the members of the joint venture have made provisions for the appropriate participation of small United States businesses in such joint venture.

(5) Section 552 of title 5, United States Code, shall not apply to the following information obtained by the Federal Government on a confidential basis in connection with the activities of any business or any joint venture receiving funding under the Program—

(A) information on the business operation of any member of the business or joint venture; and

(B) trade secrets possessed by any business or any member of the joint venture.

(6) Intellectual property owned and developed by any business or joint venture receiving funding or by any member of such a joint venture may not be disclosed by any officer or employee of the Federal Government except in accordance with a written agreement between the owner or developer and the Program.

(7) If a business or joint venture fails before the completion of the period for which a contract or award has been made, after all allowable costs have been paid and appropriate audits conducted, the unspent balance of the Federal funds shall be returned by the recipient to the Program.

(8) Upon dissolution of any joint venture or at the time otherwise agreed upon, the Federal Government shall be entitled to a share of the residual assets of the joint venture proportional to the Federal share of the costs of the joint venture as determined by independent audit.

(9) A company shall be eligible to receive financial assistance under this section only if—

(A) the Secretary finds that the company's participation in the program would be in the economic interest of the United States, as evidenced by investments in the United States in research, development, and manufacturing (including, for example, the manufacture of major components or subassemblies in the United States); significant contributions to employment in the United States; and agreement with respect to any technology arising from assistance provided under this section to promote the manufacture within the United States of products resulting from that technology (taking into account the goals of promoting the competitiveness of United States industry), and to procure parts and materials from competitive suppliers; and

(B) either—

(i) the company is a United States-owned company; or

(ii) the Secretary finds that the company is incorporated in the United States and has a parent company which is incorporated in a country which affords to United States-owned companies opportunities, comparable to those afforded to any other company, to participate in any joint venture similar to those authorized under this Act; affords to United States-owned companies local investment opportunities comparable to those afforded to any other company; and affords adequate and effective protection for the intellectual property rights of United States-owned companies.

(10) Grants, contracts, and cooperative assignments under this section shall be designed to support projects which are high risk and which have the potential for eventual substantial widespread commercial application. In order to receive a grant, contract, or cooperative agreement under this section, a research and development entity shall demonstrate to the Secretary the requisite ability in research and technology development and management in the project area in which the grant, contract, or cooperative agreement is being sought.

(11) (A) Title to any intellectual property arising from assistance provided under this section shall vest in a company or companies incorporated in the United States. The United States may reserve a nonexclusive, nontransferable, irrevocable paid-up license, to have practiced for or on behalf of the United States, in connection with any such intellectual property, but shall not, in the exercise of such license, publicly disclose proprietary information related to the license. Title to any such intellectual property shall not be transferred or passed, except to a company incorporated in the United States, until the expiration of the first patent obtained in connection with such intellectual property.

(B) For purposes of this paragraph, the term "intellectual property" means an invention patentable under title 35, United States Code, or any patent on such an invention.

(C) Nothing in this paragraph shall be construed to prohibit the licensing to any company of intellectual property rights arising from assistance provided under this section.

(e) The Secretary may, within 30 days after notice to Congress, suspend a company or joint venture from continued assistance under this section if the Secretary determines that the company, the country of incorporation of the company or a parent company, or the joint venture has failed to satisfy any of the criteria set forth in subsection (d)(9), and that it is in the national interest of the United States to do so.

(f) When reviewing private sector requests for awards under the Program, and when monitoring the progress of assisted research projects, the Secretary and the Director shall, as appropriate, coordinate with the Secretary of Defense and other senior Federal officials to ensure cooperation and coordination in Federal technology programs and to avoid unnecessary duplication of effort. The Secretary and the Director are authorized to work with the Director of the Office of Science and Technology Policy, the Secretary of Defense, and other appropriate Federal officials to form interagency working groups or special project offices to coordinate Federal technology activities.

(g) In order to analyze the need for the value of joint ventures and other research projects in specific technical fields, to evaluate any proposal made by a joint venture or company requesting the Secretary's assistance, or to monitor the progress of any joint venture or any company research project which receives Federal funds under the Program, the Secretary, the Under Secretary of Commerce for Technology, and the Director may, notwithstanding any other provision of law, meet with such industry sources as they consider useful and appropriate.

(h) Up to 10 percent of the funds appropriated for carrying out this section may be used for

standards development and technical activities by the Institute in support of the purposes of this section.

(i) In addition to such sums as may be authorized and appropriated to the Secretary and Director to operate the Program, the Secretary and Director also may accept funds from other Federal departments and agencies for the purpose of providing Federal funds to support awards under the Program. Any Program award which is supported with funds which originally came from other Federal departments and agencies shall be selected and carried out according to the provisions of this section.

(j) As used in this section—

(1) the term "joint venture" means any group of activities, including attempting to make, making, or performing a contract, by two or more persons for the purpose of—

(A) theoretical analysis, experimentation, or systematic study of phenomena or observable facts;

(B) the development or testing of basic engineering techniques;

(C) the extension of investigative findings or theory of a scientific or technical nature into practical application for experimental and demonstration purposes, including the experimental production and testing of models, prototypes, equipment, materials, and processes;

(D) the collection, exchange, and analysis of research information;

(E) the production of any product, process, or service; or

(F) any combination of the purposes specified in subparagraphs (A), (B), (C), (D), and (E), and may include the establishment and operation of facilities for the conducting of research, the conducting of such venture on a protected and proprietary basis, and the prosecuting of applications for patents and the granting of licenses for the results of such venture; and

(2) the term "United States-owned company" means a company that has majority ownership or control by individuals who are citizens of the United States.

Appendix B

ATP Rule—15 C.F.R. Part 295

Subpart A—General

Sec. 295.1 Purpose.

(a) The purpose of the Advanced Technology Program (ATP) is to assist United States businesses to carry out research and development on high risk, high pay-off, emerging and enabling technologies. These technologies are:

(1) High risk, because the technical challenges make success uncertain;

(2) High pay-off, because when applied, they offer significant benefits to the U.S. economy; and

(3) Emerging and enabling, because they offer wide breadth of potential application and form an important technical basis for future commercial applications.

(b) The rules in this part prescribe policies and procedures for the award of cooperative agreements under the Advanced Technology Program in order to ensure the fair treatment of all proposals. While the Advanced Technology Program is authorized to enter into grants, cooperative agreements, and contracts to carry out its mission, these rules address only the award of cooperative agreements. The program employs cooperative agreements rather than grants because such agreements allow ATP to exercise appropriate management oversight of projects and also to link ATP-funded projects to ongoing R&D at the National Institute of Standards and Technology wherever such linkage would increase the likelihood of success of the project.

(c) In carrying out the rules in this part, the Program endeavors to put more emphasis on joint ventures and consortia with a broad range of participants, including large companies, and less emphasis on support of individual large companies.

Sec. 295.2 Definitions.

(a) For the purposes of ATP, the term *award* means Federal financial assistance made under a grant or cooperative agreement.

(b) The term *company* means a for-profit organization, including sole proprietors, partnerships, limited liability companies (LLCs), or corporations.

(c) The term *cooperative agreement* refers to a Federal assistance instrument used whenever the principal purpose of the relationship between the Federal Government and the recipient is the transfer of money, property, or services, or anything of value to the recipient to accomplish a public purpose of support or stimulation authorized by Federal statute, rather than acquisition by purchase, lease, or barter, of property or services for the direct benefit or use of the Federal Government; and substantial involvement is anticipated between the executive agency, acting for the Federal

Government, and the recipient during performance of the contemplated activity.

(d) The term *direct costs* means costs that can be identified readily with activities carried out in support of a particular final objective. A cost may not be allocated to an award as a direct cost if any other cost incurred for the same purpose in like circumstances has been assigned to an award as an indirect cost. Because of the diverse characteristics and accounting practices of different organizations, it is not possible to specify the types of costs which may be classified as direct costs in all situations. However, typical direct costs could include salaries of personnel working on the ATP project and associated reasonable fringe benefits such as medical insurance. Direct costs might also include supplies and materials, special equipment required specifically for the ATP project, and travel associated with the ATP project. ATP shall determine the allowability of direct costs in accordance with applicable Federal cost principles.

(e) The term *foreign-owned company* means a company other than a United States-owned company as defined in 295.2(q).

(f) The term *grant* means a Federal assistance instrument used whenever the principal purpose of the relationship between the Federal Government and the recipient is the transfer of money, property, services, or anything of value to the recipient in order to accomplish a public purpose of support or stimulation authorized by Federal statute, rather than acquisition by purchase, lease, or barter, of property or services for the direct benefit or use of the Federal Government; and no substantial involvement is anticipated between the executive agency, acting for the Federal Government, and the recipient during performance of the contemplated activity.

(g) The term *independent research organization* (IRO) means a nonprofit research and development corporation or association organized under the laws of any state for the purpose of carrying out research and development on behalf of other organizations.

(h) The term *indirect costs* means those costs incurred for common or joint objectives that cannot be readily identified with activities carried out in support of a particular final objective. A cost may not be allocated to an award as an indirect cost if any other cost incurred for the same purpose in like circumstances has been assigned to an award as a direct cost. Because of diverse characteristics and accounting practices it is not possible to specify the types of costs which may be classified as indirect costs in all situations. However, typical examples of indirect costs include general administration expenses, such as the salaries and expenses of executive officers, personnel administration, maintenance, library expenses, and accounting. ATP shall determine the allowability of indirect costs in accordance with applicable Federal cost principles.

(i) The term *industry-led joint research and development venture* or *joint venture* means a business arrangement that consists of two or more separately-owned, for-profit companies that perform research and development in the project; control the joint venture's membership, research directions, and funding priorities; and share total project costs with the Federal Government. The joint venture may include additional companies, independent research organizations, universities, and/or governmental laboratories (other than NIST) which may or may not contribute funds (other than Federal funds) to the project and perform research and development. A for-profit company or an independent research organization may serve as an Administrator and perform administrative tasks on behalf of a joint venture, such as handling receipts and disbursements of funds and making antitrust filings. The following activities are not permissible for ATP-funded joint ventures:

(1) Exchanging information among competitors relating to costs, sales, profitability, prices, marketing, or distribution of any product, process, or service that is not reasonably required to conduct the research and development that is the purpose of such venture;

(2) Entering into any agreement or engaging in any other conduct restricting, requiring, or otherwise involving the production or marketing by any person who is a party to such joint venture of any product, process, or service, other than the production or marketing of proprietary information developed through such venture, such as patents and trade secrets; and

(3) Entering into any agreement or engaging in any other conduct:

(i) To restrict or require the sale, licensing, or sharing of inventions or developments not developed through such venture, or

(ii) To restrict or require participation by such party in other research and development activities, that is not reasonably required to prevent misappropriation of proprietary information contributed by any person who is a party to such venture or of the results of such venture.

(j) The term *intellectual property* means an invention patentable under title 35, United States Code, or any patent on such an invention.

(k) The term *large business* for a particular ATP competition means any business, including any parent company plus related subsidiaries, having annual revenues in excess of the amount published by ATP in the relevant annual notice of availability of funds required by section 295.7(a) of this regulation. In establishing this amount, ATP may consider the dollar value of the total revenues of the 500th company in *Fortune* magazine's Fortune 500 listing.

(l) The term *matching funds* or *cost sharing* means that portion of project costs not borne by the Federal Government. Sources of revenue to satisfy the required cost share include cash and in-kind contributions. Cash contributions can be from recipient, state, county, city, or other non-federal sources. In-kind contributions can be made by recipients or non-federal third parties (except subcontractors working on an ATP project) and include but are not limited to equipment, research tools, software, and supplies. Except as specified at Sec. 295.25 of this regulation, the value of in-kind contributions shall be determined in accordance with OMB Circular A-110, Subpart C, Section 23. The value of in-kind contributions will be prorated according to the share of total use dedicated to the ATP program. ATP restricts the total value of in-kind contributions that can be used to satisfy the cost share by requiring that such contributions not exceed 30 percent of the non-federal share of the total project costs. ATP shall determine the allowability of matching share costs in accordance with applicable federal cost principles.

(m) The term *person* shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State, or the laws of any foreign country.

(n) The term *Program* means the Advanced Technology Program.

(o) The term *Secretary* means the Secretary of Commerce or the Secretary's designee.

(p) The term *small business* means a business that is independently owned and operated, is organized for profit, and is not dominant in

the field of operation in which it is proposing, and meets the other requirements found in 13 C.F.R. Part 121.

(q) The term *United States-owned company* means a for-profit organization, including sole proprietors, partnerships, or corporations, that has a majority ownership or control by individuals who are citizens of the United States.

Sec. 295.3 Eligibility of United States- and Foreign-Owned Businesses.

(a) A company shall be eligible to receive an award from the Program only if:

(1) The Program finds that the company's participation in the Program would be in the economic interest of the United States, as evidenced by investments in the United States in research, development, and manufacturing (including, for example, the manufacture of major components or subassemblies in the United States); significant contributions to employment in the United States; and agreement with respect to any technology arising from assistance provided by the Program to promote the manufacture within the United States of products resulting from that technology (taking into account the goals of promoting the competitiveness of United States industry), and to procure parts and materials from competitive suppliers; and

(2) Either the company is a United States-owned company, or the Program finds that the company is incorporated in the United States and has a parent company which is incorporated in a country which affords to United States-owned companies opportunities, comparable to those afforded to any other company, to participate in any joint venture similar to those authorized under the Program; affords the United States-owned companies local investment opportunities comparable to those afforded to any other company; and affords adequate and effective protection for the intellectual property rights of United States-owned companies.

(b) The Program may, within 30 days after notice to Congress, suspend a company or joint venture from continued assistance under the Program if the Program determines that the company, the country of incorporation of the company or a parent company, or the joint venture has failed to satisfy any of the criteria contained in paragraph (a) of this section, and that it is in the national interest of the United States to do so.

(c) Companies owned by legal residents (green card holders) may apply to the Program, but before an award can be given, the owner(s) must either become a citizen or ownership must be transferred to a U.S. citizen(s).

Sec. 295.4 The Selection Process.

(a) The selection process for awards is a multi-step process based on the criteria listed in section 295.6. Source evaluation boards (SEB) are established to ensure that all proposals receive careful consideration. In the first step, called "preliminary screening," proposals may be eliminated by the SEB that do not meet the requirements of this Part or the annual *Federal Register* Program announcement. Typical but not exclusive of the reasons for eliminating a proposal at this stage are that the proposal is deemed to have serious deficiencies in either the technical or business plan; involves product development rather than high-risk R&D; is not industry-led; is significantly overpriced or underpriced given the scope of the work; does not meet the requirements set out in the notice of availability of funds issued pursuant to section 295.7; or does not meet the cost-sharing requirement. NIST will also examine proposals that have been submitted to a previous

competition to determine whether substantive revisions have been made to the earlier proposal, and, if not, may reject the proposal.

(b) In the second step, referred to as the "technical and business review," proposals are evaluated under the criteria found in section 295.6. Proposals judged by the SEB after considering the technical and business evaluations to have the highest merit based on the selection criteria receive further consideration and are referred to as "semifinalists."

(c) In the third step, referred to as "selection of finalists," the SEB prepares a final ranking of semifinalist proposals by a majority vote, based on the evaluation criteria in section 295.6. During this step, the semifinalist proposers will be invited to an oral review of their proposals with NIST, and in some cases site visits may be required. Subject to the provisions of section 295.6, a list of ranked finalists is submitted to the Selecting Official.

(d) In the final step, referred to as "selection of recipients," the Selecting Official selects funding recipients from among the finalists, based upon the SEB rank order of the proposals on the basis of all selection criteria (section 295.6); assuring an appropriate distribution of funds among technologies and their applications; the availability of funds; and adherence to the Program selection criteria. The Program reserves the right to deny awards in any case where information is uncovered which raises a reasonable doubt as to the responsibility of the proposer. The decision of the Selecting Official is final.

(e) NIST reserves the right to negotiate the cost and scope of the proposed work with the proposers that have been selected to receive awards. For example, NIST may request that the proposer delete from the scope of work a particular task that is deemed by NIST to be product development or otherwise inappropriate for ATP support.

Sec. 295.5 Use of Pre-Proposals in the Selection Process.

To reduce proposal preparation costs incurred by proposers and to make the selection process more efficient, NIST may use mandatory or optional preliminary qualification processes based on preproposals. In such cases, announcements requesting pre-proposals will be published as indicated in section 295.7, and will seek abbreviated proposals (pre-proposals) that address both of the selection criteria, but in considerably less detail than full proposals. The Program will review the pre-proposals in accordance with the selection criteria and provide written feedback to the proposers to determine whether the proposed projects appear sufficiently promising to warrant further development into full proposals. Proposals are neither "accepted" nor "rejected" at the pre-proposal stage. When the full proposals are received in response to the notice of availability of funds described in section 295.7, the review and selection process will occur as described in section 295.4.

Sec. 295.6 Criteria for Selection.

The evaluation criteria to be used in selecting any proposal for funding under this program, and their respective weights, are listed in this section. No proposal will be funded unless the Program determines that it has scientific and technological merit and that the proposed technology has strong potential for broad-based economic benefits to the nation. Additionally, no proposal will be funded that does not require Federal support, that is product development rather than high-risk R&D, that does not display an appropriate level of commitment from the proposer, or does not have an adequate technical and commercialization plan.

(a) Scientific and Technological Merit (50%)

The proposed technology must be highly innovative. The research must be challenging, with high technical risk. It must be aimed at overcoming an important problem(s) or

exploiting a promising opportunity. The technical leverage of the technology must be adequately explained. The research must have a strong potential for advancing the state of the art and contributing significantly to the U.S. scientific and technical knowledge base. The technical plan must be clear and concise; clearly identify the core innovation, the technical approach, major technical hurdles, and the attendant risks; and clearly establish feasibility through adequately detailed plans linked to major technical barriers. The plan must address the questions of "what, how, where, when, why, and by whom" in substantial detail. The Program will assess the proposing team's relevant experience for pursuing the technical plan. The team carrying out the work must demonstrate a high level of scientific/technical expertise to conduct the R&D and have access to the necessary research facilities.

(b) Potential for Broad-Based Economic Benefits (50%)

The proposed technology must have a strong potential to generate substantial benefits to the nation that extend significantly beyond the direct returns to the proposing organization(s). The proposal must explain why ATP support is needed and what difference ATP funding is expected to make in terms of what will be accomplished with the ATP funding versus without it. The pathways to economic benefit must be described, including the proposer's plan for getting the technology into commercial use, as well as additional routes that might be taken to achieve broader diffusion of the technology. The proposal should identify the expected returns that the proposer expects to gain, as well as returns that are expected to accrue to others, i.e., spillover effects. The Program will assess the proposer's relevant experience and level of commitment to the project and project's organizational structure and management plan, including the extent to which participation by small businesses is encouraged and is a key component in a joint venture proposal, and for large company single proposers, the extent to which subcontractor/subrecipient teaming arrangements are featured and are a key component of the proposal.

Sec. 295.7 Notice of Availability of Funds.

The Program shall publish at least annually a *Federal Register* notice inviting interested parties to submit proposals, and may more frequently publish invitations for proposals in the *Commerce Business Daily,* based upon the annual notice. Proposals must be submitted in accordance with the guidelines in the *ATP Proposal Preparation Kit* as identified in the published notice. Proposals will only be considered for funding when submitted in response to an invitation published in the *Federal Register,* or a related announcement in the *Commerce Business Daily.*

Sec 295.8 Intellectual Property Rights; Publication of Research Results.

(a)(1) **Patent Rights:** Title to inventions arising from assistance provided by the Program must vest in a company or companies incorporated in the United States. Joint ventures shall provide to NIST a copy of their written agreement which defines the disposition of ownership rights among the members of the joint venture, and their contractors and subcontractors as appropriate, that complies with the first sentence of this paragraph. The United States will reserve a non-exclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States any such intellectual property, but shall not, in the exercise of such license, publicly disclose proprietary information related to the license. Title to any such intellectual property shall not be transferred or passed, except to a company

incorporated in the United States, until the expiration of the first patent obtained in connection with such intellectual property. Nothing in this paragraph shall be construed to prohibit the licensing to any company of intellectual property rights arising from assistance provided under this section.

(2) **Patent Procedures:** Each award by the Program shall include provisions assuring the retention of a governmental use license in each disclosed invention, and the government's retention of march-in rights. In addition, each award by the Program will contain procedures regarding reporting of subject inventions by the funding Recipient to the Program, including the subject inventions of members of the joint venture (if applicable) in which the funding Recipient is a participant, contractors, and subcontractors of the funding Recipient. The funding Recipient shall disclose such subject inventions to the Program within two months after the inventor discloses it in writing to the Recipient's designated representative responsible for patent matters. The disclosure shall consist of a detailed, written report which provides the Program with the following: the title of the present invention; the names of all inventors; the name and address of the assignee (if any); an acknowledgment that the United States has rights in the subject invention; the filing date of the present invention, or, in the alternative, a statement identifying that the Recipient determined that filing was not feasible; an abstract of the disclosure; a description or summary of the present invention; the background of the present invention or the prior art; a description of the preferred embodiments; and what matter is claimed. Upon issuance of the patent, the funding Recipient or Recipients must notify the Program accordingly, providing it with the Serial Number of the patent as issued, the date of issuance, a copy of the disclosure as issued, and if appropriate, the name, address, and telephone number(s) of an assignee.

(b) **Copyrights:** Except as otherwise specifically provided for in an Award, funding Recipients under the Program may establish claim to copyright subsisting in any data first produced in the performance of the award. When claim is made to copyright, the funding Recipient shall affix the applicable copyright notice of 17 U.S.C. § 401 or § 402 and acknowledgment of Government sponsorship to the data when and if the data are delivered to the Government, are published, or are deposited for registration as a published work in the U.S. Copyright Office. The funding recipient shall grant to the Government, and others acting on its behalf, a paid up, nonexclusive, irrevocable, worldwide license for all such data to reproduce, prepare derivative works, perform publicly and display publicly, and for data other than computer software to distribute to the public by or on behalf of the Government.

(c) **Publication of Research Results:** The decision on whether or not to publish research results will be made by the funding Recipient(s). Unpublished intellectual property owned and developed by any business or joint research and development venture receiving funding or by any member of such a joint venture may not be disclosed by any officer or employee of the Federal Government except in accordance with a written agreement between the owner or developer and the Program. The licenses granted to the Government under section 295.8(b) shall not be considered a waiver of this requirement.

Sec. 295.9 Protection of Confidential Information.

As required by section 278n(d)(5) of Title 15 of the United States Code, the following information obtained by the Secretary on a confidential basis in connection with the activities of any business

aggregate of these allowable costs exceed 30 percent of the non-Federal share of the total cost of the joint research and development program.

(c) **Definition.** The term *best customer price* shall mean the GSA schedule price, or if such price is unavailable, the lowest price at which a sale was made during the last 12 months prior to the transfer of the particular good or service.

Subpart C—Assistance to Single-Proposer U.S. Businesses

Sec. 295.30 Types of Assistance Available.

This Subpart describes the types of assistance that may be provided under the authority of 15 U.S.C. § 278n(b)(2). Such assistance includes but is not limited to entering into cooperative agreements with United States businesses, especially small businesses.

Sec. 295.31 Qualification of Proposers.

Awards under this Subpart will be available to all businesses, subject to the limitations set out in section 295.3 and 295.32.

Sec. 295.32 Limitations on Assistance.

(a) The Program will not directly provide fundin under this Subpart to any governmental entity academic institution, or independent research organization.

(b) For proposals submitted to ATP after December 31, 1997, awards to large businesses made under this Subpart shall not exceed 40 percent of the total project costs of those awards in any year of the award.

(c) Awards under this Subpart may not exceed $2,000,000, or be for more than 3 years, unless the Secretary provides a written explanation to the authorizing committees of both Houses of Congress and then, only after 30 days during which both Houses of Congress are in session. No funding for indirect costs, profits, or management fees shall be available for awards made under this Subpart.

(d) The total value of any in-kind contributions used to satisfy a cost-sharing requirement may not exceed 30 percent of the non-Federal share of the total project costs.

U.S. Department of Commerce
Donald L. Evans, Secretary

Technology Administration

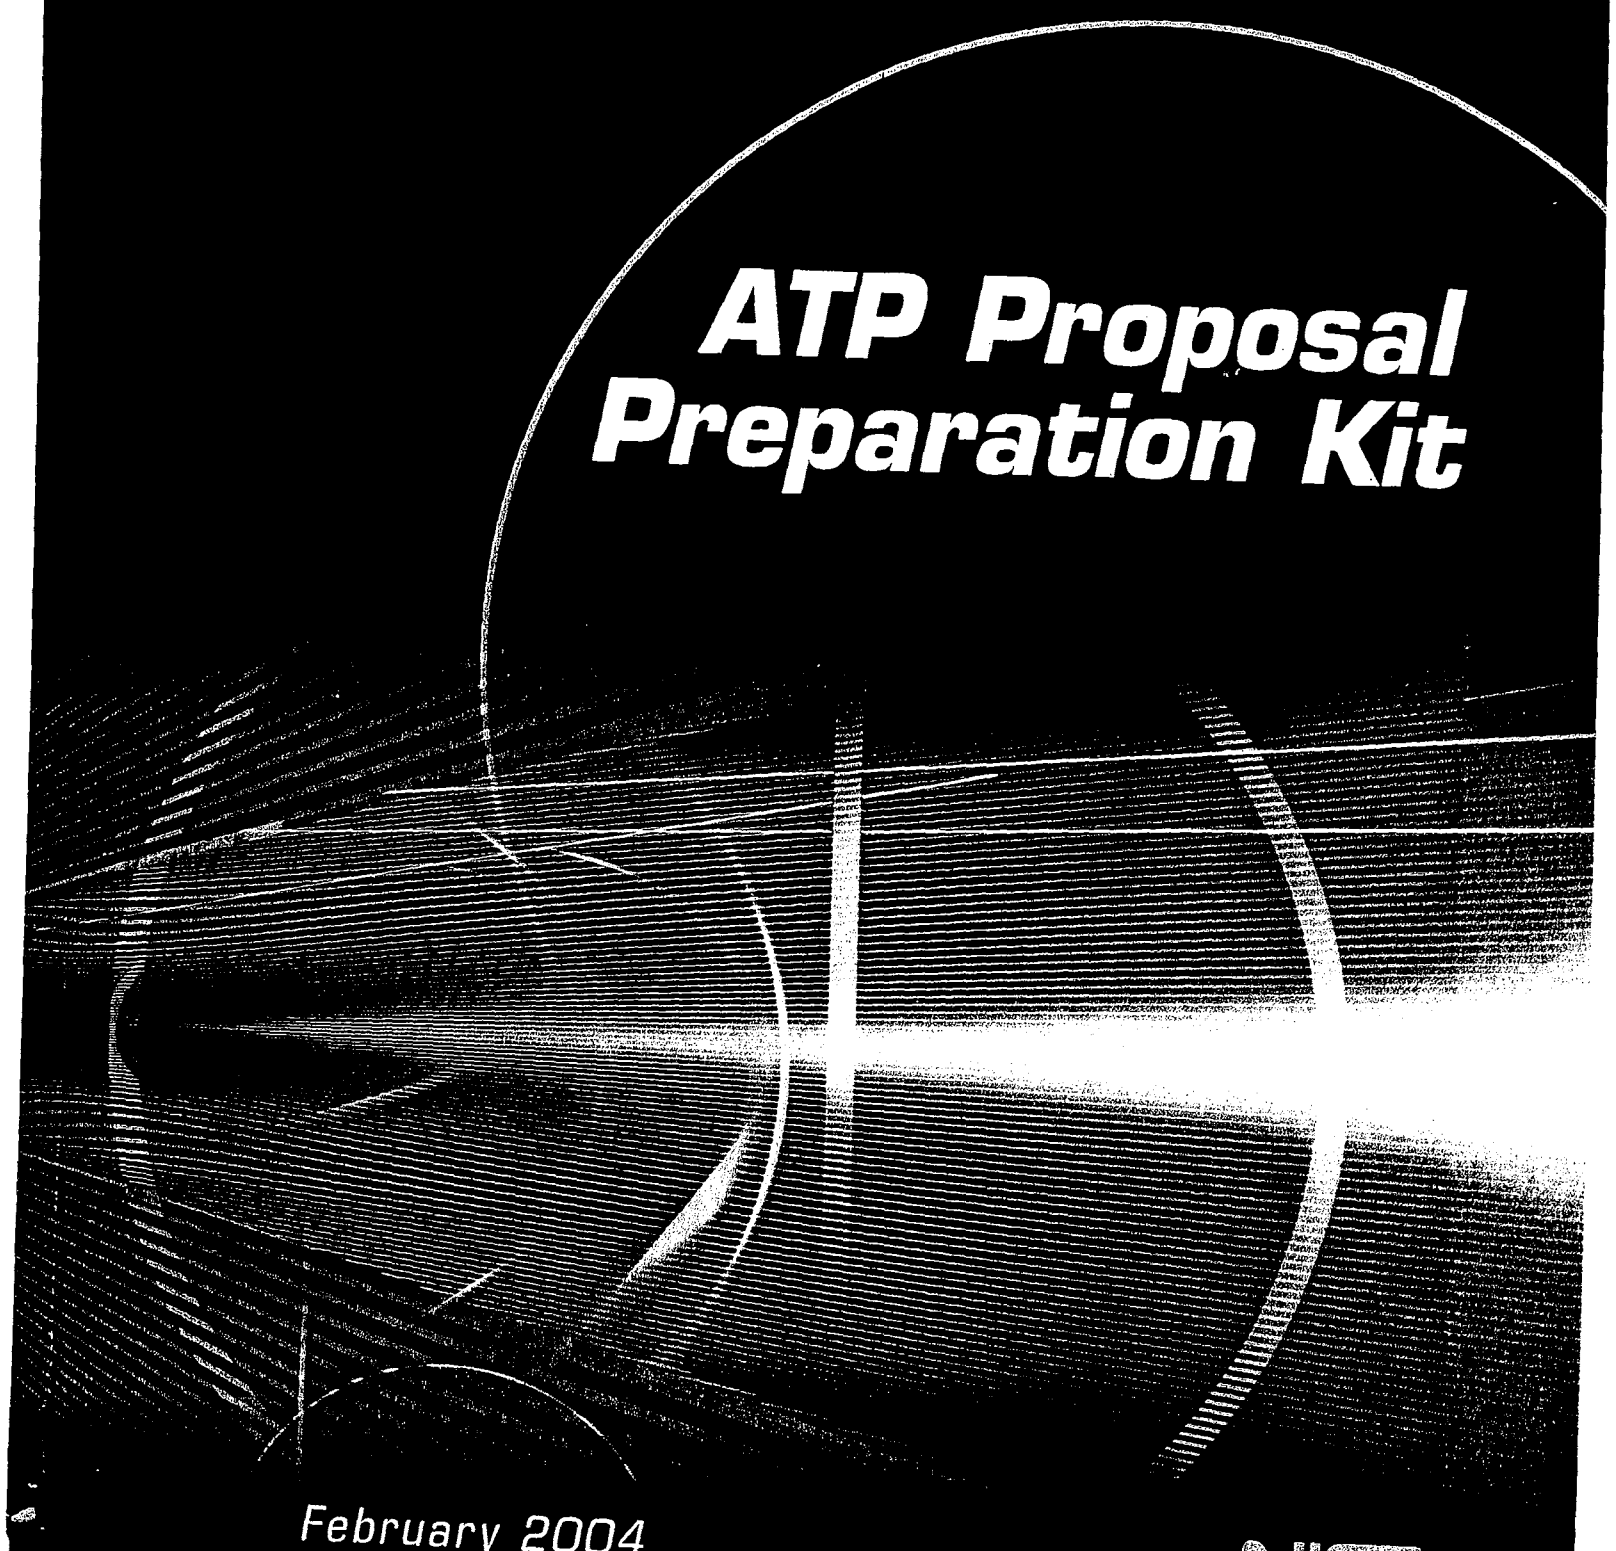
ADVANCED TECHNOLOGY PROGRAM

ATP Proposal Preparation Kit



February 2004

NIST
National Institute of Standards and Technology
Technology Administration
U.S. Department of Commerce

f. Predominantly straightforward, routine data gathering (e.g., creation of voluntary consensus standards, data gathering/handbook preparation, testing of materials, or unbounded research aimed at basic discovery science) or application of standard engineering practices.

g. Projects that are simply a follow-on or a continuation of tasks previously funded in ATP projects from essentially the same proposing team.

h. Projects in which the only risk is market oriented—that is, the risk that the end product may not be embraced by the marketplace.

2. What types of costs are ineligible/unallowable?

The following items, regardless of whether they are allowable under the federal cost principles, are unallowable under ATP:

a. Marketing, sales, or commercialization costs, unless they are included in a federally approved indirect cost rate.

b. Costs for the construction of new buildings or extensive renovations of existing laboratory buildings. However, costs for the construction of experimental research and development facilities to be located within a new or existing building are allowable provided that the equipment or facilities are essential for carrying out the proposed scientific and technical project and are approved by the NIST Grants Officer.

c. Indirect costs for single-company recipients, which must be absorbed by the company. (Note that with large businesses submitting proposals as single-company proposers, indirect costs absorbed by the large business may be used to meet the cost-sharing requirement.)

d. Bid and proposal costs, tuition costs, and costs for marketing surveys, commercialization studies, and general business planning, unless they are incorporated into a federally approved indirect cost rate. However, a university participating in an ATP project as a subcontractor or as a joint venture partner may charge ATP for tuition remission or other forms of compensation in lieu of wages paid to university students working on ATP projects but only as provided in OMB Circular A-21, Section J.41. In such cases, tuition remission would be considered a cash contribution rather than an in-kind contribution.

e. For research involving human and/or animal subjects, any costs used to secure Institutional Review Board or Institutional Animal Care and Use Committee approvals before the award or during the award.

f. Relocation costs, unless they are included in a federally approved indirect cost rate.

g. Office furniture costs, unless they are included in a federally approved indirect cost rate.

h. Costs for general purpose office equipment and supplies that are not used exclusively for the research—for example, office computers, printers, copiers, paper, pens, and toner cartridges.

i. Subcontractor expenses such as those for office supplies and conferences/workshops.

j. Patent costs and legal fees, unless they are included in a federally approved indirect cost rate.

k. Profit, management fees, interest on borrowed funds, or facilities capital cost of money.

l. Subcontracts to another part of the same company or to another company with identical or nearly identical ownership. Work proposed by another part of the same company or by another company with identical or nearly identical ownership should be shown as funded through interorganizational transfers

that do not contain profit. Interorganizational transfers should be broken down in the appropriate budget categories.

3. Can a university employee establish a company and subcontract back to his/her university?

Generally no. This would present a conflict of interest. However, under certain circumstances, for example, if the university's participation is unique and essential to the project, the subcontracting arrangement may be considered. In such a case, the organization/individual with the conflict of interest may not benefit or profit from the subcontract. For more information, see the Codes of Conduct guidance in 15 C.F.R. § 14.42 (http://www.atp.nist.gov/atp/helpful.htm).

4. Can an individual who has a financial or other interest in a company receive a subcontract from that company?

Generally no. See the answer to D.3 above.

5. Will ATP fund research performed outside the United States?

Possibly. Although ATP is not precluded from funding research performed outside the United States, proposals involving significant research outside the United States would likely be less competitive when evaluated against the ATP selection criterion related to how national economic benefits accrue to the United States. Any proposed use of a foreign subcontractor or a foreign-located organization must be justified in the proposal. This justification must include why the work or services cannot be performed equivalently or obtained in the United States.

E. Funding and Cost Sharing

1. How much funding can a company/organization receive, and is cost sharing required?

a. A **single company** can receive up to a total of $2 million for R&D activities for up to 3 years. ATP funds may only be used to pay direct costs for single-company recipients. Single-company recipients are responsible for funding all of their indirect/overhead costs. Small- and medium-sized companies applying as single-company proposers are not required to provide cost sharing of direct costs; however, they may pay a portion of the direct costs if they propose to, in addition to all indirect costs throughout the project. If a single company proposes to pay direct costs, it will become a requirement of the award. The company will be responsible for meeting its committed cost share in accordance with its approved budget throughout the award.

   Large companies applying as single-company proposers must cost share at least 60 percent of the yearly total project costs (direct plus all of the indirect costs). A *large company* is defined as any business, including any parent company plus related subsidiaries, having annual revenues in excess of $3.043 billion. (Note that this number will likely be updated annually and will be noted in future annual announcements of availability of funds and revised editions of the *ATP Proposal Preparation Kit.*)

b. A **joint venture** can receive funds for R&D activities for up to 5 years with no funding limitation other than the announced availability of funds. Joint ventures must cost share more than 50 percent of the yearly total project costs (direct plus indirect costs).

If an award is issued to a joint venture, each joint venture participant will be responsible for meeting its committed cost share in accordance with its approved budget throughout the award. No joint venture participant will be responsible for the cost-share commitment of any other joint venture participant. However, with the agreement of the joint venture participants, along with notification to the NIST Grants Officer, a joint venture participant that has exceeded its cost-share commitment may allow its excess cost share to be applied to the cost-share deficit of another joint venture participant, so that the overall joint venture cost share is met.

2. How does ATP define *cost sharing?*

Cost sharing is that portion of the project costs not borne by the federal government and includes direct and indirect costs. Sources of revenue to satisfy the required cost share include cash and in-kind contributions. Cash contributions can be from recipient, state, county, city, or other nonfederal sources. In-kind contributions can be made by recipients or nonfederal third parties (excluding subcontractors) and can include, but are not limited to, equipment, research tools, software, and supplies. Except as specified in 15 C.F.R. § 295.25, the value of in-kind contributions shall be determined in accordance with 15 C.F.R. § 14.23. The value of in-kind contributions will be prorated according to the share of total use dedicated to the ATP project. Labor/personnel costs are not in-kind contributions; they are cash contributions. ATP limits the total value of in-kind contributions that can be used to satisfy the cost share to 30 percent of the nonfederal share of the total project costs.

Any cost sharing must be in accordance with the "cost sharing or matching" provisions of 15 C.F.R. Part 14, *Uniform Administrative Requirements for Grants and Cooperative Agreements With Institutions of Higher Education, Hospitals, Other Non-Profit, and Commercial Organizations* (http://www.atp.nist.gov/atp/helpful.htm).

Additionally, as with the federal share, any costs included as cost share must be allowable under the following applicable federal cost principles. These documents may be found at http://www.atp.nist.gov/atp/helpful.htm:

a. For-profit companies, 48 C.F.R. Part 31.

b. Universities, OMB Circular A-21.

c. Nonprofit organizations, OMB Circular A-122.

d. Hospitals, 45 C.F.R. Part 74, Appendix E.

3. What are direct and indirect costs?

Direct costs are those that are directly related to a specific, single cost objective. Examples include personnel, travel, equipment, subcontractors, and materials and supplies. An indirect cost is any cost not directly identified with a single, final cost objective but identified with two or more final cost objectives or an intermediate cost objective. After direct costs have been determined and charged directly to the project or other work, indirect costs are those remaining to be allocated to the several cost objectives. Because of diverse characteristics and accounting practices of recipient organizations, it is not possible to specify the types of costs that may be classified as indirect costs in all situations. However, typical examples of indirect costs for many organizations include general administration such as salaries and expenses of executive officers, rent, utilities, personnel administration, maintenance, library expenses, and accounting. ATP shall interpret indirect costs in accordance with applicable federal cost principles.

4. I am a small startup company and do not have any indirect costs. If funded, the ATP project would be the only project for my company. Will ATP fund a proposal that only has direct costs?

No. When the assertion is made that a company has no indirect costs, it raises the following concerns:

a. If a company claims to have no indirect costs, this suggests to ATP that either the company is inexperienced in its fiscal affairs or the company has no intention of carrying on any business other than performing research for the ATP project. On this latter point, ATP will not pay for commercialization activities in which the company may engage at some point to earn revenues.

b. ATP projects are industry/government, cost-shared projects. A company proposing to recover 100 percent of the project costs from ATP is not complying with the spirit of the ATP statute because the company has no funds of its own at risk. In addition, if the company is not sharing in the risk of the investment with ATP, it gives the appearance that it is not very committed to moving the technology into the marketplace. Therefore, a proposal claiming no indirect costs is unlikely to receive an ATP award.

5. I am a small startup company and expect to cost share direct costs through the use of state or other private investors. If those resources fall through after I receive an ATP award, will I be expected to make up the cost-share gap?

Yes. If a single-company or joint venture proposal is selected for funding, the recipient's percentage of cost sharing will be made a part of the award, and only rarely will NIST reduce it after the award is issued. NIST cannot violate the ATP statutory cost-sharing requirements.

6. Can Cooperative Research and Development Agreement (CRADA) funds be used as cost sharing? May I count my company CRADA contribution as cost share?

No. Since CRADA funds derive from federal sources, they cannot be used for cost-sharing purposes. In the event that CRADA funds have been awarded in areas closely related to the ATP project, the proposer must make a clear distinction between the two projects. Recovering the proposer's cost share through a CRADA would be contrary to the kind of financial commitment expected of proposers by the ATP statute. In addition, title to any inventions arising from an ATP-funded project must be held by a for-profit company or companies incorporated or organized in the United States. Federal laboratories cannot hold title to inventions from ATP-funded research. This is another reason to keep the projects separate and distinct.

7. Can independent research and development (IR&D) funds be used as cost sharing?

The fundamental expectation for cost sharing is that the proposer's share of the ATP project costs will be funded from nonfederal sources, such as retained earnings or profits, not funds included as an indirect expense that is subsequently allocated for reimbursement under federally funded procurement contracts, grants, and other agreements. Recovering the proposer's cost share as part of its IR&D/General and Administrative (G&A) allocation to other federally funded projects would be contrary to the kind of financial commitment expected of proposers by the ATP statute.

Proposers **MAY NOT** classify the nonfederal share of the ATP project costs as an IR&D expense that is subsequently allocated, either as

Government, and the recipient during performance of the contemplated activity.

(d) The term *direct costs* means costs that can be identified readily with activities carried out in support of a particular final objective. A cost may not be allocated to an award as a direct cost if any other cost incurred for the same purpose in like circumstances has been assigned to an award as an indirect cost. Because of the diverse characteristics and accounting practices of different organizations, it is not possible to specify the types of costs which may be classified as direct costs in all situations. However, typical direct costs could include salaries of personnel working on the ATP project and associated reasonable fringe benefits such as medical insurance. Direct costs might also include supplies and materials, special equipment required specifically for the ATP project, and travel associated with the ATP project. ATP shall determine the allowability of direct costs in accordance with applicable Federal cost principles.

(e) The term *foreign-owned company* means a company other than a United States-owned company as defined in 295.2(q).

(f) The term *grant* means a Federal assistance instrument used whenever the principal purpose of the relationship between the Federal Government and the recipient is the transfer of money, property, services, or anything of value to the recipient in order to accomplish a public purpose of support or stimulation authorized by Federal statute, rather than acquisition by purchase, lease, or barter, of property or services for the direct benefit or use of the Federal Government; and no substantial involvement is anticipated between the executive agency, acting for the Federal Government, and the recipient during performance of the contemplated activity.

(g) The term *independent research organization* (IRO) means a nonprofit research and development corporation or association organized under the laws of any state for the purpose of carrying out research and development on behalf of other organizations.

(h) The term *indirect costs* means those costs incurred for common or joint objectives that cannot be readily identified with activities carried out in support of a particular final objective. A cost may not be allocated to an award as an indirect cost if any other cost incurred for the same purpose in like circumstances has been assigned to an award as a direct cost. Because of diverse characteristics and accounting practices it is not possible to specify the types of costs which may be classified as indirect costs in all situations. However, typical examples of indirect costs include general administration expenses, such as the salaries and expenses of executive officers, personnel administration, maintenance, library expenses, and accounting. ATP shall determine the allowability of indirect costs in accordance with applicable Federal cost principles.

(i) The term *industry-led joint research and development venture* or *joint venture* means a business arrangement that consists of two or more separately-owned, for-profit companies that perform research and development in the project; control the joint venture's membership, research directions, and funding priorities; and share total project costs with the Federal Government. The joint venture may include additional companies, independent research organizations, universities, and/or governmental laboratories (other than NIST) which may or may not contribute funds (other than Federal funds) to the project and perform research and development. A for-profit company or an independent research organization may serve as an Administrator and perform administrative tasks on behalf of a joint venture, such as handling receipts and disbursements of funds and making antitrust filings. The following activities are not permissible for ATP-funded joint ventures:

A. FINANCIAL REQUIREMENTS

.01 Financial Reports

a. The Recipient shall submit a "Financial Status Report" (SF-269) on a semi-annual basis for the periods ending March 31 and September 30, or any portion thereof, unless otherwise specified in a special award condition. Reports are due no later than 30 days following the end of each reporting period. A final SF-269 shall be submitted within 90 days after the expiration date of the award.

b. The Recipient shall submit a "Federal Cash Transactions Report" (SF-272) for each award where funds are advanced to Recipients. The SF-272 should be submitted on a quarterly basis for periods ending March 31, June 30, September 30, and December 31. The SF-272 is due 15 working days following the end of each reporting period unless otherwise specified in a special award condition.

c. All financial reports shall be submitted in triplicate (one original and two copies) to the Grants Officer.

.02 Award Payments

a. The advance method of payment shall be authorized unless otherwise specified in a special award condition. Payments will be made through electronic funds transfers in accordance with the requirements of the Debt Collection Improvement Act of 1996.

b. When the "Request for Advance or Reimbursement" (SF-270) is used to request payment, the Recipient shall submit the request no more frequently than monthly to request payment. The SF-270 shall be submitted in triplicate (an original and two copies) to the Grants Officer. When the SF-270 is used, the Recipient must complete the SF-3881, "ACH Vendor Miscellaneous Payment Enrollment Form," and return it to the Grants Officer. The award number must be included on all payment-related information and forms.

c. Payments will be made via electronic funds transfer which transfers funds directly to a Recipient's bank account.

d. Advances shall be limited to the minimum amounts necessary to meet immediate disbursement needs. Advanced funds not disbursed in a timely manner must be promptly returned to the Department of Commerce (DoC). Advances shall be approved for periods not to exceed 30 days. The Grants Officer determines the

appropriate method of payment. If a Recipient demonstrates an unwillingness or inability to establish procedures which will minimize the time elapsing between the transfer of funds and disbursement or if the Recipient otherwise fails to continue to qualify for the advance method of payment, the Grants Officer may change the method of payment to reimbursement only.

.03 Federal and Non-Federal Sharing

a. Awards which include Federal and non-Federal sharing incorporate an estimated budget consisting of shared allowable costs. If actual allowable costs are less than the total approved estimated budget, the Federal and non-Federal cost share ratio shall be calculated as a percentage of Federal and non-Federal approved amounts. If actual allowable costs are greater than the total approved estimated budget, the Federal share shall not exceed the total Federal dollar amount as reflected in the Financial Assistance Award (CD-450) and Amendment to Financial Assistance Award (CD-451).

b. The non-Federal share, whether in cash or in in-kind, is expected to be paid out at the same general rate as the Federal share. Exceptions to this requirement may be granted by the Grants Officer based on sufficient documentation demonstrating previously determined plans for or later commitment of cash or in-kind contributions. However, the Recipient must meet its cost share commitment over the life of the award.

.04 Budget Changes and Transfer of Funds Among Categories

a. Requests for budget changes to the approved estimated budget in accordance with the provision noted below must be submitted to the Federal Program Officer who shall review them and make a recommendation to the Grants Officer. The Grants Officer shall make the final determination on such requests and notify the Recipient in writing.

b. Unless the Recipient is subject to 15 CFR Part 24 and the Federal share of the budget is $100,000 or less, cumulative transfers of funds of an amount above 10 percent of the total award must be approved by the Grants Officer in writing. This allows the Recipient to transfer funds among approved direct cost categories when the cumulative amount of such transfers does not exceed 10 percent of the current (last approved) total budget. The same criteria applies to the cumulative amount of transfer of funds among projects, functions, joint ventures, consortia, activities, and annual costs when budgeted separately within an award, except transfers will not be permitted if such transfers would cause any Federal appropriation, or part thereof, to be used for purposes other than those intended. This transfer authority does not authorize the Recipient to create new budget categories within an approved budget unless the Grants Officer has provided prior approval.

c. The Recipient is not authorized at any time to transfer amounts budgeted for direct costs to the indirect costs line item or vice versa, without written prior approval of the Grants Officer.

.05 Indirect Costs

a. Indirect costs will not be allowable charges against the award unless specifically included as a line item in the approved budget incorporated into the award.

b. Excess indirect costs may not be used to offset unallowable direct costs.

c. If the Recipient has not previously established an indirect cost rate with a Federal agency, the negotiation and approval of a rate is subject to the procedures in the applicable cost principles and the following subparagraphs:

1. The Office of Inspector General (OIG) is authorized to negotiate indirect cost rates on behalf of the DoC for those organizations for which the DoC is cognizant or has oversight. The OIG will negotiate only fixed rates. The Recipient shall submit to the OIG within 90 days of the award start date, documentation (indirect cost proposal, cost allocation plan, etc.) necessary to establish such rates. The Recipient shall provide the Grants Officer with a copy of the transmittal letter to the OIG.

2. When an oversight or cognizant Federal agency other than the DoC has responsibility for establishing an indirect cost rate, the Recipient shall submit to that oversight or cognizant Federal agency within 90 days of the award start date the documentation (indirect cost proposal, cost allocation plan, etc.) necessary to establish such rates. The Recipient shall provide both the Grants Officer and the DoC OIG with a copy of the transmittal letter to the cognizant Federal agency.

3. If the Recipient fails to submit the required documentation to the OIG or other oversight or cognizant Federal agency within 90 days of the award start date, the Grants Officer shall amend the award to preclude the recovery of any indirect costs under the award. If the DoC OIG, oversight, or cognizant Federal agency determines there is a finding of good and sufficient cause to excuse the Recipient's delay in submitting the documentation, an extension of the 90-day due date may be approved by the Grants Officer.

4. Regardless of any approved indirect cost rate applicable to the award, the maximum dollar amount of allocable indirect costs for which the DoC will reimburse the Recipient shall be the lesser of:

(a) The Federal share of the total allocable indirect costs of the award based on the negotiated rate with the cognizant Federal agency as established by audit or negotiation; or

(b) The line item amount for the Federal share of indirect costs contained in the approved budget of the award.

.06 Incurring Costs or Obligating Federal Funds Beyond the Expiration Date

a. The Recipient shall not incur costs or obligate funds for any purpose pertaining to the operation of the project, program, or activities beyond the expiration date stipulated in the award. The only costs which are authorized for a period of up to 90 days following the award expiration date are those strictly associated with closeout activities. Closeout activities are limited to the preparation of final progress, financial, and required project audit reports.

b. Unless otherwise authorized in 15 CFR Part 14.25(e)(4) or a special award condition, any extension of the award period can only be authorized by the Grants Officer in writing. Verbal or written assurances of funding from other than the Grants Officer shall not constitute authority to obligate funds for programmatic activities beyond the expiration date.

c. The DoC has no obligation to provide any additional prospective funding. Any renewal of the award to increase funding and to extend the period of performance is at the sole discretion of the DoC.

.07 Tax Refunds

Refunds of FICA/FUTA taxes received by the Recipient during or after the award period must be refunded or credited to the DoC where the benefits were financed with Federal funds under the award. The Recipient agrees to contact the Grants Officer immediately upon receipt of these refunds. The Recipient further agrees to refund portions of FICA/FUTA taxes determined to belong to the Federal Government, including refunds received after the expiration of the award.

B. PROGRAMMATIC REQUIREMENTS

.01 Performance (Technical) Reports

a. The Recipient shall submit performance (technical) reports in triplicate (one original and two copies) to the Federal Program Officer in the same frequency as the Financial Status Report (SF-269).

b. Unless otherwise specified in the award provisions, performance (technical) reports shall contain brief information as prescribed in the applicable uniform administrative requirements incorporated into the award.

.02 Unsatisfactory Performance

Failure to perform the work in accordance with the terms of the award and maintain at least a satisfactory performance rating may result in designation of the Recipient as high risk and assignment of special award conditions or other further action as specified in the standard term and condition entitled "Non-Compliance With Award Provisions."

.03 Programmatic Changes

a. The Recipient shall not make any programmatic changes to the award without prior written approval by the Grants Officer.

b. Any requests by the Recipient for programmatic changes must be submitted to the Federal Program Officer who shall review and make recommendations to the Grants Officer. The Grants Officer shall make the final determination and notify the Recipient in writing.

.04 Other Federal Awards with Similar Programmatic Activities

The Recipient shall immediately provide written notification to the Federal Program Officer and the Grants Officer in the event that, subsequent to receipt of the DoC award, other financial assistance is received to support or fund any portion of the scope of work incorporated into the DoC award. DoC will not pay for costs that are funded by other sources.

C. NON-DISCRIMINATION REQUIREMENTS

No person in the United States shall, on the ground of race, color, national origin, handicap, religion, or sex, be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program or activity receiving Federal financial assistance. The Recipient agrees to comply with the non-discrimination requirements below:

.01 Statutory Provisions

a. Title VI of the Civil Rights Act of 1964 (42 USC §§ 2000d et seq.) and DoC implementing regulations published at 15 CFR Part 8 which prohibit discrimination on the grounds of race, color, or national origin under programs or activities receiving Federal financial assistance;

b. Title IX of the Education Amendments of 1972 (20 USC §§ 1681 et seq.) prohibiting discrimination on the basis of sex under Federally assisted education programs or activities;

c. Section 504 of the Rehabilitation Act of 1973, as amended (29 USC § 794) and DoC implementing regulations published at 15 CFR Part 8b prohibiting discrimination on the basis of handicap under any program or activity receiving or benefitting from Federal assistance;

d. The Age Discrimination Act of 1975, as amended (42 USC §§ 6101 et seq.) and DoC implementing regulations published at 15 CFR Part 20 prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;

e. The Americans with Disabilities Act of 1990 (42 USC §§ 12101 et seq.) prohibiting discrimination on the basis of disability under programs, activities, and services provided or made available by state and local governments or instrumentalities or agencies thereto, as well as public or private entities that provide public transportation;

f. Any other non-discrimination provisions of statutory law.

.02 Other Provisions

Parts II and III of Executive Order 11246 (30 F.R. 12319, 1965) as amended by Executive Orders 11375 (32 F.R. 14303, 1967) and 12086 (43 F.R. 46501, 1978) requiring Federally assisted construction contracts to include the nondiscrimination provisions of §§ 202 and 203 of that Executive Order and Department of Labor regulations implementing Executive Order 11246 (41 CFR § 60-1.4(b), 1991).

D. AUDITS

Under the Inspector General Act of 1978, as amended, 5 USC App. I, section 1 et seq., an audit of the award may be conducted at any time. The Inspector General of the DoC, or any of his or her duly authorized representatives, shall have access to any pertinent books, documents, papers and records of the Recipient, whether written, printed, recorded, produced or reproduced by any mechanical, magnetic

or other process or medium, in order to make audits, inspections, excerpts, transcripts or other examinations as authorized by law. When the OIG requires a project audit on a DoC award, the OIG will usually make the arrangements to audit the award, whether the audit is performed by OIG personnel, an independent accountant under contract with the DoC, or any other Federal, state or local audit entity.

.01 Organization-Wide, Program-Specific, and Project Audits

a. Organization-wide or program-specific audits shall be performed in accordance with the Single Audit Act Amendments of 1996, as implemented by OMB Circular A-133, "Audits of States, Local Governments, and Non-Profit Organizations." Recipients that are subject to the provisions of OMB Circular A-133 and that expend $300,000 or more in Federal awards shall have an audit performed in accordance with the requirements contained in OMB Circular A-133.

b. In accordance with 15 CFR Part 14.26 (c) and (d), for-profit Recipients shall have a project audit performed no less than once every two years in accordance with the Generally Accepted Government Auditing Standards.

c. The Recipient shall submit copies of project audits conducted in accordance with 15 CFR Part 14.26 (c) an (d), which are required by the award and included as a line item in the budget of the award, and program-specific audits conducted under OMB A-133 to the DoC OIG at the following address with a copy of the transmittal letter to the Grants Officer:

Office of Inspector General
U.S. Department of Commerce
Atlanta Regional Office of Audits
401 West Peachtree Street, N.W., Suite 2742
Atlanta, GA 30308

d. Recipients expending Federal awards over $300,000 a year and having audits conducted in accordance with OMB Circular A-133 shall submit a copy of organization-wide or program-specific audits to the Bureau of the Census, which has been designated by OMB as a central clearinghouse. The address is:

Federal Audit Clearinghouse
Bureau of the Census
1201 E. 10th Street
Jeffersonville, IN 47132

.02 Audit Resolution Process

a. An audit of the award may result in the disallowance of costs incurred by the Recipient and the establishment of a debt (account receivable) due DoC. For this reason, the Recipient should take seriously its responsibility to respond to all audit findings and recommendations with adequate explanations and supporting evidence whenever audit results are disputed.

b. A Recipient whose award is audited has the following opportunities to dispute the proposed disallowance of costs and the establishment of a debt:

1. Unless the Inspector General determines otherwise, the Recipient has 30 days from the date of the transmittal of the draft audit report to submit written comments and documentary evidence.

2. The Recipient has 30 days from the date of the transmittal of the final audit report to submit written comments and documentary evidence. There will be no extension of this deadline.

3. The DoC shall review the documentary evidence submitted by the Recipient and shall notify the Recipient of the results in an Audit Resolution Determination Letter. The Recipient has 30 days from the date of receipt of the Audit Resolution Determination Letter to submit a written appeal. There will be no extension of this deadline. The appeal is the last opportunity for the Recipient to submit written comments and documentary evidence that dispute the validity of the audit resolution determination. In addition, an appeal does not preclude the Recipient's obligation to pay a debt that may be established nor does the appeal preclude the accrual of interest on a debt.

4. The DoC shall review the Recipient's appeal and notify the Recipient of the results in an Appeal Determination Letter. After the opportunity to appeal has expired or after the appeal determination has been rendered, DoC will not accept any further documentary evidence from the Recipient. There will be no other administrative appeals available in DoC.

E. DEBTS

.01 Payment of Debts Owed the Federal Government

Any debts determined to be owed the Federal Government shall be paid promptly by the Recipient. A debt will be considered delinquent if it is not paid within 15 days of the due date. Failure to pay a debt by the due date shall result in the imposition of late payment charges as noted below. In addition, failure to pay the debt or establish a repayment agreement by the due date will also result in the

referral of the debt for collection action and may result in DoC taking further action as specified in the standard term and condition entitled "Non-Compliance With Award Provisions." Payment of a debt must not come from other Federally sponsored programs. Verification that other Federal funds have not been used will be made during future program visits and audits.

.02 Late Payment Charges

a. An interest charge shall be assessed on the delinquent debt (over 15 days) as established by the Debt Collection Act of 1982, as amended. The minimum annual interest rate to be assessed is the Department of the Treasury's Current Value of Funds Rate. This rate is published in the Federal Register by the Department of the Treasury. The assessed rate shall remain fixed for the duration of the indebtedness.

b. A penalty charge shall be assessed on any portion of a debt that is delinquent for more than 90 days, although the charge will accrue and be assessed from the date the debt became delinquent.

c. An administrative charge shall be assessed to cover processing and handling the amount due.

d. State and local governments are not subject to penalty and administrative charges.

F. NAME CHECK

A name check review shall be performed by the OIG on key individuals associated with non-profit and for-profit organizations, unless an exemption has been authorized by the Inspector General.

.01 Results of Name Check

DoC reserves the right to take any of the actions described in section F.02 if any of the following occurs as a result of the name check review:

a. A key individual fails to submit the required form "Identification - Applicant for Funding Assistance (CD-346);

b. A key individual made an incorrect statement or omitted a material fact on the CD-346; or

c. The name check reveals significant adverse findings that reflect on the business integrity or responsibility of the Recipient and/or key individual.

.02 Action(s) Taken as a Result of Name Check Review

If any situation noted in F.01 occurs, DoC, at its discretion, may take one or more of the following actions:

a. Consider termination of the award;

b. Require the removal of any key individual from association with the management of and/or implementation of the award; and/or

c. Make appropriate provisions or revisions at DoC's discretion with respect to the method of payment and/or financial reporting requirements.

G. GOVERNMENTWIDE DEBARMENT AND SUSPENSION (NONPROCUREMENT)

The Recipient shall comply with the provisions of Executive Order 12549, "Debarment and Suspension" and DoC's implementing regulations published at 15 CFR Part 26, Subparts A through E, "Governmentwide Debarment and Suspension (Nonprocurement)," which generally prohibit entities that have been debarred, suspended, or voluntarily excluded from participating in Federal nonprocurement transactions either through primary or lower tier covered transactions.

H. DRUG-FREE WORKPLACE

The Recipient shall comply with the provisions of Public Law 100-690, Title V, Subtitle D, "Drug-Free Workplace Act of 1988," and DoC implementing regulations published at 15 CFR Part 26, Subpart F, "Governmentwide Requirements for Drug-Free Workplace (Grants)," which require that the Recipient take steps to provide a drug-free workplace.

I. LOBBYING RESTRICTIONS

.01 Statutory Provisions

The Recipient shall comply with the provisions of Section 319 of Public Law 101-121, which added Section 1352 to Chapter 13 of Title 31 of the United States Code, and DoC implementing regulations published at 15 CFR Part 28, "New Restrictions on Lobbying." These provisions generally prohibit the use of Federal funds for lobbying the Executive or Legislative Branches of the Federal government in connection with the award, and require the disclosure of the use of non-Federal funds for lobbying.

.02 Disclosure of Lobbying Activities

The Recipient receiving in excess of $100,000 in Federal funding shall submit a completed "Disclosure of Lobbying Activities" (SF-LLL) regarding the use of non-Federal funds for lobbying. The SF-LLL shall be submitted within 30 days following the end of the calendar quarter in which there occurs any event that requires disclosure or that materially affects the accuracy of the information contained in any disclosure form previously filed. The Recipient must submit the SF-LLLs, including those received from subrecipients, contractors, and subcontractors, to the Grants Officer.

J. SUBAWARD, CONTRACT, AND SUBCONTRACT

.01 Applicability of Award Provisions to Subrecipients

The Recipient shall require all subrecipients, including lower tier subrecipients, under the award to comply with the provisions of the award including applicable cost principles, administrative, and audit requirements.

.02 Competition and Codes of Conduct for Subawards

a. All subawards will be made in a manner to provide, to the maximum extent practicable, open and free competition. The Recipient shall be alert to organizational conflicts of interest as well as other practices among subrecipients that may restrict or eliminate competition. In order to ensure objective subrecipient performance and eliminate unfair competitive advantage, subrecipients that develop or draft work requirements, statements of work, or requests for proposals shall be excluded from competing for such subawards.

b. The Recipient shall maintain written standards of conduct governing the performance of its employees engaged in the award and administration of subawards. No employee, officer, or agent shall participate in the selection, award, or administration of a subaward supported by Federal funds if a real or apparent conflict of interest would be involved. Such a conflict would arise when the employee, officer, or agent, any member of his or her immediate family, his or her partner, or an organization which employs or is about to employ any of the parties mentioned in this section, has a financial interest or other interest in the organization selected for a subaward. The officers, employees, and agents of the Recipient shall neither solicit nor accept anything of monetary value from subrecipients. However, the Recipient may set standards for situations in which the financial interest is not substantial or the gift is an unsolicited item of nominal value. The standards of conduct shall provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the Recipient.

.03 **Applicability of Provisions to Subawards, Contracts, and Subcontracts**

a. The Recipient shall include the following notice in each request for applications or bids:

> Applicants/bidders for a lower tier covered transaction (except for goods and services under the $100,000 simplified acquisition threshold and where the lower tier Recipient will have no critical influence on or substantive control over the award) are subject to 15 CFR Part 26, Subparts A through E, "Governmentwide Debarment and Suspension (Nonprocurement). In addition, applicants/bidders for a lower tier covered transaction for a subaward, contract, or subcontract greater than $100,000 of Federal funds at any tier are subject to 15 CFR Part 28, "New Restrictions on Lobbying." Applicants/bidders should familiarize themselves with these provisions, including the certification requirements. Therefore, applications for a lower tier covered transaction must include a "Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion--Lower Tier Covered Transactions and Lobbying" (CD-512) completed without modification.

b. The Recipient shall include a statement in all lower tier covered transactions (subawards, contracts, and subcontracts), that the award is subject to Executive Order 12549, "Debarment and Suspension" and DoC implementing regulations published at 15 CFR Part 26, Subparts A through E, "Governmentwide Debarment and Suspension (Nonprocurement)."

c. The Recipient shall include a statement in all lower tier covered transactions (subawards, contracts, and subcontracts) exceeding $100,000 in Federal funds, that the subaward, contract, or subcontract is subject to Section 319 of Public Law 101-121, which added Section 1352, regarding lobbying restrictions, to Chapter 13 of Title 31 of the United States Code as implemented at 15 CFR Part 28, "New Restrictions on Lobbying." The Recipient shall further require the subrecipient, contractor, or subcontractor to submit a completed "Disclosure of Lobbying Activities" (SF-LLL) regarding the use of non-Federal funds for lobbying. The SF-LLL shall be submitted within 15 days following the end of the calendar quarter in which there occurs any event that requires disclosure or that materially affects the accuracy of the information contained in any disclosure form previously filed. The SF-LLL shall be submitted from tier to tier until received by the Recipient. The Recipient must submit all disclosure forms received, including those that report lobbying activity on its own behalf, to the Grants Officer within 30 days following the end of the calendar quarter.

.04 Minority and Women-Owned Business Enterprise

DoC encourages Recipients to utilize minority and women-owned firms and enterprises in contracts under financial assistance awards. The Minority Business Development Agency will assist Recipients in matching qualified minority and women-owned enterprises with contract opportunities. For further information contact:

U.S. Department of Commerce
Minority Business Development Agency
Herbert C. Hoover Building
14th Street and Constitution Avenue, N.W.
Washington, D.C. 20230

.05 Subaward and/or Contract to a Federal Agency

a. The Recipient, subrecipient, contractor, and/or subcontractor shall not sub-grant or sub-contract any part of the approved project to any agency of the DoC and/or other Federal department, agency or instrumentality, without the prior written approval of the Grants Officer.

b. Requests for approval of such action must be submitted to the Federal Program Officer who shall review and make a recommendation to the Grants Officer. The Grants Officer shall make the final determination and will notify the Recipient in writing of the final determination.

K. PROPERTY

.01 Standards

The Recipient shall comply with the property management standards as stipulated in the applicable uniform administrative requirements. Any inventory listings stipulated under the applicable uniform administrative requirements shall be submitted on the "Report of Government Property in Possession of Contractor" (CD-281). The CD-281 shall be submitted in triplicate (an original and two copies) to the Grants Officer.

.02 Rights to Inventions

Unless otherwise provided in applicable statutes, the policy and procedures set forth in DoC regulations 37 CFR Part 401, "Rights to Inventions made by Nonprofit Organizations and Small Business Firms under Government Grants, Contracts, and Cooperative Agreements," shall apply to all grants and cooperative agreements made to nonprofit organizations and small business firms where the purpose of the award is to accomplish experimental, developmental, or research work.

L. MISCELLANEOUS REQUIREMENTS

.01 Non-Compliance With Award Provisions

Failure to comply with any or all of the provisions of the award may be considered grounds for any or all of the following actions: establishment of an account receivable, withholding payments under any DoC awards to the Recipient, changing the method of payment from advance to reimbursement only, termination of any DoC active awards, and may have a negative impact on future funding by the DoC.

.02 Prohibition Against Assignment by the Recipient

Notwithstanding any other provision of the award, the Recipient shall not transfer, pledge, mortgage, or otherwise assign the award, or any interest therein, or any claim arising thereunder, to any party or parties, bank trust companies, or other financing or financial institutions.

.03 Internal Revenue Service (IRS) Information

a. A Recipient classified for tax purposes as an individual, partnership, proprietorship, corporation, or medical corporation is required to submit a taxpayer identification number (TIN) (either social security number, employer identification number as applicable, or registered foreign organization number) on Form W-9, "Payer's Request for Taxpayer Identification Number." Tax-exempt organizations and corporations (with the exception of medical corporations) are excluded from this requirement. Form W-9 shall be submitted to the Grants Officer within 60 days of the award start date. The TIN will be provided to the IRS by DoC on Form 1099-G, "Statement for Recipients of Certain Government Payments." Recipients who either fail to provide their TIN or provide an incorrect TIN may have funding suspended until the requirement is met.

b. Disclosure of a Recipient's TIN is mandatory for Federal income tax reporting purposes under the authority of 26 USC, Section 6011 and 6109(d), and 26 CFR, Section 301.6109-1. This is to ensure the accuracy of income computation by the IRS. This information will be used to identify an individual who is compensated with DoC funds or paid interest under the Prompt Payment Act.

.04 Foreign Travel

a. The Recipient shall comply with the provisions of the Fly America Act (49 USC § 40118).

b. The Fly America Act requires that Federal travelers and others performing U.S. Government-financed foreign air travel must use U.S. flag air carriers, to the extent that service by such carriers is available. Foreign air carriers may be used only when a U.S. flag air carrier is unavailable, or use of U.S. flag air carrier service will not accomplish the agency's mission.

c. Use of foreign air carriers may also be used only if bilateral agreements permit such travel pursuant to 49 USC § 40118(b). DoC is not aware of any bilateral agreements which meet these requirements, therefore, it is the responsibility of the Recipient to provide the Grants Officer with a copy of the applicable bilateral agreement if use of a foreign air carrier is anticipated.

d. If a foreign air carrier is anticipated to be used for any part of foreign travel, the Recipient must receive prior approval from the Grants Officer. The Recipient must submit a justification to the Federal Program Officer explaining why service by a U.S. flag air carrier is not available as determined under 41 CFR Part 301, why it would be necessary to use a foreign air carrier, or if a bilateral agreement permits such travel and provide a copy of the agreement. The Grants Officer shall make the final determination and notify the Recipient in writing. Failure to adhere to the provisions of the Fly America Act will result in the disallowance of the Recipient's air carrier expenses in an amount comparable to the loss of revenues suffered by the U.S. flag air carriers as a result of the Recipient's actions.

.05 American-Made Equipment or Products. Recipients are hereby notified that they are encouraged, to the greatest extent practicable, to purchase American-made equipment and products with funding provided under this program.

.06 Patent Notification Procedures. Pursuant to Executive Order 12889, the Department of Commerce (DoC) is required to notify the owner of any valid patent covering technology whenever the DoC or its financial assistance Recipients, without making a patent search, knows (or has demonstrable reasonable grounds to know) that technology covered by a valid United States patent has been or will be used without a license from the owner. To ensure proper notification, if the Recipient uses or has used patented technology under this award without a license or permission from the owner, the Recipient must notify the DoC Patent Counsel at the following address, with a copy to the Grants Officer:

Department of Commerce
Office of Chief Counsel for Technology
Patent Counsel
14th Street and Constitution Avenue, N.W. Room H-4613
Washington, D.C. 20230

The notification shall include the following information:

- the award number
- the name of the DoC awarding agency
- a copy of the patent
- a description of how the patented technology was used
- the name of the Recipient contact, including an address and telephone number

PART 31--CONTRACT COST PRINCIPLES AND PROCEDURES

Sec.

31.000 Scope of part.
31.001 Definitions.
31.002 Availability of accounting guide.

Subpart 31.1--Applicability

31.100 Scope of subpart.
31.101 Objectives.
31.102 Fixed-price contracts.
31.103 Contracts with commercial organizations.
31.104 Contracts with educational institutions.
31.105 Construction and architect-engineer contracts.
31.106 Facilities contracts.
31.106-1 Applicable cost principles.
31.106-2 Exceptions to general rules on allowability and allocability.
31.106-3 Contractor's commercial items.
31.107 Contracts with State, local, and federally recognized Indian tribal governments.
31.108 Contracts with nonprofit organizations.
31.109 Advance agreements.
31.110 Indirect cost rate certification and penalties on unallowable costs.

Subpart 31.2--Contracts with Commercial Organizations

31.201 General.
31.201-1 Composition of total cost.
31.201-2 Determining allowability.
31.201-3 Determining reasonableness.
31.201-4 Determining allocability.
31.201-5 Credits.
31.201-6 Accounting for unallowable costs.
31.201-7 Construction and architect-engineer contracts.
31.202 Direct costs.
31.203 Indirect costs.
31.204 Application of principles and procedures.
31.205 Selected costs.
31.205-1 Public relations and advertising costs.
31.205-2 [Reserved]
31.205-3 Bad debts.
31.205-4 Bonding costs.
31.205-5 [Reserved]

31.205-6 Compensation for personal services.
31.205-7 Contingencies.
31.205-8 Contributions or donations.
31.205-9 [Reserved]
31.205-10 Cost of money.
31.205-11 Depreciation.
31.205-12 Economic planning costs.
31.205-13 Employee morale, health, welfare, food service, and dormitory costs and credits.
31.205-14 Entertainment costs.
31.205-15 Fines, penalties, and mischarging costs.
31.205-16 Gains and losses on disposition or impairment of depreciable property or other capital assets.
31.205-17 Idle facilities and idle capacity costs.
31.205-18 Independent research and development and bid and proposal costs.
31.205-19 Insurance and indemnification.
31.205-20 Interest and other financial costs.
31.205-21 Labor relations costs.
31.205-22 Lobbying and political activity costs.
31.205-23 Losses on other contracts.
31.205-24 Maintenance and repair costs.
31.205-25 Manufacturing and production engineering costs.
31.205-26 Material costs.
31.205-27 Organization costs.
31.205-28 Other business expenses.
31.205-29 Plant protection costs.
31.205-30 Patent costs.
31.205-31 Plant reconversion costs.
31.205-32 Precontract costs.
31.205-33 Professional and consultant service costs.
31.205-34 Recruitment costs.
31.205-35 Relocation costs.
31.205-36 Rental costs.
31.205-37 Royalties and other costs for use of patents.
31.205-38 Selling costs.
31.205-39 Service and warranty costs.
31.205-40 Special tooling and special test equipment costs.
31.205-41 Taxes.
31.205-42 Termination costs.
31.205-43 Trade, business, technical, and professional activity costs.
31.205-44 Training and education costs.
31.205-45 Transportation costs.
31.205-46 Travel costs.

31.205-47 Costs related to legal and other proceedings.
31.205-48 Deferred research and development costs.
31.205-49 Goodwill.
31.205-50 [Reserved]
31.205-51 Costs of alcoholic beverages.
31.205-52 Asset valuations resulting from business combinations.

Subpart 31.3--Contracts with Educational Institutions

31.301 Purpose.
31.302 General.
31.303 Requirements.

Subparts 31.4 and 31.5--[Reserved]

Subpart 31.6--Contracts with State, Local, and Federally Recognized Indian Tribal Governments

31.601 Purpose.
31.602 General.
31.603 Requirements.

Subpart 31.7--Contracts with Nonprofit Organizations

31.701 Purpose.
31.702 General.
31.703 Requirements.

31.000 Scope of part.

This part contains cost principles and procedures for--

(a) The pricing of contracts, subcontracts, and modifications to contracts and subcontracts whenever cost analysis is performed (see 15.404-1(c)); and

(b) The determination, negotiation, or allowance of costs when required by a contract clause.

31.001 Definitions.

As used in this part--

"Accrued benefit cost method" means an actuarial cost method under which units of benefits are assigned to each cost accounting period and are valued as they accrue; *i.e.*, based on the services performed by each employee in the period involved. The measure of normal cost under this method for each cost accounting period is the present value of the units of benefit deemed to be credited to employees for service in that period. The measure of the actuarial accrued liability at a plan's inception date is the present value of the units of benefit credited to employees for service prior to that date. (This method is also known as the unit credit cost method without salary projection.).

"Accumulating costs" means collecting cost data in an organized manner, such as through a system of accounts.

"Actual cash value" means the cost of replacing damaged property with other property of like kind and quality in the physical condition of the property immediately before the damage.

"Actual costs" means (except for Subpart 31.6) amounts determined on the basis of costs incurred, as distinguished from forecasted costs. Actual costs include standard costs properly adjusted for applicable variances.

"Actuarial accrued liability" means pension cost attributable, under the actuarial cost method in use, to years prior to the current period considered by a particular actuarial valuation. As of such date, the actuarial accrued liability represents the excess of the present value of future benefits and administrative expenses over the present value of future normal costs for all plan participants and beneficiaries. The excess of the actuarial accrued liability over the actuarial value of the assets of a pension plan is the unfunded actuarial liability. The excess of the actuarial value of the assets of a pension plan over the actuarial accrued liability is an actuarial surplus and is treated as a negative unfunded actuarial liability.

"Actuarial assumption" means an estimate of future conditions affecting pension cost; *e.g.*, mortality rate, employee turnover, compensation levels, earnings on pension plan assets, and changes in values of pension plan assets.

"Actuarial cost method" means a technique which uses actuarial assumptions to measure the present value of future pension benefits and pension plan administrative expenses, and that assigns the cost of such benefits and expenses to cost accounting periods. The actuarial cost method includes the asset valuation method used to determine the actuarial value of the assets of a pension plan.

"Actuarial gain and loss" means the effect on pension cost resulting from differences between actuarial assumptions and actual experience.

"Actuarial valuation" means the determination, as of a specified date, of the normal cost, actuarial accrued liability, actuarial value of the assets of a pension plan, and other relevant values for the pension plan.

"Allocate" means to assign an item of cost, or a group of items of cost, to one or more cost objectives. This term includes both direct assignment of cost and the reassignment of a share from an indirect cost pool.

"Compensated personal absence" means any absence from work for reasons such as illness, vacation, holidays, jury duty, military training, or personal activities for which an employer pays compensation directly to an employee in accordance with a plan or custom of the employer.

"Cost input" means the cost, except general and administrative (G&A) expenses, which for contract costing purposes is allocable to the production of goods and services during a cost accounting period.

"Cost objective" means (except for Subpart 31.6) a function, organizational subdivision, contract, or other work unit for which cost data are desired and for which provision is made to accumulate and measure the cost of processes, products, jobs, capitalized projects, etc.

"Cost of capital committed to facilities" means an imputed cost determined by applying a cost of money rate to facilities capital.

"Deferred compensation" means an award made by an employer to compensate an employee in a future cost accounting period or periods for services rendered in one or more cost accounting periods before the date of the receipt of compensation by the employee. This definition shall not include the amount of year end accruals for salaries, wages, or bonuses that are to be paid within a reasonable period of time after the end of a cost accounting period.

"Defined-benefit pension plan" means a pension plan in which the benefits to be paid, or the basis for determining such benefits, are established in advance and the contributions are intended to provide the stated benefits.

"Defined-contribution pension plan" means a pension plan in which the contributions to be made are

established in advance and the benefits are determined thereby.

"Directly associated cost" means any cost which is generated solely as a result of the incurrence of another cost, and which would not have been incurred had the other cost not been incurred.

"Estimating costs" means the process of forecasting a future result in terms of cost, based upon information available at the time.

"Expressly unallowable cost" means a particular item or type of cost which, under the express provisions of an applicable law, regulation, or contract, is specifically named and stated to be unallowable.

"Facilities capital" means the net book value of tangible capital assets and of those intangible capital assets that are subject to amortization.

"Final cost objective" means (except for Subparts 31.3 and 31.6) a cost objective that has allocated to it both direct and indirect costs and, in the contractor's accumulation system, is one of the final accumulation points.

"Fiscal year" means the accounting period for which annual financial statements are regularly prepared, generally a period of 12 months, 52 weeks, or 53 weeks.

"Funded pension cost" means the portion of pension cost for a current or prior cost accounting period that has been paid to a funding agency.

"Home office" means an office responsible for directing or managing two or more, but not necessarily all, segments of an organization. It typically establishes policy for, and provides guidance to, the segments in their operations. It usually performs management, supervisory, or administrative functions, and may also perform service functions in support of the operations of the various segments. An organization which has intermediate levels, such as groups, may have several home offices which report to a common home office. An intermediate organization may be both a segment and a home office.

"Immediate-gain actuarial cost method" means any of the several actuarial cost methods under which actuarial gains and losses are included as part of the unfunded actuarial liability of the pension plan, rather than as part of the normal cost of the plan.

"Independent research and development (IR&D) cost" means the cost of effort which is neither sponsored by a grant, nor required in performing a contract, and which falls within any of the following four areas--

(a) Basic research,

(b) Applied research,

(c) Development, and

(d) Systems and other concept formulation studies.

"Indirect cost pools" means (except for Subparts 31.3 and 31.6) groupings of incurred costs identified with two or more cost objectives but not identified specifically with any final cost objective.

"Insurance administration expenses" means the contractor's costs of administering an insurance program; *e.g.*, the costs of operating an insurance or risk-management department, processing claims, actuarial fees, and service fees paid to insurance companies, trustees, or technical consultants.

"Intangible capital asset" means an asset that has no physical substance, has more than minimal value, and is expected to be held by an enterprise for continued use or possession beyond the current accounting period for the benefits it yields.

"Job" means a homogeneous cluster of work tasks, the completion of which serves an enduring purpose for the organization. Taken as a whole, the collection of tasks, duties, and responsibilities constitutes the assignment for one or more individuals whose work is of the same nature and is performed at the same skill/responsibility level--as opposed to a position, which is a collection of tasks assigned to a specific individual. Within a job, there may be pay categories which are dependent on the degree of supervision required by the employee while performing assigned tasks which are performed by all persons with the same job.

"Job class of employees" means employees performing in positions within the same job.

"Labor cost at standard" means a preestablished measure of the labor element of cost, computed by multiplying labor-rate standard by labor-time standard.

"Labor market" means a place where individuals exchange their labor for compensation. Labor markets are identified and defined by a combination of the following factors--

(1) Geography,

(2) Education and/or technical background required,

(3) Experience required by the job,

(4) Licensing or certification requirements,

(5) Occupational membership, and

(6) Industry.

"Labor-rate standard" means a preestablished measure, expressed in monetary terms, of the price of labor.

"Labor-time standard" means a preestablished measure, expressed in temporal terms, of the quantity of labor.

"Material cost at standard" means a preestablished measure of the material elements of cost, computed by multiplying material-price standard by material-quantity standard.

"Material-price standard" means a preestablished measure, expressed in monetary terms, of the price of material.

"Material-quantity standard" means a preestablished measure, expressed in physical terms, of the quantity of material.

"Moving average cost" means an inventory costing method under which an average unit cost is computed after each acquisition by adding the cost of the newly acquired units to the cost of the units of inventory on hand and dividing this figure by the new total number of units.

"Nonqualified pension plan" means any pension plan other than a qualified pension plan as defined in this part.

"Normal cost" means the annual cost attributable, under the actuarial cost method in use, to current and future years as of a particular valuation date excluding any payment in respect of an unfunded actuarial liability.

"Original complement of low cost equipment" means a group of items acquired for the initial outfitting of a tangible capital asset or an operational unit, or a new addition to either. The items in the group

individually cost less than the minimum amount established by the contractor for capitalization for the classes of assets acquired but in the aggregate they represent a material investment. The group, as a complement, is expected to be held for continued service beyond the current period. Initial outfitting of the unit is completed when the unit is ready and available for normal operations.

"Pay-as-you-go cost method" means a method of recognizing pension cost only when benefits are paid to retired employees or their beneficiaries.

"Pension plan" means a deferred compensation plan established and maintained by one or more employers to provide systematically for the payment of benefits to plan participants after their retirements, provided that the benefits are paid for life or are payable for life at the option of the employees. Additional benefits such as permanent and total disability and death payments, and survivorship payments to beneficiaries of deceased employees, may be an integral part of a pension plan.

"Pension plan participant" means any employee or former employee of an employer or any member or former member of an employee organization, who is or may become eligible to receive a benefit from a pension plan which covers employees of such employer or members of such organization who have satisfied the plan's participation requirements, or whose beneficiaries are receiving or may be eligible to receive any such benefit. A participant whose employment status with the employer has not been terminated is an active participant of the employer's pension plan.

"Profit center" means (except for Subparts 31.3 and 31.6) the smallest organizationally independent segment of a company charged by management with profit and loss responsibilities.

"Projected benefit cost method" means either--

(1) Any of the several actuarial cost methods that distribute the estimated total cost of all of the employees' prospective benefits over a period of years, usually their working careers; or

(2) A modification of the accrued benefit cost method that considers projected compensation levels.

"Proposal" means any offer or other submission used as a basis for pricing a contract, contract modification, or termination settlement or for securing payments thereunder.

"Qualified pension plan" means a pension plan comprising a definite written program communicated to and for the exclusive benefit of employees that meets the criteria deemed essential by the Internal Revenue Service as set forth in the Internal Revenue Code for preferential tax treatment regarding contributions, investments, and distributions. Any other plan is a nonqualified pension plan.

"Self-insurance charge" means a cost which represents the projected average loss under a self-insurance plan.

"Service life" means the period of usefulness of a tangible capital asset (or group of assets) to its current owner. The period may be expressed in units of time or output. The estimated service life of a tangible capital asset (or group of assets) is a current forecast of its service life and is the period over which depreciation cost is to be assigned.

"Spread-gain actuarial cost method" means any of the several projected benefit actuarial cost methods under which actuarial gains and losses are included as part of the current and future normal costs of the pension plan.

"Standard cost" means any cost computed with the use of preestablished measures.

"Tangible capital asset" means an asset that has physical substance, more than minimal value, and is expected to be held by an enterprise for continued use or possession beyond the current accounting period for the services it yields.

"Termination of employment gain or loss" means an actuarial gain or loss resulting from the difference between the assumed and actual rates at which pension plan participants separate from employment for reasons other than retirement, disability, or death.

"Variance" means the difference between a preestablished measure and an actual measure.

"Weighted average cost" means an inventory costing method under which an average unit cost is computed periodically by dividing the sum of the cost of beginning inventory plus the cost of acquisitions by the total number of units included in these two categories.

31.002 Availability of accounting guide.

Contractors needing assistance in developing or improving their accounting systems and procedures may request a copy of the guide entitled "Information for Contractors" (DCAAP 7641.90). The guide is available from--

Subpart 31.1--Applicability

31.100 Scope of subpart.

This subpart describes the applicability of the cost principles and procedures in succeeding subparts of this part to various types of contracts and subcontracts. It also describes the need for advance agreements.

31.101 Objectives.

In recognition of differing organizational characteristics, the cost principles and procedures in the succeeding subparts are grouped basically by organizational type; *e.g.*, commercial concerns and educational institutions. The overall objective is to provide that, to the extent practicable, all organizations of similar types doing similar work will follow the same cost principles and procedures. To achieve this uniformity, individual deviations concerning cost principles require advance approval of the agency head or designee. Class deviations for the civilian agencies require advance approval of the Civilian Agency Acquisition Council. Class deviations for the National Aeronautics and Space Administration require advance approval of the Associate Administrator for Procurement. Class deviations for the Department of Defense require advance approval of the Director of Defense Procurement, Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics.

31.102 Fixed-price contracts.

The applicable subparts of Part 31 shall be used in the pricing of fixed-price contracts, subcontracts, and modifications to contracts and subcontracts whenever (a) cost analysis is performed, or (b) a fixed-price contract clause requires the determination or negotiation of costs. However, application of cost principles to fixed-price contracts and subcontracts shall not be construed as a requirement to negotiate agreements on individual elements of cost in arriving at agreement on the total price. The final price accepted by the parties reflects agreement only on the total price. Further, notwithstanding the

mandatory use of cost principles, the objective will continue to be to negotiate prices that are fair and reasonable, cost and other factors considered.

31.103 Contracts with commercial organizations.

This category includes all contracts and contract modifications for supplies, services, or experimental, developmental, or research work negotiated with organizations other than educational institutions (see 31.104), construction and architect-engineer contracts (see 31.105), State and local governments (see 31.107) and nonprofit organizations (see 31.108) on the basis of cost.

(a) The cost principles and procedures in Subpart 31.2 and agency supplements shall be used in pricing negotiated supply, service, experimental, developmental, and research contracts and contract modifications with commercial organizations whenever cost analysis is performed as required by 15.404-1(c).

(b) In addition, the contracting officer shall incorporate the cost principles and procedures in Subpart 31.2 and agency supplements by reference in contracts with commercial organizations as the basis for--

(1) Determining reimbursable costs under--

(i) Cost-reimbursement contracts and cost-reimbursement subcontracts under these contracts performed by commercial organizations and

(ii) The cost-reimbursement portion of time-and-materials contracts except when material is priced on a basis other than at cost (see 16.601(b)(3));

(2) Negotiating indirect cost rates (see Subpart 42.7);

(3) Proposing, negotiating, or determining costs under terminated contracts (see 49.103 and 49.113);

(4) Price revision of fixed-price incentive contracts (see 16.204 and 16.403);

(5) Price redetermination of price redetermination contracts (see 16.205 and 16.206); and

(6) Pricing changes and other contract modifications.

31.104 Contracts with educational institutions.

This category includes all contracts and contract modifications for research and development, training, and other work performed by educational institutions.

(a) The contracting officer shall incorporate the cost principles and procedures in Subpart 31.3 by reference in cost-reimbursement contracts with educational institutions as the basis for--

(1) Determining reimbursable costs under the contracts and cost-reimbursement subcontracts thereunder performed by educational institutions;

(2) Negotiating indirect cost rates; and

(3) Settling costs of cost-reimbursement terminated contracts (see Subpart 49.3 and 49.109-7).

(b) The cost principles in this subpart are to be used as a guide in evaluating costs in connection with negotiating fixed-price contracts and termination settlements.

31.105 Construction and architect-engineer contracts.

(a) This category includes all contracts and contract modifications negotiated on the basis of cost with

organizations other than educational institutions (see 31.104), State and local governments (see 31.107), and nonprofit organizations except those exempted under OMB Circular A-122 (see 31.108) for construction management or construction, alteration or repair of buildings, bridges, roads, or other kinds of real property. It also includes architect-engineer contracts related to construction projects. It does not include contracts for vessels, aircraft, or other kinds of personal property.

(b) Except as otherwise provided in (d) of this section, the cost principles and procedures in Subpart 31.2 shall be used in the pricing of contracts and contract modifications in this category if cost analysis is performed as required by 15.404-1(c).

(c) In addition, the contracting officer shall incorporate the cost principles and procedures in Subpart 31.2 (as modified by (d) of this section by reference in contracts in this category as the basis for--

(1) Determining reimbursable costs under cost-reimbursement contracts, including cost-reimbursement subcontracts thereunder;

(2) Negotiating indirect cost rates;

(3) Proposing, negotiating, or determining costs under terminated contracts;

(4) Price revision of fixed-price incentive contracts; and

(5) Pricing changes and other contract modifications.

(d) Except as otherwise provided in this paragraph (d), the allowability of costs for construction and architect-engineer contracts shall be determined in accordance with Subpart 31.2.

(1) Because of widely varying factors such as the nature, size, duration, and location of the construction project, advance agreements as set forth in 31.109, for such items as home office overhead, partners' compensation, employment of consultants, and equipment usage costs, are particularly important in construction and architect-engineer contracts. When appropriate, they serve to express the parties' understanding and avoid possible subsequent disputes or disallowances.

(2) "Construction equipment," as used in this section, means equipment (including marine equipment) in sound workable condition, either owned or controlled by the contractor or the subcontractor at any tier, or obtained from a commercial rental source, and furnished for use under Government contracts.

(i) Allowable ownership and operating costs shall be determined as follows:

(A) Actual cost data shall be used when such data can be determined for both ownership and operations costs for each piece of equipment, or groups of similar serial or series equipment, from the contractor's accounting records. When such costs cannot be so determined, the contracting agency may specify the use of a particular schedule of predetermined rates or any part thereof to determine ownership and operating costs of construction equipment (see subdivisions (d)(2)(i)(B) and (C) of this section). However, costs otherwise unallowable under this part shall not become allowable through the use of any schedule (see 31.109(c)). For example, schedules need to be adjusted for Government contract costing purposes if they are based on replacement cost, include unallowable interest costs, or use improper cost of money rates or computations. Contracting officers should review the computations and factors included within the specified schedule and ensure that unallowable or unacceptably computed factors are not allowed in cost submissions.

(B) Predetermined schedules of construction equipment use rates (*e.g.*, the Construction Equipment Ownership and Operating Expense Schedule, published by the U.S. Army Corps of Engineers, industry sponsored construction equipment cost guides, or commercially published schedules of construction equipment use cost) provide average ownership and operating rates for construction equipment. The allowance for operating costs may include costs for such items as fuel, filters, oil, and grease; servicing, repairs, and maintenance; and tire wear and repair. Costs of labor, mobilization, demobilization,

overhead, and profit are generally not reflected in schedules, and separate consideration may be necessary.

(C) When a schedule of predetermined use rates for construction equipment is used to determine direct costs, all costs of equipment that are included in the cost allowances provided by the schedule shall be identified and eliminated from the contractor's other direct and indirect costs charged to the contract. If the contractor's accounting system provides for site or home office overhead allocations, all costs which are included in the equipment allowances may need to be included in any cost input base before computing the contractor's overhead rate. In periods of suspension of work pursuant to a contract clause, the allowance for equipment ownership shall not exceed an amount for standby cost as determined by the schedule or contract provision.

(ii) Reasonable costs of renting construction equipment are allowable (but see paragraph (C) of this subsection).

(A) Costs, such as maintenance and minor or running repairs incident to operating such rented equipment, that are not included in the rental rate are allowable.

(B) Costs incident to major repair and overhaul of rental equipment are unallowable.

(C) The allowability of charges for construction equipment rented from any division, subsidiary, or organization under common control, will be determined in accordance with 31.205-36(b)(3).

(3) Costs incurred at the job site incident to performing the work, such as the cost of superintendence, timekeeping and clerical work, engineering, utility costs, supplies, material handling, restoration and cleanup, etc., are allowable as direct or indirect costs, provided the accounting practice used is in accordance with the contractor's established and consistently followed cost accounting practices for all work.

(4) Rental and any other costs, less any applicable credits incurred in acquiring the temporary use of land, structures, and facilities are allowable. Costs, less any applicable credits, incurred in constructing or fabricating structures and facilities of a temporary nature are allowable.

31.106 Facilities contracts.

31.106-1 Applicable cost principles.

The cost principles and procedures applicable to the evaluation and determination of costs under facilities contracts (as defined in 45.301), and subcontracts thereunder, will be governed by the type of entity to which a facilities contract is awarded. Except as otherwise provided in 31.106-2 of this section, Subpart 31.2 applies to facilities contracts awarded to commercial organizations; Subpart 31.3 applies to facilities contracts awarded to educational institutions; and 31.105 applies to facilities contracts awarded to construction contractors. Whichever cost principles are appropriate will be used in the pricing of facilities contracts and contract modifications if cost analysis is performed as required by 15.404-1(c). In addition, the contracting officer shall incorporate the cost principles and procedures appropriate in the circumstances (*e.g.*, Subpart 31.2; Subpart 31.3; or 31.105) by reference in facilities contracts as the basis for--

(a) Determining reimbursable costs under facilities contracts, including cost-reimbursement subcontracts thereunder;

(b) Negotiating indirect cost rates; and

(c) Determining costs of terminated contracts when the contractor elects to "voucher out" costs (see Subpart 49.3), and for settlement by determination (see 49.109-7).

31.106-2 Exceptions to general rules on allowability and allocability.

(a) A contractor's established accounting system and procedures are normally directed to the equitable allocation of costs to the types of products which the contractor produces or services rendered in the course of normal operating activities. The acquisition of, or work on, facilities for the Government normally does not involve the manufacturing processes, plant departmental operations, cost patterns of work, administrative and managerial control, or clerical effort usual to production of the contractor's normal products or services.

(b) Advance agreements (see 31.109) should be made between the contractor and the contracting officer as to indirect cost items to be applied to the facilities acquisition. A contractor's normal accounting practice for allocating indirect costs to the acquisition of contractor facilities may range from charging all these costs to this acquisition to not charging any. When necessary to produce an equitable result, the contractor's usual method of allocating indirect cost shall be varied, and appropriate adjustment shall be made to the pools of indirect cost and the bases of their distribution.

(c) The purchase of completed facilities (or services in connection with the facilities) from outside sources does not involve the contractor's direct labor or indirect plant maintenance personnel. Accordingly, indirect manufacturing and plant overhead costs, which are primarily incurred or generated by reason of direct labor or maintenance labor operations, are not allocable to the acquisition of such facilities.

(d) Contracts providing for the installation of new facilities or the rehabilitation of existing facilities may involve the use of the contractor's plant maintenance labor, as distinguished from direct labor engaged in the production of the company's normal products. In such instances, only those types of indirect manufacturing and plant operating costs that are related to or incurred by reason of the expenditures of the classes of labor used for the performance of the facilities work may be allocated to the facilities contract. Thus, a facilities contract which involves the use of plant maintenance labor only would not be subject to an allocation of such cost items as direct productive labor supervision, depreciation, and maintenance expense applicable to productive machinery and equipment, or raw material and finished goods storage costs.

(e) Where a facilities contract calls for the construction, production, or rehabilitation of equipment or other items that are involved in the regular course of the contractor's business by the use of the contractor's direct labor and manufacturing processes, the indirect costs normally allocated to all that work may be allocated to the facilities contract.

31.106-3 Contractor's commercial items.

If facilities constituting the contractor's usual commercial items (or only minor modifications thereof) are acquired by the Government under the contract, the Government shall not pay any amount in excess of the contractor's most favored customer price or the price of other suppliers for like quantities of the same or substantially the same items, whichever is lower.

31.107 Contracts with State, local, and federally recognized Indian tribal governments.

(a) Subpart 31.6 provides principles and standards for determining costs applicable to contracts with State, local, and federally recognized Indian tribal governments. They provide the basis for a uniform approach to the problem of determining costs and to promote efficiency and better relationships between State, local, and federally recognized Indian tribal governments, and Federal Government entities. They apply to all programs that involve contracts with State, local, and federally recognized Indian tribal governments, except contracts with--

(1) Publicly financed educational institutions subject to Subpart 31.3; or

(2) Publicly owned hospitals and other providers of medical care subject to requirements promulgated by the sponsoring Government agencies.

(b) The Office of Management and Budget will approve any other exceptions in particular cases when adequate justification is presented.

31.108 Contracts with nonprofit organizations.

Subpart 31.7 provides principles and standards for determining costs applicable to contracts with nonprofit organizations other than educational institutions, State and local governments, and those nonprofit organizations exempted under OMB Circular No. A-122.

31.109 Advance agreements.

(a) The extent of allowability of the costs covered in this part applies broadly to many accounting systems in varying contract situations. Thus, the reasonableness, the allocability and the allowability under the specific cost principles at Subparts 31.2, 31.3, 31.6, and 31.7 of certain costs may be difficult to determine. To avoid possible subsequent disallowance or dispute based on unreasonableness, unallocability or unallowability under the specific cost principles at Subparts 31.2, 31.3, 31.6, and 31.7, contracting officers and contractors should seek advance agreement on the treatment of special or unusual costs. However, an advance agreement is not an absolute requirement and the absence of an advance agreement on any cost will not, in itself, affect the reasonableness, allocability or the allowability under the specific cost principles at Subparts 31.2, 31.3, 31.6, and 31.7 of that cost.

(b) Advance agreements may be negotiated either before or during a contract but should be negotiated before incurrence of the costs involved. The agreements must be in writing, executed by both contracting parties, and incorporated into applicable current and future contracts. An advance agreement shall contain a statement of its applicability and duration.

(c) The contracting officer is not authorized by this 31.109 to agree to a treatment of costs inconsistent with this part. For example, an advance agreement may not provide that, notwithstanding 31.205-20, interest is allowable.

(d) Advance agreements may be negotiated with a particular contractor for a single contract, a group of contracts, or all the contracts of a contracting office, an agency, or several agencies.

(e) The cognizant administrative contracting officer (ACO), or other contracting officer established in Part 42, shall negotiate advance agreements except that an advance agreement affecting only one contract, or class of contracts from a single contracting office, shall be negotiated by a contracting officer in the contracting office, or an ACO when delegated by the contracting officer. When the negotiation authority is delegated, the ACO shall coordinate the proposed agreement with the contracting officer before executing the advance agreement.

(f) Before negotiating an advance agreement, the Government negotiator shall--

(1) Determine if other contracting offices inside the agency or in other agencies have a significant unliquidated dollar balance in contracts with the same contractor;

(2) Inform any such office or agency of the matters under consideration for negotiation; and

(3) As appropriate, invite the office or agency and the responsible audit agency to participate in prenegotiation discussions and/or in the subsequent negotiations.

(g) Upon completion of the negotiation, the sponsor shall prepare and distribute to other interested agencies and offices, including the audit agency, copies of the executed agreement and a memorandum providing the information specified in 15.406-3, as applicable.

(h) Examples of costs for which advance agreements may be particularly important are--

(1) Compensation for personal services, including but not limited to allowances for off-site pay,

incentive pay, location allowances, hardship pay, cost of living differential, and termination of defined benefit pension plans;

(2) Use charges for fully depreciated assets;

(3) Deferred maintenance costs;

(4) Precontract costs;

(5) Independent research and development and bid and proposal costs;

(6) Royalties and other costs for use of patents;

(7) Selling and distribution costs;

(8) Travel and relocation costs, as related to special or mass personnel movements, as related to travel via contractor-owned, -leased, or -chartered aircraft; or as related to maximum per diem rates;

(9) Costs of idle facilities and idle capacity;

(10) Severance pay to employees on support service contracts;

(11) Plant reconversion;

(12) Professional services (*e.g.*, legal, accounting, and engineering);

(13) General and administrative costs (*e.g.*, corporate, division, or branch allocations) attributable to the general management, supervision, and conduct of the contractor's business as a whole. These costs are particularly significant in construction, job-site, architect-engineer, facilities, and Government-owned contractor operated (GOCO) plant contracts (see 31.203(f));

(14) Costs of construction plant and equipment (see 31.105(d));

(15) Costs of public relations and advertising; and

(16) Training and education costs (see 31.205-44(h)).

31.110 Indirect cost rate certification and penalties on unallowable costs.

(a) Certain contracts require certification of the indirect cost rates proposed for final payment purposes. See 42.703-2 for administrative procedures regarding the certification provisions and the related contract clause prescription.

(b) If unallowable costs are included in final indirect cost settlement proposals, penalties may be assessed. See 42.709 for administrative procedures regarding the penalty assessment provisions and the related contract clause prescription.

Subpart 31.2--Contracts with Commercial Organizations

31.201 General.

31.201-1 Composition of total cost.

(a) The total cost of a contract is the sum of the direct and indirect costs allocable to the contract, incurred or to be incurred, less any allocable credits, plus any allocable cost of money pursuant to 31.205-10. In ascertaining what constitutes a cost, any generally accepted method of determining or estimating costs that is equitable and is consistently applied may be used, including standard costs

properly adjusted for applicable variances. See 31.201-2(b) and (c) for Cost Accounting Standards (CAS) requirements.

(b) While the total cost of a contract includes all costs properly allocable to the contract, the allowable costs to the Government are limited to those allocable costs which are allowable pursuant to Part 31 and applicable agency supplements.

31.201-2 Determining allowability.

(a) The factors to be considered in determining whether a cost is allowable include the following:

(1) Reasonableness.

(2) Allocability.

(3) Standards promulgated by the CAS Board, if applicable; otherwise, generally accepted accounting principles and practices appropriate to the particular circumstances.

(4) Terms of the contract.

(5) Any limitations set forth in this subpart.

(b) Certain cost principles in this subpart incorporate the measurement, assignment, and allocability rules of selected CAS and limit the allowability of costs to the amounts determined using the criteria in those selected standards. Only those CAS or portions of standards specifically made applicable by the cost principles in this subpart are mandatory unless the contract is CAS-covered (see Part 30). Business units that are not otherwise subject to these standards under a CAS clause are subject to the selected standards only for the purpose of determining allowability of costs on Government contracts. Including the selected standards in the cost principles does not subject the business unit to any other CAS rules and regulations. The applicability of the CAS rules and regulations is determined by the CAS clause, if any, in the contract and the requirements of the standards themselves.

(c) When contractor accounting practices are inconsistent with this Subpart 31.2, costs resulting from such inconsistent practices shall not be allowed in excess of the amount that would have resulted from using practices consistent with this subpart.

(d) A contractor is responsible for accounting for costs appropriately and for maintaining records, including supporting documentation, adequate to demonstrate that costs claimed have been incurred, are allocable to the contract, and comply with applicable cost principles in this subpart and agency supplements. The contracting officer may disallow all or part of a claimed cost which is inadequately supported.

31.201-3 Determining reasonableness.

(a) A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person in the conduct of competitive business. Reasonableness of specific costs must be examined with particular care in connection with firms or their separate divisions that may not be subject to effective competitive restraints. No presumption of reasonableness shall be attached to the incurrence of costs by a contractor. If an initial review of the facts results in a challenge of a specific cost by the contracting officer or the contracting officer's representative, the burden of proof shall be upon the contractor to establish that such cost is reasonable.

(b) What is reasonable depends upon a variety of considerations and circumstances, including--

(1) Whether it is the type of cost generally recognized as ordinary and necessary for the conduct of the contractor's business or the contract performance;

(2) Generally accepted sound business practices, arm's-length bargaining, and Federal and State laws and regulations;

(3) The contractor's responsibilities to the Government, other customers, the owners of the business, employees, and the public at large; and

(4) Any significant deviations from the contractor's established practices.

31.201-4 Determining allocability.

A cost is allocable if it is assignable or chargeable to one or more cost objectives on the basis of relative benefits received or other equitable relationship. Subject to the foregoing, a cost is allocable to a Government contract if it--

(a) Is incurred specifically for the contract;

(b) Benefits both the contract and other work, and can be distributed to them in reasonable proportion to the benefits received; or

(c) Is necessary to the overall operation of the business, although a direct relationship to any particular cost objective cannot be shown.

31.201-5 Credits.

The applicable portion of any income, rebate, allowance, or other credit relating to any allowable cost and received by or accruing to the contractor shall be credited to the Government either as a cost reduction or by cash refund. See 31.205-6(j)(4) for rules governing refund or credit to the Government associated with pension adjustments and asset reversions.

31.201-6 Accounting for unallowable costs.

(a) Costs that are expressly unallowable or mutually agreed to be unallowable, including mutually agreed to be unallowable directly associated costs, shall be identified and excluded from any billing, claim, or proposal applicable to a Government contract. A directly associated cost is any cost which is generated solely as a result of incurring another cost, and which would not have been incurred had the other cost not been incurred. When an unallowable cost is incurred, its directly associated costs are also unallowable.

(b) Costs which specifically become designated as unallowable or as unallowable directly associated costs of unallowable costs as a result of a written decision furnished by a contracting officer shall be identified if included in or used in computing any billing, claim, or proposal applicable to a Government contract. This identification requirement applies also to any costs incurred for the same purpose under like circumstances as the costs specifically identified as unallowable under either this paragraph or paragraph (a) of this subsection.

(c) The practices for accounting for and presentation of unallowable costs will be those as described in 48 CFR 9904.405, Accounting for Unallowable Costs.

(d) If a directly associated cost is included in a cost pool which is allocated over a base that includes the unallowable cost with which it is associated, the directly associated cost shall remain in the cost pool. Since the unallowable costs will attract their allocable share of costs from the cost pool, no further action is required to assure disallowance of the directly associated costs. In all other cases, the directly associated costs, if material in amount, must be purged from the cost pool as unallowable costs.

(e)(1) In determining the materiality of a directly associated cost, consideration should be given to the significance of--

(i) The actual dollar amount,

(ii) The cumulative effect of all directly associated costs in a cost pool, or

(iii) The ultimate effect on the cost of Government contracts.

(2) Salary expenses of employees who participate in activities that generate unallowable costs shall be treated as directly associated costs to the extent of the time spent on the proscribed activity, provided the costs are material in accordance with subparagraph (e)(1) of this subsection (except when such salary expenses are, themselves, unallowable). The time spent in proscribed activities should be compared to total time spent on company activities to determine if the costs are material. Time spent by employees outside the normal working hours should not be considered except when it is evident that an employee engages so frequently in company activities during periods outside normal working hours as to indicate that such activities are a part of the employee's regular duties.

(3) When a selected item of cost under 31.205 provides that directly associated costs be unallowable, it is intended that such directly associated costs be unallowable only if determined to be material in amount in accordance with the criteria provided in subparagraphs (e)(1) and (e)(2) of this section, except in those situations where allowance of any of the directly associated costs involved would be considered to be contrary to public policy.

31.201-7 Construction and architect-engineer contracts.

Specific principles and procedures for evaluating and determining costs in connection with contracts and subcontracts for construction, and architect-engineer contracts related to construction projects, are in 31.105. The applicability of these principles and procedures is set forth in 31.000 and 31.100.

31.202 Direct costs.

(a) A direct cost is any cost that can be identified specifically with a particular final cost objective. No final cost objective shall have allocated to it as a direct cost any cost, if other costs incurred for the same purpose in like circumstances have been included in any indirect cost pool to be allocated to that or any other final cost objective. Costs identified specifically with the contract are direct costs of the contract and are to be charged directly to the contract. All costs specifically identified with other final cost objectives of the contractor are direct costs of those cost objectives and are not to be charged to the contract directly or indirectly.

(b) For reasons of practicality, any direct cost of minor dollar amount may be treated as an indirect cost if the accounting treatment--

(1) Is consistently applied to all final cost objectives; and

(2) Produces substantially the same results as treating the cost as a direct cost.

31.203 Indirect costs.

(a) An indirect cost is any cost not directly identified with a single, final cost objective, but identified with two or more final cost objectives or an intermediate cost objective. It is not subject to treatment as a direct cost. After direct costs have been determined and charged directly to the contract or other work, indirect costs are those remaining to be allocated to the several cost objectives. An indirect cost shall not be allocated to a final cost objective if other costs incurred for the same purpose in like circumstances have been included as a direct cost of that or any other final cost objective.

(b) Indirect costs shall be accumulated by logical cost groupings with due consideration of the reasons for incurring such costs. Each grouping should be determined so as to permit distribution of the grouping on the basis of the benefits accruing to the several cost objectives. Commonly, manufacturing overhead, selling expenses, and general and administrative (G&A) expenses are separately grouped. Similarly, the

particular case may require subdivision of these groupings, *e.g.*, building occupancy costs might be separable from those of personnel administration within the manufacturing overhead group. This necessitates selecting a distribution base common to all cost objectives to which the grouping is to be allocated. The base should be selected so as to permit allocation of the grouping on the basis of the benefits accruing to the several cost objectives. When substantially the same results can be achieved through less precise methods, the number and composition of cost groupings should be governed by practical considerations and should not unduly complicate the allocation.

(c) Once an appropriate base for distributing indirect costs has been accepted, it shall not be fragmented by removing individual elements. All items properly includable in an indirect cost base should bear a pro rata share of indirect costs irrespective of their acceptance as Government contract costs. For example, when a cost input base is used for the distribution of G&A costs, all items that would properly be part of the cost input base, whether allowable or unallowable, shall be included in the base and bear their pro rata share of G&A costs.

(d) The contractor's method of allocating indirect costs shall be in accordance with standards promulgated by the CAS Board, if applicable to the contract; otherwise, the method shall be in accordance with generally accepted accounting principles which are consistently applied. The method may require examination when--

(1) Substantial differences occur between the cost patterns of work under the contract and the contractor's other work;

(2) Significant changes occur in the nature of the business, the extent of subcontracting, fixed-asset improvement programs, inventories, the volume of sales and production, manufacturing processes, the contractor's products, or other relevant circumstances; or

(3) Indirect cost groupings developed for a contractor's primary location are applied to offsite locations. Separate cost groupings for costs allocable to offsite locations may be necessary to permit equitable distribution of costs on the basis of the benefits accruing to the several cost objectives.

(e) A base period for allocating indirect costs is the cost accounting period during which such costs are incurred and accumulated for distribution to work performed in that period. The criteria and guidance in 30.406 for selecting the cost accounting periods to be used in allocating indirect costs are incorporated herein for application to contracts subject to full CAS coverage. For contracts subject to modified CAS coverage and for non-CAS-covered contracts, the base period for allocating indirect costs will normally be the contractor's fiscal year. But a shorter period may be appropriate (1) for contracts in which performance involves only a minor portion of the fiscal year, or (2) when it is general practice in the industry to use a shorter period. When a contract is performed over an extended period, as many base periods shall be used as are required to represent the period of contract performance.

(f) Special care should be exercised in applying the principles of paragraphs (b), (c), and (d) above when Government-owned contractor-operated (GOCO) plants are involved. The distribution of corporate, division, or branch office G&A expenses to such plants operating with little or no dependence on corporate administrative activities may require more precise cost groupings, detailed accounts screening, and carefully developed distribution bases.

31.204 Application of principles and procedures.

(a) Costs shall be allowed to the extent they are reasonable, allocable, and determined to be allowable under 31.201, 31.202, 31.203, and 31.205. These criteria apply to all of the selected items that follow, even if particular guidance is provided for certain items for emphasis or clarity.

(b) Costs incurred as reimbursements or payments to a subcontractor under a cost-reimbursement, fixed-price incentive, or price redeterminable type subcontract of any tier above the first firm-fixed-price subcontract or fixed-price subcontract with economic price adjustment provisions are allowable to the extent that allowance is consistent with the appropriate subpart of this Part 31 applicable to the

subcontract involved. Costs incurred as payments under firm-fixed-price subcontracts or fixed-price subcontracts with economic price adjustment provisions or modifications thereto, when cost analysis was performed under 15.404-1(c), shall be allowable only to the extent that the price was negotiated in accordance with 31.102.

(c) Section 31.205 does not cover every element of cost. Failure to include any item of cost does not imply that it is either allowable or unallowable. The determination of allowability shall be based on the principles and standards in this subpart and the treatment of similar or related selected items. When more than one subsection in 31.205 is relevant to a contractor cost, the cost shall be apportioned among the applicable subsections, and the determination of allowability of each portion shall be based on the guidance contained in the applicable subsection. When a cost, to which more than one subsection in 31.205 is relevant, cannot be apportioned, the determination of allowability shall be based on the guidance contained in the subsection that most specifically deals with, or best captures the essential nature of, the cost at issue.

31.205 Selected costs.

31.205-1 Public relations and advertising costs.

(a) "Public relations" means all functions and activities dedicated to--

(1) Maintaining, protecting, and enhancing the image of a concern or its products; or

(2) Maintaining or promoting reciprocal understanding and favorable relations with the public at large, or any segment of the public. The term public relations includes activities associated with areas such as advertising, customer relations, etc.

(b) "Advertising" means the use of media to promote the sale of products or services and to accomplish the activities referred to in paragraph (d) of this subsection, regardless of the medium employed, when the advertiser has control over the form and content of what will appear, the media in which it will appear, and when it will appear. Advertising media include but are not limited to conventions, exhibits, free goods, samples, magazines, newspapers, trade papers, direct mail, dealer cards, window displays, outdoor advertising, radio, and television.

(c) Public relations and advertising costs include the costs of media time and space, purchased services performed by outside organizations, as well as the applicable portion of salaries, travel, and fringe benefits of employees engaged in the functions and activities identified in paragraphs (a) and (b) of this subsection.

(d) The only allowable advertising costs are those that are--

(1) Specifically required by contract, or that arise from requirements of Government contracts, and that are exclusively for--

(i) Acquiring scarce items for contract performance; or

(ii) Disposing of scrap or surplus materials acquired for contract performance;

(2) Costs of activities to promote sales of products normally sold to the U.S. Government, including trade shows, which contain a significant effort to promote exports from the United States. Such costs are allowable, notwithstanding paragraphs (f)(1), (f)(3), (f)(4)(ii), and (f)(5) of this subsection. However, such costs do not include the costs of memorabilia (*e.g.*, models, gifts, and souvenirs), alcoholic beverages, entertainment, and physical facilities that are used primarily for entertainment rather than product promotion; or

(3) Allowable in accordance with 31.205-34.

(e) Allowable public relations costs include the following:

(1) Costs specifically required by contract.

(2) Costs of--

(i) Responding to inquiries on company policies and activities;

(ii) Communicating with the public, press, stockholders, creditors, and customers; and

(iii) Conducting general liaison with news media and Government public relations officers, to the extent that such activities are limited to communication and liaison necessary to keep the public informed on matters of public concern such as notice of contract awards, plant closings or openings, employee layoffs or rehires, financial information, etc.

(3) Costs of participation in community service activities (*e.g.*, blood bank drives, charity drives, savings bond drives, disaster assistance, etc.).

(4) Costs of plant tours and open houses (but see subparagraph (f)(5) of this subsection).

(5) Costs of keel laying, ship launching, commissioning, and roll-out ceremonies, to the extent specifically provided for by contract.

(f) Unallowable public relations and advertising costs include the following:

(1) All public relations and advertising costs, other than those specified in paragraphs (d) and (e) of this subsection, whose primary purpose is to promote the sale of products or services by stimulating interest in a product or product line (except for those costs made allowable under 31.205-38(c)), or by disseminating messages calling favorable attention to the contractor for purposes of enhancing the company image to sell the company's products or services.

(2) All costs of trade shows and other special events which do not contain a significant effort to promote the export sales of products normally sold to the U.S. Government.

(3) Costs of sponsoring meetings, conventions, symposia, seminars, and other special events when the principal purpose of the event is other than dissemination of technical information or stimulation of production.

(4) Costs of ceremonies such as--

(i) Corporate celebrations and

(ii) New product announcements.

(5) Costs of promotional material, motion pictures, videotapes, brochures, handouts, magazines, and other media that are designed to call favorable attention to the contractor and its activities.

(6) Costs of souvenirs, models, imprinted clothing, buttons, and other mementos provided to customers or the public.

(7) Costs of memberships in civic and community organizations.

31.205-2 [Reserved]

31.205-3 Bad debts.

Bad debts, including actual or estimated losses arising from uncollectible accounts receivable due from

customers and other claims, and any directly associated costs such as collection costs, and legal costs are unallowable.

31.205-4 Bonding costs.

(a) Bonding costs arise when the Government requires assurance against financial loss to itself or others by reason of the act or default of the contractor. They arise also in instances where the contractor requires similar assurance. Included are such bonds as bid, performance, payment, advance payment, infringement, and fidelity bonds.

(b) Costs of bonding required pursuant to the terms of the contract are allowable.

(c) Costs of bonding required by the contractor in the general conduct of its business are allowable to the extent that such bonding is in accordance with sound business practice and the rates and premiums are reasonable under the circumstances.

31.205-5 [Reserved]

31.205-6 Compensation for personal services.

(a) *General.* Compensation for personal services includes all remuneration paid currently or accrued, in whatever form and whether paid immediately or deferred, for services rendered by employees to the contractor during the period of contract performance (except as otherwise provided for in other paragraphs of this subsection). It includes, but is not limited to, salaries; wages; directors' and executive committee members' fees; bonuses (including stock bonuses); incentive awards; employee stock options, and stock appreciation rights; employee stock ownership plans; employee insurance; fringe benefits; contributions to pension, other postretirement benefits, annuity, and employee incentive compensation plans; and allowances for off-site pay, incentive pay, location allowances, hardship pay, severance pay, and cost of living differential. Compensation for personal services is allowable subject to the following general criteria and additional requirements contained in other parts of this cost principle:

(1) Compensation for personal services must be for work performed by the employee in the current year and must not represent a retroactive adjustment of prior years' salaries or wages (but see 31.205-6(g), (h), (j), (k), (m), and (o) of this subsection).

(2) The compensation in total must be reasonable for the work performed; however, specific restrictions on individual compensation elements must be observed where they are prescribed.

(3) The compensation must be based upon and conform to the terms and conditions of the contractor's established compensation plan or practice followed so consistently as to imply, in effect, an agreement to make the payment.

(4) No presumption of allowability will exist where the contractor introduces major revisions of existing compensation plans or new plans and the contractor--

(i) Has not notified the cognizant ACO of the changes either before their implementation or within a reasonable period after their implementation, and

(ii) Has not provided the Government, either before implementation or within a reasonable period after it, an opportunity to review the allowability of the changes.

(5) Costs that are unallowable under other paragraphs of this Subpart 31.2 shall not be allowable under this subsection 31.205-6 solely on the basis that they constitute compensation for personal services.

(b) *Reasonableness.* The compensation for personal services paid or accrued to each employee must be reasonable for the work performed. Compensation will be considered reasonable if each of the allowable elements making up the employee's compensation package is reasonable. This paragraph addresses the

reasonableness of compensation, except when the compensation is set by provisions of a labor-management agreement under terms of the Federal Labor Relations Act or similar state statutes. The tests for reasonableness of labor-management agreements are set forth in paragraph (c) of this subsection. In addition to the provisions of 31.201-3, in testing the reasonableness of individual elements for particular employees or job classes of employees, consideration should be given to factors determined to be relevant by the contracting officer.

(1) Among others, factors which may be relevant include general conformity with the compensation practices of other firms of the same size, the compensation practices of other firms in the same industry, the compensation practices of firms in the same geographic area, the compensation practices of firms engaged in predominantly non-Government work, and the cost of comparable services obtainable from outside sources. The appropriate factors for evaluating the reasonableness of compensation depend on the degree to which those factors are representative of the labor market for the job being evaluated. The relative significance of factors will vary according to circumstances. In administering this principle, it is recognized that not every compensation case need be subjected in detail to the tests described in this cost principle. The tests need be applied only when a general review reveals amounts or types of compensation that appear unreasonable or unjustified. Based on an initial review of the facts, contracting officers or their representatives may challenge the reasonableness of any individual element or the sum of the individual elements of compensation paid or accrued to particular employees or job classes of employees. In such cases, there is no presumption of reasonableness and, upon challenge, the contractor must demonstrate the reasonableness of the compensation item in question. In doing so, the contractor may introduce, and the contracting officer will consider, not only any circumstances surrounding the compensation item challenged, but also the magnitude of other compensation elements which may be lower than would be considered reasonable in themselves. However, the contractor's right to introduce offsetting compensation elements into consideration is subject to the following limitations:

(i) Offsets will be considered only between the allowable elements of an employee's (or a job class of employees') compensation package or between the compensation packages of employees in jobs within the same job grade or level.

(ii) Offsets will be considered only between the allowable portion of the following compensation elements of employees or job classes of employees:

(A) Wages and salaries.

(B) Incentive bonuses.

(C) Deferred compensation.

(D) Pension and savings plan benefits.

(E) Health insurance benefits.

(F) Life insurance benefits.

(G) Compensated personal absence benefits.

However, any of the above elements or portions thereof, whose amount is not measurable, shall not be introduced or considered as an offset item.

(iii) In considering offsets, the magnitude of the compensation elements in question must be taken into account. In determining the magnitude of compensation elements, the timing of receipt by the employee must be considered.

(2) Compensation costs under certain conditions give rise to the need for special consideration. Among such conditions are the following:

(i) Compensation to (A) owners of closely held corporations, partners, sole proprietors, or members of their immediate families, or (B) persons who are contractually committed to acquire a substantial financial interest in the contractor's enterprise. Determination should be made that salaries are reasonable for the personal services rendered rather than being a distribution of profits. Compensation in lieu of salary for services rendered by partners and sole proprietors will be allowed to the extent that it is reasonable and does not constitute a distribution of profits. For closely held corporations, compensation costs covered by this subdivision shall not be recognized in amounts exceeding those costs that are deductible as compensation under the Internal Revenue Code and regulations under it.

(ii) Any change in a contractor's compensation policy that results in a substantial increase in the contractor's level of compensation, particularly when it was concurrent with an increase in the ratio of Government contracts to other business, or any change in the treatment of allowability of specific types of compensation due to changes in Government policy. Contracting officers or their representatives should normally challenge increased costs where major revisions of existing compensation plans or new plans are introduced by the contractor, and the contractor--

(A) Has not notified the cognizant ACO of the changes either before their implementation or within a reasonable period after their implementation; and

(B) Has not provided the Government, either before implementation or within a reasonable period after it, an opportunity to review the reasonableness of the changes.

(iii) The contractor's business is such that its compensation levels are not subject to the restraints that normally occur in the conduct of competitive business.

(iv) The contractor incurs costs for compensation in excess of the amounts which are deductible under the Internal Revenue Code and regulations issued under it.

(c) *Labor-management agreements.* If costs of compensation established under "arm's length" negotiated labor-management agreements are otherwise allowable, the costs are reasonable if, as applied to work in performing Government contracts, they are not determined to be unwarranted by the character and circumstances of the work or discriminatory against the Government. The application of the provisions of a labor-management agreement designed to apply to a given set of circumstances and conditions of employment (*e.g,* work involving extremely hazardous activities or work not requiring recurrent use of overtime) is unwarranted when applied to a Government contract involving significantly different circumstances and conditions of employment (*e.g.*, work involving less hazardous activities or work continually requiring use of overtime). It is discriminatory against the Government if it results in employee compensation (in whatever form or name) in excess of that being paid for similar non-Government work under comparable circumstances. Disallowance of costs will not be made under this paragraph (c) unless--

(1) The contractor has been permitted an opportunity to justify the costs; and

(2) Due consideration has been given to whether unusual conditions pertain to Government contract work, imposing burdens, hardships, or hazards on the contractor's employees, for which compensation that might otherwise appear unreasonable is required to attract and hold necessary personnel.

(d) *Form of payment.* (1) Compensation for personal services includes compensation paid or to be paid in the future to employees in the form of cash, corporate securities, such as stocks, bonds, and other financial instruments (see paragraph (d)(2) of this subsection regarding valuation), or other assets, products, or services.

(2) When compensation is paid with securities of the contractor or of an affiliate, the following additional restrictions apply:

(i) Valuation placed on the securities shall be the fair market value on the measurement date (*i.e.*, the first date the number of shares awarded is known) determined upon the most objective basis available.

(ii) Accruals for the cost of securities before issuing the securities to the employees shall be subject to adjustment according to the possibilities that the employees will not receive the securities and that their interest in the accruals will be forfeited.

(e) *Domestic and foreign differential pay.* (1) When personal services are performed in a foreign country, compensation may also include a differential that may properly consider all expenses associated with foreign employment such as housing, cost of living adjustments, transportation, bonuses, additional Federal, State, local or foreign income taxes resulting from foreign assignment, and other related expenses.

(2) Differential allowances for additional Federal, State, or local income taxes resulting from domestic assignments are unallowable.

(f) *Bonuses and incentive compensation.* (1) Incentive compensation for management employees, cash bonuses, suggestion awards, safety awards, and incentive compensation based on production, cost reduction, or efficient performance are allowable provided the awards are paid or accrued under an agreement entered into in good faith between the contractor and the employees before the services are rendered or pursuant to an established plan or policy followed by the contractor so consistently as to imply, in effect, an agreement to make such payment and the basis for the award is supported.

(2) When the bonus and incentive compensation payments are deferred, the costs are subject to the requirements of subparagraph (f)(1) of this subsection and of paragraph (k) of this subsection.

(g) *Severance pay.* (1) Severance pay, also commonly referred to as dismissal wages, is a payment in addition to regular salaries and wages by contractors to workers whose employment is being involuntarily terminated. Payments for early retirement incentive plans are covered in paragraph (j)(7).

(2) Severance pay to be allowable must meet the general allowability criteria in subdivision (g)(2)(i) of this subsection, and, depending upon whether the severance is normal or abnormal, criteria in subdivision (g)(2)(ii) for normal severance pay or subdivision (g)(2)(iii) for abnormal severance pay also apply. In addition, paragraph (g)(3) of this subsection applies if the severance cost is for foreign nationals employed outside the United States.

(i) Severance pay is allowable only to the extent that, in each case, it is required by (A) law; (B) employer-employee agreement; (C) established policy that constitutes, in effect, an implied agreement on the contractor's part; or (D) circumstances of the particular employment. Payments made in the event of employment with a replacement contractor where continuity of employment with credit for prior length of service is preserved under substantially equal conditions of employment, or continued employment by the contractor at another facility, subsidiary, affiliate, or parent company of the contractor are not severance pay and are unallowable.

(ii) Actual normal turnover severance payments shall be allocated to all work performed in the contractor's plant, or where the contractor provides for accrual of pay for normal severances, that method will be acceptable if the amount of the accrual is reasonable in light of payments actually made for normal severances over a representative past period and if amounts accrued are allocated to all work performed in the contractor's plant.

(iii) Abnormal or mass severance pay is of such a conjectural nature that measurement of costs by means of an accrual will not achieve equity to both parties. Thus, accruals for this purpose are not allowable. However, the Government recognizes its obligation to participate, to the extent of its fair share, in any specific payment. Thus, allowability will be considered on a case-by-case basis.

(3) Notwithstanding the reference to geographical area in 31.205-6(b)(1), under 10 U.S.C. 2324(e)(1)(M) and 41 U.S.C. 256(e)(1)(M), the costs of severance payments to foreign nationals employed under a service contract performed outside the United States are unallowable to the extent that such payments exceed amounts typically paid to employees providing similar services in the same

industry in the United States. Further, under 10 U.S.C. 2324(e)(1)(N) and 41 U.S.C. 256(e)(1)(N), all such costs of severance payments which are otherwise allowable are unallowable if the termination of employment of the foreign national is the result of the closing of, or the curtailment of activities at, a United States facility in that country at the request of the government of that country; this does not apply if the closing of a facility or curtailment of activities is made pursuant to a status-of-forces or other country-to-country agreement entered into with the government of that country before November 29, 1989. 10 U.S.C. 2324(e)(3) and 41 U.S.C. 256(e)(2) permit the head of the agency, or designee, to waive these cost allowability limitations under certain circumstances (see 37.113 and the solicitation provision at 52.237-8).

(h) *Backpay.* (1) *Backpay resulting from violations of Federal labor laws or the Civil Rights Act of 1964.* Backpay may result from a negotiated settlement, order, or court decree that resolves a violation of Federal labor laws or the Civil Rights Act of 1964. Such backpay falls into two categories: one requiring the contractor to pay employees additional compensation for work performed for which they were underpaid, and the other resulting from other violations, such as when the employee was improperly discharged, discriminated against, or other circumstances for which the backpay was not additional compensation for work performed. Backpay resulting from underpaid work is compensation for the work performed and is allowable. All other backpay resulting from violation of Federal labor laws or the Civil Rights Act of 1964 is unallowable.

(2) *Other backpay.* Backpay may also result from payments to employees (union and nonunion) for the difference in their past and current wage rates for working without a contract or labor agreement during labor management negotiations. Such backpay is allowable. Backpay to nonunion employees based upon results of union agreement negotiations is allowable only if--

(i) A formal agreement or understanding exists between management and the employees concerning these payments, or

(ii) An established policy or practice exists and is followed by the contractor so consistently as to imply, in effect, an agreement to make such payment.

(i) Compensation based on changes in the prices of corporate securities or corporate security ownership, such as stock options, stock appreciation rights, phantom stock plans, and junior stock conversions.

(1) Any compensation which is calculated, or valued, based on changes in the price of corporate securities is unallowable.

(2) Any compensation represented by dividend payments or which is calculated based on dividend payments is unallowable.

(3) If a contractor pays an employee in lieu of the employee receiving or exercising a right, option, or benefit which would have been unallowable under this paragraph (i), such payments are also unallowable.

(j) *Pension costs.* (1) A pension plan, as defined in 31.001, is a deferred compensation plan. Additional benefits such as permanent and total disability and death payments and survivorship payments to beneficiaries of deceased employees may be treated as pension costs, provided the benefits are an integral part of the pension plan and meet all the criteria pertaining to pension costs.

(2) Pension plans are normally segregated into two types of plans: defined-benefit or defined-contribution pension plans. The cost of all defined-benefit pension plans shall be measured, allocated, and accounted for in compliance with the provisions of 48 CFR 9904.412, Cost accounting standard for composition and measurement of pension cost, and 48 CFR 9904.413, Adjustment and allocation of pension cost. The costs of all defined-contribution pension plans shall be measured, allocated, and accounted for in accordance with the provisions of 48 CFR 9904.412 and 48 CFR 9904.413. Pension costs are allowable subject to the referenced standards and the cost limitations and exclusions set forth in paragraph (j)(2)(i) and in paragraphs (j)(3) through (8) of this subsection.

(i) Except for nonqualified pension plans using the pay-as-you-go cost method, to be allowable in the current year, pension costs must be funded by the time set for filing of the Federal income tax return or any extension thereof. Pension costs assigned to the current year, but not funded by the tax return time, shall not be allowable in any subsequent year. For nonqualified pension plans using the pay-as-you-go cost method, to be allowable in the current year, pension costs must be allocable in accordance with 48 CFR 9904.412-50(d)(3).

(ii) Pension payments must be reasonable in amount and must be paid pursuant to an agreement entered into in good faith between the contractor and employees before the work or services are performed; and the terms and conditions of the established plan. The cost of changes in pension plans that are discriminatory to the Government or are not intended to be applied consistently for all employees under similar circumstances in the future are not allowable.

(iii) Except as provided for early retirement benefits in paragraph (j)(7) of this subsection, one-time-only pension supplements not available to all participants of the basic plan are not allowable as pension costs unless the supplemental benefits represent a separate pension plan and the benefits are payable for life at the option of the employee.

(iv) Increases in payments to previously retired plan participants covering cost-of-living adjustments are allowable if paid in accordance with a policy or practice consistently followed.

(3) *Defined-benefit pension plans.* This paragraph covers pension plans in which the benefits to be paid or the basis for determining such benefits are established in advance and the contributions are intended to provide the stated benefits. The cost limitations and exclusions pertaining to defined-benefit plans are as follows:

(i)(A) Except for nonqualified pension plans, pension costs (see 48 CFR 9904.412-40(a)(1)) assigned to the current accounting period, but not funded during it, shall not be allowable in subsequent years (except that a payment made to a fund by the time set for filing the Federal income tax return or any extension thereof is considered to have been made during such taxable year). However, any portion of pension cost computed for a cost accounting period, that exceeds the amount required to be funded pursuant to a waiver granted under the provisions of the Employee's Retirement Income Security Act of 1974 (ERISA), will be allowable in those future accounting periods in which the funding of such excess amounts occurs (see 48 CFR 9904.412-50(c)(5)).

(B) For nonqualified pension plans, except those using the pay-as-you-go cost method, allowable costs are limited to the amount allocable in accordance with 48 CFR 9904.412-50(d)(2).

(C) For nonqualified pension plans using the pay-as-you-go cost method, allowable costs are limited to the amounts allocable in accordance with 48 CFR 9904.412-50(d)(3).

(ii) Any amount funded in excess of the pension cost assigned to a cost accounting period is not allowable and shall be accounted for as set forth at 48 CFR 9904.412-50(a)(4), and shall be allowable in the future period to which it is assigned, to the extent it is allocable, reasonable, and not otherwise unallowable.

(iii) Increased pension costs caused by delay in funding beyond 30 days after each quarter of the year to which they are assignable are unallowable. If a composite rate is used for allocating pension costs between the segments of a company and if, because of differences in the timing of the funding by the segments, an inequity exists, allowable pension costs for each segment will be limited to that particular segment's calculation of pension costs as provided for in 48 CFR 9904.413-50(c). Determinations of unallowable costs shall be made in accordance with the actuarial cost method used in calculating pension costs.

(iv) Allowability of the cost of indemnifying the Pension Benefit Guaranty Corporation (PBGC) under ERISA Section 4062 or 4064 arising from terminating an employee deferred compensation plan will be

considered on a case-by-case basis, provided that if insurance was required by the PBGC under ERISA Section 4023, it was so obtained and the indemnification payment is not recoverable under the insurance. Consideration under the foregoing circumstances will be primarily for the purpose of appraising the extent to which the indemnification payment is allocable to Government work. If a beneficial or other equitable relationship exists, the Government will participate, despite the requirements of 31.205-19(a)(3) and (b), in the indemnification payment to the extent of its fair share.

(v) Increased pension costs resulting from the withdrawal of assets from a pension fund and transfer to another employee benefit plan fund, or transfer of assets to another account within the same fund, are unallowable except to the extent authorized by an advance agreement. If the withdrawal of assets from a pension fund is a plan termination under ERISA, the provisions of paragraph (j)(4) of this subsection apply. The advance agreement shall--

(A) State the amount of the Government's equitable share in the gross amount withdrawn or transferred; and

(B) Provide that the Government receive a credit equal to the amount of the Government's equitable share of the gross withdrawal or transfer.

(4) *Pension adjustments and asset reversions.* (i) For segment closings, pension plan terminations, or curtailment of benefits, the adjustment amount shall be the amount measured, assigned, and allocated in accordance with 48 CFR 9904.413-50(c)(12) for contracts and subcontracts that are subject to Cost Accounting Standards (CAS) Board rules and regulations (48 CFR Chapter 99). For contracts and subcontracts that are not subject to CAS, the adjustment amount shall be the amount measured, assigned, and allocated in accordance with 48 CFR 9904.413-50(c)(12), except the numerator of the fraction at 48 CFR 9904.413-50(c)(12)(vi) shall be the sum of the pension plan costs allocated to all non-CAS-covered contracts and subcontracts that are subject to Subpart 31.2 or for which cost or pricing data were submitted.

(ii) For all other situations where assets revert to the contractor, or such assets are constructively received by it for any reason, the contractor shall, at the Government's option, make a refund or give a credit to the Government for its equitable share of the gross amount withdrawn. The Government's equitable share shall reflect the Government's participation in pension costs through those contracts for which cost or pricing data were submitted or that are subject to Subpart 31.2. Excise taxes on pension plan asset reversions or withdrawals under this subparagraph (j)(4)(ii) are unallowable in accordance with 31.205-41(b)(6).

(5) *Defined-contribution pension plans.* This paragraph covers those pension plans in which the contributions are established in advance and the level of benefits is determined by the contributions made. It also covers profit sharing, savings plans, and other such plans, provided the plans fall within the definition of a pension plan in paragraph (j)(1) of this subsection.

(i) Allowable pension cost is limited to the net contribution required to be made for a cost accounting period after taking into account dividends and other credits, where applicable. However, any portion of pension cost computed for a cost accounting period that exceeds the amount required to be funded pursuant to a waiver granted under the provisions of ERISA will be allowable in those future accounting periods in which the funding of such excess amounts occurs (see 48 CFR 9904.412-50(c)(5)).

(ii) The provisions of paragraphs (j)(3)(ii) and (iv) of this subsection apply to defined-contribution plans.

(6) *Pension plans using the pay-as-you-go cost method.* The cost of pension plans using the pay-as-you-go cost method shall be measured, allocated, and accounted for in accordance with 48 CFR 9904.412 and 9904.413. Pension costs for a pension plan using the pay-as-you-go cost method shall be allowable to the extent they are allocable, reasonable, and not otherwise unallowable.

(7) *Early retirement incentive plans.* An early retirement incentive plan is a plan under which employees receive a bonus or incentive, over and above the requirement of the basic pension plan, to retire early.

These plans normally are not applicable to all participants of the basic plan and do not represent life income settlements, and as such would not qualify as pension costs. However, for contract costing purposes, early retirement incentive payments are allow-able subject to the pension cost criteria contained in subdivisions (j)(3)(i) through (iv) provided--

(i) The costs are accounted for and allocated in accordance with the contractor's system of accounting for pension costs;

(ii) The payments are made in accordance with the terms and conditions of the contractor's plan;

(iii) The plan is applied only to active employees. The cost of extending the plan to employees who retired or were terminated before the adoption of the plan is unallowable; and

(iv) The total of the incentive payments to any employee may not exceed the amount of the employee's annual salary for the previous fiscal year before the employee's retirement.

(8) *Employee stock ownership plans (ESOP).* (i) An ESOP is an individual stock bonus plan designed specifically to invest in the stock of the employer corporation. The contractor's contributions to an Employee Stock Ownership Trust (ESOT) may be in the form of cash, stock, or property. Costs of ESOP's are allowable subject to the following conditions:

(A) Contributions by the contractor in any one year may not exceed 15 percent (25 percent when a money purchase plan is included) of salaries and wages of employees participating in the plan in any particular year.

(B) The contribution rate (ratio of contribution to salaries and wages of participating employees) may not exceed the last approved contribution rate except when approved by the contracting officer based upon justification provided by the contractor. When no contribution was made in the previous year for an existing ESOP, or when a new ESOP is first established, and the contractor proposes to make a contribution in the current year, the contribution rate shall be subject to the contracting officer's approval.

(C) When a plan or agreement exists wherein the liability for the contribution can be compelled for a specific year, the expense associated with that liability is assignable only to that period. Any portion of the contribution not funded by the time set for filing of the Federal income tax return for that year or any extension thereof shall not be allowable in subsequent years.

(D) When a plan or agreement exists wherein the liability for the contribution cannot be compelled, the amount contributed for any year is assignable to that year provided the amount is funded by the time set for filing of the Federal income tax return for that year.

(E) When the contribution is in the form of stock, the value of the stock contribution shall be limited to the fair market value of the stock on the date that title is effectively transferred to the trust. Cash contributions shall be allowable only when the contractor furnishes evidence satisfactory to the contracting officer demonstrating that stock purchases by the ESOT are or will be at a fair market price; *e.g.*, makes arrangements with the trust permitting the contracting officer to examine purchases of stock by the trust to determine that prices paid are at fair market value. When excessive prices are paid, the amount of the excess will be credited to the same indirect cost pools that were charged for the ESOP contributions in the year in which the stock purchase occurs. However, when the trust purchases the stock with borrowed funds which will be repaid over a period of years by cash contributions from the contractor to the trust, the excess price over fair market value shall be credited to the indirect cost pools pro rata over the period of years during which the contractor contributes the cash used by the trust to repay the loan. When the fair market value of unissued stock or stock of a closely held corporation is not readily determinable, the valuation will be made on a case-by-case basis taking into consideration the guidelines for valuation used by the IRS.

(ii) Amounts contributed to an ESOP arising from either--

(A) An additional investment tax credit (see 1975 Tax Reduction Act--TRASOP's); or

(B) A payroll-based tax credit (see Economic Recovery Tax Act of 1981) are unallowable.

(iii) The requirements of subdivision (j)(3)(ii) of this subsection are applicable to Employee Stock Ownership Plans.

(k) *Deferred compensation other than pensions.* (1) Deferred compensation is an award given by an employer to compensate an employee in a future cost accounting period or periods for services rendered in one or more cost accounting periods before the date of receipt of compensation by the employee. Deferred compensation does not include the amount of year-end accruals for salaries, wages, or bonuses that are paid within a reasonable period of time after the end of a cost accounting period. Subject to 31.205-6(a), deferred awards are allowable when they are based on current or future services. Awards made in periods subsequent to the period when the work being remunerated was performed are not allowable.

(2) The costs of deferred awards shall be measured, allocated, and accounted for in compliance with the provisions of 48 CFR 9904.415, Accounting for the Cost of Deferred Compensation.

(3) Deferred compensation payments to employees under awards made before the effective date of 48 CFR 9904.415 are allowable to the extent they would have been allowable under prior acquisition regulations.

(l) *Compensation incidental to business acquisitions.* The following costs are unallowable:

(1) Payments to employees under agreements in which they receive special compensation, in excess of the contractor's normal severance pay practice, if their employment terminates following a change in the management control over, or ownership of, the contractor or a substantial portion of its assets.

(2) Payments to employees under plans introduced in connection with a change (whether actual or prospective) in the management control over, or ownership of, the contractor or a substantial portion of its assets in which those employees receive special compensation, which is contingent upon the employee remaining with the contractor for a specified period of time.

(m) *Fringe benefits.* (1) Fringe benefits are allowances and services provided by the contractor to its employees as compensation in addition to regular wages and salaries. Fringe benefits include, but are not limited to, the cost of vacations, sick leave, holidays, military leave, employee insurance, and supplemental unemployment benefit plans. Except as provided otherwise in Subpart 31.2, the costs of fringe benefits are allowable to the extent that they are reasonable and are required by law, employer-employee agreement, or an established policy of the contractor.

(2) That portion of the cost of company-furnished automobiles that relates to personal use by employees (including transportation to and from work) is unallowable regardless of whether the cost is reported as taxable income to the employees (see 31.205-46(f)).

(n) *Employee rebate and purchase discount plans.* Rebates and purchase discounts, in whatever form, granted to employees on products or services produced by the contractor or affiliates are unallowable.

(o) *Postretirement benefits other than pensions (PRB).* (1) PRB covers all benefits, other than cash benefits and life insurance benefits paid by pension plans, provided to employees, their beneficiaries, and covered dependents during the period following the employees' retirement. Benefits encompassed include, but are not limited to, postretirement health care; life insurance provided outside a pension plan; and other welfare benefits such as tuition assistance, day care, legal services, and housing subsidies provided after retirement.

(2) To be allowable, PRB costs must be reasonable and incurred pursuant to law, employer-employee

agreement, or an established policy of the contractor. In addition, to be allowable, PRB costs must also be calculated in accordance with paragraphs (o)(2)(i), (ii), or (iii) of this section.

(i) *Cash basis.* Cost recognized as benefits when they are actually provided, must be paid to an insurer, provider, or other recipient for current year benefits or premiums.

(ii) *Terminal funding.* If a contractor elects a terminal-funded plan, it does not accrue PRB costs during the working lives of employees. Instead, it accrues and pays the entire PRB liability to an insurer or trustee in a lump sum upon the termination of employees (or upon conversion to such a terminal-funded plan) to establish and maintain a fund or reserve for the sole purpose of providing PRB to retirees. The lump sum is allowable if amortized over a period of 15 years.

(iii) *Accrual basis.* Accrual costing other than terminal funding must be measured and assigned according to Generally Accepted Accounting Principles and be paid to an insurer or trustee to establish and maintain a fund or reserve for the sole purpose of providing PRB to retirees. The accrual must also be calculated in accordance with generally accepted actuarial principles and practices as promulgated by the Actuarial Standards Board.

(3) To be allowable, costs must be funded by the time set for filing the Federal income tax return or any extension thereof. PRB costs assigned to the current year, but not funded or otherwise liquidated by the tax return time, shall not be allowable in any subsequent year.

(4) Increased PRB costs caused by delay in funding beyond 30 days after each quarter of the year to which they are assignable are unallowable.

(5) Costs of postretirement benefits in subdivision (o)(2)(iii) of this subsection attributable to past service ("transition obligation") as defined in Financial Accounting Standards Board Statement 106, paragraph 110, are allowable subject to the following limitation: The allowable amount of such costs assignable to a contractor fiscal year cannot exceed the amount of such costs which would be assigned to that contractor fiscal year under the delayed recognition methodology described in paragraphs 112 and 113 of Statement 106.

(6) The Government shall receive an equitable share of any amount of previously funded PRB costs which revert or inure to the contractor. Such equitable share shall reflect the Government's previous participation in PRB costs through those contracts for which cost or pricing data were required or which were subject to Subpart 31.2.

(p) *Limitation on allowability of compensation for certain contractor personnel.* (1) Costs incurred after January 1, 1998, for compensation of a senior executive in excess of the benchmark compensation amount determined applicable for the contractor fiscal year by the Administrator, Office of Federal Procurement Policy (OFPP), under Section 39 of the OFPP Act (41 U.S.C. 435) are unallowable (10 U.S.C. 2324(e)(1)(P) and 41 U.S.C. 256(e)(1)(P)). This limitation is the sole statutory limitation on allowable senior executive compensation costs incurred after January 1, 1998, under new or previously existing contracts. This limitation applies whether or not the affected contracts were previously subject to a statutory limitation on such costs. (Note that pursuant to Section 804 of Pub. L. 105-261, the definition of "senior executive" in (p)(2)(ii) has been changed for compensation costs incurred after January 1, 1999.)

(2) As used in this paragraph:

(i) "Compensation" means the total amount of wages, salary, bonuses, deferred compensation (see paragraph (k) of this subsection), and employer contributions to defined contribution pension plans (see paragraphs (j)(5) and (j)(8) of this subsection), for the fiscal year, whether paid, earned, or otherwise accruing, as recorded in the contractor's cost accounting records for the fiscal year.

(ii) "Senior executive" means--

(A) Prior to January 2, 1999--

(1) The Chief Executive Officer (CEO) or any individual acting in a similar capacity at the contractor's headquarters;

(2) The four most highly compensated employees in management positions at the contractor's headquarters, other than the CEO; and

(3) If the contractor has intermediate home offices or segments that report directly to the contractor's headquarters, the five most highly compensated employees in management positions at each such intermediate home office or segment.

(B) Effective January 2, 1999, the five most highly compensated employees in management positions at each home office and each segment of the contractor, whether or not the home office or segment reports directly to the contractor's headquarters.

(iii) "Fiscal year" means the fiscal year established by the contractor for accounting purposes.

(iv) "Contractor's headquarters" means the highest organizational level from which executive compensation costs are allocated to Government contracts.

31.205-7 Contingencies.

(a) "Contingency," as used in this subpart, means a possible future event or condition arising from presently known or unknown causes, the outcome of which is indeterminable at the present time.

(b) Costs for contingencies are generally unallowable for historical costing purposes because such costing deals with costs incurred and recorded on the contractor's books. However, in some cases, as for example, terminations, a contingency factor may be recognized when it is applicable to a past period to give recognition to minor unsettled factors in the interest of expediting settlement.

(c) In connection with estimates of future costs, contingencies fall into two categories:

(1) Those that may arise from presently known and existing conditions, the effects of which are foreseeable within reasonable limits of accuracy; *e.g.*, anticipated costs of rejects and defective work. Contingencies of this category are to be included in the estimates of future costs so as to provide the best estimate of performance cost.

(2) Those that may arise from presently known or unknown conditions, the effect of which cannot be measured so precisely as to provide equitable results to the contractor and to the Government; *e.g.*, results of pending litigation. Contingencies of this category are to be excluded from cost estimates under the several items of cost, but should be disclosed separately (including the basis upon which the contingency is computed) to facilitate the negotiation of

appropriate contractual coverage. (See, for example, 31.205-6(g), 31.205-19, and 31.205-24.)

31.205-8 Contributions or donations.

Contributions or donations, including cash, property and services, regardless of recipient, are unallowable, except as provided in 31.205-1(e)(3).

31.205-9 [Reserved]

31.205-10 Cost of money.

(a) *Facilities capital cost of money*--(1) *General.* (i) Facilities capital cost of money (cost of capital committed to facilities) is an imputed cost determined by applying a cost-of-money rate to facilities capital employed in contract performance. A cost-of-money rate is uniformly imputed to all contractors (see subdivision (a)(1)(ii) of this subsection). Capital employed is determined without regard to whether its source is equity or borrowed capital. The resulting cost of money is not a form of interest on borrowings (see 31.205-20).

(ii) 48 CFR 9904.414, Cost of Money as an Element of the Cost of Facilities Capital, establishes criteria for measuring and allocating, as an element of contract cost, the cost of capital committed to facilities. Cost-of-money factors are developed on Form CASB-CMF, broken down by overhead pool at the business unit, using--

(A) Business-unit facilities capital data,

(B) Overhead allocation base data, and

(C) The cost-of-money rate, which is based on interest rates specified by the Secretary of the Treasury under Public Law 92-41.

(2) *Allowability.* Whether or not the contract is otherwise subject to CAS, facilities capital cost of money is allowable if--

(i) The contractor's capital investment is measured, allocated to contracts, and costed in accordance with 48 CFR 9904.414;

(ii) The contractor maintains adequate records to demonstrate compliance with this standard;

(iii) The estimated facilities capital cost of money is specifically identified or proposed in cost proposals relating to the contract under which this cost is to be claimed; and

(iv) The requirements of 31.205-52, which limit the allowability of facilities capital cost of money, are observed.

(3) *Accounting.* The facilities capital cost of money need not be entered on the contractor's books of account. However, the contractor shall--

(i) Make a memorandum entry of the cost, and

(ii) Maintain, in a manner that permits audit and verification, all relevant schedules, cost data, and other data necessary to support the entry fully.

(4) *Payment.* Facilities capital cost of money that is--

(i) Allowable under subparagraph (2) of this subsection; and

(ii) Calculated, allocated, and documented in accordance with this cost principle shall be an "incurred cost" for reimbursement purposes under applicable cost-reimbursement contracts and for progress payment purposes under fixed-price contracts.

(5) The requirements of 31.205-52 shall be observed in determining the allowable cost of money attributable to including asset valuations resulting from business combinations in the facilities capital employed base.

(b) *Cost of money as an element of the cost of capital assets under construction*--(1) *General.* (i) Cost of money as an element of the cost of capital assets under construction is an imputed cost determined by

applying a cost-of-money rate to the investment in tangible and intangible capital assets while they are being constructed, fabricated, or developed for a contractor's own use. Capital employed is determined without regard to whether its source is equity or borrowed capital. The resulting cost of money is not a form of interest on borrowing (see 31.205-20).

(ii) 48 CFR 9904.417, Cost of Money as an Element of the Cost of Capital Assets Under Construction, establishes criteria for measuring and allocating, as an element of contract cost, the cost of capital committed to capital assets under construction, fabrication, or development.

(2) *Allowability.* (i) Whether or not the contract is otherwise subject to CAS, and except as specified in subdivision (ii) of this section, the cost of money for capital assets under construction, fabrication, or development is allowable if--

(A) The cost of money is calculated, allocated to contracts, and costed in accordance with 48 CFR 9904.417;

(B) The contractor maintains adequate records to demonstrate compliance with this standard;

(C) The cost of money for tangible capital assets is included in the capitalized cost that provides the basis for allowable depreciation costs, or, in the case of intangible capital assets, the cost of money is included in the cost of those assets for which amortization costs are allowable; and

(D) The requirements of 31.205-52, which limit the allowability of cost of money for capital assets under construction, fabrication, or development, are observed.

(ii) Actual interest cost in lieu of the calculated imputed cost of money for capital assets under construction, fabrication, or development is unallowable.

(3) *Accounting.* The cost of money for capital assets under construction need not be entered on the contractor's books of account. However, the contractor shall (i) make a memorandum entry of the cost and (ii) maintain, in a manner that permits audit and verification, all relevant schedules, cost data, and other data necessary to support the entry fully.

(4) *Payment.* The cost of money for capital assets under construction that is allowable under subparagraph (2) above of this cost principle shall be an "incurred cost" for reimbursement purposes under applicable cost-reimbursement contracts and for progress payment purposes under fixed-price contracts.

31.205-11 Depreciation.

(a) Depreciation is a charge to current operations which distributes the cost of a tangible capital asset, less estimated residual value, over the estimated useful life of the asset in a systematic and logical manner. It does not involve a process of valuation. Useful life refers to the prospective period of economic usefulness in a particular contractor's operations as distinguished from physical life; it is evidenced by the actual or estimated retirement and replacement practice of the contractor.

(b) Contractors having contracts subject to 48 CFR 9904.409, Depreciation of Tangible Capital Assets, must adhere to the requirement of that standard for all fully CAS-covered contracts and may elect to adopt the standard for all other contracts. All requirements of 48 CFR 9904.409 are applicable if the election is made, and its requirements supersede any conflicting requirements of this cost principle. Once electing to adopt 48 CFR 9904.409 for all contracts, contractors must continue to follow it until notification of final acceptance of all deliverable items on all open negotiated Government contracts. Paragraphs (c) through (e) below apply to contracts to which 48 CFR 9904.409 is not applied.

(c) Normal depreciation on a contractor's plant, equipment, and other capital facilities is an allowable contract cost, if the contractor is able to demonstrate that it is reasonable and allocable (but see paragraph (i) of this section).

(d) Depreciation shall be considered reasonable if the contractor follows policies and procedures that are--

(1) Consistent with those followed in the same cost center for business other than Government;

(2) Reflected in the contractor's books of accounts and financial statements; and

(3) Both used and acceptable for Federal income tax purposes.

(e) When the depreciation reflected on a contractor's books of accounts and financial statements differs from that used and acceptable for Federal income tax purposes, reimbursement shall be based on the asset cost amortized over the estimated useful life of the property using depreciation methods (straight line, sum of the years' digits, etc.) acceptable for income tax purposes. Allowable depreciation shall not exceed the amounts used for book and statement purposes and shall be determined in a manner consistent with the depreciation policies and procedures followed in the same cost center on non-Government business (but see paragraph (o) of this subsection).

(f) Depreciation for reimbursement purposes in the case of tax-exempt organizations shall be determined on the basis described in paragraph (e) of this section.

(g) Special considerations are required for assets acquired before the effective date of this cost principle if, on that date, the undepreciated balance of these assets resulting from depreciation policies and procedures used previously for Government contracts and subcontracts is different from the undepreciated balance on the books and financial statements. The undepreciated balance for contract cost purposes shall be depreciated over the remaining life using the methods and lives followed for book purposes. The aggregate depreciation of any asset allowable after the effective date of this 31.205-11 shall not exceed the cost basis of the asset less any depreciation allowed or allowable under prior acquisition regulations.

(h) Depreciation should usually be allocated to the contract and other work as an indirect cost. The amount of depreciation allowed in any accounting period may, consistent with the basic objectives in paragraph (a) above, vary with volume of production or use of multishift operations.

(i) In the case of emergency facilities covered by certificates of necessity, a contractor may elect to use normal depreciation without requesting a determination of "true depreciation," or may elect to use either normal or "true depreciation" after a determination of "true depreciation" has been made by an Emergency Facilities Depreciation Board (EFDB). The method elected must be followed consistently throughout the life of the emergency facility. When an election is made to use normal depreciation, the criteria in paragraphs (c), (d), (e), and (f) of this section shall apply for both the emergency period and the post-emergency period. When an election is made to use "true depreciation", the amount allowable as depreciation--

(1) With respect to the emergency period (five years), shall be computed in accordance with the determination of the EFDB and allocated rateably over the full five year emergency period; *provided* no other allowance is made which would duplicate the factors, such as extraordinary obsolescence, covered by the Board's determination; and

(2) After the end of the emergency period, shall be computed by distributing the remaining undepreciated portion of the cost of the emergency facility over the balance of its useful life provided the remaining undepreciated portion of such cost shall not include any amount of unrecovered "true depreciation."

(j) No depreciation, rental, or use charge shall be allowed on property acquired at no cost from the Government by the contractor or by any division, subsidiary, or affiliate of the contractor under common control.

(k) The depreciation on any item which meets the criteria for allowance at a "price" under 31.205-26(e) may be based on that price, provided the same policies and procedures are used for costing all business of the using division, subsidiary, or organization under common control.

(l) No depreciation or rental shall be allowed on property fully depreciated by the contractor or by any division, subsidiary, or affiliate of the contractor under common control. However, a reasonable charge for using fully depreciated property may be agreed upon and allowed (but see 31.109(h)(2)). In determining the charge, consideration shall be given to cost, total estimated useful life at the time of negotiations, effect of any increased maintenance charges or decreased efficiency due to age, and the amount of depreciation previously charged to Government contracts or subcontracts.

(m) 48 CFR 9904.404, Capitalization of Tangible Assets, applies to assets acquired by a "capital lease" as defined in Statement of Financial Accounting Standard No. 13 (FAS-13), Accounting for Leases, issued by the Financial Accounting Standards Board (FASB). Compliance with 48 CFR 9904.404 and FAS-13 requires that such leased assets (capital leases) be treated as purchased assets; *i.e.*, be capitalized and the capitalized value of such assets be distributed over their useful lives as depreciation charges, or over the leased life as amortization charges as appropriate. Assets whose leases are classified as capital leases under FAS-13 are subject to the requirements of 31.205-11 while assets acquired under leases classified as operating leases are subject to the requirements on rental costs in 31.205-36. The standards of financial accounting and reporting prescribed by FAS-13 are incorporated into this principle and shall govern its application, except as provided in subparagraphs (1), (2), and (3) of this paragraph.

(1) Rental costs under a sale and leaseback arrangement shall be allowable up to the amount that would have been allowed had the contractor retained title to the property.

(2) Capital leases, as defined in FAS-13, for all real and personal property, between any related parties are subject to the requirements of this subparagraph 31.205-11(m). If it is determined that the terms of the lease have been significantly affected by the fact that the lessee and lessor are related, depreciation charges shall not be allowed in excess of those which would have occurred if the lease contained terms consistent with those found in a lease between unrelated parties.

(3) Assets acquired under leases that the contractor must capitalize under FAS-13 shall not be treated as purchased assets for contract purposes if the leases are covered by 31.205-36(b)(4).

(n) Whether or not the contract is otherwise subject to CAS, the requirements of 31.205-52, which limit the allowability of depreciation, shall be observed.

(o) In the event of a write-down from carrying value to fair value as a result of impairments caused by events or changes in circumstances, allowable depreciation of the impaired assets shall be limited to the amounts that would have been allowed had the assets not been written down (see 31.205-16(g)). However, this does not preclude a change in depreciation resulting from other causes such as permissible changes in estimates of service life, consumption of services, or residual value.

31.205-12 Economic planning costs.

(a) This category includes costs of generalized long-range management planning that is concerned with the future overall development of the contractor's business and that may take into account the eventual possibility of economic dislocations or fundamental alterations in those markets in which the contractor currently does business Economic planning costs do not include organization or reorganization costs covered by 31.205-27.

(b) Economic planning costs are allowable as indirect costs to be properly allocated.

(c) Research and development and engineering costs designed to lead to new products for sale to the general public are not allowable under this principle.

31.205-13 Employee morale, health, welfare, food service, and dormitory costs and credits.

(a) Aggregate costs incurred on activities designed to improve working conditions, employer-employee relations, employee morale, and employee performance (less income generated by these activities) are allowable, except as limited by paragraphs (b), (c), and (d) of this subsection. Some examples of allowable activities are house publications, health clinics, wellness/fitness centers, employee counseling services, and food and dormitory services, which include operating or furnishing facilities for cafeterias, dining rooms, canteens, lunch wagons, vending machines, living accommodations, or similar types of services for the contractor's employees at or near the contractor's facilities.

(b) *Costs of gifts are unallowable.* (Gifts do not include awards for performance made pursuant to 31.205-6(f) or awards made in recognition of employee achievements pursuant to an established contractor plan or policy.)

(c) Costs of recreation are unallowable, except for the costs of employees' participation in company sponsored sports teams or employee organizations designed to improve company loyalty, team work, or physical fitness.

(d) Losses from operating food and dormitory services may be included as costs only if the contractor's objective is to operate such services on a break-even basis. Losses sustained because food services or lodging accommodations are furnished without charge or at prices or rates which obviously would not be conducive to the accomplishment of the above objective are not allowable. A loss may be allowed, however, to the extent that the contractor can demonstrate that unusual circumstances exist (*e.g.*, where the contractor must provide food or dormitory services at remote locations where adequate commercial facilities are not reasonably available; or where charged but unproductive labor costs would be excessive but for the services provided or where cessation or reduction of food or dormitory operations will not otherwise yield net cost savings) such that even with efficient management, operating the services on a break-even basis would require charging inordinately high prices, or prices or rates higher than those charged by commercial establishments offering the same services in the same geographical areas. Costs of food and dormitory services shall include an allocable share of indirect expenses pertaining to these activities.

(e) When the contractor has an arrangement authorizing an employee association to provide or operate a service, such as vending machines in the contractor's plant, and retain the profits, such profits shall be treated in the same manner as if the contractor were providing the service (but see paragraph (f) of this subsection).

(f) Contributions by the contractor to an employee organization, including funds from vending machine receipts or similar sources, may be included as costs incurred under paragraph (a) of this subsection only to the extent that the contractor demonstrates that an equivalent amount of the costs incurred by the employee organization would be allowable if directly incurred by the contractor.

31.205-14 Entertainment costs.

Costs of amusement, diversions, social activities, and any directly associated costs such as tickets to shows or sports events, meals, lodging, rentals, transportation, and gratuities are unallowable. Costs made specifically unallowable under this cost principle are not allowable under any other cost principle. Costs of membership in social, dining, or country clubs or other organizations having the same purposes are also unallowable, regardless of whether the cost is reported as taxable income to the employees.

31.205-15 Fines, penalties, and mischarging costs.

(a) Costs of fines and penalties resulting from violations of, or failure of the contractor to comply with, Federal, State, local, or foreign laws and regulations, are unallowable except when incurred as a result of compliance with specific terms and conditions of the contract or written instructions from the contracting officer.

(b) Costs incurred in connection with, or related to, the mischarging of costs on Government contracts

are unallowable when the costs are caused by, or result from, alteration or destruction of records, or other false or improper charging or recording of costs. Such costs include those incurred to measure or otherwise determine the magnitude of the improper charging, and costs incurred to remedy or correct the mischarging, such as costs to rescreen and reconstruct records.

31.205-16 Gains and losses on disposition or impairment of depreciable property or other capital assets.

(a) Gains and losses from the sale, retirement, or other disposition (but see 31.205-19) of depreciable property shall be included in the year in which they occur as credits or charges to the cost grouping(s) in which the depreciation or amortization applicable to those assets was included (but see paragraph (d) of this subsection). However, no gain or loss shall be recognized as a result of the transfer of assets in a business combination (see 31.205-52).

(b) Gains and losses on disposition of tangible capital assets, including those acquired under capital leases (see 31.205-11(m)), shall be considered as adjustments of depreciation costs previously recognized. The gain or loss for each asset disposed of is the difference between the net amount realized, including insurance proceeds from involuntary conversions, and its undepreciated balance. The gain recognized for contract costing purposes shall be limited to the difference between the acquisition cost (or for assets acquired under a capital lease, the value at which the leased asset is capitalized) of the asset and its undepreciated balance (except see subdivisions (c)(2)(i) or (ii) of this section).

(c) Special considerations apply to an involuntary con-version which occurs when a contractor's property is destroyed by events over which the owner has no control, such as fire, windstorm, flood, accident, theft, etc., and an insurance award is recovered. The following govern involuntary conversions:

(1) When there is a cash award and the converted asset is not replaced, gain or loss shall be recognized in the period of disposition. The gain recognized for contract costing purposes shall be limited to the difference between the acquisition cost of the asset and its undepreciated balance.

(2) When the converted asset is replaced, the contractor shall either--

(i) Adjust the depreciable basis of the new asset by the amount of the total realized gain or loss; or

(ii) Recognize the gain or loss in the period of disposition, in which case the Government shall participate to the same extent as outlined in subparagraph (c)(1) of this subsection.

(d) Gains and losses on the disposition of depreciable property shall not be recognized as a separate charge or credit when--

(1) Gains and losses are processed through the depreciation reserve account and reflected in the depreciation allowable under 31.205-11; or

(2) The property is exchanged as part of the purchase price of a similar item, and the gain or loss is taken into consideration in the depreciation cost basis of the new item.

(e) Gains and losses arising from mass or extraordinary sales, retirements, or other disposition other than through business combinations shall be considered on a case-by-case basis.

(f) Gains and losses of any nature arising from the sale or exchange of capital assets other than depreciable property shall be excluded in computing contract costs.

(g) With respect to long-lived tangible and identifiable intangible assets held for use, no loss shall be allowed for a write-down from carrying value to fair value as a result of impairments caused by events or changes in circumstances (*e.g.*, environmental damage, idle facilities arising from a declining business base, etc.). If depreciable property or other capital assets have been written down from carrying value to fair value due to impairments, gains or losses upon disposition shall be the amounts that would

have been allowed had the assets not been written down.

31.205-17 Idle facilities and idle capacity costs.

As used in this subsection--

"Costs of idle facilities or idle capacity" means costs such as maintenance, repair, housing, rent, and other related costs; *e.g.*, property taxes, insurance, and depreciation.

"Facilities" means plant or any portion thereof (including land integral to the opera-tion), equipment, individually or collectively, or any other tangible capital asset, wherever located, and whether owned or leased by the contractor.

"Idle capacity" means the unused capacity of partially used facilities. It is the difference between that which a facility could achieve under 100 percent operating time on a one-shift basis, less operating interruptions resulting from time lost for repairs, setups, unsatisfactory materials, and other normal delays, and the extent to which the facility was actually used to meet demands during the accounting period. A multiple-shift basis may be used in the calculation instead of a one-shift basis if it can be shown that this amount of usage could normally be expected for the type of facility involved.

"Idle facilities" means completely unused facilities that are excess to the contractor's current needs.

(1) The costs of idle facilities are unallowable unless the facilities--

(i) Are necessary to meet fluctuations in workload; or

(ii) Were necessary when acquired and are now idle because of changes in requirements, production economies, reorganization, termination, or other causes which could not have been reasonably foreseen. (Costs of idle facilities are allowable for a reasonable period, ordinarily not to exceed 1 year, depending upon the initiative taken to use, lease, or dispose of the idle facilities (but see 31.205-42)).

(2) Costs of idle capacity are costs of doing business and are a factor in the normal fluctuations of usage or overhead rates from period to period. Such costs are allowable provided the capacity is necessary or was originally reasonable and is not subject to reduction or elimination by subletting, renting, or sale, in accordance with sound business, economics, or security practices. Widespread idle capacity throughout an entire plant or among a group of assets having substantially the same function may be idle facilities.

(3) Any costs to be paid directly by the Government for idle facilities or idle capacity reserved for defense mobilization production shall be the subject of a separate agreement.

31.205-18 Independent research and development and bid and proposal costs.

(a) *Definitions.* As used in this subsection--

"Applied research" means that effort which (1) normally follows basic research, but may not be severable from the related basic research, (2) attempts to determine and exploit the potential of scientific discoveries or improvements in technology, materials, processes, methods, devices, or techniques, and (3) attempts to advance the state of the art. Applied research does not include efforts whose principal aim is design, development, or test of specific items or services to be considered for sale; these efforts are within the definition of the term "development," defined in this subsection.

"Basic research" (see 2.101).

"Bid and proposal (B&P) costs" means the costs incurred in preparing, submitting, and supporting bids and proposals (whether or not solicited) on potential Government or non-Government contracts. The term does not include the costs of effort sponsored by a grant or cooperative agreement, or required in the performance of a contract.

"Company" means all divisions, subsidiaries, and affiliates of the contractor under common control.

"Development" means the systematic use, under whatever name, of scientific and technical knowledge in the design, development, test, or evaluation of a potential new product or service (or of an improvement in an existing product or service) for the purpose of meeting specific performance requirements or objectives. Development includes the functions of design engineering, prototyping, and engineering testing. Development excludes--

(1) Subcontracted technical effort which is for the sole purpose of developing an additional source for an existing product, or

(2) Development effort for manufacturing or production materials, systems, processes, methods, equipment, tools, and techniques not intended for sale.

"Independent research and development (IR&D)" means a contractor's IR&D cost that consists of projects falling within the four following areas: (1) basic research, (2) applied research, (3) development, and (4) systems and other concept formulation studies. The term does not include the costs of effort sponsored by a grant or required in the performance of a contract. IR&D effort shall not include technical effort expended in developing and preparing technical data specifically to support submitting a bid or proposal.

"Systems and other concept formulation studies" means analyses and study efforts either related to specific IR&D efforts or directed toward identifying desirable new systems, equipment or components, or modifications and improvements to existing systems, equipment, or components.

(b) *Composition and allocation of costs.* The requirements of 48 CFR 9904.420, Accounting for independent research and development costs and bid and proposal costs, are incorporated in their entirety and shall apply as follows--

(1) *Fully-CAS-covered contracts.* Contracts that are fully-CAS-covered shall be subject to all requirements of 48 CFR 9904.420.

(2) *Modified CAS-covered and non-CAS-covered contracts.* Contracts that are not CAS-covered or that contain terms or conditions requiring modified CAS coverage shall be subject to all requirements of 48 CFR 9904.420 except 48 CFR 9904.420-50(e)(2) and 48 CFR 9904.420-50(f)(2), which are not then applicable. However, non-CAS-covered or modified CAS-covered contracts awarded at a time the contractor has CAS-covered contracts requiring compliance with 48 CFR 9904.420, shall be subject to all the requirements of 48 CFR 9904.420. When the requirements of 48 CFR 9904.420-50(e)(2) and 48 CFR 9904.420-50(f)(2) are not applicable, the following apply:

(i) IR&D and B&P costs shall be allocated to final cost objectives on the same basis of allocation used for the G&A expense grouping of the profit center (see 31.001) in which the costs are incurred. However, when IR&D and B&P costs clearly benefit other profit centers or benefit the entire company, those costs shall be allocated through the G&A of the other profit centers or through the corporate G&A, as appropriate.

(ii) If allocations of IR&D or B&P through the G&A base do not provide equitable cost allocation, the contracting officer may approve use of a different base.

(c) *Allowability.* Except as provided in paragraphs (d) and (e) of this subsection, or as provided in agency regulations, costs for IR&D and B&P are allowable as indirect expenses on contracts to the extent that those costs are allocable and reasonable.

(d) *Deferred IR&D costs.* (1) IR&D costs that were incurred in previous accounting periods are unallowable, except when a contractor has developed a specific product at its own risk in anticipation of recovering the development costs in the sale price of the product provided that--

(i) The total amount of IR&D costs applicable to the product can be identified;

(ii) The proration of such costs to sales of the product is reasonable;

(iii) The contractor had no Government business during the time that the costs were incurred or did not allocate IR&D costs to Government contracts except to prorate the cost of developing a specific product to the sales of that product; and

(iv) No costs of current IR&D programs are allocated to Government work except to prorate the costs of developing a specific product to the sales of that product.

(2) When deferred costs are recognized, the contract (except firm-fixed-price and fixed-price with economic price adjustment) will include a specific provision setting forth the amount of deferred IR&D costs that are allocable to the contract. The negotiation memorandum will state the circumstances pertaining to the case and the reason for accepting the deferred costs.

(e) *Cooperative arrangements.* (1) IR&D costs may be incurred by contractors working jointly with one or more non-Federal entities pursuant to a cooperative arrangement (for example, joint ventures, limited partnerships, teaming arrangements, and collaboration and consortium arrangements). IR&D costs also may include costs contributed by contractors in performing cooperative research and development agreements, or similar arrangements, entered into under--

(i) Section 12 of the Stevenson-Wydler Technology Transfer Act of 1980 (15 U.S.C. 3710(a));

(ii) Sections 203(c)(5) and (6) of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2473(c)(5) and (6));

(iii) 10 U.S.C. 2371 for the Defense Advanced Research Projects Agency; or

(iv) Other equivalent authority.

(2) IR&D costs incurred by a contractor pursuant to these types of cooperative arrangements should be considered as allowable IR&D costs if the work performed would have been allowed as contractor IR&D had there been no cooperative arrangement.

(3) Costs incurred in preparing, submitting, and supporting offers on potential cooperative arrangements are allowable to the extent they are allocable, reasonable, and not otherwise unallowable.

31.205-19 Insurance and indemnification.

(a) Insurance by purchase or by self-insuring includes coverage the contractor is required to carry, or to have approved, under the terms of the contract and any other coverage the contractor maintains in connection with the general conduct of its business. Any contractor desiring to establish a program of self-insurance applicable to contracts that are not subject to 48 CFR 9904.416, Accounting for Insurance Costs, shall comply with the self-insurance requirements of that standard as well as with Part 28 of this Regulation. However, approval of a contractor's insurance program in accordance with Part 28 does not constitute a determination as to the allowability of the program's cost. The amount of insurance costs which may be allowed is subject to the cost limitations and exclusions in the following subparagraphs.

(1) Costs of insurance required or approved, and maintained by the contractor pursuant to the contract, are allowable.

(2) Costs of insurance maintained by the contractor in connection with the general conduct of its business are allowable, subject to the following limitations:

(i) Types and extent of coverage shall follow sound business practice, and the rates and premiums must

be reasonable.

(ii) Costs allowed for business interruption or other similar insurance must be limited to exclude coverage of profit.

(iii) The cost of property insurance premiums for insurance coverage in excess of the acquisition cost of the insured assets is allowable only when the contractor has a formal written policy assuring that in the event the insured property is involuntarily converted, the new asset shall be valued at the book value of the replaced asset plus or minus adjustments for differences between insurance proceeds and actual replacement cost. If the contractor does not have such a formal written policy, the cost of premiums for insurance coverage in excess of the acquisition cost of the insured asset is unallowable.

(iv) Costs of insurance for the risk of loss of or damage to Government property are allowable only to the extent that the contractor is liable for such loss or damage and such insurance does not cover loss or damage that results from willful misconduct or lack of good faith on the part of any of the contractor's directors or officers or other equivalent representatives.

(v) Contractors operating under a program of self- insurance must obtain approval of the program when required by 28.308(a).

(vi) Costs of insurance on the lives of officers, partners, or proprietors are allowable only to the extent that the insurance represents additional compensation (see 31.205-6).

(3) Actual losses are unallowable unless expressly provided for in the contract, except--(i) Losses incurred under the nominal deductible provisions of purchased insurance, in keeping with sound business practice, are allowable for contracts not subject to 48 CFR 9904.416 and when the

contractor did not establish a self-insurance program. Such contracts are not subject to the self-insurance requirements of 48 CFR 9904.416. For contracts subject to 48 CFR 9904.416, and for those made subject to the self-insurance requirements of that Standard as a result of the contractor's having established a self-insurance program (see paragraph (a) of this section), actual losses may be used as a basis for charges under a self-insurance program when the actual amount of losses will not differ significantly from the projected average losses for the accounting period (see 48 CFR 9904.416.50(a)(2)(ii)). In those instances where an actual loss has occurred and the present value of the liability is determined under the provisions of 48 CFR 9904.416-50(a)(3)(ii), the allowable cost shall be limited to an amount computed using as a discount rate the interest rate determined by the Secretary of the Treasury pursuant to 50 U.S.C. App. 1215(b)(2) in effect at the time the loss is recognized. However, the full amount of a lump-sum settlement to be paid within a year of the date of settlement is allowable.

(ii) Minor losses, such as spoilage, breakage, and disappearance of small hand tools that occur in the ordinary course of doing business and that are not covered by insurance are allowable.

(4) The cost of insurance to protect the contractor against the costs of correcting its own defects in materials or workmanship is unallowable. However, insurance costs to cover fortuitous or casualty losses resulting from defects in materials or workmanship are allowable as a normal business expense.

(5) Premiums for retroactive or backdated insurance written to cover occurred and known losses are unallowable.

(b) If purchased insurance is available, the charge for any self-insurance coverage plus insurance administration expenses shall not exceed the cost of comparable purchased insurance plus associated insurance administration expenses.

(c) Insurance provided by captive insurers (insurers owned by or under the control of the contractor) is considered self-insurance, and charges for it must comply with the self-insurance provisions of 48 CFR 9904.416. However, if the captive insurer also sells insurance to the general public in substantial quantities and it can be demonstrated that the charge to the contractor is based on competitive market forces, the insurance will be considered purchased insurance.

(d) The allowability of premiums for insurance purchased from fronting insurance companies (insurance companies not related to the contractor but who reinsure with a captive insurer of the contractor) shall not exceed the amount (plus reasonable fronting company charges for services rendered) which the contractor would have been allowed had it insured directly with the captive insurer.

(e) Self-insurance charges for risks of catastrophic losses are not allowable (see 28.308(e)).

(f) The Government is obligated to indemnify the contractor only to the extent authorized by law, as expressly provided for in the contract, except as provided in paragraph (a)(3) of this section.

(g) Late premium payment charges related to employee deferred compensation plan insurance incurred pursuant to Section 4007 (29 U.S.C. 1307) or Section 4023 (29 U.S.C. 1323) of the Employee Retirement Income Security Act of 1974 are unallowable.

31.205-20 Interest and other financial costs.

Interest on borrowings (however represented), bond discounts, costs of financing and refinancing capital (net worth plus long-term liabilities), legal and professional fees paid in connection with preparing prospectuses, and costs of preparing and issuing stock rights are unallowable (but see 31.205-28). However, interest assessed by State or local taxing authorities under the conditions specified in 31.205-41(a)(3) is allowable.

31.205-21 Labor relations costs.

(a) Costs incurred in maintaining satisfactory relations between the contractor and its employees, including costs of shop stewards, labor management committees, employee publications, and other related activities, are allowable.

(b) **[This paragraph (b) is stayed indefinitely.]** Costs incurred for activities that assist, promote, or deter unionization are unallowable.

31.205-22 Lobbying and political activity costs.

(a) Costs associated with the following activities are unallowable:

(1) Attempts to influence the outcomes of any Federal, State, or local election, referendum, initiative, or similar procedure, through in kind or cash contributions, endorsements, publicity, or similar activities;

(2) Establishing, administering, contributing to, or paying the expenses of a political party, campaign, political action committee, or other organization established for the purpose of influencing the outcomes of elections;

(3) Any attempt to influence--

(i) The introduction of Federal, state, or local legislation, or

(ii) The enactment or modification of any pending Federal, state, or local legislation through communication with any member or employee of the Congress or state legislature (including efforts to influence state or local officials to engage in similar lobbying activity), or with any government official or employee in connection with a decision to sign or veto enrolled legislation;

(4) Any attempt to influence--

(i) The introduction of Federal, state, or local legislation, or

(ii) The enactment or modification of any pending Federal, state, or local legislation by preparing, distributing or using publicity or propaganda, or by urging members of the general public or any segment thereof to contribute to or participate in any mass demonstration, march, rally, fund raising drive, lobbying campaign or letter writing or telephone campaign;

(5) Legislative liaison activities, including attendance at legislative sessions or committee hearings, gathering information regarding legislation, and analyzing the effect of legislation, when such activities are carried on in support of or in knowing preparation for an effort to engage in unallowable activities; or

(6) Costs incurred in attempting to improperly influence (see 3.401), either directly or indirectly, an employee or officer of the Executive branch of the Federal Government to give consideration to or act regarding a regulatory or contract matter.

(b) The following activities are excepted from the coverage of (a) of this section:

(1) Providing a technical and factual presentation of information on a topic directly related to the performance of a contract through hearing testimony, statements or letters to the Congress or a state legislature, or subdivision, member, or cognizant staff member thereof, in response to a documented request (including a Congressional Record notice requesting testimony or statements for the record at a regularly scheduled hearing) made by the recipient member, legislative body or subdivision, or a cognizant staff member thereof; provided such information is readily obtainable and can be readily put in deliverable form; and further provided that costs under this section for transportation, lodging or meals are unallowable unless incurred for the purpose of offering testimony at a regularly scheduled Congressional hearing pursuant to a written request for such presentation made by the Chairman or Ranking Minority Member of the Committee or Subcommittee conducting such hearing.

(2) Any lobbying made unallowable by paragraph (a)(3) of this subsection to influence state or local legislation in order to directly reduce contract cost, or to avoid material impairment of the contractor's authority to perform the contract.

(3) Any activity specifically authorized by statute to be undertaken with funds from the contract.

(c) When a contractor seeks reimbursement for indirect costs, total lobbying costs shall be separately identified in the indirect cost rate proposal, and thereafter treated as other unallowable activity costs.

(d) Contractors shall maintain adequate records to demonstrate that the certification of costs as being allowable or unallowable (see 42.703-2) pursuant to this subsection complies with the requirements of this subsection.

(e) Existing procedures should be utilized to resolve in advance any significant questions or disagreements concerning the interpretation or application of this subsection.

31.205-23 Losses on other contracts.

An excess of costs over income under any other contract (including the contractor's contributed portion under cost-sharing contracts) is unallowable.

31.205-24 Maintenance and repair costs.

(a) Costs necessary for the upkeep of property (including Government property, unless otherwise provided for) that neither add to the permanent value of the property nor appreciably prolong its intended life, but keep it in an efficient operating condition, are to be treated as follows (but see

31.205-11):

(1) Normal maintenance and repair costs are allowable.

(2) Extraordinary maintenance and repair costs are allowable, provided those costs are allocated to the applicable periods for purposes of determining contract costs (but see 31.109).

(b) Expenditures for plant and equipment, including rehabilitation which should be capitalized and subject to depreciation, according to generally accepted accounting principles as applied under the contractor's established policy or, when applicable, according to 48 CFR 9904.404, Capitalization of Tangible Assets, are allowable only on a depreciation basis.

31.205-25 Manufacturing and production engineering costs.

(a) The costs of manufacturing and production engineering effort as described in (1) through (4) of this paragraph are all allowable:

(1) Developing and deploying new or improved materials, systems, processes, methods, equipment, tools and techniques that are or are expected to be used in producing products or services;

(2) Developing and deploying pilot production lines;

(3) Improving current production functions, such as plant layout, production scheduling and control, methods and job analysis, equipment capabilities and capacities, inspection techniques, and tooling analysis (including tooling design and application improvements); and

(4) Material and manufacturing producibility analysis for production suitability and to optimize manufacturing processes, methods, and techniques.

(b) This cost principle does not cover--

(1) Basic and applied research effort (as defined in 31.205-18(a)) related to new technology, materials, systems, processes, methods, equipment, tools and techniques. Such technical effort is governed by 31.205-18, Independent research and development and bid and proposal costs; and

(2) Development effort for manufacturing or production materials, systems, processes, methods, equipment, tools, and techniques that are intended for sale is also governed by 31.205-18.

(c) Where manufacturing or production development costs are capitalized or required to be capitalized under the contractor's capitalization policies, allowable cost will be determined in accordance with the requirements of 31.205-11, Depreciation.

31.205-26 Material costs.

(a) Material costs include the costs of such items as raw materials, parts, sub-assemblies, components, and manufacturing supplies, whether purchased or manufactured by the contractor, and may include such collateral items as inbound transportation and intransit insurance. In computing material costs, consideration shall be given to reasonable overruns, spoilage, or defective work (unless otherwise provided in any contract provision relating to inspecting and correcting defective work). These costs are allowable, subject to the requirements of paragraphs (b) through (e) of this section.

(b) Costs of material shall be adjusted for income and other credits, including available trade discounts, refunds, rebates, allowances, and cash discounts, and credits for scrap, salvage, and material returned to vendors. Such income and other credits shall either be credited directly to the cost of the material or be allocated as a credit to indirect costs. When the contractor can demonstrate that failure to take cash discounts was reasonable, lost discounts need not be credited.

(c) Reasonable adjustments arising from differences between periodic physical inventories and book inventories may be included in arriving at costs; provided, such adjustments relate to the period of contract performance.

(d) When materials are purchased specifically for and are identifiable solely with performance under a contract, the actual purchase cost of those materials should be charged to the contract. If material is issued from stores, any generally recognized method of pricing such material is acceptable if that method is consistently applied and the results are equitable. When estimates of future material costs are required, current market price or anticipated acquisition cost may be used, but the basis of pricing must be disclosed.

(e) Allowance for all materials, supplies, and services that are sold or transferred between any divisions, subdivisions, subsidiaries, or affiliates of the contractor under a common control shall be on the basis of cost incurred in accordance with this subpart. However, allowance may be at price when it is the established practice of the transferring organization to price interorganizational transfers at other than cost for commercial work of the contractor or any division, subsidiary, or affiliate of the contractor under a common control, and when the item being transferred qualifies for an exception under 15.403-1(b) and the contracting officer has not determined the price to be unreasonable.

(f) When a commercial item under paragraph (e) of this subsection is transferred at a price based on a catalog or market price, the price should be adjusted to reflect the quantities being acquired and may be adjusted to reflect the actual cost of any modifications necessary because of contract requirements.

31.205-27 Organization costs.

(a) Except as provided in paragraph (b) of this subsection, expenditures in connection with (1) planning or executing the organization or reorganization of the corporate structure of a business, including mergers and acquisitions, (2) resisting or planning to resist the reorganization of the corporate structure of a business or a change in the controlling interest in the ownership of a business, and (3) raising capital (net worth plus long-term liabilities), are unallowable. Such expenditures include but are not limited to incorporation fees and costs of attorneys, accountants, brokers, promoters and organizers, management consultants and investment counselors, whether or not employees of the contractor. Unallowable "reorganization" costs include the cost of any change in the contractor's financial structure, excluding administrative costs of short-term borrowings for working capital, resulting in alterations in the rights and interests of security holders, whether or not additional capital is raised.

(b) The cost of activities primarily intended to provide compensation will not be considered organizational costs subject to this subsection, but will be governed by 31.205-6. These activities include acquiring stock for--

(1) Executive bonuses,

(2) Employee savings plans, and

(3) Employee stock ownership plans.

31.205-28 Other business expenses.

The following types of recurring costs are allowable when allocated on an equitable basis:

(a) Registry and transfer charges resulting from changes in ownership of securities issued by the contractor.

(b) Cost of shareholders' meetings.

(c) Normal proxy solicitations.

(d) Preparing and publishing reports to shareholders.

(e) Preparing and submitting required reports and forms to taxing and other regulatory bodies.

(f) Incidental costs of directors' and committee meetings.

(g) Other similar costs.

31.205-29 Plant protection costs.

Costs of items such as--

(a) Wages, uniforms, and equipment of personnel engaged in plant protection,

(b) Depreciation on plant protection capital assets, and

(c) Necessary expenses to comply with military requirements, are allowable.

31.205-30 Patent costs.

(a) The following patent costs are allowable to the extent that they are incurred as requirements of a Government contract (but see 31.205-33):

(1) Costs of preparing invention disclosures, reports, and other documents.

(2) Costs for searching the art to the extent necessary to make the invention disclosures.

(3) Other costs in connection with the filing and prosecution of a United States patent application where title or royalty-free license is to be conveyed to the Government.

(b) General counseling services relating to patent matters, such as advice on patent laws, regulations, clauses, and employee agreements, are allowable (but see 31.205-33).

(c) Other than those for general counseling services, patent costs not required by the contract are unallowable. (See also 31.205-37.)

31.205-31 Plant reconversion costs.

Plant reconversion costs are those incurred in restoring or rehabilitating the contractor's facilities to approximately the same condition existing immediately before the start of the Government contract, fair wear and tear excepted. Reconversion costs are unallowable except for the cost of removing Government property and the restoration or rehabilitation costs caused by such removal. However, in special circumstances where equity so dictates, additional costs may be allowed to the extent agreed upon before costs are incurred. Care should be exercised to avoid duplication through allowance as contingencies, additional profit or fee, or in other contracts.

31.205-32 Precontract costs.

Precontract costs means costs incurred before the effective date of the contract directly pursuant to the negotiation and in anticipation of the contract award when such incurrence is necessary to comply with the proposed contract delivery schedule. These costs are allowable to the extent that they would have been allowable if incurred after the date of the contract (see 31.109).

31.205-33 Professional and consultant service costs.

(a) *Definition.* "Professional and consultant services," as used in this subsection, means those services rendered by persons who are members of a particular profession or possess a special skill and who are

not officers or employees of the contractor. Examples include those services acquired by contractors or subcontractors in order to enhance their legal, economic, financial, or technical positions. Professional and consultant services are generally acquired to obtain information, advice, opinions, alternatives, conclusions, recommendations, training, or direct assistance, such as studies, analyses, evaluations, liaison with Government officials, or other forms of representation.

(b) Costs of professional and consultant services are allowable subject to this paragraph and paragraphs (c) through (f) of this subsection when reasonable in relation to the services rendered and when not contingent upon recovery of the costs from the Government (but see 31.205-30 and 31.205-47).

(c) Costs of professional and consultant services performed under any of the following circumstances are unallowable:

(1) Services to improperly obtain, distribute, or use information or data protected by law or regulation (*e.g.*, 52.215-1(e), Restriction on Disclosure and Use of Data).

(2) Services that are intended to improperly influence the contents of solicitations, the evaluation of proposals or quotations, or the selection of sources for contract award, whether award is by the Government, or by a prime contractor or subcontractor.

(3) Any other services obtained, performed, or otherwise resulting in violation of any statute or regulation prohibiting improper business practices or conflicts of interest.

(4) Services performed which are not consistent with the purpose and scope of the services contracted for or otherwise agreed to.

(d) In determining the allowability of costs (including retainer fees) in a particular case, no single factor or any special combination of factors is necessarily determinative. However, the contracting officer shall consider the following factors, among others:

(1) The nature and scope of the service rendered in relation to the service required.

(2) The necessity of contracting for the service, considering the contractor's capability in the particular area.

(3) The past pattern of acquiring such services and their costs, particularly in the years prior to the award of Government contracts.

(4) The impact of Government contracts on the contractor's business.

(5) Whether the proportion of Government work to the contractor's total business is such as to influence the contractor in favor of incurring the cost, particularly when the services rendered are not of a continuing nature and have little relationship to work under Government contracts.

(6) Whether the service can be performed more economically by employment rather than by contracting.

(7) The qualifications of the individual or concern rendering the service and the customary fee charged, especially on non-Government contracts.

(8) Adequacy of the contractual agreement for the service (*e.g.*, description of the service, estimate of time required, rate of compensation, termination provisions).

(e) Retainer fees, to be allowable, must be supported by evidence that--

(1) The services covered by the retainer agreement are necessary and customary;

(2) The level of past services justifies the amount of the retainer fees (if no services were rendered, fees

are not automatically unallowable);

(3) The retainer fee is reasonable in comparison with maintaining an in-house capability to perform the covered services, when factors such as cost and level of expertise are considered; and

(4) The actual services performed are documented in accordance with paragraph (f) of this subsection.

(f) Fees for services rendered shall be allowable only when supported by evidence of the nature and scope of the service furnished. (See also 31.205-38(f).) However, retainer agreements generally are not based on specific statements of work. Evidence necessary to determine that work performed is proper and does not violate law or regulation shall include--

(1) Details of all agreements (*e.g.*, work requirements, rate of compensation, and nature and amount of other expenses, if any) with the individuals or organizations providing the services and details of actual services performed;

(2) Invoices or billings submitted by consultants, including sufficient detail as to the time expended and nature of the actual services provided; and

(3) Consultants' work products and related documents, such as trip reports indicating persons visited and subjects discussed, minutes of meetings, and collateral memoranda and reports.

31.205-34 Recruitment costs.

(a) Subject to paragraph (b) of this subsection, the following costs are allowable:

(1) Costs of help-wanted advertising.

(2) Costs of operating an employment office needed to secure and maintain an adequate labor force.

(3) Costs of operating an aptitude and educational testing program.

(4) Travel costs of employees engaged in recruiting personnel.

(5) Travel costs of applicants for interviews.

(6) Costs for employment agencies, not in excess of standard commercial rates.

(b) Help-wanted advertising costs are unallowable if the advertising--

(1) Does not describe specific positions or classes of positions; or

(2) Includes material that is not relevant for recruitment purposes, such as extensive illustrations or descriptions of the company's products or capabilities.

31.205-35 Relocation costs.

(a) Relocation costs are costs incident to the permanent change of duty assignment (for an indefinite period or for a stated period, but in either event for not less than 12 months) of an existing employee or upon recruitment of a new employee. The following types of relocation costs are allowable as noted, subject to paragraphs (b) and (f) of this subsection:

(1) Cost of travel of the employee and members of the immediate family (see 31.205-46) and transportation of the household and personal effects to the new location.

(2) Cost of finding a new home, such as advance trips by employees and spouses to locate living quarters, and temporary lodging during the transition periods not exceeding separate cumulative totals of

60 days for employees and 45 days for spouses and dependents, including advance trip time.

(3) Closing costs (*i.e.*, brokerage fees, legal fees, appraisal fees, points, finance charges, etc.) incident to the disposition of actual residence owned by the employee when notified of transfer, except that these costs when added to the costs described in subparagraph (a)(4) of this section shall not exceed 14 percent of the sales price of the property sold.

(4) Continuing costs of ownership of the vacant former actual residence being sold, such as maintenance of building and grounds (exclusive of fixing up expenses), utilities, taxes, property insurance, mortgage interest, after settlement date or lease date of new permanent residence, except that these costs when added to the costs described in subparagraph (a)(3) of this section, shall not exceed 14 percent of the sales price of the property sold.

(5) Other necessary and reasonable expenses normally incident to relocation, such as disconnecting and connecting household appliances; automobile registration; driver's license and use taxes; cutting and fitting rugs, draperies, and curtains; forfeited utility fees and deposits; and purchase of insurance against damage to or loss of personal property while in transit.

(6) Costs incident to acquiring a home in a new location, except that--

(i) These costs will not be allowable for existing employees or newly recruited employees who, before the relocation, were not homeowners and

(ii) The total costs shall not exceed 5 percent of the purchase price of the new home.

(7) Mortgage interest differential payments, except that these costs are not allowable for existing or newly recruited employees who, before the relocation, were not homeowners and the total payments are limited to an amount determined as follows:

(i) The difference between the mortgage interest rates of the old and new residences times the current balance of the old mortgage times 3 years.

(ii) When mortgage differential payments are made on a lump sum basis and the employee leaves or is transferred again in less than 3 years, the amount initially recognized shall be proportionately adjusted to reflect payments only for the actual time of the relocation.

(8) Rental differential payments covering situations where relocated employees retain ownership of a vacated home in the old location and rent at the new location. The rented quarters at the new location must be comparable to those vacated, and the allowable differential payments may not exceed the actual rental costs for the new home, less the fair market rent for the vacated home times 3 years.

(9) Cost of canceling an unexpired lease.

(b) The costs described in paragraph (a) of this section must also meet the following criteria to be considered allowable:

(1) The move must be for the benefit of the employer.

(2) Reimbursement must be in accordance with an established policy or practice that is consistently followed by the employer and is designed to motivate employees to relocate promptly and economically.

(3) The costs must not otherwise be unallowable under Subpart 31.2.

(4) Amounts to be reimbursed shall not exceed the employee's actual expenses, except that for miscellaneous costs of the type discussed in subparagraph (a)(5) of this section, a flat amount, not to exceed $1,000, may be allowed in lieu of actual costs.

(c) The following types of costs are not allowable:

(1) Loss on sale of a home.

(2) Costs incident to acquiring a home in a new location as follows:

(i) Real estate brokers fees and commissions.

(ii) Cost of litigation.

(iii) Real and personal property insurance against damage or loss of property.

(iv) Mortgage life insurance.

(v) Owner's title policy insurance when such insurance was not previously carried by the employee on the old residence (however, cost of a mortgage title policy is allowable).

(vi) Property taxes and operating or maintenance costs.

(3) Continuing mortgage principal payments on residence being sold.

(4) Payments for employee income or FICA (social security) taxes incident to reimbursed relocation costs.

(5) Payments for job counseling and placement assistance to employee spouses and dependents who were not employees of the contractor at the old location.

(6) Costs incident to furnishing equity or nonequity loans to employees or making arrangements with lenders for employees to obtain lower-than-market rate mortgage loans.

(d) If relocation costs for an employee have been allowed either as an allocable indirect or direct cost, and the employee resigns within 12 months for reasons within the employee's control, the contractor shall refund or credit the relocation costs to the Government.

(e) Subject to the requirements of paragraphs (a) through (d) of this section, the costs of family movements and of personnel movements of a special or mass nature are allowable. The cost, however, should be assigned on the basis of work (contracts) or time period benefited.

(f) Relocation costs (both outgoing and return) of employees who are hired for performance on specific contracts or long-term field projects are allowable if--

(1) The term of employment is not less than 12 months;

(2) The employment agreement specifically limits the duration of employment to the time spent on the contract or field project for which the employee is hired;

(3) The employment agreement provides for return relocation to the employee's permanent and principal home immediately prior to the outgoing relocation,or other location of equal or lesser cost; and

(4) The relocation costs are determined under the rules of paragraphs (a) through (d) of this section. However, the costs to return employees, who are released from employment upon completion of field assignments pursuant to their employment agreements, are not subject to the refund or credit requirement of paragraph (d).

31.205-36 Rental costs.

(a) This subsection is applicable to the cost of renting or leasing real or personal property acquired under

"operating leases" as defined in Statement of Financial Accounting Standards No. 13 (FAS-13), Accounting for Leases. Compliance with 31.205-11(m) requires that assets acquired by means of capital leases, as defined in FAS-13, shall be treated as purchased assets; *i.e.*, be capitalized and the capitalized value of such assets be distributed over their useful lives as depreciation charges, or over the lease term as amortization charges, as appropriate (but see paragraph (b)(4) of this section).

(b) The following costs are allowable:

(1) Rental costs under operating leases, to the extent that the rates are reasonable at the time of the lease decision, after consideration of--

(i) Rental costs of comparable property, if any;

(ii) Market conditions in the area;

(iii) The type, life expectancy, condition, and value of the property leased;

(iv) Alternatives available; and

(v) Other provisions of the agreement.

(2) Rental costs under a sale and leaseback arrangement only up to the amount the contractor would be allowed if the contractor retained title.

(3) Charges in the nature of rent for property between any divisions, subsidiaries, or organizations under common control, to the extent that they do not exceed the normal costs of ownership, such as depreciation, taxes, insurance, facilities capital cost of money, and maintenance (excluding interest or other unallowable costs pursuant to Part 31), provided that no part of such costs shall duplicate any other allowed cost. Rental cost of personal property leased from any division, subsidiary, or affiliate of the contractor under common control, that has an established practice of leasing the same or similar property to unaffiliated lessees shall be allowed in accordance with paragraph (b)(1) of this subsection.

(4) Rental costs under leases entered into before March 1, 1970 for the remaining term of the lease (excluding options not exercised before March 1, 1970) to the extent they would have been allowable under Defense Acquisition Regulation (formerly ASPR) 15-205.34 or Federal Procurement Regulations section 1-15.205-34 in effect January 1, 1969.

(c) The allowability of rental costs under unexpired leases in connection with terminations is treated in 31.205-42(e).

31.205-37 Royalties and other costs for use of patents.

(a) Royalties on a patent or amortization of the cost of purchasing a patent or patent rights necessary for the proper performance of the contract and applicable to contract products or processes are allowable unless--

(1) The Government has a license or the right to a free use of the patent;

(2) The patent has been adjudicated to be invalid, or has been administratively determined to be invalid;

(3) The patent is considered to be unenforceable; or

(4) The patent is expired.

(b) Care should be exercised in determining reasonableness when the royalties may have been arrived at as a result of less-than-arm's-length bargaining; *e.g.*, royalties--

(e) Costs of the type identified in paragraphs (b), (c), and (d) of this subsection are often commingled on the contractor's books in the selling expense account because these activities are performed by the sales departments. However, identification and segregation of unallowable costs is required under the provisions of 31.201-6 and 30.405, and such costs are not allowable merely because they are incurred in connection with allowable selling activities.

(f) Notwithstanding any other provision of this subsection, sellers' or agents' compensation, fees, commissions, percentages, retainer or brokerage fees, whether or not contingent upon the award of contracts, are allowable only when paid to bona fide employees or established commercial or selling agencies maintained by the contractor for the purpose of securing business.

31.205-39 Service and warranty costs.

Service and warranty costs include those arising from fulfillment of any contractual obligation of a contractor to provide services such as installation, training, correcting defects in the products, replacing defective parts, and making refunds in the case of inadequate performance. When not inconsistent with the terms of the contract, service and warranty costs are allowable. However, care should be exercised to avoid duplication of the allowance as an element of both estimated product cost and risk.

31.205-40 Special tooling and special test equipment costs.

(a) The terms "special tooling" and "special test equipment" are defined in 45.101.

(b) The cost of special tooling and special test equipment used in performing one or more Government contracts is allowable and shall be allocated to the specific Government contract or contracts for which acquired, except that the cost of--

(1) Items acquired by the contractor before the effective date of the contract (or replacement of such items), whether or not altered or adapted for use in performing the contract, and

(2) Items which the contract schedule specifically excludes, shall be allowable only as depreciation or amortization.

(c) When items are disqualified as special tooling or special test equipment because with relatively minor expense they can be made suitable for general purpose use and have a value as such commensurate with their value as special tooling or special test equipment, the cost of adapting the items for use under the contract and the cost of returning them to their prior configuration are allowable.

31.205-41 Taxes.

(a) The following types of costs are allowable:

(1) Federal, State, and local taxes (see Part 29), except as otherwise provided in paragraph (b) of this section that are required to be and are paid or accrued in accordance with generally accepted accounting principles. Fines and penalties are not considered taxes.

(2) Taxes otherwise allowable under subparagraph (a)(1) of this section, but upon which a claim of illegality or erroneous assessment exists; provided the contractor, before paying such taxes--

(i) Promptly requests instructions from the contracting officer concerning such taxes; and

(ii) Takes all action directed by the contracting officer arising out of paragraph (2)(i) of this section or an independent decision of the Government as to the existence of a claim of illegality or erroneous assessment, to--

(A) Determine the legality of the assessment or

(1) Paid to persons, including corporations, affiliated with the contractor;

(2) Paid to unaffiliated parties, including corporations, under an agreement entered into in contemplation that a Government contract would be awarded; or

(3) Paid under an agreement entered into after the contract award.

(c) In any case involving a patent formerly owned by the contractor, the royalty amount allowed should not exceed the cost which would have been allowed had the contractor retained title.

(d) See 31.109 regarding advance agreements.

31.205-38 Selling costs.

(a) "Selling" is a generic term encompassing all efforts to market the contractor's products or services, some of which are covered specifically in other subsections of 31.205. Selling activity includes the following broad categories:

(1) Advertising.

(2) Corporate image enhancement including broadly-targeted sales efforts, other than advertising.

(3) Bid and proposal costs.

(4) Market planning.

(5) Direct selling.

(b) Advertising costs are defined at 31.205-1(b) and are subject to the allowability provisions of 31.205-1(d) and (f). Corporate image enhancement activities are included within the definitions of public relations at 31.205-1(a) and entertainment at 31.205-14 and are subject to the allowability provisions at 31.205-1(e) and (f) and 31.205-14, respectively. Bid and proposal costs are defined at 31.205-18 and have their allowability controlled by that subsection. Market planning involves market research and analysis and generalized management planning concerned with development of the contractor's business. The allowability of long-range market planning costs is controlled by the provisions of 31.205-12. Other market planning costs are allowable to the extent that they are reasonable and not in excess of the limitations of paragraph (c)(2) of this subsection. Costs of activities which are correctly classified and disallowed under cost principles referenced in this paragraph (b) are not to be reconsidered for reimbursement under any other provision of this subsection.

(c)(1) Direct selling efforts are those acts or actions to induce particular customers to purchase particular products or services of the contractor. Direct selling is characterized by person-to-person contact and includes such activities as familiarizing a potential customer with the contractor's products or services, conditions of sale, service capabilities, etc. It also includes negotiation, liaison between customer and contractor personnel, technical and consulting activities, individual demonstrations, and any other activities having as their purpose the application or adaptation of the contractor's products or services for a particular customer's use. The cost of direct selling efforts is allowable if reasonable in amount.

(2) The costs of broadly targeted and direct selling efforts and market planning other than long-range, that are incurred in connection with a significant effort to promote export sales of products normally sold to the U.S. Government, including the costs of exhibiting and demonstrating such products, are allowable on contracts with the U.S. Government provided the costs are allocable, reasonable, and otherwise allowable under this Subpart 31.2.

(d) The costs of any selling efforts other than those addressed in paragraphs (b) or (c) of this subsection are unallowable.

accrued over the period during which the contractor had been reimbursed by the Government for the taxes, interest, or penalties.

31.205-42 Termination costs.

Contract terminations generally give rise to the incurrence of costs or the need for special treatment of costs that would not have arisen had the contract not been terminated. The following cost principles peculiar to termination situations are to be used in conjunction with the other cost principles in Subpart 31.2:

(a) *Common items.* The costs of items reasonably usable on the contractor's other work shall not be allowable unless the contractor submits evidence that the items could not be retained at cost without sustaining a loss. The contracting officer should consider the contractor's plans and orders for current and planned production when determining if items can reasonably be used on other work of the contractor. Contemporaneous purchases of common items by the contractor shall be regarded as evidence that such items are reasonably usable on the contractor's other work. Any acceptance of common items as allocable to the terminated portion of the contract should be limited to the extent that the quantities of such items on hand, in transit, and on order are in excess of the reasonable quantitative requirements of other work.

(b) *Costs continuing after termination.* Despite all reasonable efforts by the contractor, costs which cannot be discontinued immediately after the effective date of termination are generally allowable. However, any costs continuing after the effective date of the termination due to the negligent or willful failure of the contractor to discontinue the costs shall be unallowable.

(c) *Initial costs.* Initial costs, including starting load and preparatory costs, are allowable as follows:

(1) Starting load costs not fully absorbed because of termination are nonrecurring labor, material, and related overhead costs incurred in the early part of production and result from factors such as--

(i) Excessive spoilage due to inexperienced labor;

(ii) Idle time and subnormal production due to testing and changing production methods;

(iii) Training; and

(iv) Lack of familiarity or experience with the product, materials, or manufacturing processes.

(2) Preparatory costs incurred in preparing to perform the terminated contract include such costs as those incurred for initial plant rearrangement and alterations, management and personnel organization, and production planning. They do not include special machinery and equipment and starting load costs.

(3) When initial costs are included in the settlement proposal as a direct charge, such costs shall not also be included in overhead. Initial costs attributable to only one contract shall not be allocated to other contracts.

(4) If initial costs are claimed and have not been segregated on the contractor's books, they shall be segregated for settlement purposes from cost reports and schedules reflecting that high unit cost incurred during the early stages of the contract.

(5) If the settlement proposal is on the inventory basis, initial costs should normally be allocated on the basis of total end items called for by the contract immediately before termination; however, if the contract includes end items of a diverse nature, some other equitable basis may be used, such as machine or labor hours.

(d) *Loss of useful value.* Loss of useful value of special tooling, and special machinery and equipment is generally allowable, provided--

(B) Secure a refund of such taxes.

(3) Pursuant to paragraph (a)(2) of this section, the reasonable costs of any action taken by the contractor at the direction or with the concurrence of the contracting officer. Interest or penalties incurred by the contractor for non-payment of any tax at the direction of the contracting officer or by reason of the failure of the contracting officer to ensure timely direction after a prompt request.

(4) The Environmental Tax found at section 59A of the Internal Revenue Code, also called the "Superfund Tax."

(b) The following types of costs are not allowable:

(1) Federal income and excess profits taxes.

(2) Taxes in connection with financing, refinancing, refunding operations, or reorganizations (see 31.205-20 and 31.205-27).

(3) Taxes from which exemptions are available to the contractor directly, or available to the contractor based on an exemption afforded the Government, except when the contracting officer determines that the administrative burden incident to obtaining the exemption outweighs the corresponding benefits accruing to the Government. When partial exemption from a tax is attributable to Government contract activity, taxes charged to such work in excess of that amount resulting from application of the preferential treatment are unallowable. These provisions intend that tax preference attributable to Government contract activity be realized by the Government. The term "exemption" means freedom from taxation in whole or in part and includes a tax abatement or reduction resulting from mode of assessment, method of calculation, or otherwise.

(4) Special assessments on land that represent capital improvements.

(5) Taxes (including excises) on real or personal property, or on the value, use, possession or sale thereof, which is used solely in connection with work other than on Government contracts (see paragraph (c) of this section).

(6) Any excise tax in subtitle D, chapter 43 of the Internal Revenue Code of 1986, as amended. That chapter includes excise taxes imposed in connection with qualified pension plans, welfare plans, deferred compensation plans, or other similar types of plans.

(7) Income tax accruals designed to account for the tax effects of differences between taxable income and pretax income as reflected by the books of account and financial statements.

(c) Taxes on property (see subparagraph (b)(5) of this section) used solely in connection with either non-Government or Government work should be considered directly applicable to the respective category of work unless the amounts involved are insignificant or comparable results would otherwise be obtained; *e.g.*, taxes on contractor-owned work-in-process which is used solely in connection with non-Government work should be allocated to such work; taxes on contractor-owned work-in-process inventory (and Government-owned work-in-process inventory when taxed) used solely in connection with Government work should be charged to such work. The cost of taxes incurred on property used in both Government and non-Government work shall be apportioned to all such work based upon the use of such property on the respective final cost objectives.

(d) Any taxes, interest, or penalties that were allowed as contract costs and are refunded to the contractor shall be credited or paid to the Government in the manner it directs. If a contractor or subcontractor obtains a foreign tax credit that reduces its U.S. Federal income tax because of the payment of any tax or duty allowed as contract costs, and if those costs were reimbursed by a foreign government, the amount of the reduction shall be paid to the Treasurer of the United States at the time the Federal income tax return is filed. However, any interest actually paid or credited to a contractor incident to a refund of tax, interest, or penalty shall be paid or credited to the Government only to the extent that such interest

(1) The special tooling, or special machinery and equipment is not reasonably capable of use in the other work of the contractor;

(2) The Government's interest is protected by transfer of title or by other means deemed appropriate by the contracting officer; and

(3) The loss of useful value for any one terminated contract is limited to that portion of the acquisition cost which bears the same ratio to the total acquisition cost as the terminated portion of the contract bears to the entire terminated contract and other Government contracts for which the special tooling, or special machinery and equipment was acquired.

(e) *Rental under unexpired leases.* Rental costs under unexpired leases, less the residual value of such leases, are generally allowable when shown to have been reasonably necessary for the performance of the terminated contract, if--

(1) The amount of rental claimed does not exceed the reasonable use value of the property leased for the period of the contract and such further period as may be reasonable; and

(2) The contractor makes all reasonable efforts to terminate, assign, settle, or otherwise reduce the cost of such lease.

(f) *Alterations of leased property.* The cost of alterations and reasonable restorations required by the lease may be allowed when the alterations were necessary for performing the contract.

(g) *Settlement expenses.* (1) Settlement expenses, including the following, are generally allowable:

(i) Accounting, legal, clerical, and similar costs reasonably necessary for--

(A) The preparation and presentation, including supporting data, of settlement claims to the contracting officer; and

(B) The termination and settlement of subcontracts.

(ii) Reasonable costs for the storage, transportation, protection, and disposition of property acquired or produced for the contract.

(iii) Indirect costs related to salary and wages incurred as settlement expenses in (i) and (ii); normally, such indirect costs shall be limited to payroll taxes, fringe benefits, occupancy costs, and immediate supervision costs.

(2) If settlement expenses are significant, a cost account or work order shall be established to separately identify and accumulate them.

(h) *Subcontractor claims.* Subcontractor claims, including the allocable portion of the claims common to the contract and to other work of the contractor, are generally allowable. An appropriate share of the contractor's indirect expense may be allocated to the amount of settlements with subcontractors; provided, that the amount allocated is reasonably proportionate to the relative benefits received and is otherwise consistent with 31.201-4 and 31.203(c). The indirect expense so allocated shall exclude the same and similar costs claimed directly or indirectly as settlement expenses.

31.205-43 Trade, business, technical and professional activity costs.

The following types of costs are allowable:

(a) Memberships in trade, business, technical, and professional organizations.

(b) Subscriptions to trade, business, professional, or other technical periodicals.

(c) When the principal purpose of a meeting, convention, conference, symposium, or seminar is the dissemination of trade, business, technical or professional information or the stimulation of production or improved productivity--

(1) Costs of organizing, setting up, and sponsoring the meetings, conventions, symposia, etc., including rental of meeting facilities, transportation, subsistence, and incidental costs;

(2) Costs of attendance by contractor employees, including travel costs (see 31.205-46); and

(3) Costs of attendance by individuals who are not employees of the contractor, provided--

(i) Such costs are not also reimbursed to the individual by the employing company or organization, and

(ii) The individuals attendance is essential to achieve the purpose of the conference, meeting, convention, symposium, etc.

31.205-44 Training and education costs.

(a) *Allowable costs.* Training and education costs are allowable to the extent indicated below.

(b) *Vocational training.* Costs of preparing and maintaining a noncollege level program of instruction, including but not limited to on-the-job, classroom, and apprenticeship training, designed to increase the vocational effectiveness of employees, are allowable. These costs include--

(1) Salaries or wages of trainees (excluding overtime compensation),

(2) Salaries of the director of training and staff when the training program is conducted by the contractor,

(3) Tuition and fees when the training is in an institution not operated by the contractor, and/or

(4) Training materials and textbooks.

(c) *Part-time college level education.* Allowable costs of part-time college education at an undergraduate or postgraduate level, including that provided at the contractor's own facilities, are limited to--

(1) Fees and tuition charged by the educational institution, or, instead of tuition, instructors' salaries and the related share of indirect cost of the educational institution, to the extent that the sum thereof is not in excess of the tuition that would have been paid to the participating educational institution;

(2) Salaries and related costs of instructors who are employees of the contractor;

(3) Training materials and textbooks; and

(4) Straight-time compensation of each employee for time spent attending classes during working hours not in excess of 156 hours per year where circumstances do not permit the operation of classes or attendance at classes after regular working hours. In unusual cases, the period may be extended (see paragraph (h) of this subsection).

(d) *Full-time education.* Costs of tuition, fees, training materials and textbooks (but not subsistence, salary, or any other emoluments) in connection with full-time education, including that provided at the contractor's own facilities, at a postgraduate but not undergraduate college level, are allowable only when the course or degree pursued is related to the field in which the employee is working or may reasonably be expected to work and are limited to a total period not to exceed 2 school years or the length of the degree program, whichever is less, for each employee so trained.

(e) *Specialized programs.* Costs of attendance of up to 16 weeks per employee per year at specialized programs specifically designed to enhance the effectiveness of managers or to prepare employees for such positions are allowable. Such costs include enrollment fees and related charges and employees' salaries, subsistence, training materials, textbooks, and travel. Costs allowable under this paragraph do not include costs for courses that are part of a degree-oriented curriculum, which are only allowable pursuant to paragraphs (c) and (d) of this subsection.

(f) *Other expenses.* Maintenance expense and normal depreciation or fair rental on facilities owned or leased by the contractor for training purposes are allowable in accordance with 31.205-11, 31.205-17, 31.205-24, and 31.205-36.

(g) *Grants.* Grants to educational or training institutions, including the donation of facilities or other properties, scholarships, and fellowships are considered contributions and are unallowable.

(h) *Advance agreements.* (1) Training and education costs in excess of those otherwise allowable under paragraphs (c) and (d) of this subsection, including subsistence, salaries or any other emoluments, may be allowed to the extent set forth in an advance agreement negotiated under 31.109. To be considered for an advance agreement, the contractor must demonstrate that the costs are consistently incurred under an established managerial, engineering, or scientific training and education program, and that the course or degree pursued is related to the field in which the employees are now working or may reasonably be expected to work. Before entering into the advance agreement, the contracting officer shall give consideration to such factors as--

(i) The length of employees' service with the contractor;

(ii) Employees' past performance and potential;

(iii) Whether employees are in formal development programs; and

(iv) The total number of participating employees.

(2) Any advance agreement must include a provision requiring the contractor to refund to the Government training and education costs for employees who resign within 12 months of completion of such training or education for reasons within an employee's control.

(i) *Training or education costs for other than bona fide employees.* Costs of tuition, fees, textbooks, and similar or related benefits provided for other than bona fide employees are unallowable, except that the costs incurred for educating employee dependents (primary and secondary level studies) when the employee is working in a foreign country where public education is not available and where suitable private education is inordinately expensive may be included in overseas differential.

(j) *Employee dependent education plans.* Costs of college plans for employee dependents are unallowable.

31.205-45 Transportation costs.

Allowable transportation costs include freight, express, cartage, and postage charges relating to goods purchased, in process, or delivered. When these costs can be identified with the items involved, they may be directly costed as transportation costs or added to the cost of such items. When identification with the materials received cannot be made, inbound transportation costs may be charged to the appropriate indirect cost accounts if the contractor follows a consistent and equitable procedure. Outbound freight, if reimbursable under the terms of the contract, shall be treated as a direct cost.

31.205-46 Travel costs.

(a) *Costs for transportation, lodging, meals, and incidental expenses.* (1) Costs incurred by contractor

personnel on official company business are allowable, subject to the limitations contained in this subsection. Costs for transportation may be based on mileage rates, actual costs incurred, or on a combination thereof, provided the method used results in a reasonable charge. Costs for lodging, meals, and incidental expenses may be based on per diem, actual expenses, or a combination thereof, provided the method used results in a reasonable charge.

(2) Except as provided in subparagraph (a)(3) of this subsection, costs incurred for lodging, meals, and incidental expenses (as defined in the regulations cited in (a)(2)(i) through (iii) of this subparagraph) shall be considered to be reasonable and allowable only to the extent that they do not exceed on a daily basis the maximum per diem rates in effect at the time of travel as set forth in the--

(i) Federal Travel Regulations, prescribed by the General Services Administration, for travel in the conterminous 48 United States, available on a subscription basis from the:

Superintendent of Documents

U.S. Government Printing Office

Washington DC 20402

Stock No. 922-002-00000-2

(ii) Joint Travel Regulation, Volume 2, DoD Civilian Personnel, Appendix A, prescribed by the Department of Defense, for travel in Alaska, Hawaii, The Commonwealth of Puerto Rico, and territories and possessions of the United States, available on a subscription basis from the--

Superintendent of Documents

U.S. Government Printing Office

Washington DC 20402

Stock No. 908-010-00000-1; or

(iii) Standardized Regulations (Government Civilians, Foreign Areas), Section 925, "Maximum Travel Per Diem Allowances for Foreign Areas," prescribed by the Department of State, for travel in areas not covered in (a)(2)(i) and (ii) of this subparagraph, available on a subscription basis from the--

Superintendent of Documents

U.S. Government Printing Office

Washington, DC 20402

Stock No. 744-008-00000-0

(3) In special or unusual situations, actual costs in excess of the above-referenced maximum per diem rates are allowable provided that such amounts do not exceed the higher amounts authorized for Federal civilian employees as permitted in the regulations referenced in (a)(2)(i), (ii), or (iii) of this subsection. For such higher amounts to be allowable, all of the following conditions must be met:

(i) One of the conditions warranting approval of the actual expense method, as set forth in the regulations referenced in paragraphs (a)(2)(i), (ii), or (iii) of this subsection, must exist.

(ii) A written justification for use of the higher amounts must be approved by an officer of the contractor's organization or designee to ensure that the authority is properly administered and controlled to prevent abuse.

(iii) If it becomes necessary to exercise the authority to use the higher actual expense method repetitively or on a continuing basis in a particular area, the contractor must obtain advance approval from the contracting officer.

(iv) Documentation to support actual costs incurred shall be in accordance with the contractor's established practices, subject to paragraph (a)(7) of this subsection, and provided that a receipt is required for each expenditure of $75.00 or more. The approved justification required by paragraph (a)(3)(ii) and, if applicable, paragraph (a)(3)(iii) of this subsection must be retained.

(4) Subparagraphs (a)(2) and (a)(3) of this subsection do not incorporate the regulations cited in subdivisions (a)(2)(i), (ii), and (iii) of this subsection in their entirety. Only the maximum per diem rates, the definitions of lodging, meals, and incidental expenses, and the regulatory coverage dealing with special or unusual situations are incorporated herein.

(5) An advance agreement (see 31.109) with respect to compliance with subparagraphs (a)(2) and (a)(3) of this subsection may be useful and desirable.

(6) The maximum per diem rates referenced in subparagraph (a)(2) of this subsection generally would not constitute a reasonable daily charge--

(i) When no lodging costs are incurred; and/or

(ii) On partial travel days (*e.g.*, day of departure and return).

Appropriate downward adjustments from the maximum per diem rates would normally be required under these circumstances. While these adjustments need not be calculated in accordance with the Federal Travel Regulation or Joint Travel Regulations, they must result in a reasonable charge.

(7) Costs shall be allowable only if the following information is documented--

(i) Date and place (city, town, or other similar designation) of the expenses;

(ii) Purpose of the trip; and

(iii) Name of person on trip and that person's title or relationship to the contractor.

(b) Travel costs incurred in the normal course of overall administration of the business are allowable and shall be treated as indirect costs.

(c) Travel costs directly attributable to specific contract performance are allowable and may be charged to the contract under 31.202.

(d) Airfare costs in excess of the lowest customary standard, coach, or equivalent airfare offered during normal business hours are unallowable except when such accommodations require circuitous routing, require travel during unreasonable hours, excessively prolong travel, result in increased cost that would offset transportation savings, are not reasonably adequate for the physical or medical needs of the traveler, or are not reasonably available to meet mission requirements. However, in order for airfare costs in excess of the above standard airfare to be allowable, the applicable condition(s) set forth above must be documented and justified.

(e)(1) "Cost of travel by contractor-owned, -leased, or -chartered aircraft," as used in this paragraph, includes the cost of lease, charter, operation (including personnel), maintenance, depreciation, insurance, and other related costs.

(2) The costs of travel by contractor-owned, -leased, or -chartered aircraft are limited to the standard airfare described in paragraph (d) of this subsection for the flight destination unless travel by such

aircraft is specifically required by contract specification, term, or condition, or a higher amount is approved by the contracting officer. A higher amount may be agreed to when one or more of the circumstances for justifying higher than standard airfare listed in paragraph (d) of this subsection are applicable, or when an advance agreement under paragraph (e)(3) of this subsection has been executed. In all cases, travel by contractor-owned, -leased, or -chartered aircraft must be fully documented and justified. For each contractor-owned, -leased, or -chartered aircraft used for any business purpose which is charged or allocated, directly or indirectly, to a Government contract, the contractor must maintain and make available manifest/logs for all flights on such company aircraft. As a minimum, the manifest/log shall indicate--

(i) Date, time, and points of departure;

(ii) Destination, date, and time of arrival;

(iii) Name of each passenger and relationship to the contractor;

(iv) Authorization for trip; and

(v) Purpose of trip.

(3) Where an advance agreement is proposed (see 31.109), consideration may be given to the following:

(i) Whether scheduled commercial airlines or other suitable, less costly, travel facilities are available at reasonable times, with reasonable frequency, and serve the required destinations conveniently.

(ii) Whether increased flexibility in scheduling results in time savings and more effective use of personnel that would outweigh additional travel costs.

(f) Costs of contractor-owned or -leased automobiles, as used in this paragraph, include the costs of lease, operation (including personnel), maintenance, depreciation, insurance, etc. These costs are allowable, if reasonable, to the extent that the automobiles are used for company business. That portion of the cost of company-furnished automobiles that relates to personal use by employees (including transportation to and from work) is compensation for personal services and is unallowable as stated in 31.205-6(m)(2).

31.205-47 Costs related to legal and other proceedings.

(a) *Definitions.* As used in this subpart--

"Costs" include, but are not limited to, administrative and clerical expenses; the costs of legal services, whether performed by in-house or private counsel; the costs of the services of accountants, consultants, or others retained by the contractor to assist it; costs of employees, officers, and directors; and any similar costs incurred before, during, and after commencement of a judicial or administrative proceeding which bears a direct relationship to the proceeding.

"Fraud," as used in this subsection, means--

(1) Acts of fraud or corruption or attempts to defraud the Government or to corrupt its agents,

(2) Acts which constitute a cause for debarment or suspension under 9.406-2(a) and 9.407-2(a) and

(3) Acts which violate the False Claims Act, 31 U.S.C., sections 3729-3731, or the Anti-Kickback Act, 41 U.S.C., sections 51 and 54.

"Penalty," does not include restitution, reimbursement, or compensatory damages.

"Proceeding," includes an investigation.

(b) Costs incurred in connection with any proceeding brought by a Federal, State, local, or foreign government for violation of, or a failure to comply with, law or regulation by the contractor (including its agents or employees), or costs incurred in connection with any proceeding brought by a third party in the name of the United States under the False Claims Act, 31 U.S.C. 3730, are unallowable if the result is--

(1) In a criminal proceeding, a conviction;

(2) In a civil or administrative proceeding, a finding that the contractor violated, or failed to comply with, a law or regulation; **[This language stayed indefinitely. Please use paragraph (b)(3) below.]**

(3) In a civil or administrative proceeding, either a finding of contractor liability where the proceeding involves an allegation of fraud or similar misconduct or imposition of a monetary penalty where the proceeding does not involve an allegation of fraud or similar misconduct;

(4) A final decision by an appropriate official of an executive agency to--

(i) Debar or suspend the contractor;

(ii) Rescind or void a contract; or

(iii) Terminate a contract for default by reason of a violation or failure to comply with a law or regulation.

(5) Disposition of the matter by consent or compromise if the proceeding could have led to any of the outcomes listed in paragraphs (b)(1) through (3) of this subsection (but see paragraphs (c) and (d) of this subsection); or

(6) Not covered by paragraphs (b)(1) through (4) of this subsection, but where the underlying alleged contractor misconduct was the same as that which led to a different proceeding whose costs are unallowable by reason of paragraphs (b)(1) through (4) of this subsection.

(c)(1) To the extent they are not otherwise unallowable, costs incurred in connection with any proceeding under paragraph (b) of this subsection commenced by the United States that is resolved by consent or compromise pursuant to an agreement entered into between the contractor and the United States, and which are unallowable solely because of paragraph (b) of this subsection, may be allowed to the extent specifically provided in such agreement

(2) In the event of a settlement of any proceeding brought by a third party under the False Claims Act in which the United States did not intervene, reasonable costs incurred by the contractor in connection with such a proceeding, that are not otherwise unallowable by regulation or by separate agreement with the United States, may be allowed if the contracting officer, in consultation with his or her legal advisor, determines that there was very little likelihood that the third party would have been successful on the merits.

(d) To the extent that they are not otherwise unallowable, costs incurred in connection with any proceeding under paragraph (b) of this subsection commenced by a State, local, or foreign government may be allowable when the contracting officer (or other official specified in agency procedures) determines, that the costs were incurred either:

(1) As a direct result of a specific term or condition of a Federal contract; or

(2) As a result of compliance with specific written direction of the cognizant contracting officer.

(e) Costs incurred in connection with proceedings described in paragraph (b) of this subsection, but which are not made unallowable by that paragraph, may be allowable to the extent that:

(1) The costs are reasonable in relation to the activities required to deal with the proceeding and the underlying cause of action;

(2) The costs are not otherwise recovered from the Federal Government or a third party, either directly as a result of the proceeding or otherwise; and

(3) The percentage of costs allowed does not exceed the percentage determined to be appropriate considering the complexity of procurement litigation, generally accepted principles governing the award of legal fees in civil actions involving the United States as a party, and such other factors as may be appropriate. Such percentage shall not exceed 80 percent. Agreements reached under paragraph (c) of this subsection shall be subject to this limitation. If, however, an agreement described in paragraph (c)(1) of this subsection explicitly states the amount of otherwise allowable incurred legal fees and limits the allowable recovery to 80 percent or less of the stated legal fees, no additional limitation need be applied. The amount of reimbursement allowed for legal costs in connection with any proceeding described in paragraph (c)(2) of this subsection shall be determined by the cognizant contracting officer, but shall not exceed 80 percent of otherwise allowable legal costs incurred.

(f) Costs not covered elsewhere in this subsection are unallowable if incurred in connection with:

(1) Defense against Federal Government claims or appeals or the prosecution of claims or appeals against the Federal Government (see 33.201).

(2) Organization, reorganization, (including mergers and acquisitions) or resisting mergers and acquisitions (see also 31.205-27).

(3) Defense of antitrust suits.

(4) Defense of suits brought by employees or ex-employees of the contractor under section 2 of the Major Fraud Act of 1988 where the contractor was found liable or settled.

(5) Costs of legal, accounting, and consultant services and directly associated costs incurred in connection with the defense or prosecution of lawsuits or appeals between contractors arising from either--

(i) An agreement or contract concerning a teaming arrangement, a joint venture, or similar arrangement of shared interest; or

(ii) Dual sourcing, coproduction, or similar programs, are unallowable, except when--

(A) Incurred as a result of compliance with specific terms and conditions of the contract or written instructions from the contracting officer, or

(B) When agreed to in writing by the contracting officer.

(6) Patent infringement litigation, unless otherwise provided for in the contract.

(7) Representation of, or assistance to, individuals, groups, or legal entities which the contractor is not legally bound to provide, arising from an action where the participant was convicted of violation of a law or regulation or was found liable in a civil or administrative proceeding.

(8) Protests of Federal Government solicitations or contract awards, or the defense against protests of such solicitations or contract awards, unless the costs of defending against a protest are incurred pursuant to a written request from the cognizant contracting officer.

(g) Costs which may be unallowable under 31.205-47, including directly associated costs, shall be segregated and accounted for by the contractor separately. During the pendency of any proceeding

by the contracting officer in accordance with, the revision of OMB Circular A-21 in effect on the date of the contract.

(b) Agencies are not expected to place additional restrictions on individual items of cost.

Subparts 31.4 and 31.5--[Reserved]

Subpart 31.6--Contracts with State, Local, and Federally Recognized Indian Tribal Governments

31.601 Purpose.

This subpart provides the principles for determining allowable cost of contracts and subcontracts with State, local, and federally recognized Indian tribal governments.

31.602 General.

Office of Management and Budget (OMB) Circular No. A-87, Cost Principles for State and Local Governments, Revised, sets forth the principles for determining the allowable costs of contracts and subcontracts with State, local, and federally recognized Indian tribal governments. These principles are for cost determination and are not intended to identify the circumstances or dictate the extent of Federal and State or local participation in financing a particular contract.

31.603 Requirements.

(a) Contracts that refer to this Subpart 31.6 for determining allowable costs under contracts with State, local and Indian tribal governments shall be deemed to refer to, and shall have the allowability of costs determined by the contracting officer in accordance with, the revision of OMB Circular A-87 which is in effect on the date of the contract.

(b) Agencies are not expected to place additional restrictions on individual items of cost. However, under 10 U.S.C. 2324(e) and 41 U.S.C. 256(e), the following costs are unallowable:

(1) Costs of entertainment, including amusement, diversion, and social activities, and any costs directly associated with such costs (such as tickets to shows or sports events, meals, lodging, rentals, transportation, and gratuities).

(2) Costs incurred to influence (directly or indirectly) legislative action on any matter pending before Congress, a State legislature, or a legislative body of a political subdivision of a State.

(3) Costs incurred in defense of any civil or criminal fraud proceeding or similar proceeding (including filing of any false certification) brought by the United States where the contractor is found liable or has pleaded nolo contendere to a charge of fraud or similar proceeding (including filing of a false certification).

(4) Payments of fines and penalties resulting from violations of, or failure to comply with, Federal, state, local, or foreign laws and regulations, except when incurred as a result of compliance with specific terms and conditions of the contract or specific written instructions from the contracting officer authorizing in advance such payments in accordance with applicable regulations in the FAR or an executive agency supplement to the FAR.

(5) Costs of any membership in any social, dining, or country club or organization.

(6) Costs of alcoholic beverages.

(7) Contributions or donations, regardless of the recipient.

(8) Costs of advertising designed to promote the contractor or its products.

covered by paragraph (b) and paragraphs (f)(4) and (f)(7) of this subsection, the contracting officer shall generally withhold payment of such costs. However, if in the best interests of the Government, the contracting officer may provide for conditional payment upon provision of adequate security, or other adequate assurance, and agreement by the contractor to repay all unallowable costs, plus interest, if the costs are subsequently determined to be unallowable.

31.205-48 Deferred research and development costs.

"Research and development," as used in this section, means the type of technical effort described in 31.205-18 but sponsored by a grant or required in the performance of a contract. When costs are incurred in excess of either the price of a contract or amount of a grant for research and development effort, the excess is unallowable under any other Government contract.

31.205-49 Goodwill.

Goodwill, an unidentifiable intangible asset, originates under the purchase method of accounting for a business combination when the price paid by the acquiring company exceeds the sum of the identifiable individual assets acquired less liabilities assumed, based upon their fair values. The excess is commonly referred to as goodwill. Goodwill may arise from the acquisition of a company as a whole or a portion thereof. Any costs for amortization, expensing, write-off, or write-down of goodwill (however represented) are unallowable.

31.205-50 [Reserved]

31.205-51 Costs of alcoholic beverages.

Costs of alcoholic beverages are unallowable.

31.205-52 Asset valuations resulting from business combinations.

(a) For tangible capital assets, when the purchase method of accounting for a business combination is used, whether or not the contract or subcontract is subject to CAS, the allowable depreciation and cost of money shall be based on the capitalized asset values measured and assigned in accordance with 48 CFR 9904.404-50(d), if allocable, reasonable, and not otherwise unallowable.

(b) For intangible capital assets, when the purchase method of accounting for a business combination is used, allowable amortization and cost of money shall be limited to the total of the amounts that would have been allowed had the combination not taken place.

Subpart 31.3--Contracts with Educational Institutions

31.301 Purpose.

This subpart provides the principles for determining the cost of research and development, training, and other work performed by educational institutions under contracts with the Government.

31.302 General.

Office of Management and Budget (OMB) Circular No. A-21, Cost Principles for Educational Institutions, revised, provides principles for determining the costs applicable to research and development, training, and other work performed by educational institutions under contracts with the Government.

31.303 Requirements.

(a) Contracts that refer to this Subpart 31.3 for determining allowable costs under contracts with educational institutions shall be deemed to refer to, and shall have the allowability of costs determined

(9) Costs of promotional items and memorabilia, including models, gifts, and souvenirs.

(10) Costs for travel by commercial aircraft which exceed the amount of the standard commercial fare.

(11) Costs incurred in making any payment (commonly known as a "golden parachute payment") which is--

(i) In an amount in excess of the normal severance pay paid by the contractor to an employee upon termination of employment; and

(ii) Is paid to the employee contingent upon, and following, a change in management control over, or ownership of, the contractor or a substantial portion of the contractor's assets.

(12) Costs of commercial insurance that protects against the costs of the contractor for correction of the contractor's own defects in materials or workmanship.

(13) Costs of severance pay paid by the contractor to foreign nationals employed by the contractor under a service contract performed outside the United States, to the extent that the amount of the severance pay paid in any case exceeds the amount paid in the industry involved under the customary or prevailing practice for firms in that industry providing similar services in the United States, as determined by regulations in the FAR or in an executive agency supplement to the FAR.

(14) Costs of severance pay paid by the contractor to a foreign national employed by the contractor under a service contract performed in a foreign country if the termination of the employment of the foreign national is the result of the closing of, or curtailment of activities at, a United States facility in that country at the request of the government of that country.

(15) Costs incurred by a contractor in connection with any criminal, civil, or administrative proceedings commenced by the United States or a State, to the extent provided in 10 U.S.C. 2324(k) or 41 U.S.C. 256(k).

Subpart 31.7--Contracts with Nonprofit Organizations

31.701 Purpose.

This subpart provides the principles for determining the cost applicable to work performed by nonprofit organizations under contracts with the Government. A nonprofit organization, for purpose of identification, is defined as a business entity organized and operated exclusively for charitable, scientific, or educational purposes, of which no part of the net earnings inure to the benefit of any private shareholder or individual, of which no substantial part of the activities is carrying on propaganda or otherwise attempting to influence legislation or participating in any political campaign on behalf of any candidate for public office, and which are exempt from Federal income taxation under section 501 of the Internal Revenue Code.

31.702 General.

Office of Management and Budget (OMB) Circular No. A-122, Cost Principles for Nonprofit Organizations, sets forth principles for determining the costs applicable to work performed by nonprofit organizations under contracts (also applies to grants and other agreements) with the Government.

31.703 Requirements.

(a) Contracts which refer to this Subpart 31.7 for determining allowable costs shall be deemed to refer to, and shall have the allowability of costs determined by the contracting officer in accordance with, the revision of OMB Circular A-122 in effect on the date of the contract.

(b) Agencies are not expected to place additional restrictions on individual items of cost. However, under 10 U.S.C. 2324(e) and 41 U.S.C. 256(e), the costs cited in 31.603(b) are unallowable.

UNITED STATES DEPARTMENT OF COMMERCE
National Institute of Standards and Technology

Dr. D. B. Karron
Computer Aided Surgery, Inc.
300 East 33rd Street
Suite 4N
New York, New York 10016

Reference: Advanced Technology Program Award Number 70NANB1H3050

Dear Dr. Karron:

I am pleased to transmit three (3) copies of the referenced award. Please review the award documents thoroughly and if you agree with the provisions, sign the three (3) copies of the Financial Assistance Award (CD-450) and return two (2) originally signed copies, including the Special Award Conditions and budget, to:

National Institute of Standards and Technology
Grants and Agreements Management Division
100 Bureau Drive, Building 411, Room A143, Stop 3580
Gaithersburg, MD 20899-3580

You are to retain the third copy of the award document and provisions for your records. This award becomes void if not signed and returned within thirty (30) days of receipt. If you have any questions concerning this award, please contact the NIST Grants Specialist identified in the cooperative agreement special award conditions.

We congratulate you on receiving this award and wish you success in the development and broad dissemination of challenging high-risk technologies that could offer the potential for significant, broad-based economic benefits for the nation.

Sincerely,

Marc Stanley

Marc G. Stanley
Acting Director, Advanced Technology Program

5. PROJECT DESCRIPTION

All research shall be conducted in accordance with the Recipient's proposal dated 07/06/01 (Gate 1), and 08/06/01 (Gate 2), and all revisions/late documentation dated 08/21/01, 08/27/01, 09/06/01, 09/12/01, 09/14/01, and 09/--/01, including revised budget dated 09/--/01.

6. FUNDING LIMITATIONS

The scope of work and budget incorporated into this award cover a **three-year** period (referred to as the "project period") for a total amount of **$2,000,000.00** in Federal funds. However, Federal funding available at this time is limited to **$800,000.00** for the first year period from **October 1, 2001 through September 30, 2002** (referred to as the "budget period"). The Grants Officer may require additional clarification to support the budget. If that results in changes to the budget or budget narrative, the Recipient shall submit, in writing, a revised budget and/or budget narrative to the Grants Officer for approval. Receipt of any funding beyond the first year up to the level projected under this award is contingent upon the availability of funds from Congress, satisfactory performance, and will be at the sole discretion of the National Institute of Standards and Technology (NIST). The Recipient may not obligate, incur any expenditure, nor engage in any activity that involves a commitment of Federal funds under this Agreement in excess of the Federal amount presently available. No legal liability exists or will result on the part of the Federal Government for payment of any portion of the remaining funds, which have not been made available under the award. If additional funds are not made available, any expenses incurred related to closeout activities must be funded from the amount already made available under this award. The notice of availability or non-availability of additional funding for the **second** and **third** year(s) will be made in writing **by the Grants Officer**. Only the Grants Officer is authorized to obligate funds. No other verbal or written notice should be relied upon by the Recipient. In the absence of a written notice of additional funding, no assumption should be made by the Recipient that the funds will be forthcoming.

ojected budget amounts and periods:

ear 2: $600,000.00 (From 10/01/02 to 09/30/03)
ear 3: $600,000.00 (From 10/01/03 to 09/30/04)

. COST SHARE

or the first year period, the cost sharing ratio (direct costs ily) applicable to this award is the Recipient's contribution of 61% ($30,000.00) and NIST's contribution of 96.39% 800,000.00).

. PERSONNEL AND CONSULTANT REQUIREMENT

ne Recipient must provide to the ATP Project Manager in writing ithin 60 days of project start date, identification of the ersonnel on the project and the percentage of time including onsultants.

. REQUIREMENT OF ACCOUNTING SYSTEM CERTIFICATION

ne Recipient, whether receiving Federal Funds or only providing atching funds, must have a functioning financial management stem that meets the provisions of 15 CFR 14.21 to ensure oper accountability of funds. Therefore, Computer Aided rgery, Inc., must submit an **accounting system certification** sued by an Independent Certified Public Accountant (CPA) to e NIST Grants Officer within 90 days from the date of this ward.

). DEFERRAL OF REVIEW OF USE OF HUMAN SUBJECTS

ased upon a review of the proposal dated July 6, 2001, IST has determined that the involvement of human subjects in search identified herein meets the criteria to qualify for a eferred review. This award is made in accordance with 15 FR 27.118, which permits research that does not involve uman subjects to proceed even though human subjects may involved at a later stage during the project period. In cordance with the 8/01 ATP General Terms and Conditions 19, the Recipient must submit the following documentation ior to Year 3 of the project and prior to any research that ay involve human subjects, to the ATP Project Manager for view and approval by appropriate NIST officials:

a) Documentation establishing approval of the project by an Institutional Review Board qualified under 15 CFR 27.103, OR

b) Documentation to support an exemption for the project pursuant to 15 CFR 27.101(b).

ne documentation requirements are available on the ATP ebsite at http://www.atp.nist.gov, outlined in the ATP oklet titled "Guidelines and Documentation Requirements for search Involving Human and Animal Subjects." No volvement of human subjects in research may be undertaken conducted, or costs involving human subjects research curred or charged to the project, until the NIST Grants ficer's approval of the above documentation is obtained in iting.

Chapter 1. General Guidance

Audit Requirements: The Advanced Technology Program (ATP) is a cost-sharing program designed to assist United States industry and businesses pursue high risk, enabling technologies with significant commercial and economic potential. The statutory authority for ATP, 15 USC Sec. 278n, requires that NIST establish procedures regarding financial reporting and auditing to ensure that cooperative agreements are used for their specified purposes. Pursuant to the Inspector General Act of 1978, as amended, 5 USC App., all audits of financial assistance are to be performed in accordance with Government Auditing Standards issued by the Comptroller General of the United States. These audit requirements can be met by conducting an audit of the ATP financial statement, "Schedule of Fund Sources and Project Costs" and an examination-level attestation engagement of management's assertions regarding compliance with laws and regulations.

The ATP financial statement will be audited using generally accepted auditing standards which have been incorporated into the Government Auditing Standards. The examination-level compliance attestation engagement will be conducted in accordance with Government Auditing Standards and the standards contained in the Statement on Standards for Attestation Engagement (SSAE) No. 3, *Compliance Attestation,* as amended by SSAE No. 9, *Statement of Standards for Attestation Engagement Nos. 1, 2, and 3*, issued by the American Institute of Certified Public Accountants (AICPA). A compliance attestation engagement, conducted in accordance with SSAE No. 3, as amended, is a type of financial-related audit under Government Auditing Standards.

These guidelines are to be used by independent auditors to perform the required program-specific audits of ATP recipients **except** when ATP recipients are required to comply with the Single Audit Act of 1996 and Office of Management and Budget (OMB) Circular A-133, *"Audits of States, Local Governments and Non-Profit Organizations."* For recipients required to have annual audits in compliance with OMB Circular A-133, these guidelines can be used to identify the allowability of specific cost elements and other programmatic compliance requirements which may be tested.

These guidelines are not intended to be a complete manual of procedures, nor are they intended to supplant the auditor's judgment of the work required to meet the audit's objectives. These guidelines may not cover all circumstances encountered while performing the program-specific audit, similarly not all procedures will apply to every situation. Auditors must use their professional judgment in determining the work necessary to render the required opinions.

Different guidelines will be used by single companies from those used by joint venture participants because of differing requirements for each of these types of award recipients. A single company is defined by NIST as a small, medium, or large for-profit company. A single company can receive up to $2 million of ATP funds over a period not to exceed three (3) years.

ATP funds may only be used to pay for direct costs for single company recipients. Single company recipients are responsible for funding all of their overhead or indirect costs.

Small and medium size single companies are not required to provide a cost-share of direct costs, however, they may pay a portion of the direct costs in addition to paying for all the indirect costs allocated to the award. Large companies must cost-share at least 60 percent of the yearly total project costs (direct and indirect costs). A large company is defined as any business, including any parent company plus related subsidiaries, having annual revenues in excess of $2.721 billion. (Note that the revenue requirement for defining a large company will likely change annually as reflected in the ATP Proposal Kit). As with small and medium sized companies, ATP funds can only be used to pay for direct costs. However, large companies may use their overhead/indirect costs allocated to the project to meet their cost-share requirement.

All federal programs are assigned a number in the Catalog of Federal Domestic Assistance (CFDA). The CFDA number for the Advanced Technology Program is 11.612.

Objectives: The opinions on the program financial statement and management's assertions regarding compliance will be used as a tool by program managers and grant officials in meeting their responsibilities for ensuring that federal funds are spent for their intended purposes and in accordance with laws and regulations.

Frequency: ATP recipients shall have a program-specific audit performed in accordance with the following schedule:

- For awards less than 24 months, a program-specific audit is required only at the end of the project.

- For 2- and 3-year awards, a program-specific audit is required after the first year and at the end of the project.

The program-specific audit is to cover the period elapsed since the last program-specific audit of the company or since the project began if the audit is the initial audit. The NIST Grants Officer may amend an award to extend the project period but provide no additional funding. This is known as a no-cost extension. In the case of a no-cost extension to the first year of an award, the audit should include project funds and project costs for the first year and the extension period.

Engagement Letter: A letter of engagement between the ATP recipient and the auditor conducting the program-specific audit shall specifically include a provision that the auditor is required to provide the Secretary of Commerce, the Office of Inspector General, and the U.S. General Accounting Office or their representatives access to working papers or related documents. Access to working papers includes making necessary photocopies.

Protection of Confidential Information: Certain information obtained in this engagement is exempt from disclosure under the Freedom of Information Act (FOIA). Exempt from FOIA disclosure is information on the ATP recipient's business operation and trade secrets.

Criteria: The auditor should review the cooperative agreement which stipulates all required award terms and conditions including the applicable administrative requirements and cost principles. In addition, the following documents should be available:

Department of Commerce Requirements

- Department of Commerce (DOC) Financial Assistance Standard Terms and Conditions.
- Financial Assistance Award (Form CD-450) and any amendment to the Financial Assistance Award (Form CD-451) which incorporates the approved budget, as described on Form NIST-1262, page 3.
- General Terms and Conditions - Advanced Technology Program.
- Special Award Conditions - Advanced Technology Program.
- Advanced Technology Program Proposal Preparation Kit (the kit in effect at the time the proposal was submitted). The Kit includes the 1) Advanced Technology Program (ATP) Public Law 100-418 as amended by Public Law 102-245, and 2) Advanced Technology Program (ATP) Rule, Title 15, CFR Part 295.

Administrative Requirements (As Applicable)

- 15 CFR Part 14, *"Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals and Other Nonprofit Organizations and Commercial Organizations,"* (DOC's implementation of OMB Circular A-110).

Cost Principles (As Applicable)

- Federal Acquisition Regulations (FAR) System, Part 31, "*Contract Cost Principles and Procedures."*
- Office of Management and Budget (OMB), Circular A-21, *"Cost Principles for Educational Institutions."*
- Office of Management and Budget (OMB), Circular A-122, *"Cost Principles for Nonprofit Organizations."*
- 45 CFR Part 74, Appendix E, "*Principles for Determining Costs Applicable to Research and Development Under Grants and Contracts with Hospitals."*

Chapter 2. Reporting Requirements

Report Package: The report package should include the following:

- A Schedule of Fund Sources and Project Costs including disclosure notes prepared by the ATP recipient. The schedule should include the most recently approved project budget. The budget information is found on Form NIST-1262, page 3. Chapter 3 of these guidelines provides further details on the preparation of the schedule. Appendix A provides an illustrative example.

- An opinion on the Schedule of Fund Sources and Project Costs of the ATP award. Chapter 4 of these guidelines includes a discussion of the cost principles governing the project costs. The auditor's opinion should be issued in accordance with the AICPA's Codification of Statement of Auditing Standards, Section 623, Paragraph 22, *Special Purpose Financial Presentation to Comply with Contractual Agreement or Regulatory Provisions*. Appendix B provides an illustrative example.

- An opinion on management's assertions on the entity's compliance with specified requirements applicable to the ATP program. The practitioner's opinion should be issued in accordance with the AICPA's Statement on Standards for Attestation Engagements No. 3, *Compliance Attestation,* as amended by SSAE No. 9, *Amendments to Statement on Standards for Attestation Engagements Nos. 1, 2, and 3*. The management assertions are found in Chapter 5 of these guidelines. Appendix C provides an illustrative example which includes management's assertions as part of the first paragraph of the report. It is also acceptable to refer to a separate report which includes management's assertions. This separate management report **MUST** accompany the audit report package.

- A written communication of any reportable conditions or material weaknesses which were noted in the audit of the Schedule of Fund Sources and Project Costs or during the compliance attestation engagement that could adversely affect the entity's ability to report financial data or comply with the specified compliance requirements. AICPA Statement of Auditing Standards (SAS) No. 60, *Communication of Internal Control Structure Related Matters Noted in an Audit*, requires these internal control deficiencies be communicated to management. These guidelines require the communication be in writing. A report on the Internal Controls prepared in accordance with Government Auditing Standards is not required for financial-related audits.

- A Schedule of Findings and Questioned Costs when applicable. This schedule will include all material noncompliance with provisions of laws, regulations or the cooperative agreement. It will also include all known questioned costs which are greater than $10,000 identified through the audit of the Schedule of Fund Sources and Project Costs or in the examination of the management assertions. Whenever possible, identified findings should be quantified. The reported noncompliance and questioned costs should be developed with information necessary to facilitate the audit resolution process (i.e., the size of the universe and corresponding dollar amount, size and dollar

amount of the sample, and number and corresponding dollar amount of the instances of noncompliance). Because independent auditors do not disallow costs, questioned costs are identified for possible disallowance by the Department of Commerce.

- A Corrective Action Plan when applicable. Management should describe the corrective action taken or planned in response to the findings and questioned costs identified by the auditor. The plan should also include the status of corrective actions taken on prior findings resulting from other independent audits including audits performed by the Office of Inspector General or Defense Contract Audit Agency.

Submission of Reports: The report package should be submitted within 90 days of the end of the reporting period. The ATP recipient should submit with the report package the company's most recent audited or reviewed financial statements. Two copies should be submitted to the Department of Commerce. One copy should be submitted to the NIST Grants Officer at the following address:

National Institute of Standards & Technology
Grants Office - Advanced Technology Program
Cooperative Agreement No. _____
100 Bureau Drive, Stop 3576
Building 411, Room 143
Gaithersburg, Maryland 20899-3576

The other copy should be forwarded to the Office of Inspector General at the following address:

U.S. Department of Commerce
Office of Inspector General
ATTN: ATP Program-Specific Audit Report Coordinator
401 West Peachtree Street, NW, Suite 2742
Atlanta, Georgia 30308

In the accompanying transmittal letter, please provide the name and phone number of the company's designated contact person in the event of questions about the submitted reports.

Chapter 3. The Schedule of Fund Sources and Project Costs

The Schedule of Fund Sources and Project Costs as presented in Appendix A will be prepared by the ATP recipient from the company's accounting records. The Schedule should report the latest approved budget, for the period being audited, as identified on Form NIST-1262, page 3, and the actual fund sources and project costs incurred for the reporting period. Project costs include costs allowable under the applicable cost principles subject to all limitations and exclusions set forth in the award including the award's special and general terms and conditions, and DOC's financial assistance standard terms and conditions. In addition, the recipient should review the guidance included in ATP's Proposal Preparation Kit for the allowability or valuation of a specific cost element. If the aforementioned documents are silent on the accounting for a specific item of cost, then generally accepted accounting principles should be used.

The ATP recipient should prepare adequate disclosure notes to describe the basis of the schedule's presentation and any significant accounting policies used in preparing the schedule. In addition, the notes should include a general description of the company receiving the ATP award, a general project description, basic award terms such as the length of the award, the amount of federal funding, and the recipient's required cost-share. When appropriate, disclosure notes should also include related party transactions, subsequent events, and material questioned costs.

4. The Auditor's Opinion on the Schedule of Fund Sources and Project Costs

Overview: The Schedule of Fund Sources and Project Costs is the ATP financial statement. This program financial statement should be audited under generally accepted auditing standards incorporated into Government Auditing Standards. The opinion on the Schedule of Fund Sources and Project Costs should be prepared in accordance with the AICPA's Codification of Statement of Auditing Standards, Section 623, Paragraph 22, *Special-Purpose Financial Presentations to Comply with Contractual Agreement or Regulatory Provisions.*

The Schedule of Fund Sources and Project Costs is prepared in conformance with the terms of the award and consistent with the cost principles which govern the expenditures of funds. This presentation of project income and expenditures is referred to as an other comprehensive basis of accounting. If material questioned costs are found while the auditor is forming an opinion of the ATP financial statement or during the attestation engagement, the Schedule of Fund Sources and Project Costs should remain unchanged and include the total project costs incurred, including the material questioned costs. The costs questioned should be disclosed in the accompanying notes to the ATP financial statement. With adequate note disclosure, the auditor can issue an unqualified opinion with an explanatory paragraph following the opinion, as appropriate.

Cost Principles: There are federal cost principles for each type of recipient receiving federal assistance. The cost principles applicable to the recipient are stated in the award document. Allowability of costs is determined as follows:

For-profit organizations	-	Federal Acquisition Regulations (FAR) Part 31, *"Contract Cost Principles and Procedures"*
Non-profit organizations	-	OMB Circular A-122, *"Cost Principles for Nonprofit Organizations"*
Educational organizations	-	OMB Circular A-21, *"Cost Principles for Educational Organizations"*
Hospitals	-	45 CFR Part 74, Appendix E, *"Principles for Determining Costs Applicable to Research and Development Under Grants and Contracts with Hospitals"*

ATP was created as a cost reimbursement research and development vehicle. NIST built the cost reimbursement theory into the ATP regulation and cooperative agreements by requiring compliance with applicable federal administrative requirements and cost principles. Reimbursement claims to NIST using a basis other than cost (e.g. GSA schedule, commercial price, etc.) are not allowable under the terms of ATP cooperative agreements. Single company recipients may only use actual costs incurred during the award period as the basis for any claims.

Cost Limitations: The following costs are not allowable under the ATP program regardless of whether they are allowable under the FAR or OMB cost principles:

- Profit, management fees, interest on borrowed funds, and facilities capital cost of money.
- Bid and Proposal costs, tuition costs, marketing surveys, or commercialization studies and general business planning unless they are incorporated into a federally approved indirect cost rate. However, a university participating in an ATP award as a subcontractor/subrecipient may include tuition or other forms of compensation in lieu of wages paid to university students working on ATP projects as provided in OMB Circular A-21, Section J.41.
- Direct charges for the construction of new buildings or extensive renovations of existing buildings.
- Subcontract costs, if the subcontract is to another part of the same company or to another company with identical or nearly identical ownership.

Refer to the ATP Proposal Preparation Kit for further details regarding the unallowable costs cited above.

The award terms and conditions stipulate prior approval requirements. In addition to the prior approval requirements specified in 15 CFR Part 14, the following are allowable ONLY IF prior approval is obtained from the NIST Grants Officer:

- Budget transfers among direct cost categories exceeding 10 percent of the total annual budget.
- Revisions to ownership and/or dissolution when a company is acquired by a foreign company.
- Changes in use of human and animal subjects.
- Construction costs of experimental research and development facilities provided that the equipment or facilities are essential for carrying out the proposed scientific and technical project and are approved by the NIST Grants Officer.

Direct Costs vs. Indirect Costs: Single company ATP recipients are reimbursed for allowable direct costs only. Indirect costs for single companies are unallowable for reimbursement with Federal funds and must be absorbed by the single companies. If indirect costs are not part of the cost-share computation, the indirect costs are not required to be audited. **Note**, beginning with proposals submitted on or after December 1997, large company recipients are required to cost-share at least 60 percent of the yearly total project costs (direct and indirect costs). Indirect costs incurred by a large company and allocable to the ATP award may be used to meet the company's cost-sharing requirement. If a large company recipient includes indirect cost as part of their cost-share, the indirect costs are required to be audited.

Small and medium size single companies' cost-sharing of any direct costs, and large single company cost-sharing of direct and indirect costs are defined based on the company's proposal and approved budget. The cost-sharing amount is made part of the award and must 1) meet the criteria stipulated in the administrative requirements of 15 CFR Part 14, 2) be allowable under

the applicable federal cost principles, and 3) be subject to audit.

Costs claimed as indirect costs are subject to all the same limitations and prior approval requirements as direct costs. In order to be reimbursed for indirect costs, a large company claiming indirect costs must have an indirect cost rate or proposal approved by its federal cognizant agency,. The indirect cost rate proposals provide a basis for allocating indirect costs to federal programs. They should be submitted by the company to its cognizant federal agency within 90 days of receiving an ATP award.

Indirect costs must be calculated in accordance with an approved indirect cost proposal or a negotiated indirect cost rate. Indirect cost rates are normally negotiated based on the entities' fiscal year. Regardless of any approved indirect cost rate applicable to the award, the maximum dollar amount of allocable indirect costs will not exceed the line item for indirect costs contained in the approved budget.

Audit Objectives: Determine whether the ATP award funds (federal and committed non-federal award funds) were expended only for allowable activities in conformance with provisions of the applicable cost principles, limitations or exclusions set forth in the cooperative agreement award, applicable terms and conditions incorporated in the award, (i.e., Special Award Conditions, ATP General Terms and Conditions and DOC Financial Assistance Standard Terms and Conditions).

Suggested Audit Procedures: These procedures are provided to assist the auditors in planning and performing tests of the ATP award. Auditor judgment is necessary to determine whether the suggested audit procedures are sufficient to achieve the stated audit objective. The following are the suggested audit procedures for determining the allowability of costs in accordance with the cost principles:

1. Obtain the latest approved budget (Form NIST-1262, page 3) for the project period under audit.

2. Test that the costs claimed are within the approved budget.

3. Test that the costs are actual costs incurred for the ATP award in accordance with the applicable cost principles and not budgeted or projected amounts.

4. Test that the cost conforms to any limitations or exclusions set forth in the cooperative agreement award, applicable terms and conditions incorporated in the award, i.e., Special Award Conditions, ATP General Terms and Conditions and DOC Financial Assistance Standard Terms and Conditions.

5. Test that the cost conforms with the allocability provisions of applicable cost principles.

6. Ascertain that the cost has been given consistent accounting treatment within and between accounting periods. Consistency in accounting requires that costs incurred for the same purpose, in like circumstances, be treated as either direct costs only or indirect costs only with respect to final cost objectives.

7. Test on a sample basis that the cost charged to ATP is a net cost, i.e., all applicable credits, volume or cash discounts, refunds, rental income, trade-ins, scrap sales, etc., have been subtracted.

8. Examine on a sample basis the underlying documentation, (e.g., time and attendance payroll records, time and effort records for employees charged to more than one activity, approved purchase orders, vendor invoices, canceled checks, etc.) and determine that the cost is correctly charged as to project, account, amount and period.

9. For wages, salaries and fringe benefits, test on a sample basis that the employee's total compensation is consistent with established company practices for that category of employee.

10. Test, on a sample basis, that charges for fringe benefits including sick leave, vacation leave, life and health insurance, and pension plans are supported by a plan and the allocations are based on the benefits received by different classes of employees within the organization.

11. Test, on a sample basis, that depreciation is not being claimed on assets or a portion of the assets purchased with federal funds.

Steps 12 through 14 are for companies providing indirect cost as a required cost-share.

12. Test the indirect cost pools allocable to the ATP award to ascertain that the pools include only allowable costs in accordance with applicable cost principles.

13. When DOC is the cognizant agency, test that the methodology used in allocating costs to ascertain if it produces an equitable distribution of costs.

14. If the company has a negotiated indirect cost rate, select a sample of claims for reimbursement and verify that the rates used are in accordance with the rate agreement, that rates were applied to the appropriate bases, and that amounts claimed were the product of applying the rate to the applicable base.

Chapter 5. The Attestation Engagement

Overview: The practitioner is required to obtain written assertions from management as part of the compliance attestation engagement performed in accordance with the AICPA's Statement on Standards for Attestation Engagement (SSAE) No. 3, *Compliance Attestation*, as amended by SSAE No. 9, *Amendments to Statement on Standards for Attestation Engagements Nos. 1, 2, and 3.* The written assertion may be provided to the practitioner in a representation letter or may be presented in a separate report that will accompany the practitioner's report. When a separate management report does not accompany the practitioner's report, the first paragraph of the report should also contain a list of management's assertions.

In addition to the five specific assertions that follow, management's written representations should include the general matters required by paragraph 67 of SSAE No. 3, as amended. Management's representations are an integral part of the engagement. Materiality relates to each specific management assertion.

Management Assertions, Compliance Requirements and Suggested Examination Procedures:

1. Matching or Cost-sharing

Management Assertion. *The cost-share established in the budget of the ATP award has been met. The funds claimed as cost-share are not from a subcontractor or other federal sources and were not used as matching or cost-sharing funds on other federally supported activities. The funds claimed as cost-share meet the definition provided in 15 CFR Part 14 Section 23 and conform to the limitations in 15 CFR Part 295.2(l).*

Compliance Requirement - The ATP statute and implementing regulations require that large companies receiving an award as a single company must cost-share at least 60 percent of the yearly total project costs (direct and indirect costs). Section 295.2(l) of the ATP implementing regulations has defined the term "matching funds or cost-sharing" to mean that portion of project costs not borne by the federal government. Sources of revenue to satisfy the required cost-share include cash and in-kind contributions. In-kind contributions shall be valued in accordance with 15 CFR Part 14 Section 23. ATP restricts the total value of in-kind contributions that can be used to satisfy the cost-share by requiring that such contributions not exceed 30 percent of the non-federal share of total project costs.

Subcontractors may not contribute towards the cost-share requirement. An ATP recipient cannot use funds received from other federal programs to meet the required cost-share of the ATP award. .

Suggested Examination Procedures

a. Ascertain the cost-share provided by the ATP recipient. Determine whether the recipient met the required cost-share specified by their approved budget.

b. Ascertain that the cost-share provided did not come from a subcontractor to the project or from other federal sources.

c. Inquire of management whether the costs charged to the ATP project have been used to meet cost-sharing or matching requirements of other federally supported activities.

d. If in-kind contributions are part of the cost-share, trace these contributions to the company's accounting and summary records to determine that the value of the in-kind contribution is in accordance with 15 CFR Part 14 Section 23 and does not exceed the limitations imposed by 15 CFR Part 295.2(l).

2. Property Management

Management Assertion. *Equipment acquired with the ATP funds has been accounted for in accordance with federal property management standards found in 15 CFR Part 14 Sections 30-37.*

Compliance Requirement - Title to equipment acquired using federal financial assistance vests with the recipient. The recipient agrees to use the equipment for the authorized purpose of the project as long as it is needed and will not encumber the asset. There are no requirements pertaining to equipment with a cost of less than $5,000. NIST has disposition authority as described in 15 CFR Part 14 Section 34.

Equipment records shall be maintained, a physical inventory of equipment taken at least once every two years and reconciled to the equipment records, an appropriate control system should be used to safeguard equipment, and equipment shall be adequately maintained.

While title to property and equipment vests with the recipient, the recipient has no cost basis in the assets purchased with government funds. The recipient's fixed asset system, therefore, must clearly identify that federal funds are the source of funding for the assets. The company is neither entitled to a depreciation deduction on their corporate tax return nor the R & D credit based on federal expenditures under this program.

Suggested Examination Procedures

a. Ascertain that the recipient has a fixed asset system to identify equipment purchased, including the source of funds for equipment, percentage of federal ownership, location, cost and other pertinent information.

b. Ascertain that a physical inventory is conducted at least once every two years.

c. Inquire as to the disposal of ATP funded equipment during the award period. Ascertain whether disposition instructions were requested from NIST and, if so, were they followed. If disposition instructions were not requested, did the disposition of property meet the requirements of 15 CFR Part 14, Section 34.

3. Procurement and Suspension and Debarment

Management Assertion. *Federal procurement standards described in 15 CFR Part 14 Sections 40-48 have been incorporated into the purchasing policies and adhered to for ATP award expenditures. Contracts and subawards have not been made to any organizations or its principals listed in the "List of Parties Excluded From Federal Procurement or Nonprocurement Programs," issued by General Service Administration.*

Compliance Requirement - The purpose of federal procurement requirements is to provide to the maximum extent practical open and free competition. Recipients will use their own written procurement procedures provided these procedures conform to federal law and regulations identified in 15 CFR Part 14 Sections 40-48.

Recipients are prohibited from contracting with or making subawards under covered transactions to parties that are suspended or debarred or whose principals are suspended or debarred. Covered transactions include procurement contracts for goods or services equal to or in excess of $100,000 and all nonprocurement transactions (e.g., subawards to subcontractors/ subrecipients). Requirements for suspension and debarment are contained in 15 CFR Part 26.

Suggested Examination Procedures

a. Review the recipient's written procurement policies. Verify that the policies comply with applicable federal requirements. If the previous program-specific audit did not disclosed any problems with the recipient's procurement policies, then examine only changes to those policies since the previous audit.

b. Test a representative sample of procurement transactions. Evaluate whether the contract files maintain sufficient detail to document the significant history of the procurement, including the rationale for method of procurement, selection of contract type, contractor selection or rejection, and the basis of contract price.

c. Inquire about the rationale for any procurement with limited competition and ascertain if the limitation was justified.

5. Subcontractors/Subrecipients

Management Assertion. *The agreements entered into with subcontractors/subrecipients, as defined below, require that the subcontractors/subrecipients adhere to federal laws and regulations as specified by the ATP award and sanctions are specified for the subcontractor's/subrecipient's noncompliance.*

Compliance Requirement - The ATP recipient is ultimately responsible to NIST for funds passed to a subcontractor/subrecipient. For the purpose of these guidelines, a subcontractor/ subrecipient is defined as an organization which receives a portion of the financial assistance from the ATP recipient and assists the recipient in meeting the project's goals. This definition does not include the procurement of goods and services.

The ATP recipient should include in each agreement with its subcontractors/subrecipient the requirement for adherence to the federal laws and regulations as required by NIST's Advanced Technology Program. Subcontractors/subrecipients are required to have an audit performed in accordance with the ATP Program-Specific Audit Guidelines if the subcontractor/subrecipient has received more than $300,000 under an ATP award.

Suggested Examination Procedures

a. Test the agreements to determine that the ATP recipient required adherence to federal laws, regulations and provisions of the cooperative agreement.

b. Ascertain whether the ATP recipient received the subcontractor's/subrecipient's audit reports and the ATP recipient required the subcontractor/subrecipient to take timely corrective actions on deficiencies identified in the audits.

c. When audit reports are not required from subcontractors/subrecipients, review the ATP recipient's monitoring procedures to ascertain if the subcontractor/ subrecipient used federal funds for authorized purposes and what action was taken in response to findings.

d. Test the agreements to determine that there are sanctions in place for noncompliance with laws and regulations as specified by the ATP award and if noncompliance was found that the sanctions were enforced.

Independent Auditor's Report on The Schedule of Fund Sources and Project Costs for NIST ATP Cooperative Agreement Number 70NANB#H#### For the Period of xx/xx/xx to xx/xx/xx

Independent Auditor's Report

[Addressee]

We have audited the accompanying Schedule of Fund Sources and Project Costs of [single company] as of [date of this report]. This Schedule of Fund Sources and Project Costs is the responsibility of [single company's] management. Our responsibility is to express an opinion on the Schedule of Fund Sources and Project Costs based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and Government Auditing Standards issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Schedule of Fund Sources and Project Costs are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the Schedule of Fund Sources and Project Costs. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the Schedule of Fund Sources and Project Costs. We believe that our audit provides a reasonable basis for our opinion.

The accompanying Schedule of Fund Sources and Project Costs was prepared for the purpose of complying with the award requirements of the ATP cooperative agreement number 70NANB#H#### entered into by [single company] and the U.S. Department of Commerce as described in Note X. This Schedule was prepared in conformance with the award requirements which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the Schedule of Fund Sources and Project Costs referred to above presents fairly, in all material respects,[2] the source of funds and project costs of [single company] for the period [year end (date)/period from (date) to (date)] in conformity with the basis of accounting described in Note X.

This report is intended solely for the information and use of the audit committee, management and the U.S. Department of Commerce and should not be used for any other purpose.

[Signature]
[Date]

---

[2] The auditor should modify the standard report and issue a qualified, adverse or disclaimer of opinion, as appropriate, in the following circumstances:
- The ATP recipient does not adjust the Schedule of Fund Sources and Project Cost or disclose the material questioned costs in the accompanying notes.
- In forming an opinion on the Schedule of Fund Sources and Project Costs the extent of other potentially unallowable costs in transactions not tested should be considered.

Opinion on Management's Assertions on Compliance with Specified Requirements Applicable to the NIST Advanced Technology Program Cooperative Agreement Number 70NANB#H####

Independent Accountant's Report

[Addressee]

We have examined management's assertions, that [single company] complied with the following specified requirements, relative to the Company's Schedule of Fund Sources & Project Costs for the NIST ATP Cooperative Agreement No. 70NANB#H#### for the period from [date] to [date] (list compliance requirements as shown below or attach management assertions in accompanying management report).

- *The cost-share established by the budget in the ATP award has been met. The funds claimed as cost-share are not from a subcontractor or other federal sources and were not used as matching or cost-sharing funds on other federally supported activities. The funds claimed as cost-share meet the definition provided in 15 CFR Part 14, Section 23 and conform to the limitations in 15 CFR Part 295.2(l).*

- *Equipment acquired with the ATP funds has been accounted for in accordance with federal property management standards found in 15 CFR Part 14 Sections 30-37.*

- *Federal procurement standards described in 15 CFR Part 14 Sections 40-48 have been incorporated into the purchasing policies and adhered to for ATP award expenditures. Contracts and subawards have not been made to any organizations or its principals listed in the "List of Parties Excluded From Federal Procurement or Nonprocurement Programs," issued by General Service Administration.*

- *The amounts in the quarterly financial status reports and the requests for advance or reimbursement agree with the underlying accounting records and summary records.*

- *The agreements entered into with subcontractors/subrecipients, as defined below, require that the subcontractors/subrecipients adhere to federal laws and regulations as specified by the ATP award and sanctions are specified for the subcontractor's/subrecipient's noncompliance.*

Management is responsible for [single company's] compliance with those requirements. Our responsibility is to express an opinion on management's assertions about [single company's] compliance based on our examination.

Our examination was conducted in accordance with Government Auditing Standards, issued by the Comptroller General of the United States; attestation standards established by the American Institute of Certified Public Accountants; and the NIST Program-Specific Audit Guidelines for Advanced Technology Program (ATP) Cooperative Agreements with Single Companies, issued by the U.S. Department of Commerce, Office of Inspector General, dated May 1999 and, accordingly, included examining, on a test basis, evidence about [single company's] compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on [single company's] compliance with specified requirements.

FORM CD-451 (REV 10/98) U.S. DEPARTMENT OF COMMERCE AMENDMENT TO FINANCIAL ASSISTANCE AWARD	☐ GRANT X COOPERATIVE AGREEMENT ACCOUNTING CODE cc: 2/4721348 Obj. Class: 4110 Req. No. 2/472-2106 $600,000.00 AWARD NUMBER 70NANB1H3050
RECIPIENT NAME Computer Aided Surgery, Inc.	AMENDMENT NUMBER #03
STREET ADDRESS 300 East 33rd Street, Suite 4N	EFFECTIVE DATE JUL 16 2002
CITY, STATE, ZIP CODE New York, NY 10016	EXTEND WORK COMPLETION TO

CFDA NO. AND PROJECT TITLE: 11.612, Advanced Technology Program (ATP), Proposal No. 00-00-4607
Project Title: Anatomic Computer Modeling for Precise and Accurate Therapies

COSTS ARE REVISED AS FOLLOWS:	PREVIOUS ESTIMATED COST	ADD	DEDUCT	TOTAL ESTIMATED COST
FEDERAL SHARE OF COST	$800,000.00	$600,000.00	$0	$1,400,000.00
RECIPIENT SHARE OF COST	$ 36,500.00	$30,500.00	$0	$67,000.00
TOTAL ESTIMATED COST	$836,500.00	$630,500.00	$0	$1,467,000.00

REASON(S) FOR AMENDMENT
This cooperative agreement is being amended to (1) obligate and authorize funding for the second year (10/01/02 – 09/30/03) and (2) indicate on the attached, those terms and conditions affected by this action.

This Amendment approved by the Grants Officer is issued in triplicate and constitutes an obligation of Federal funding. By signing the three documents, the Recipient agrees to comply with the Amendment provisions checked below and attached, as well as previous provisions incorporated into the Award. Upon acceptance by the Recipient, two signed Amendment documents shall be returned to the Grants Officer and the third document shall be retained by the Recipient. If not signed and returned without modification by the Recipient within 30 days of receipt, the Grants Officer may unilaterally terminate this Amendment.

SPECIAL AWARD CONDITIONS
ADVANCED TECHNOLOGY PROGRAM – SINGLE RECIPIENT
COMPUTER AIDED SURGERY, INC.
COOPERATIVE AGREEMENT NO. 70NANB1H3050
AMENDMENT #03

THE FOLLOWING SPECIAL AWARD CONDITIONS ARE AMENDED:

6. FUNDING LIMITATIONS

The scope of work and budget incorporated into this award covers a three-year period (referred to as the "project period") for a total amount of $2,000,000.00 in Federal funds. Pursuant to this amendment, Federal Funds in the amount of $600,000.00 are hereby made available for the budget period of 10/01/02 through 09/30/03, plus the carryover of unexpended funds from the previous year. No funds authorized under this amendment shall be allowable for expenditures prior to 10/01/02. All funds must be expended in accordance with the schedule of expenditures outlined in the approved budget dated 12/27/01. No legal liability exists or will result on the part of the Federal Government for payment of any portion of the remaining funds, which have not been made available under the award. If additional funds are not made available, any expenses incurred related to closeout activities must be funded from the amount already made available under this award. The notice of availability or non-availability of additional funding for the third year will be made in writing by the Grants Officer. Only the Grants Officer is authorized to obligate funds. No other verbal or written notice should be relied upon by the Recipient. The Grants Officer's written notification shall be made prior to the expiration of each year's activities.

FUTURE FUNDING:

YEAR	FUNDS	BUDGET PERIOD
3	$600,000.00	(10/01/03 - 09/30/04)

7. COST SHARE

For the first year period, the cost sharing ratio (direct costs only) applicable to this award is the Recipient's contribution of 4.57% ($30,500) and NIST's contribution of 95.43% ($600,000).

ALL PRIOR TERMS AND CONDITIONS REMAIN THE SAME.

7 Revised 12/20/01

ESTIMATED MULTI-YEAR BUDGET - SINGLE COMPANY

	YEAR ONE	YEAR TWO	YEAR THREE	TOTAL

EXHIBIT 14

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in **Gate 2**. The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided:

Subject: budget020403
Importance: High

Dan --- All in all, I thought you did very well in the review. Here is the budget and the draft reply to NIST. As it stands, they denied about $30,000 of expenses you claimed in year 1. As I understand it, you may rebudget this into years 2 and 3. Because many of the items they denied recurred in years 2 and 3, the total drops. Yet, some categories increased due to mandated shifts.

1) All related and supporting files are in dailies/pmr under today, 020403.
2) Attached you should find the three years of budget detail and the summary, 1262s, plus some supporting spreadsheets.
3) Although Matt is not finished with his section, the numbers shouldn't change. He said he alerted you and there is a spot to differentiate year of payment for equipment purchased year 1.

I recommend you copy this directly to Joan because you and she have so little time to finish this off.

Peter

Justification of budget: Year 1 and Year 2 revision and year 3 budget.

CASI is a startup with ambitious goals and limited resources. Presently, an ATP/NIST grant is the sole funding source. During the first year, a number of changes in the spending of ATP money became necessary as a result of unanticipated delay in obtaining matching funds from New York State and business decisions made by the PI to centralize the work effort to the CASI premises.

The purpose of this document is to specify and justify changes in the original budget in light of current direction. The narrative will show that the changes were not only useful, but that they strengthen CASI's position to further its objectives in light of present circumstances. CASI has a budget revision that has been pending since August 2002; this revision is effectively that pending revision. No action has been taken at ATP concerning that budget. Technical and arithmetic errors discovered in the 08/01 budgets were corrected in December 2001, but the revised 08/01 budget has not yet been approved. It is important that we coax the budget approval process along so that we can manage our project without audit exceptions and make the high technology and his risk spending decisions required to make this project a success. The very nature of high risk and high cost technology research means that budgeting is a fine art and predicting spending requirements more than a few months in advance is fraught with perils and problems. The ATP program has managed to bridge the gap between high-risk high reward basic research and the government spending regulations that require spending approval and strict budget/spending strictures through a mixture of wisdom, keen insight into the technicalities of the Government Spending Principles and the needs of advanced

The project fidelity is intact, the milestones are being met; new and exciting, unexpected and fundamental research findings are being developed. However, there are two main changes in the budget, which resulted from the above-mentioned change in project execution strategy.

The first is a request for a potential one time only hardship allowance of POSSIBLY as much as $51,000 in indirect costs that the PI has been unable to pay out of pocket in the fist year. The actual amount depends on the auditor's opinion of some marginal cost items that the auditors will need letter decisions from ATP on.

The second is a transfer of year 1 equipment purchase to year 2.

The PI elected to reduce off site contractors and instead work on site on the SGI computers purchased for this purpose. Programming is now conducted in a 'programming bullpen' so that each programmer can ask any other developer questions and get immediate help. A sense of team spirit and unity of purpose requires everyone work together in the same place under the constant care and support of the PI. Taking on students and interns, some of who are doing wonderful work, requires close supervision not possible in a formal office environment. Further, work is progressing almost around the clock, with people working on site almost 16 hours a day. Improving working conditions is also a priority so that the ambient noise and temperature are kept tolerable and healthy. Development by contractors on differing computers added unnecessary complexity and delay, and reduced the speed and efficiency of the developed code.

Allowance of $51,000 "indirect costs". CASI accepted this grant anticipating, as did ATP, that some sort of state matching funds would be available to help with costs not readily assumed under the grant. However, the fallout from 9/11 and the economic downturn in NYC and NYS, led to difficulty in securing the needed moneys. Accordingly, the PI accepted a very large salary,

intending to re-invest after-tax dollars in the project. Indeed, that is what happened. However, the failure to secure additional money and the lack of strong accounting guidance led to a deficit in indirect costs for which there existed no other source of funds. The PI does not have another income.

Our auditor is now auditing a budget submitted in August 2001 (i.e. a full year earlier than the 08/02 revision), when the proposal for this project was being formulated. To date, the auditor has tagged $51,000 in charges to the grant as "unallowable". The exact figures from that audit are a moving target. This is because as we justify costs and explain individual items, this total disallowed sum is being reduced. We are facing a years worth of bad business decisions from the previous business manager and poor accounting from the first CASI accountant. We do not know exactly what the final audited actual cost figures will be. It is hard to submit a budget with confidence. Many of the items disallowed in the audit should, in our understanding of previous policy, have been allowed. As explained below, we are now requesting a potential allowance of some these items so we can plan for the future.

CASI engaged a second CPA with many years NIST ATP program management to get a firmer perspective on these matters. We were led to believe by our consultant that a number of costs could be broken out and accounted for as a direct charge if a clear direct cost basis could be established. For example, we found that power bills and telecommunications increased many-fold over pre-project levels, clearly as a result of project utilization. Although we did our best to follow those guidelines, our auditor has chosen to these as "indirect costs" out of hand. The result may appear in the year 1 audit as much as 51 thousand dollars in disallowed costs.

To summarize, despite CASI's serious efforts to manage its budget in accordance with NIST requirements, and following the counsel of ATP-savvy experts hired by CASI, the PI may have to refund $51,000 as a charge back to year 2. Fairness concerns aside, we believe that defeats the purpose of the NIST grant to CASI.

It should be noted that CASI, while situated in a dwelling, fully occupies that dwelling. Aside from this grant, there are no other projects going on at CASI, and at present this grant is the sole source of funding. The residential apartment in which CASI is located is fully in use for the business. The auditor has expressed similar thoughts. Therefore, it is intuitively questionable whether there is any true "sharing" of the cost basis.

Based on the above, CASI requests that the $51,000 excluded in the audit be allowed for the purpose of offsetting costs that in CASI's situation are clearly direct costs. In the proposed year 1 revision accompanying this, those charges are shared between "materials" and "other".

Salaries: Dr. Karron billed unevenly, on an hourly basis, for 100% of his time, as was discussed with BJ and Jayne and documented in a memo. The auditor requires a written authorization so as not to except this practice.

Fringe (actual for year 1) was decreased by $24,700 due to the hiring of personnel on work schedules who did not accumulate enough hours for full benefits.

Travel: The decrease of $9,000 in travel budget was used to increase supplies.

Other: Other category is increased to $57,500 to absorb new direct costs.

Materials and supplies: This category is increased to $35,000 due to increased supply needs because of the larger amount of onsite work.

Decrease in consultant fees: There is a decrease in consultancy fees from 250,000 approved to $101,500 actually used due to the larger amount of onsite work.

Increase in equipment purchases: There is a partially offsetting increase in equipment purchased from 110,000 to 223,300. In addition, equipment was purchased in year 1 that was not paid for with year 1 funds. These equipment purchases total 88,000. It is requested that these purchases be made from the year 2 budget for reasons explained under "Transfer of Year 1 equipment charges to year 2."below.

Conversion of consultant fees to equipment: The task breakdown in the approved year 1 budget reflects an approximately even split between salaries and equipment. However, in the original approved budget, request was made for more consultancy fees. It was felt that programming could be outsourced and done at home on pc. Early on in the project, it was found that work was not progressing when outsourced this way. It was found that the PC environment could not handle the workload of heavy image processing. In addition, one contractor was working at home on a Sun Computer Systems environment and was unable to get his code to run on the machines in CASI. It was therefore decided to do all development in the actual CASI shop. In order to get more control over the project, it was further decided to have all personnel work on site. Accordingly, the increase in equipment basis reflects a decrease in the amount spent on consultancy fees. It was decided to get better value from equipment purchases than from the one-time services of outsourced work. By means of this change, Dr. Karron has in fact strengthened the business plans considerably. As the work in years 2 and 3 unfolds, availability of these high-powered computers will make the services more widely available. This consolidation increases accessibility of CASI services to potential clients. When appropriate IRB approvals are available, this will make it even more attractive for physicians in the local community to use the service for their data.

Transfer of Year 1 equipment charges to year 2.The amount of $88,000 is requested to be transferred from year 1 to year 2 of the grant. Year 1 equipment spending exceeded the original budgeted amount for the reasons described above. SGI provided one machine on permanent loan. A second graphics super workstation was ordered and delivered in January but not billed until late September. When we asked them whether this machine was part of their support of CASI's project, they gave indirect answers. An invoice was requested repeatedly by CASI. SGI sent a statement, at our request acting on an ATP suggestion, showing no balance due. It looked like this machine was a contribution from SGI to CASI for the NIST project, and Dr. Karron had several conversations with SGI employees on this topic. Then, unexpectedly, SGI back billed CASI $35,000 without the benefit of discounts they applied to a third machine purchased subsequently. Having already adopted a policy that all programming must be done on site, CASI found it needed the machine. At present, therefore, CASI feels that the most prudent course is to renegotiate the bill and pay it from year 2 funds. After receiving evidence that the first bill was not going to b e rendered, CASI decided to use then available equipment funds to buy a third machine, at a 60% discount. This machine was a low-end superworkstation with two graphics heads permitting two people to simultaneously work on the same machine. This machine was found to be highly valuable to our work for this reason. These items, and additional $14,000 to Silicon City needed to replace a heat related RAID failure to provide comprehensive, high density backup of all our computer systems, and the balance in miscellaneous technology glue are necessary expenses in use and vital to the project. All the bills were either unexpected or came

due right at the juncture of years 1 and There remained no money in year 1 budget. It is therefore requested to transfer the amount for these items to the year 2 budget.

Reduction in investigator matching funds to the grant and increase in costs absorbed:
We propose budget changes to reflect the fact that unexpected personal taxes are reducing the available funds the PI can use to match ATP supplied funds. Currently, the only available source of matching funds is from the PI's salary, which is taxed in the approximately 50% tax bracket. Instead of the anticipated 175 + fringes K the PI considered abundant for co-funding the project, the PI now nets approximately 85K, which is in midtown not a even considered a middle class income. With a co-funding contribution of 36,500 that leaves about 49K for living expenses and for CASI overhead funding. The PI has had to borrow 30K to help fund the first year and still was unable to make the full contribution. There exists the real possibility the PI will run out of salary in project year 2 to make the year 2 co-funding requirement and repay the first year loan. This was unanticipated during the original budget drafted last year. There has been serious controversy about what is a direct and chargeable cost element and what is not. The PI is paying a significant number of overhead and direct costs; the urgency of the need obtaining matching funds has not been lost. This is going to be an important uncompensated task of Dr. Ross. This was a major factor in Mr. Gurfein's abrupt departure at the end of year one.

Year 3 budget: Year 3 revisions reflect changes in years 1 and 2. Year 3 salaries reflect small cost increases and an increase in project involvement by Mr. Rothman. $15,000 travel is requested mainly for the dissemination of findings and publicizing the availability of the techniques developed under the grant. A significant request for equipment ($65,000) is included because of the heavy reliance of the project on high end computing and the consequent need to ensure availability of adequate computing power to process and display data. A slot is requested for "miscellaneous programmers" to assist with front-end development and refinement. We are really looking for a salaried person, but we do not yet have continuation funding, and we prefer to bring new people in as consultants to see how they work with the group. We have also had excellent experience with Dr. Karron's students hired on a semester-to-semester basis. Overall, the year 3 budget is a natural extension of the year 2 budget leading to the wind-up of the project.

CASI EMPLOYEE HANDBOOK

A. Introduction and Intent of Plan

This Employee Handbook is designed to acquaint you with the Company and i policies and procedures. It provides information of general interest to both nev employees and highlights the Company's rules, regulations, and benefits. Although it is not all-inclusive, it is intended as a guide to assist you during your employment.

This handbook contains a thorough review of the Company's current policies, procedures, and benefits, all of which will reviewed periodically and may be changed at any time by the Company. As changes occur, you will be provided with the appropriate revisions or additions. Please make an effort to keep your copy up-to-date so that it will continue to be useful to you. The Plan has been in effect since July of 2001 and this version incorporated all previous versions by reference and has an effective date of June 1, 2003.

This handbook should not be construed as, or be considered evidence of, a contract or a guarantee of any kind. The Company may simply choose not to follow a provision in the Handbook in a particular case. Furthermore, this Handbook does not guarantee your employment for any period of time. Unless an employee has negotiated with and signed an agreement with the Company for a contract of employment, your employment is entirely EMPLOYMENT AT WILL

Employment at will means that either you or the Company can terminate our employment relationship at any time, without cause and without notice. It also means that our employment relationship can be terminated by either party for good reason, bad reason, or no reason at all, except as limited by laws which this handbook cannot alter.

You are urged to read the contents carefully and maintain the Handbook for future reference. In addition, you are encouraged to discuss any questions you may have with your immediate supervisor or with Personnel.

B. History

CASI is a Limited Liability Company (LLC) formed from the merger/absorption of its predecessor corporation Computer Aided Surgery, Inc. Computer Aided Surgery, Inc. was formed from a loose association of surgeons and scientists derived from New York University Medical Center and New York University Medical School, as well as colleagues from St. Louis University Medical Center in 1995 with funding from DARPA. It has consisted mainly of university faculty and students, and was closely held by Dr. Karron and his family. As the company grew, its ability to perform groundbreaking medical research depended on its faculty and employees.

As such, CASI has maintained a policy of compensating and paying for the health and well being of its senior employees far beyond legal minimum requirements. Employment at CASI features full medical benefits for senior employees. Catastrophic Medical exposure

has always been minimized because most of the employees of CASI have traditionally maintained health insurance with their primary employer and coordination of benefits has kept benefits plan costs far below the normal rates for comparative companies. This is done by using a high deductible medical benefits insurance plan offered by Oxford Health Plans to cover all costs above the 1000 deductible (which covers catastrophic illness).

The intent of the plan is encourage employees to become vested in the benefits package, and to enable our key employees to grow both professionally by paying for the job and task related training at a high level as well as physical well being so important to the high stress levels of this kind of work.

Finally a new feature is planned for implementation to include executive compensation and retirement plans as well as the formalization of the pre-existing CASI health benefits plan being implemented this year 2003.

C. EQUAL EMPLOYMENT OPPORTUNITY

The Company supports and is committed to equal employment opportunity for all personnel. The Company does not discriminate against applicants or employees because of race, color, creed, national origin, religion, sexual orientation, marital status, age, mental or physical handicap, disability, or veteran status.

D. SEXUAL HARASSMENT

It is the Company's policy that all employees should be able to enjoy a work atmosphere free from sexual harassment. We will not condone such conduct, whether committed by a supervisor, a co-worker, or any other person at the Company. Nor will we permit it to affect any employment decision.

The United States Equal Employment Opportunity Act Commission has declared harassment on the basis of sex to be a violation Title VII of the Civil Rights Act of 1964, and has published Guidelines on sexual harassment in the workplace. State law and the Guidelines state that unwelcome sexual advances or other verbal or physical conduct of a sexual nature are unlawful. Employee conduct or the display of sexually orientated materials could have the effect of interfering with work performance and creating an intimidating, hostile, or offensive working environment and will not be tolerated. You cannot be asked to submit to such conduct as a basis for any employment decision, or as a condition of employment.

Charges of sexual harassment will be thoroughly investigated by the Equal Employment Opportunity Officer, and a report will be made to the employee concerning the results of that investigation. If it is determined that a sexual harassment has occurred, appropriate remedies for the complainer and disciplinary action against the harasser, including suspension, demotion, or discharge, will follow.

The Company understands that these matters can be extremely sensitive and will do whatever we reasonably can do to keep employee complaints and all communication, such as interviews and statements, in strict confidence. We will not tolerate retaliation against any employee who, in good faith, complains of sexual harassment or who, in good faith, provides information in connection with any such complaint.

If you have questions about this policy against sexual harassment or the procedure to be followed in lodging a complaint, contact the Equal Employment Opportunity Officer. The name of the person who currently holds the position of Equal Employment Opportunity Officer is posted on the Employee bulletin board.

E. Personnel Definitions

These are terms used throughout this document and define company policy in these employee classes.

1 **Part Time Employee**
A part time employee is an employee who works twenty (20) hours per week or less.

2 **Full Time Employee**
A full time employee is an employee who works strictly more than twenty (20)hours per week.

3 **Junior Employee**
A Junior Employee is a full time employee who has worked less than three (3) years for CASI

4 **Senior Employee**
A senior Employee is a full time employee who has worked 2 years or more for CASI

5 **CASI Workday**
The nominal CASI workday is from 9am through 5pm, Monday through Friday, exclusive of holidays and weekends.

6 **Casi Workday Length**
CASI workdays are 8 hours in length

7 **CASI Flextime**
CASI has a flexible working schedule, employees are not required to report to work at a fixed time, nor are required to leave work at a fixed time. However, in the weekly aggregate, full time employees are expected to work 20 hours or more hours on billable activities for recording.

F. Orientation

1. Probationary Period

All new Employees must complete an orientation/probationary period of six months. During such time, the Company may complete reference and background checks. During this first three months of the probationary period, employees are not entitled to any Company benefits. Successful completion of the three months of probation will entitle a full time employee to the Company's medical/accident insurance benefits. Successful

completion of the probationary period does not guarantee continued employment. After the probationary period, employment remains at will.

2. Probation evaluation

At the conclusion of the probation period, Management will make an oral report to the employee of its findings on the suitability of the employee. This report can be written, if requested by either party.

3. Probation Evaluation Criteria

Technical Ability to accomplish hard tasks assigned
Willingness to work harmoniously with others.
Ability to focus on assignments
Ability to meet deadlines
Creativity
Ability to balance conflicting priority
Makes a good appearance to customers and clients.

F. Vacations

1 Part Time (PT) employees will not be eligible for paid vacation days.
2 Full Time (FT) employees will receive paid vacation coverage in the following schedule (check with IRA)

CASI Vacation Policy

The number of days eligible for vacation depends on the years of CASI employment according to the following schedule:

Earned Vacation Days

1	1	
2	10	
3	15	
4	8	20

Advanced Scheduling of Vacations Required

1 Employees are required to inform management of their vacation plans at least two weeks prior to the actual taking of vacation.
2 Unless there is a pressing business need employees may schedule their vacation at their discretion with management approval.
3 All vacation days not taken in the calendar year will be forfeited. Vacation days may not be carried forward.

G. CASI Sabbatical Policy

Employees may apply for a sabbatical period up to 12 months. This shall be granted or denied, done solely at the discretion of the management.

H. CASI Holidays

The following National Holidays are fixed.

New Years Day
Presidents Day
Memorial Day
4th of July
Labor Day
Thanksgiving Day
Christmas Day

I. **Personal Day Policy: Unified Sick, Vacation days are personal days.**
After a new employee emerges from their probation period, and for an additional 30 days after that, all employees earn unified sick and vacation days at the rate of 3 days for every month worked for a maximum of 20 days per year.

Vacation days

1 Employees can use their earned personal days any way they wish to.
2 Examples of personal days would include Jewish holidays, Catholic holidays, birthdays, etc.
3 Employees accumulate two days for every month the worked to maximum of twenty days.
4 New Employees start to accumulate day after completing their probation period, as defined previously, and an additional 30 days for the personal days to begin.
5 CASI Employees will receive 12 paid Holidays per calendar year.

J. **Sick Days**
Sick days are a type of personal day.
Junior Employees can take up to 5 sick days per year.
However, after five consecutive days of absence an employee must contact a physician for a medical release to return to work.
Senior Employees may take up to 10 sick days, however all days in excess of 5 dates are counted against accrued vacation days.

Payment for Sick Days

28 CASI employees will be paid for sick days.

Dismissal for excessive sick days.
Excessive sick (>5) sick days without medical support are grounds for dismissal.

K. **Severance Policy**
Termination by conveyance
CASI may terminate employees at any time, at will, at its connivance.
CASI will attempt to give 30 days notice for termination. In the situation where termination notice is not given, employees will receive two weeks severance payments, commencing 4 weeks after termination and return of CASI property, books, paper, computer materials, and resign non-disclosure and secrecy agreements.
Termination for cause
CASI employees who are terminate for cause

Causes of termination include, but are not limited to:

Malfeasance
Incompetence

Excessive non sick absence
Failure to perform job functions, poor job performance (fines, penalties, or other problem costs associated with poor job performance)
Other job related problems.

L. **Termination procedure**

Termination will be by verbal notification followed by certified letter and e-mail.
Terminated for cause employees will not receive any severance benefit and forfeit their vacation days and medical benefits.
Termination notification will explain in full detail the reasons for the termination and the employee's options to appeal, and COBRA options.
They will not be eligible for unemployment, and employees who file for unemployment will be challenged by CASI shall they receive unemployment funding.

M. **Employee performance appraisal and salary program**

During the course of your employment with the Company, your job performance will be reviewed at least annually. Salary increases are based on merit and are the discretion of the management of the Company.
Should you be promoted to a new position within your department, your salary review date will be changed in order to relate to the date of the promotion. Neither a lateral transfer to a new position in the same pay grade nor a transfer to a lower pay grade changes your salary review date.
The purpose of a performance appraisal is to mutually assess your performance and to agree on steps to be taken to improve those areas that require further development. The clements of your job performance that will be evaluated are your quality and quantity of work, job knowledge and application, teamwork, attitude, accomplishments, developmental needs, attendance, and punctuality, and possibly other factors.
Each job has a salary range based on the relative value of the job of the Company and competitive wage rates in the marketplace. Other compensation including but not limited in form to Executive Compensation, and liberal health and welfare benefits shall be considered compensation for purposes of this Company's policy. The salary range is used to determine your starting rate, pay increases are based on your qualifications and job performance. Aside from merit increases, the Company conducts salary surveys to remain competitive, and may adjust salary ranges accordingly.

N. **Performance Improvement**

It is in the best interest of both the Company and the employee to facilitate practices that enhance the employee's ability to perform the required tasks. In our company, managers need to take action to ensure that each employee understands what is expected and what steps need to be taken to improve performance. The following performance improvement measures are goals that will be weighed against business considerations and time available:
1. Development of a job description: Each manager should develop a description of the tasks, skills required, and responsibilities for the job. Job responsibilities are dynamic

and can change based on the mix of people in a department. Accordingly, any such job description should be developed or refined and discussed with the employee as soon as possible with the employee after the employee's start date and whenever job titles or responsibilities change significantly.

2. A performance review is required to be conducted annually, but managers should consider the benefits of discussing an employee's progress and charting a course for the future more often. A performance review is a unique opportunity to discuss strengths and weaknesses and establish criteria for improving productivity. Performance reviews should occur regularly and future goals should be laid out with measurable milestones wherever possible.

O. Conditions of Employment Respecting Nondisclosure and Non-competitiveness

This Company has expanded great effort and incurred major expenses in developing and enhancing our products and services, and expects to continue to do so.
Should competitors gain access to the results of our efforts, they could be in a position to compete unfairly with the Company and thereby limit and endanger the success and future growth of the Company and its employees.
Such information as proprietary data bases; techniques for finding, analyzing, and distributing data or information; proprietary computer system components, including hardware, software, firmware, models, languages, algorithms, and documentation; business methods and practices, client lists; confidential, proprietary, or trade-secret information, and Company operations, personnel, products and services are property of the Company and are considered to be particularly vulnerable to this kind of disclosure.

P. Discipline and Termination of Employment

Because of the high caliber of our employees, we expect behavior in accordance with accepted business standards. Actually, most written rules only state in print what we know and follow based on our common sense and good judgment. Nevertheless, if a problem arises, your supervisor will evaluate the situation, and, if necessary, issue appropriate discipline, up to and including discharge, in light of all circumstances.
The Company is committed to a policy of progressive discipline. Although the Company may skip or repeat steps at its discretion, in most situations employees will be disciplined in accordance with the following processes in the order presented:

1. Counseling: The supervisor will discuss the problem with the employee, suggest ways to correct the problem, establish a reasonable time frame within which the employee must show improvement, and tell the employee that he or she will be subject to discipline and/or discharge if he or she does not improve within the designated period.
2. Written Warning: The supervisor will give the employee a written warning outlining the deficiencies and specific steps for improvement, establishing a reasonable time frame within which the employee must show improvement, and advising the employee that if he or she does not improve within the designated period, he or she will be discharged. The employee will be given an opportunity to discuss the written warning and comment about the warning in writing.

3. Termination: In cases where the disciplinary measures fail, or where a serious violation of Company policy, code of conduct, or gross negligence occurs, an employee may be terminated without prior warning. The decision to terminate will be made based on the recommendation of the supervisor and will be reviewed by the Chief Operations officer. Terminated employees will be paid up to and including the date of termination. Checks will be mailed to the employee's last known address. All monies owed to the Company must be repaid and property of the Company must be accounted for and returned prior to release of the final paycheck.

It is understood at the time you agree to be employed by the Company, that either you or the Company have the right to terminate your employment relationship at will, with or without cause and with or without notice. When you terminate your employment relationship with the company through a written or oral resignation, you are requested to give minimum of four weeks' prior notice. You will be entitled to unused vacation pay, if you comply with this notice requirement and with the conditions for payout of unused vacation upon termination in accordance with applicable laws and Company policy.
If your position is eliminated, the Company will make every possible effort to provide a similar notice period.
Vacation time will not be considered as a valid part of your notice period. Once you have submitted your resignation from the Company, unused sick pay will be authorized only if substantiated by a doctor's statement verifying your inability to work.

Q. Employee Complaint Procedure

In any work environment, problems or differences of opinion are bound to occur. In addition, dissatisfaction may arise because an employee fees that he or she has not been treated fairly or because a mistake has been made in the administration of a policy. Whatever the problem, an employee may request that the Company review the matter.

R. Absences and Lateness

Attendance and punctuality are very important to the efficient operation of the Company. While employed by the company, you must make every effort to meet your commitment to work the scheduled hours to which you have agreed. Good attendance and punctuality may contribute to a higher performance rating on your performance appraisals, to selection for promotional opportunities, and to consideration for merit pay increases.
In the even that you are unable to report to work at your regularly scheduled time because of illness or for any other unavoidable reason, you, personally, must notify your immediate supervisor as soon as possible, but not later than two hours prior to your normal staring time. Home telephone numbers of the management staff are supplied to each employee. It is your responsibility to reach your supervisor, and messages left on an answering machine or with other employees are not sufficient notification. If proper notification is given, work schedules can be altered to make up for your absence, and requests for information that require your attention can be redirected to the employees capable of responding professionally or client service inquiries. Failure to make proper contact with your supervisor to advise of your absence will be considered an unexcused absence and you will

not be compensated for days out from work. Supervisors may require a doctor's note for absences. Patterned lateness or absenteeism will result in performance improvement warnings and possible discharge.

S. **Pay Periods.**

As a company employee, you are paid on the 15th and last day of each month. If the normal payday falls on a weekend or holiday, you will receive your paycheck in the last working day preceding the payday.
Time records must be kept my all employees so that direct labor costs can be allocated properly; employees can be correctly compensated including vacation, sick leave, holiday, and approved personal leave pay; and the requirements of state and federal laws can be met. Additionally a departmental activity report is kept by your department to verify the information provided in time records.
Payroll deductions for Federal Income Tax, Social Security Tax; State, City and Township Taxes; and valid tax liens and garnishments are automatically withheld from your paycheck, when applicable, as required by law.
When available, you may elect the direct deposit option for your convenience.
Upon eligibility, you are enrolled in and the company pays for health/accident and limited dental insurance packages. Should you wish to enroll dependents at your expense, your premium cost will be automatically withheld from your pay upon the effective date of your enrollment decision
To participate in the Company's Savings Incentive Plan, if any, you must complete the enrollment form, which authorizes the deduction from your paycheck of your contributions to the plan. There is a one year waiting period for eligibility.

T. Leaves of Absence

1. Military

Regular Enlistment: In accord with federal and state laws, regular full time employees entering the military service of the United States, or called up for extended active duty, will be granted an unpaid leave of absence. Benefits will not be continued during any such leave. However, at the end of the leave, upon written request submitted within 90 days after the time the service ends, the Employee will be returned to a position comparable to the one held prior to the military enlistment, induction, or activation, with no loss of seniority.

Reserve Duty: If you are in the military reserve or national guard, you are eligible to take up to three months of unpaid leave per calendar year to fulfill your active duty or service school obligation. During each such annual period of active duty, the company will continue all benefits on the same terms, as prior to the leave. To be eligible for this type of leave and the benefits relating to it, as described above, prior to departure you must provide Personnel with a copy of your military orders, reflecting your reporting date, location, and date of return from active duty. Should you fail to return to work within ten days after your release, you will be deemed to have abandoned your employment.

2. Other leaves of absence
A personnel leave of up to thirty days, without pay, for urgent or compelling reaons, may be requested by submitting a Leave of Absence Request From to your supervisor (or in the supervisor's absence, Personnel) as far in advance of your proposed starting date for the leave as is reasonably possible, and preferable at least ten days in advance. A personal leave subject to this policy will not be granted initially for more than thirty days but may be extended for an additional thirty days upon submission of a second request form prior to the expiration of the first thirty day leave. During any such unpaid leave of absence, the company will not continue any benefits at its expense. However, upon your timely return from such a leave or extension of it, you will be reinstated to the job you held prior to departure or to an equivalent position, if there is a position available.

U. Personnel Records.

Personnel maintains a file for each employee. Your file consists of pertinent, job-related information such as your application, resume, job and salary history, performance appraisals, disciplinary letters, general correspondence, and any other documents that pertain to your employment with the Company. This information is confidential and is released only to you, to a hiring supervisor when you apply for another position within the company, to management employees in your chain of command upon their request, Personnel and to General Counsel. Employees are permitted to review their personnel files and are asked to schedule an appointment with Personnel in advance.
It is to your advantage, as well as the company's, that your personal records be kept up to date. You should notify Personnel of any change in address, telephone number, marital status, dependents, or beneficiaries.
Any false statements made by employees on their employment applications or personnel records will result in disciplinary action, including possible dismissal.

V. Mail and Telephone Usage

The company's mail and telephone facilities are intended for Company business and are not meant for personal use. Do not use the postage machine, UPS, FedEx, or any other mail, shipping, or courier service for anything other than company business.
Personal telephone calls, both incoming and outgoing, should be made only in emergencies, or when absolutely necessary, and then should be kept to a minimum. Should you need to place a long distance personal phone call, you will be required to pay the toll charges.
Every time you made or receive a business telephone call, you are the company representative to the person on the other end of the line. Good telephone techniques include the following:

-Answer promptly and courteously.
-Identify yourself and your department
-Keep your conversation businesslike and brief, avoiding prolonged chats.
-Transfer incoming calls to the appropriate party quickly and courteously.
-Have someone take your calls while you are away from your desk.
-Take messages accurately and relay them to the person as soon as possible.

-Answer questions thoroughly to ensure that the caller has received the information requested.
-Be available to respond to clients' calls as a matter of good client service and minimize the cost of return calls.
-Close your conversation with a pleasant "Good-bye"
-Be effective but efficient, keeping in mind that the use of our telephones is very important to our client service but is also and expensive overheard item.

T. Internet Policy

Internet access includes logging on and viewing Web Sites, sending and receiving electronic mail, transmitting and receiving files, running internet applications and other internet communications.

1. Business Use

Internet access is provided by the Company to help employees communicate and gather information more productively, thereby helping the company achieve its business objectives. Accessing the Interne on company time, with the company's resources, may be only for the Company business purposes, as expressly authorized by management. Internet access is granted on a case by case basis.

2. Personal Use

Personal use of the Internet is prohibited, except as specifically authorized by upper level management. When authorized, personal use must not interfere with Company business, work, or employee performance and is subject to the following policies:

-Solicitation for non Company business of personal gain is prohibited.
-Discriminatory, hostile, harassing, obscene, pornographic, and other offensive of illegal communications are prohibited and may not be send, accessed, downloaded, printed, created ,or used in any other way on Company's resources.
-Use of the Company's internet resources may be monitored and communications read
-Use of the company's internet resources may not be used in any activity that is against any of the company's policies as contained in this handbook or stated elsewhere, nor may these resources be used in a manner contrary to the Company's interests.
-Intentional downloading or sending of computer viruses and/or malicious codes is prohibited
-Unauthorized access of the company's data, including employee data is prohibited; accessing, downloading, or participating in computer games is prohibited, and
-Employees may not use Company resources to address their personal ISP account or online service, as such use increases the risk of inadvertently importing a computer virus or otherwise compromising the integrity of the system

3. Transmitting Data

The Internet is a public network. Information transmitted is not private or securefrom unauthorized access. Do not disclose over the Internet proprietary, e.g. financial conditin, operations, competitive advantages, legal rights, or other information that could cause harm to the company or its reputation. Company documents transmitted over the Internet must clearly indicate the company's copyright.

4. **Receiving data**

To prevent the transmission of computer viruses, the unauthorized downloading of files or software from the internet is prohibited. Downloaded files and software for which authorization has been obtained must be scanned for viruses and checked for malicious code. Software acquired over the Internet is documented by management accordingly. Employees must adhere to the copyrights governing the use of such software.

5. **Privacy issues**

Electronic documents created or stored on the Company's systems and communications using the company's computer resources are the property of CASI. The Company accesses documents or communications stored on its property or on its systems whenever warranted. Employees do not have personal property rights in any communication or other matter created, received, sent, or accessed through the computing resource system.
The Company may monitor and otherwise control access to the Internet from its corporate telecommunications and computing network.

6. **Employee Responsibilities**

As in all our policies, employees are responsible for understanding and complying with the provisions of this policy, additionally employees are responsible for:
-Reporting suspicious activity or suspected violations of this policy immediately to management,
-Adhering to the terms governing the use of the downloaded software.

Use of the Internet from the company's computing resources bears a company address and is therefore attributable to the company. Using an alias or adding a disclaimer to a posting in an effort to disassociate communications from the company is not sufficient and does not protect the company, nor the employee, from legal action.
Failure to comply with the company's internet policies may result in a loss of internet privileges and disciplinary action. The company will notify the appropriate authorities if illegal activity is suspected.

U. Conflict of Interest

The Company respects the right of its employees to engage in activities outside of their employment that are private in nature and do not conflict with or reflect unfavorably upon

the best interest of the company. You should report all outside employment, particularly if there is any possibility of conflict of interest to your supervisor to assist the company in maintaining proper business conduct.

V. Solicitation, Distribution, Selling, and Company Property

In order to prevent the disruption of Company operations and to protect employees from being placed in the position of feeling obligated to contribute or make purchases, you are required to observe the following procedure:

-Solicitation, distribution, and/or posting of literature on Company property is prohibited at all times.

-Solicitation, distribution and/or posting of non-company related literature by Company employees are prohibited while either person is working or scheduled to be working or while either on Company property.

-An employee may not enter Company property or remain on company property for any purposes unless on duty, scheduled for work, or otherwise engaged in company business. For purposes of this rule, company property includes all internal areas of the Company and outside working areas.

Y. CASI Medical Coverage

1. CASI, as a medical research firm, maintains a comprehensive employee health program, consisting mainly, but not exclusively, Oxford Health Plans as main insurer, First Rehabilitation as Disability Insurance Carrier, and Princeton Insurance for Workman's Compensation. CASI full time employment AND Stock/Partnership is required for full participation in the CASI health plan. Part time Employees are not eligible. Non-Vested, non-ownership employees are not eligible. Employees on track for being vested (partnership) after passing their 30 day probation, and earning time toward their 3 years of continuous employment are eligible.

2. **CASI Medical Coverage Definitions**

Partial Medical Benefits

Limited to Oxford Health Plain Benefits with the deductible not reing reimbursed by CASI. No Dental Benefits, no Optical Benefits.
Fitness Reimbursement.
Childcare Cost Reimbursement

Full Medical Benefits

Oxford Health Plans benefit
Dental Benefit
Optical Benefit
Outpatient Visits

Pharmacy Benefit
Fitness Benefit

Transportation to and from any approved Medical Benefit, including Taxi, Ambulance (not otherwise covered by Oxford), Airfare, associated meal and incidental costs on the day of the visit.

Emergency Medical Benefits

All employees, regardless of status, appearing at work with and sufficiently serious medical problem, will be escorted to the hospital and/or medical facility for immediate treatment.

Payment for emergency treatment will be limited to $500 and must be made through approved CASI medical practitioners

Examples of Emergency benefits are:

Dental Emergency requiring extraction, lancing, or reinsertion of avulsed teeth.

Heart Attack and Resuscitation.

Trauma producing syncope, broken bones, extensive exsanguinations.

Fitness Benefit

Gym Attendance at Approved Gym

Approved Medical/Dental/Optical Pharmacy Providers

CASI approved vendors are the vendors selected for services in these specialties by the CASI directories. Recommendation of a provider makes them selected. An approved provider is a provider who has established a relationship with CASI in the past as vendors or as research collaborators. The CASI management must approve new providers.

3. **Medical**

New York University Medical Center
Davies Medical Center
St. Louis Medical Center
Columbia Presbyterian Medical Center
Specialists
Dr. Roberta White
Dr. Jeff Mechanic
Dr. Robert True
Others as approved

Chiropractic/Physiatrist

Dr. Joel Mittleman
Others as approved

Mental Health / Psychologists / Psychiatrists

Dr. Christine Wheeler
Dr. Aviva Shivany-Nubel
Dr. Leah Schaefer
Others as needed

Dental

Dr. Robert Krakow

Dr. Allan Grayson
Dr. Gail Schupak (orthodontic)
Others as approved

Optical

Kips Bay Optical
Others as approved

Pharmacy

Corner Pharmacy
Others as approved

Fitness

New York Sports Club
Crunch Sports Club
Others as approved

4. **Medical Insurance Probation Period**
Employee medical coverage does not begin until 30 days from the conclusion of their probationary first billable service day. Medical Probation subordinates to the Oxford Health Plans, or the current health insurance carrier in effect probation policy, such that etc, etc.

5. **Medical Coverage**
FT, CASI employees are covered by a company-paid Oxford Health Plan.
A company-paid Oxford Health Care Plain subject to the plan rules and policies covers all Full Time CASI employees.
Coverage commences at the conclusion of the Probationary, as specified by the Oxford Health Plan Benefits Manual. Further, this benefits manual is modified, limited or extended by the CASI Oxford plan description and contract.
A copy of the Oxford Health Plan manual is available on request to the CASI health benefits coordinator.
The CASI Managing Partner shall name the CASI Benefits Administrator.
The duties and obligations of the CASI benefits administrator mainly consist of interfacing with Oxford Health Plans in matters of Partnership and Employee Benefits and communicating with changed in Oxford policy and law.
The CASI Business Manager will serve as Benefits Administrator.
As an additional benefit CASI will reimburse all FT employees for their legitimate medical and ancillary costs not covered by the Oxford Health Care Plain.
Legitimate medical and ancillary costs are as defined by the IRS guidelines and rules.
Legitimate medical and ancillary costs include Oxford Health plan doctor co-payments and drug plan co-payments.
CASI has a preferred vendor for all Oxford drug plan purchases. Eligible employees are advised to sue their Oxford Health Plain identification card to obtain their prescription supplies.

The CASI preferred Oxford Health Plan Prescription Drug Benefit is: The Corner Pharmacy, located at the corner of 31st street and Third Avenue. The CASI preferred Oxford Health Plan prescription vendor would directly invoice CASI on a monthly basis for the Oxford co-payments instead of the eligible employee paying. The intent of this is to minimize out of pocket cash and to reduce plan costs by obtaining generic equivalent drugs wherever possible with the patient and physician consent.
In addition, CASI will reimburse all FT employees for their co-pays, not covered by the Oxford Health Care Plan, with submission of co-pay receipts.

Surgical Coverage
Dental Coverage
Optical Coverage
Mental Health Coverage
Pharmacy Coverage
Fitness Coverage
Alternative Medicine Coverage
Associated Costs for medical treatment

Senior Employees may be reimbursed for all ancillary medical costs including, but not limited to any applicable deductibility standard as set forth purusant to Title 26 of the United States Code.
These include:
-Transportation to and from any medical treatment, diagnosis, or related facility.
-Ancillary meals associated with a medical appointment longer than 2 hours in length.
-Parking associated with a medical appointment.
-Subway or Bus fare not otherwise paid by any other part of this benefit program.

These benefits are to be supplemented by a cafeteria benefits plan to be implemented effective January 1, 2004.

Z. Transit-Check Metro Cards Benefit

1 CASI will purchase New York City (NYC) Metro Cards for employee use while traversing in NYC.
2 CASI will control the use of these cards by following all City, State, and Federal requirements related to the use of NYC Metro Cards.
3 The maximum card usage allowed is $100 per month.
4. CASI provides two cards; Unlimited ride MetroCards and 30 Dollar MetrCards.

Unlimited Ride MetroCards

Unlimited cards can be distributed to a junior or senior employee at no more than once per month.

Limited Value MetroCards

No more than $100 per month in effective value limited value MetroCards may be distributed to any employee in a single calendar month.

Unlimited Ride MetroCard

Terms and Conditions

Where accepted:

MTA New York City Transit subways and local buses
MTA Long Island Bus
MTA Staten Island Railway
Most NYC private bus lines

Only 7-day Express Bus Plus accepted on express buses

Restriction:

Cannot be used again at the same subway station or the same bus route for 18 minutes. The acceptance or solicitation of compensation for use of an Unlimited Ride MetroCard by other than authorized agents of MTA New York City Transit is prohibited.

Use of Regular MetroCard is subject to MTA New York City Transit tariff.

AA. Job related Training and Education

1. Justification

Advanced Research Requirements

-CASI will pay for employee education when warranted for Company benefit and when pre-approved by CASI Management.
-Employees will pay for the approved education out-of-pocket and will be reimbursed by earning a grade of C or better. A report from the educational institution of such an earned grade must accompany the request for reimbursement.

BB. Parking Benefit

1. Justification

Parking is a major problem in midtown Manhattan. Many CASI employees hold primary jobs at nearby universities and must split their time during the day across the metropolitan area. As an inducement to get professionals to come and stay, and to reduce the wasted time of visitors, employees, and professional staff searching for parking, CASI has a practice of paying for on street parking using the NYC Muni Meter program. This program enables CASI to pre-pay for blocks of parking time that can be used only by the insertion of a MuniMeter card, much the same way MetroCards can be used for subway and bus fare. Parking at private and more expensive garages must be approved in advance.

2. **Muni Meter Program**

Description of NYC Parking Program. Street Parking Agents will feed the meter on your card

3. **Parking Tickets**
Many companies in the metropolitan are view parking ticket incurred during the execution of business functions as a routine cost of doing business. Parking tickets obtained by failure to feed the MuniMeter are not reimbursable by CASI unless submitted with a justification statement.

BB. Childcare Benefit

CASI will pay bona fide child care costs where the an employee is otherwise unable to work unless a child under 10 requires day care or transportation to and from a day care facility, to the extent provided by IRS section XXX.

Late Night Ride Home Benefit

37 CASI will pay for reasonable and actual employee travel when commuting from work to home after 9:00 PM. The purpose of this is to protect and keep **safe employees**

Late Night Meals Benefit

CASI employees working later than 8PM may have meals paid for.

CC. NO OVERTIME PAYMENT BENEFIT

Late hours/Overtime TIME NOT BEING LOGGED

Employee Relocation Benefit

Justification

Employees travel time is time away from work time.

Moving Expenses

Moving truck time,
Labor man hours,
Packing Materials
Fuel, Toll, and parking not otherwise broken out in invoice and incurred by employees during course of move.
Meals, hotels, and other reasonable and fair out of pocket expenses incurred.

Apartment Search and Apartment Brokerage Fees

Justification

In order to minimize the distractions of finding an apartment in New York City, CASI will pay employee relocation costs including apartment brokerage fees.

Brokerage Fees

Brokerage fees by licensed Real Estate Brokers, when paid by CASI purchase order, or check, with express prior approval on fees.

Roommate Fees finding fees

Temporary Housing for visits longer than 7 days

CASI has relationships with apartment and building owners to rent rooms in apartments for visiting students and staff for periods longer than 7 days.

CASI will pay for visiting students and faculty, on the payroll, for with express approval, not on the direct CASI payroll, for periods of longer than 7 days in a housing facility of its choice and with whom it pays directly.

DD. Other Benefits

Maternity / Paternity Leave
Disability Insurance
Long Term
Short Term
Retirement Plans
Life Insurance

Background

In September 2001, NIST awarded a $2,000,000 Advanced Technology Program (ATP) cooperative agreement to Computer Aided Surgery, Inc., a small for profit research firm. CASI is a tiny entrepreneurial startup firm employing at most 3 PhDs and one MD to do advanced applied math and computer research on image and modeling for surgery. CASI was a firm recruited to apply for this ATP grant by the NIST ATP program director. The PI applied after extensive consultation and support from current and former ATP program management and leadership. CASI has been in business since 1995 principally doing DARPA SBIR contracts and has yet to become profitable. The PI, a former professor of Surgery at New York University Medical Center as well as a former Professor of Computer Science at City University of New York, gave up an academic teaching job to focus exclusively on this project. The other scientists, physicians, and students on this project are all CUNY and or NYU faculty working part time with the company, some uncompensated, many under compensated with respect to their regular jobs. In addition, there are many experts who gave generously of their time and energy without compensation, strictly because of their belief in the merits of the research.

Introduction

Prior to the inception of the NIST ATP project, and repeatedly in the first year, CASI was emphatically, personally, and corporately promised New York State co-funding. The funded portion of this project was jumpstarted retroactive from October 1, 2001, in the middle of the extremely hectic days following the 9/11 attacks in New York City. Given the abruptness of the retroactive funding start, and its inexperience in this type of program, CASI made initial spending errors. These errors were incorrectly and marginally addressed by its accountant and so-called auditor, Ms Joan Hayes, CPA. Hayes had taken over responsibility for CASI accounts on 11 February 2002 after purchasing the CPA practice of the previous CASI accountant, Jill C Feldman, CPA.

Because of the gross inaccuracy of the first year program bookkeeping adjustments, the lateness of these corrections, and the inept consolidation of the first year books and the hostile, non independent first year audit; Hayes is the main reason for NIST ATP suspension of its funding of this project. While the PI admits responsibility for some staff errors in the program filings mostly in the first year, these are not the principal cause of management shortcomings. The principal cause for these shortcomings was advice followed in good faith from Hayes, much of which was to be subsequently proved incorrect, contradictory, coercive, self serving, or extremely destructive.

We will present a timeline (Exhibit IV) for the main program events in support of this contention. CASI was and is on a track toward stability because it learned its lessons from its initial mistakes. The PI has corrected the 'technical' problems and has followed the 'spirit' of the grant in every way. It is excessive and draconian to destroy CASI and it is vital because of problems jumpstarting its first government grant.

CASI's research program has emphasized science over marketing, and self-promotion. CASI research has advanced the state of the art by presentations at medical and computer science/imaging/applied math conferences. NIST ATP and the nation is benefiting from the tireless work of Dr. Karron, his students, and colleagues. Many of these people continued to work on the research no pay, continuing to publish, and advance the state of the art ,despite the technical reporting problems that have interrupted its funding. At no point can CASI be cited for not putting its full effort into its research, which is the main function for NIST ATP funding. This research had became very technology based and the emphasis had to CHANGE, from subcontracting (turnkey) to an 'equipment' oriented program staffed by students and committed professional faculty, as volunteers. Repeated attempts at revising the budget were completely ignored, as were certain requests for staffing changes.

The Problem

As a small single company recipient, CASI minimized costs and maximized productivity with its NIST ATP grant. The PI zealously adhered to the spirit of the NIST ATP guidelines. The grant research has never been questioned. Because of errors made in the first month of the grant by the PI based, on inexperience, and on the bad advice of its hostile and self serving accountant Joan Hayes, CPA, technical financial errors were made, then repeatedly made worse and worse and worse by Hayes's abuse of position. Hayes simultaneously served as trusted advisor to the PI, Corporate Tax Accountant, Personal Tax Accountant,, *de facto* management consultant, jury, judge, confessor, master, whistleblower, and auditor for the government.

CASI included in the award agreement a commitment to provide $110,500 of direct project costs, and in fact provided 67,334.19 of this co funding through a payroll holdback by September 2002 (The first year of the project!). See appendix 3, the payroll reconciliation. The NIST ATP program considers awardees' cost sharing sufficiently vital to its program that it will halt projects for lack of co-funding. Yet, there are basic direct and vital costs, such as rent and utilities, which are not really overhead in this instance, but belong in the 'other' costs section. These MUST be considered as part and parcel of what was previously requested budget revisions. See Exhibit I.

CASI engaged its long term accounting firm, Jill C. Feldman CPA, to manage CASI's books. CASI had a functioning accounting system at the time. Feldman became pregnant and sought to retire after the hectic days of 9/11/2001. Feldman started the process of selling her firm to Ms. Joan Hayes, CPA in December 2001. Joan Hayes started work on the CASI account at that time, and effectively took over CASI's books and papers in February 2002. Hayes was charged with repairing problems caused by the PI's management of the grant at that time and bringing CASI's books and records into order for taxes, management oversight, and for NIST ATP fiscal reporting.

The PI, NIST ATP, and the Department of Commerce Office of the Inspector General OIG were unable to obtain reconciled and stable data as to vendor expenditures, payables, payroll, payroll overhead, and other project cost information from its accountant, Hayes. Hayes waited until just prior to becoming auditor to make important end of first year adjustments (9/30/2002). Hayes bungled and duplicated the calculations for these adjustments, and then assumed the role of an auditor, relinquishing her responsibilities as CPA, and started manipulating her client in earnest.

As project auditor, Hayes was reviewing her own work as project accountant, which destroyed her independence as an auditor. Hayes proceeded to manipulate both CASI and NIST/ATP with threats of wistleblowing CASI to uncover fraud and major career-making revelations to NIST ATP, by reporting the bungles and errors she herself caused in the previous year. She further manipulated the situation and the PI by 'churning' the necessary bookkeeping and accounting work without any useable results. She hid her own double billing invoices in the regenerated two sets of so-called 'new books'. In fact, the 'new books' as opposed to the old books, were incomplete and inaccurate because they lacked consolidation all transactions and reconciliation of all related 'balance sheet' accounts, such as interaccount transfers (contra-accounts) and formal bank reconciliations. How can someone who may have had a hand in preparing so called 'books' independently review them? Furthermore, she kept making unfulfilled promises to NIST and the PI as to when the audit would be completed. She further soured the PI's relationship with NIST ATP by falsely accusing the PI of withholding information and resisting the audit process. In fact, because of her ineptness in preparing and presenting the information to the OIG auditor, in an organized fashion, the finger of accusation points squarely at Joan Hayes, CPA.

If the PI was guilty of anything it was an overwhelming amount of backup to all transactions which made it harder to see the big picture because of all of the detail information kept. Hayes alleged that she was unable to get information from CASI, and the PI was resisting the audit process. She spent so much time collecting and collating data from CASI that she occupied the PI much more than required and hindered the research. Then she threatened to report to NIST ATP that the PI was not spending sufficient time on the project ! With all of this investigating and collecting data, at the time of the 2003 audit, she still fed unreliable and incorrect information to the OIG auditor, and blocked the OIG auditors' access to a valid, reconciled, and auditable set of project books.

The PI wanted to fire Hayes. In retrospect not terminating Hayes and allowing her to issue a grossly unacceptable audit report was the biggest mistake made by the PI during the entire project. However, the NIST ATP Grant Specialist kept insisting that they get the audit (that they had paid for) finished, despite the fact that Hayes as auditor was abusing her position both as accountant and as auditor to attempt to extort more money from CASI. In fact, during this entire process, she never properly reconciled, and more importantly, consolidated the new sets of books she had generated. She never actually supplied the PI or the OIG with oft-promised 'new books'.

Hayes kept changing figures during the budget negotiations. Hayes could not supply stable numbers for the (SF-269) and she omitted expenditures summaries and just showed grants received. Because of this, NIST ATP was forced to request an OIG audit, scheduled for June 2003. In July 2003, the OIG issued a 'limited scope' audit report alleging that CASI had not paid any of the adjusted and reduced $54,084 cost-share (totally untrue, see Exhibit II) and had drawn $205,126 in excess of the federal share of the ATP project costs (based on preliminary audit figures). This was based on the information in the unreconciled and incomplete books kept by its accountant and so-called auditor, Hayes. Furthermore, Hayes had repeatedly promised she would have books ready for NIST review virtually every day of the extended visit by the OIG field agent. The PI was not aware of critical lacking information that the PI could have provided at that time, prior to the field visit. The auditor was inappropriately given information that was not reconciled, not up to date, or was otherwise incorrect. The PI was not aware at the time, of the horridly negative and false information Hayes was giving the OIG until the last day of the OIG fieldwork. Instead of remaining independent and neutral, and providing information as requested by the OIG auditor, Hayes, by her own malfeasance, fed the auditor misinformation of the worst kind. The award was very abruptly suspended and yet the PI continued to pay project costs as they came in, including audit costs, payroll and accounts payable, directly related to the project, and funded by the PI's personal funds. The CASI project staff agreed to continue the project without pay, or at vastly reduced pay.

Because of the incomplete data presented to the OIG in June 2003, in November 2003, the PI visited NIST ATP and requested a re-audit (not a continuation of the previous failed audit based on faulty data from Hayes). This was based on the OIG's admission of the incomplete nature of its first audit. A new accounting team headed by Mr. Melvin Spitz, CPA, reconciled, consolidated, and corrected the books for the full 12 and 9-month report periods, without changing the original transactions posted in the Hayes generated books. These two sets of 'new books' had been nothing more than summaries of two bank accounts. One called CASI, and the other called NIST. In fact, both accounts were used for project expenditures, but the CASI account has some company wide expenditures, which are not necessarily allocated to NIST. With the proper support and approach, Mr. Spitz was able to reconcile and consolidate the books in a matter of four weeks, while Hayes's stalling did not achieve this over an 18-month period.

This stonewalling and abuse of position by Hayes is evidenced by the following facts:

1. Joan Hayes refused to submit her audit report to CASI at any promised time through October, even after giving the OIG a copy of the essentially audit report in June.
2. NIST ATP demanded its audit report. There was a very real potential that Hayes would never submit her audit report without paying exorbitant fees for unnecessary 'work'. The PI was under intense pressure to supply the Hayes audit report by NIST ATP.
3. Repeated requests from the Grant Specialist of NIST ATP for the Hayes audit report which NIST ATP had paid for, and they felt was due NIST.
4. Complaints from the OIG auditor, to the PI that the OIG was unable to verify the records presented by Hayes even after being on site with CASI and with Hayes for 10 days ! The OIG field auditor said 'her negative results were taken from the CASI Books, and could not be verified'. She pretty much said she could not do an audit.
5. Moreover, the OIG was repeatedly and explicitly promised a reconciled set of CASI books
   a) prior to the OIG first field visit,
   b) multiple times during the OIG first field visit, and
   c) Multiple times after the OIG first field visit.

Mr. Melvin Spitz confirmed with the OIG auditor that they never received a reconciled set of new books from Hayes during the OIG's subsequent field visit with Spitz in December.

The OIG auditor based its first flash audit on the misdirected and poisoned presentation by Hayes during the its first field visit culminating with the July 2003 flash audit report. At the December OIG field visit, Spitz submitted to the OIG the following:

a) New payroll and loan reconciliations
b) Detailed reports and logs of reimbursable spending on project costs by the PI.
c) A complete sub ledger on credit cards (AMEX) charges (shortly after the field audit)
d) CASI's newly consolidated books and records, including transfers, from the personal account, and previously ignored activity in the new CASI LLC account, which had been missed in the first audit,
e) All personal contributions, repayments of loans, and reimbursable spending out of the PI's personal checking account, which the OIG auditor together with Mr. Spitz confirmed as to being part of the consolidation.
f) Full explanations of all of the adjustments made to Hayes books by Spitz.

The OIG auditor now had many opportunities for revision of the July 2003 report, which had been based on incomplete records. This was much additional information that had to be considered for the OIG final draft report. This final OIG report should not have been an extension and major expansion of the OIG's previous reported questioned costs. In reality, all the new information should have enabled the OIG to substantially reduce the questioned costs. The new information justified most of the questioned costs..

Mr. Spitz at this point asked if, based on this new complete information, weather Spitz should issue new corrected SF269 quarterly and annual comparison to budget filings to replace the incomplete and erroneously filed reports previously submitted based on Hayes data. The OIG auditor said this was not necessary since her audit would accomplish this. Mr. Spitz also went over Hayes's audit report point by point and without consultation with the PI to present an adequate and unbiased refutation of Hayes audit conclusions. This Hayes report formed the foundation for the July OIG flash audit report. Spitz was given the impression, after his conference with the OIG auditor, who took copious notes, that full weight would be given to all of this 'new information'. This has obviously not been the case.

The PI discussed with the OIG auditor actions needed to assist the OIG's audit, given the previous unsatisfactory performance by Hayes during the first field visit. Mr. Melvin Spitz was tasked solely to work with the OIG to conclude this unending audit. Spitz made adjusting entries to the books and records that clearly identified not only identify NIST-related expenses in very detailed form but a section for allocated corporate expenses. Spitz noted numerous deficiencies and duplications in the Hayes prepared books, especially improper recording of undercount transfers and non-recognition of monies advanced by the PI through CASI; to both fully fund co-payments and repay erroneous salary advances taken at the beginning of the project. The OIG visited in December 2003 to review the reconciled and much improved books and records, was also provided with hard, and disk copies of the Spitz consolidation.

It came as a complete surprise on the issuance of the draft audit report in May that the OIG had not considered the clarifying additional information presented in the December visit. The OIG had instead chosen to re-affirm and expand the faulty Hayes conclusions and did not reduce any of the July flash audit findings. In fact, Spitz had presented as a complement to the income and expenditure consolidation figures a so-called consolidated balance sheet showing fully reconciled items such as cash in bank, intercompany transfers (See Exhibit III). Also included in this balance sheet were the co-payments and repayments of erroneous PI salary advances. The draft report of the OIG totally misinterprets the intercompany transfers once of which is called 'due from CASI', and the other one was called 'due to NIST' which are in fact counterbalancing amounts as being proof that CASI admits to owing money to the project. This is absolutely *prima face* incorrect.

Given the gross malfeasance, lack of independence, hostility, and clear errors in the information presented by Hayes to the OIG, and the intransigence of the OIG in the face of the Hayes errors, the PI is compelled to request a face-to-face negotiation to defend its rights, reputation, and research.

Comments on OBJECTIVES, SCOPE, AND METHODOLOGY of OIG report

The scope of the OIG audit was extended to include payments made on costs incurred prior to the June 27 suspension, and to certify payables still on the books. The Hayes report scope only for the first year. As such significant improvements made in CASI fiscal and business processes were overlooked in the Hayes report, and the OIG draft report, which was almost exclusively based on Hayes faulty reporting.

OIG examined a copy of the company's most recent annual audit report for the year ending September 30, 2002. That audit was conducted by Hayes, who as we will demonstrate was NOT an independent certified public accountant. Her audit was not in the spirit and rule of the *NIST Program Specific Audit Guidelines for advanced Technology Program (ATP) Cooperative Agreements with Single Companies* dated May 1999. The Hayes report disclosed internal control weaknesses and questioned costs. The OIG obtained their own understanding of CASI internal controls through inquiries with appropriate personnel, inspection of relevant documentation and observation of CASI's operation to evaluate the assertions included in the audit report. The weaknesses noted in OIG testing did not observe the significant improvements in internal controls and reduction in disallowed costs made in the first year to the second year. None of the improvements are discussed in the findings and recommendations of the OIG draft report.

The OIG relied on computer-processed data supplied by the company as the basis for their audit findings and recommendations. Consequently, the OIG tested the accuracy of this information by tracing and comparing the data to original source documents and other supporting documents stored as scanned images. Based on their tests, the OIG concluded that the computerized data was sufficiently reliable for use in meeting our objectives. Based on this statement costs for scanning equipment used to store, and the costs of clerks and bookkeepers to file and input this data should be allowed, as it was the basis of the OIG's acceptance of this information.

The draft audit report states that it supersedes the OIG July 2003-audit report, and resolution of this report should be deemed to constitute final action with respect to the prior report. CASI disagrees and notes that this report is mealy an extension and elaboration of the July 2003 report, not a correction or a revision of the previous report. The purpose of the CASI request for re-audit fieldwork was to correct erroneous findings in the July 2003 report, not rubberstamp the July findings, based on new accurate and revised books.

Comments on FINDINGS AND RECOMMENDATIONS in the OIG report

The OIG blames the CASI inadequate financial management system as the main cause of $547,426 questioned costs. CASI had an adequate financial system until Hayes, as our auditor (in the second year), demanded that CASI completely redo its fiscal system to her specifications, in order to pass her standards for the audit. She had the CASI outside bookkeepers; engage in a complete rewrite of CASI's books, which Hayes closely and zealously supervised. Hayes ordered the splitting of CASI's books into two sets of books. These caused unending problems and errors, including vendors never being paid, vendors being overpaid, vendors being paid late, accounts running out of control, and checks bouncing. The PI was constantly running to the bank to beg the bank to refund these fees, which the band did in all cases. These books were never reconciled and consolidated despite repeated promises to both the PI and the OIG.

According to the ATP Proposal Preparation Kit:

"ATP projects are industry/government, cost shared projects. A company proposing to recover 100 percent of the project costs (*because all project costs are charged as direct costs*) from ATP is not complying with the spirit of the ATP statute because the company has no funds of its own at risk."

The company NEVER promised to recover 100% of the project costs. The approved budget and all of the subsequent proposed budget amendments shows the company co-paying over 4% of the direct project costs.

The main CASI issue with the OIG draft findings is that the Federal Cost principals have many special exceptions for small entities working 100% on a single federal project. CASI expected and needed ATP to follow its previous practice guidelines of giving special consideration to small firms such as CASI. This expectation was based on its consultants and business manager's many years previous experience managing ATP programs in very large firm. CASI's failing was that it did not get each and every eligible cost being questioned specifically allowed in signed memos. Many of these costs were explicitly allowed in verbal understandings. When the PI was advised to get these understanding documented in memos, the NIST ATP never acknowledged ANY these memos in any documentary fashion, by e-mail, fax, and paper memo . At one point, the PI made a special trip to NIST to discuss these matters and the PI was not allowed to visit in the cafeteria with any of the NIST personnel. During the written budget negotiations, the costs for that specific trip were specifically disallowed for $10.00 .

CASI maintains that precisely because it decided to focus exclusively on the NIST ATP project, partly due to the collapse of the investment market and its original, pre 9/11 offers of New York State co funding, many of the questioned costs called overhead are in fact direct costs under the spirit and letter of the Cost Principles 15 CFD Part 14.

The OIG report goes on further to state:
"Recipients of ATP awards are required to have a financial management system that meets the standards found in 15 CFR Part 14, Uniform Administrative Requirement for Grants and Agreements with Institution of Higher Education, Hospitals, Non-Profit and Commercial Organizations. Standards for financial management systems are found in Subpart C, Section 21 and require recipient's financial management system to include the following:
"effective control over and accountability for all funds..."

All CASI and NIST funds were fully accounted for in the CASI books and records. Abundant records were made of all transactions as they flowed through the CASI business process. Backup documentation was made and kept. CASI expended extensive resource to establish and maintain compliance with GAAP accounting, as well as CASI business procedures, under the dictatorial direction of Hayes. She would later refute the CASI recordkeeping procedures because it kept 'all details' and because these details would later work to document various Hayes mistakes. Later, we found she kept vital records (such as payroll reconciliations) from CASI in an attempt to maintain sole control over the account.

Subpart C continues:
"Written procedures for determining the reasonableness, allocability and allow ability of costs in accordance with the provision of the applicable federal cost principles and the terms and conditions of the award ..."

CASI adopted forms and procedures to identify allowable and eligible costs by the following means:

The original CASI books tagged a 'CLASS" of NIST costs in the CASI electronic books and records. Further, all costs that could be charged to NIST were identified with NIST ATP as the customer for chargeback billing of these costs. Finally, under Hayes direction, an entirely separate set of books of ONLY NIST Costs was prepared out of the CASI books. These books were never reconciled or consolidated, yet served as the exclusive basis of the OIG reports. There are significant differences of opinion as to what are NIST ATP costs over the life of the grant. Cost segregation and funds segregation (by a separate NIST checking account with chargeback class tagging) has been incorporated into the business process by CASI.

The OIG further notes this citation from 15 CFR 14:
"Comparison of outlays with budget amounts for each award."

CASI, in good faith, continued its research project in July 2002 after it started budget revision negotiations. In retrospect, the project should have been halted by the PI as CASI spending diverged beyond 10% from its budgeted costs. However, there exists no mechanism for the grantee to stop the project clock on a project. NIST ATP can stop a project as abruptly as it pleases, as illustrated in CASI's case. Therefore the grantee is forced into the situation CASI finds itself in, whereby it cannot make midcourse budget corrections, and it has no recourse but to continue to use up its precious project time. It became clear that its December 2001 budget was woefully

inadequate. How could CASI recognize that it needed a new budget if it could not track its actual spending relative to its budgeted spending? Clearly, CASI was aware of the discrepancy in its actual spending given the energy and effort expended in attempting to obtain a revised budget. Therefore, CASI was in compliance with the above CFR citation. Had CASI not attempted to negotiate a budget revision, then the above allegation would be clearly true; as it would be evidence that CASI was unaware of the deviations of its spending from its budget.

The OIG report continues on to state:
"Since the ATP budget included only direct project costs, the financial management system needs to be able to properly classify costs as either direct or indirect. "

Companies as small as CASI do not generally seek, or are awarded grants of this size, with such strictures. After repeated discussion with NIST officials, with Axiom consultants and with ATG consultants, specific instructions were given on how to do manage the finances of this grant so that minimal overhead would be incurred.. Further, the PI unfortunately agreed to a complete overhaul of the CASI books under Hayes direction. Furthermore, Hayes refused to consider or account for the original plan for how the grant and the PI would manage and account for overhead and indirect costs.

The OIG report states:
"Computer Aided Surgery does not have a financial management system that allows it to determine readily which of its costs are direct and which are indirect. The general ledger does not separate direct from indirect costs, and Computer Aided Surgery never prepared an indirect cost proposal that identified each item of cost to be included in the indirect cost pools."

Hayes undertook this responsibility and completely failed; The PI had originally tagged costs by using the Quick Books 'CLASS' facility, and customer cost chargeback facility; Hayes refused to consider this and insisted that a completely separate, stand-alone set of books. She insisted this was required for CASI and NIST ATP because of the disparity of the Federal reporting period and the CASI LLC and INC reporting periods. This created the extremely convoluted and unnecessary requirement that almost all entries be posted twice, into each set of books. This caused duplications and transfer accounts that were not subject to the proper consolidation adjustments as done by Spitz.

The OIG admits:
"The cost principles identified in 48 CFR Part 31, *Contract Cost Principles and Procedures*, do not provide any specific guidance on what would be typical indirect costs. However, ATP's Proposal Preparation Kit states that typical examples of indirect costs include general administration, maintenance, library expenses, and accounting. The kit also states that if the recipient has an adequate accounting system consistent with generally accepted accounting principles, then certain expense items should fall into indirect cost categories, even for a new start up company with only one project. "

Because of the small size and unusual nature of CASI, there was no clear guidance for a tiny company such as CASI to establish these costs in the tradition of much larger companies. CASI contends that it is impossible to adhere fully to the guidelines for large companies. This problem was acknowledged in early discussions between CASI and NIST ATP. This problem has been acknowledge throughout the federal government and is part of various legislative reform packages. Every company and project is unique and must comply with the spirit of the law. CASI unquestionably did.

The PI, the IRS, NYS, and the NIST ATP and OIG were never able to obtain from Hayes stable figures for any purpose whatsoever. More importantly, NIST ATP never responded to numerous attempts to revise the budget to confirm to the emerging new realities of the project. The PI surmises that because of the bad relationship nurtured by Hayes with the NIST ATP Grant Specialist and CASI, and given the changing actual figures Hayes supplied during the budget revision negotiations, NIST ATP lost all confidence in the PI and misplaced all of its confidence in Hayes. Hayes, abusing the NIST ATP confidence in her as the auditor, proceeded to torpedo CASI with bad reports to NIST, bad and late reports to the IRS, and fighting with the CASI board and legal team. The PI can only surmise why Hayes has so energetically and viciously undermined her client.

The PI was never able to rely on Hayes for stable accounting figures during her entire tenure with CASI. Hayes, except for occasional payroll filings (that were also in error) missed every deadline she was ever responsible for. We can see no other basis for such a large amount of uncompensated work as other than to bankrupt CASI so it could not attack Hayes. CASI has reported such grossly unethical behavior to the New York State Department of Education, office of Professional Discipline and they have opened a pending case for investigation.

NO Complaints on CASI Research

It is clear from the scientific output and professional kudos garnered that CASI is doing world-class significant research, and providing significant value to the NIST ATP program as well as the nation, which despite this accountancy nightmare, is the real purpose of the program. Milestones are being met and important basic science is being done.

CASI misplaced its faith in Hayes.

CASI trusted Hayes to put its books in order, keep CASI out of trouble, and to make its NIST audit report; what in fact happened Hayes torpedoed everything she was entrusted to protect as accountant, report as auditor, and advise as a government grants management authority and advisor.

Conclusions

The accompanying OIG draft audit report is ignoring additional information on balance sheet type accounts such as inter-company transfers and PI repayment of faulty advances and co-payments separately attached to the consolidated statement of fund receipts and expenditures (See Exhibit III).

The PI requires without question a face to face meeting, where if both sides are flexible on settling this matter on an amicable basis acceptable to all. Above all, the research was the main purpose of the project, and should remain so. Unfortunately, ignorance of and inexperience with government grant technical guidelines led to some mistakes at the very beginning of the project. These mistakes as to the literal interpretation of program guidelines should not have been allowed to wreck the aim of the project through its suspension.

People worked very hard, for nothing, and the government saved a lot of money. If this work were to be done in a government research laboratory, the cost of the project would have been multiple millions of dollars. Many attempts at revising the budget were met with no response from the NIST ATP sponsor. Our timeline (Exhibit IV) shows that we began this attempt at revision fairly early in the process and our financial appendix (Exhibit I) shows that had the budget been properly adjusted the research results would have come in at an acceptable cost.

Why did the project nature change? Because as the PI was writing the proposal, it seemed at the time that using the NIST ATP funding to hireling the biggest and presumably best computer graphics expert obtainable, namely his CUNY colleague Professor George Wolberg, would help insure the projects success. This was not the case; in fact, some of the most vital contributions to this project were made by people who were never on the NIST ATP or any CASI payroll. As the project commenced, it became clear that Prof. Wolberg had multiple faculty commitments and was also in the process of starting his own business. The PI felt that Prof. Wolberg could not give this project the attention it required. Further, Prof. Wolberg insisted on using his own software libraries, which he owned, and would not give CASI source code to. This created a problem of excessive dependency on Wolberg and his code, something that NIST ATP was concerned about in their first site visit. The PI was spending too much time managing Wolberg and specifying detailed contract modifications for Wolberg and arguing over invoices and not getting what the project needed. However, Professor Cox, along with the CASI intern/student Mr. DaSalla were becoming more and more adept at basic 3D computer graphics, and a PhD student from the U of Delaware, Mr. Thiarajian joined our effort and was able to do more computer graphics than Prof Wolberg was able to do. Mr. Thiarajian never appeared on the CASI payroll, being funded entirely by the Delaware Biotechnology Institute of U Delaware. When the PI started throttling back on Prof. Wolberg hours and funding, the PI started complaining to NIST ATP.

NIST ATP told the PI that they would back the PI's decisions, and that it was the PI's decision to do what was best for the project. It was this vote of confidence, and the lack of responses from the grant specialist, that gave the PI the very clear and distinct impression that NIST ATP trusted the PI and were willing to go with the PI's project decisions. These messages giving the PI autonomy were repeated in a number of instances. The business manager, Gurfein, kept asking the NIST ATP Grant Specialist many questions and permission for all sorts of CASI business decisions. Repeatedly, the Grant Specialist told Gurfein "you run your business how you see fit: we won't tell you what to do". All this trust and confidence seems to have been poisoned by Hayes.

Because of the NIST ATP resistance to documenting any verbal understandings, amendments, and changes in key people who proved vital to the project, their costs were questioned although they were a key part of the project. Not withstanding this, even if they had been accepted, this subcontractor portion and payroll portion over the three year period should have been substantially changed and transferred to the computer technology. Outsourcing key research roles by contractors caused the PI to loose control over the technical direction of the project. . Because we had to do much more of the project on site, and given the efforts of Dr. Karron's PhD and Masters students, as well as the seats they required, CASI needed a place for the small staff, and the sophisticated equipment. This equipment is being used almost around the clock to this day by students, volunteers, and uncompensated faculty who continue to work on the project. As has been erroneously identified in the draft report of the auditor, the costs of the CASI office as opposed to outside contractors doing the work in their inferior facilities, was substantially more efficient and cheaper with quicker and more advanced results. We should not be punished for trying to save the government money without sacrificing, but rather enhancing the research. The PI stands by the decisions made as to what was best for the project.

CASI Saved the Government Money.

CASI provided significant research value for the government's dollar. The PI, out of necessity, did operate with MINIMAL OVERHEAD. To penalize the PI by reducing his salary and asking him to repay the salary of the business manager, when the salaries were already budgeted and spent in good faith, along with necessary equipment and a place to house the research, two years later, will only serve to bankrupt CASI.

The research spending was always frugally managed by the PI. CASI built it its computers from components to get research grade systems that are unavailable commercially. The PI stayed with colleagues and friends when traveling on grant business. The PI drove and did not fly whenever possible. The PI's travel was not questioned (except for $10 for a trip to NIST)

Spitz made the books WHOLE by reconciliation and consolidating all pertinent transactions. Mr. Spitz's motto was 'let chips fall where they may'. Considering that during the past year, the PI has made up costs out of pocket and has mortgaged his residence to make transfers of personal funds totaling in excess of $106,000, in addition to co-pays. The PI beseeches NIST to consider that the period of suspension is punishment enough for technical errors. Finally, the quality and value of the research does not warrant suspension.

Terminating this research by bankrupting CASI is a disservice to its sponsor and the nation. The PI firmly believes that this is not what NIST ATP wants or is designed to do. NIST ATP practices and guidelines rules are designed for large corporations with lots of government experience and deep pockets to co-fund these high-risk projects. CASI has neither of these resources.

The PI has demonstrated its persistence in the face of incredible resistance by continuing to push for this grant and by continuing its research.

NIST ATP misplaced its trust in Hayes

Hayes was in continuous communication with NIST ATP for audit guidance, to protect herself from any suspicion of error or wrongdoing by NIST ATP, and was continuously getting permission for her activities with the NIST ATP Grant specialist, developing a relationship as the CASI 'tattler', and poisoning the relationship between CASI and its sponsor. Hayes was telling the PI that she was going to save CASI from its initial errors, and Hayes was telling

NIST ATP that Hayes would uncover a major scandal and earn a whistleblower reward for doing so. She would then overcharge for excessive bookkeeping and accounting work from CASI in the process. Hayes demanded slavish obedience from the PI in the minutest detail, which the PI initially thought was appropriate if Hayes was going to 'repair' errors caused early in the grant. Instead, Hayes pillared and exacerbated all of the errors to her own empowerment with the government and to further manipulate and control the PI and CASI. She seemed to take undue thrill and excitement to have so much control over so much funding. All of this was part of her desire to control and manipulate the situation, to play both sides against the middle, destroy CASI to protect her CPA license.

OIG misplaced its trust in Hayes.

Based on the above problems with Hayes, CASI contends that the OIG should have thrown out the misleading Hayes audit. In the interests of objectivity and fairness, OIG should have, and CASI expected OIG to have started their audit a fresh with the Spitz reconciled and consolidated information, which did not touch the basic transactions, but which clarified them, and made them usable, and auditable. The OIG field representative seemed convinced by the Spitz audit data and its presentation. It appeared at the time that CASI was out from under its dark cloud and there was a distinct possibility that the grant would be resumed. CASI is disappointed that OIG has not changed any of its opinions based on the faulty Hayes audit and the fresh information presented at the December 2003 field visit.

Hayes should have been fired and not permitted to submit the audit report. The PI did not fire Hayes because the PI believed the OIG would give an unbiased report not based on the Hayes audit report. CASI regrets not firing Hayes but CASI had no choice at the time.

Important observations

The Dec 2001 Budget was and is unviable: It was thrown together just before submitting the grant and CASI did not have any historical basis to estimate costs. It was based on conjectures. CASI required at least a year of operation to get an accurate sample of real costs for budget purposes. First year experience was needed to establish baseline costs. CASI did not have access to stable first year actual figures for the purpose of budget revisions due to Hayes's malfeasance. CASI had expected a substantial reduction and elimination of the OIG questioned costs per the July 2003 report for $205,125.00. CASI clarifications and rebuttals (Exhibit I) show that many disallowances should not stand because the project followed the spirit of the grant, based on a revised viable budget. CASI also expected previously requested budget revisions and some flexibility as to so-called overhead (other costs section).

CASI is committed 100 % to this project. PI is 100% committed to this project and has worked on no others.

Significant management improvements have been made subsequent to the first year. The OIG and Hayes audits do not differentiate in the comparison between the first year to the second year.

The PI made a significant effort to improve compliance with the spirit and even the letter from the first year to the second year.

Personnel very much stabilized in second year. Personnel staying with project through the funding suspension make their commitment clear: Cox, Rothman, Thiarajian, Benedict

As a small business, CASI cannot be asked to afford some of the more inflexible compliance policies, such as disallowed alternative fringes, not normally associated with big corporate structures, rent, electric, telephone, and necessary project alterations.

At no point was the value of the research questions or the value the government has received questioned.

Overall Conclusions

In conclusion, CASI does not owe NIST ATP for co-pays. Program contributions are already fully paid; CASI does not owe a significant amount for ineligible costs (these were already reimbursed by 2003). CASI does not owe for unbudgeted costs because NIST ATP was poisoned by the Hayes figures used during budget negotiations and the inaccurate audit report, into not negotiating with CASI on necessary budget revisions.

CASI believes that NIST ATP should permit CASI to finish its budget revisions (See Exhibit I) to eliminate problems caused by the December 2001 unviable budget. CASI has demonstrated significantly improved business practices and fiscal control in the second year and the PI has steadfastly demonstrated his commitment to this project during the year following in suspension. CASI and the scientific community believe that NIST ATP should resume the grant to permit the project to come to a successful scientific conclusion.

Exhibits

The following sections are the technical financial exhibits to offered as substantiation evidence in the this CASI NIST ATP Audit rebuttal

Exhibit 1 Summary of Project Costs and Point by Point Rebuttal of Questioned Costs

Project summary costs

Computer Aided Surgery Inc.
NIST Award No. 70NANB1H3050
Summary of Project Costs
10/1/01-6/27/03

	Award Budget Per Draft Report Appendix I	Proposed Revised Budget Per CASI	Costs Claimed per Draft Report	Costs Questioned Per Draft Report	Costs Claimed Per CASI	Change in claimed costs - Per CASI	
Personnel	700,000	635,000	569,911	104,683	569,911	None	
Fringe Benefits	238,000	175,000	158,576	68,884	161,758	3,182	Error in classification
Travel	29,000	35,000	36,538	23,998	36,538	None	
Equipment	119,000	250,000	320,443	201,443	238,677	(81,766)	non-equipment see our response #7.
Supplies	11,000	35,000	39,344	24,011	22,872	(16,472)	Mostly internet
Subcontracts	360,000	150,000	147,153	67,372	144,688	(2,465)	Conceded costs
Other	10,000	187,000	73,535	57,035	169,676	96,141	See our response #7.
Total	1,467,000 (A)	1,467,000 (B)	1,345,500	547,426 (C)	1,344,120 (D)	(1,380)	Net Change

(A) Please note the budget is for a 24-month period.

(B) In general, reductions in the subcontractors' budget of $210,000 and personnel and fringe benefits of $125,000 would fund increases to equipment and "other" categories, so that $335,000 of disallowed expenditures would be reinstated, because of the proper revisions alone.

(C) Explanations for all questioned items and reclassifications appear in the pages following this summary.

(D) These amounts are based on a revised budget as per above, and reclassifications as per our explanation to questioned costs. Conceded items have been subtracted from the total.

Point by Point Rebuttals

Disallowances:

Please refer to Audit report for references and full explanations.

1. Personnel Costs: $104,683 is questioned.

A. $ 71,550 is not allocable to the ATP project.

a. $ 25,000 of the Chief Operating Officer's time was allocated to non-NIST activities.

b. $ 46,550 of the Chief Technical Officer's time was allocated to non-NIST activities.

B. $ 33,133 of employees' salary was not approved by NIST officials.

a. $ 15,222 in salary to the Fiscal Control employee was not approved.

b. $17,911 in salary to the Business Manager was not approved.

Answer:

A. 100% is chargeable and allocable to project.

a. Gurfein didn't devote 25% to other activities. He worked exclusively on this project.

b. Dr. Karron didn't devote 15% to "organizational" activities. He "lived" exhausting 16 - 18 hour days solely devoted to the project.

B. None should be disallowed.

a. Although, not approved in writing, the grant specialist verbally approved this position. Clearly, it is reasonable and necessary to the project.

b. This was the assumption of Gurfein's slot at a substantially less cost and much more productive person. Benedict was more than a "business manager". He was indispensable to all concerned including any contact with the government, because of his experience with the NIST ATP programs. The government ignored attempts to approve Benedict, which was

detrimental to his being "in the loop". They ignored him in their communications with CASI. Meanwhile the program control improved dramatically under his watch.

2. Fringe Benefits: $ 68,884 are questioned.

2. CASI did have a "cafeteria" type plan, which was in the process of being formalized. There is no formal 'approval' process. It was written policy, and it was in practice since CASI's formation in 1995 without question or problem.

A. $ 52,227 is disallowed because CASI had no plan for the charges.

A. Total fringe benefits were dramatically lower than the 30% - 34% normally allowed by government programs without question. No plans were made to formalize the benefits plan based on this assumption for this program.

a. $48,989 is disallowed because expenses were paid in excess of employee's insurance reimbursements.

a. "Big" company fringe benefits such as a pension plan were not practical for this small company. Therefore, we have a medical reimbursement plan.

b. $ 3,238 of education is disallowed because it is not an ordinary expense of a corporation.

b. The educational training was a direct expense of the project, related to the research.

B. $ 14,196 is disallowed because it is a cost directly associated with another questioned cost.

B. See answers to 1A and 1B above.

a. $ 3,130 is for health insurance directly associated with a percentage of the reallocated salaries of the Chief Operating Officer & Chief Technical Officer's non-NIST activities.

a. Since they should have a zero disallowance on Salaries, health insurance is 100% allocable.

b. $2,600 of childcare cost paid for the child of a fiscal control employee whose salary was not approved.

c. $ 8,466 of payroll taxes directly associated with a percentage of the reallocated salaries of the Chief Operating Officer & Chief Technical Officer's non-NIST activities.

C. $355 for miscellaneous fitness costs in excess of gym membership paid.

D. $ 2,106 of parking related costs for employees while they are at work and medical visits.

3. Travel: $ 23,998 of gas, local gas, parking, taxis, tolls, meals and miscellaneous other items are questioned.

b. Childcare should be 100% allowed just as the related "base" salary has no basis for disallowance.

c. The COO and CTO salary should not be allocated. Similarly their fringes should not be allocated.

C. CASI's Oxford Health Plan does reimburse Gym Visits. CASI was simply supplementing the Oxford benefit, which was allowed by the OIG. The amount is very small and fitness expense is becoming a commonplace fringe benefit. Further, because of the sedentary nature of computer work, this benefit is particularly important for computer software companies and their employee health.

D. This benefit was modeled after the IRS benefit, which allows ancillary costs to medical visits (taxi, transportation, meals). These are alternative fringe benefits necessary for employees to minimize time on medical visits and to support employee productivity.

3. CASI Employees can not always spend a regular 9 am to 5 pm day at CASI; Frequently employees would have to run out mid day to teach a class at Brooklyn College or City College. Alternatively, take classes at school. In order to minimize the time spent by employees searching for parking, this benefit was implemented. Commutation to and from CASI was similarly supported to encourage the travel to CASI.

4. Equipment: $ 201,443 is questioned.

A. $ 18,424 for capital improvement to the apartment owned by the primary shareholder of CASI, and used by the company as its place of business.

a. $3,500 of Mistretta Electronic was correctly posted to CASI books as capital improvements but was incorrectly charged to NIST as equipment expenses.

b. $ 14,924 of capital costs was identified as equipment costs.

B. $ 2,533 of costs is booked twice.

C. $ 703 of costs was not allocable to the ATP award.

D. $ 265 of dues & subscriptions was not approved in the budget.

4. Only $260,339 in equipment costs are claimed not $311,923. The balance is computer software and other computer costs, a separate category.

A. Since the apartment was not a residence (the PI paid rent for a share in a home in Connecticut), but an office, these alterations which detract from the market value of selling the apartment, should be approved as necessary for running the equipment. The auditor admits that it was used by the company as "its place of business". By looking at the vendors, it is obvious that these expenditures are related to wiring and peripherals that buttress the computer technology.

a. This cost was an electrical upgrade, absolutely required, to run the computer systems for the project. Frequently circuit breaker overloads and losses of data, and insufficient current for air conditioning made this an emergency expense.

b. They are moved to an "other" category, see #7 below.

B. Insufficient supporting detail is given to confirm or refute this questioned cost item.

C. No sufficient detail is given to verify or deny this questioned cost.

D. De Minimus and Immaterial.

This reveals the petty and hostile orientation of Ms. Hayes. As was explained to the auditor face to face, the way that CASI kept track of the vital professional literature in the field was through IEEE, ACM, AAAS, MEDLARS, SPIE, and Sigma Psi Professional literature online indices and databases. There is no way to subscribe to these databases without membership.

E. $179,518 exceeded the amount in the budget for equipment.

E. $60,106 was computer costs, software, and computer repairs not related to the Equipment category but properly allocable to the "other" category. $27,700 (146,700-110,000) should be allowed as a permitted reallocation of 10% of project costs. The balance should be allowed as per budget revision request, where the "nature" of the project changed completely and is "equipment" driven. See schedule of expenditures earlier in this exhibit.

5. Supplies: $24,011 are questioned.

5. A.

A. $ 21,506 was not approved by NIST grant officials.

a. $ 378 for chase bank fees and NSF charges.

a. Bank fees were refunded but not credited properly.

b. $2,952 for dues and subscriptions.

b. Most memberships necessary for access to online library research. See above on Subscriptions.

c. $ 599 for miscellaneous costs.

c. Paypal and Barnes & Noble are direct costs of the project.

d. $ 285 for internet costs incurred prior to the award period.

e. $ 15,809 for cable hook-up and internet fees, which were listed as indirect cost on the proposal, therefore they are not an allowable direct project cost.

f. $ 1,014 was reclassified from miscellaneous expense to internet expense.

B. $ 2,323 of costs was booked twice.

C. $ 651 is capital improvements.

6.

A. $ 37,146 should be considered indirect costs.

a. $2,465 is tax work and training course taken by the auditor.

b. $7,455 in legal fees was not approved as part of the budget.

c. $25,317 for bookkeeping services, this was not approved as part of the budget.

d. $909 for clerical costs that are indirect costs.

e. $1,000 for work done by Valley for Mage Consultants. This was not approved by NIST officials.

d. Conceded as error by PI.

e-f. All internet related costs are as indispensable to computer technology as electricity and modems. The original proposal cites internet delivery of milestones. This unfathomable disallowance makes no sense because the proposed revisions to budget, would have corrected this erroneous categorization of these being "indirect" costs. The internet costs were in our original proposal and reflect the hostile and unconsidered orientation of Ms. Hayes.

B. Unconfirmed

C. See 4A above.

6.

A.

a. Conceded.

b. These legal fees were <u>never</u> claimed as NIST expenses.

c & d. A project without bookkeeping is a project without <u>any</u> controls. Both bookkeeping and clerical costs are integral <u>direct</u> costs.

e. <u>Emergency</u> repairs on a security problem with internet communication do not need <u>advance</u> approval.

B. $1,000 to the Chief Technical Officers 's brother for setting up projector. The projector was not approved by NIST officials, and the installation is not allowed.

B. CASI had no blank walls to project anything. CASI needed to make a projection screen because there were no blank walls for projection. CASI gives presentations regularly pertaining to our research, and this diffusion of research findings is a direct cost. The CTO's brother was in the conference room automation and video industry, and designs and specifies million dollar installations professionally for a major video manufacturer. The work he did for CASI for only $1,000 was more a donation than an installation contract. CASI needed light baffles and blackout shades, as well as the screen and projector.

C. $12,000 for subcontracting with ATG consultants.

C. These were ongoing post-inception costs, not a pre-project cost, utilizes a $1,000 per month retainer.

D. $400 to Axiom Inc., who helped with budget negotiations with NIST.

D. Project manager Benedict originally worked for this firm, which contracted him to CASI for $2,400, only 400 of which was paid with NIST ATP funds. Benedict was intimately familiar with CASI's NIST problems and agreed to join CASI despite these problems, as an employee for much less money then he would have earned otherwise.

E. $170 to Paypal, this was not approved by NIST officials.

E. Part of bookkeeping, solely, a direct project cost.

F. $16,656 for equipment installation that was capital improvements to the apartment.

F. See answer 4A. This should be approved under a budget revision.

7. Other: $57,035 in other costs are questioned because they were booked in Non-NIST books.

7. These were booked in a "not (yet) allocated" to NIST section. A budget revision allowing rent, electric, telephone, cleaning, computer software and other computer costs, including apartment capital renovations related to computers

and internet technology would add approximately $153,000 to this category. The breakdown is as follows:

Rent	$ 42,000
Electricity	16,735
Telephone & Modem	8,311
Cleaning	7,600
Computer Costs (including internet)	60,106
Apartment Renovations	18,424
Cost of Audit	16,500
	169,676

Exhibit II Payroll Reconciliation

Quarterly Payroll - Dr. Karron
10/1/01 - 6/30/03

Exhibit IV NIST ATP Project Timeline

2001 Pre Project

April 2001 CCNY Meeting with Marc Stanley
June 2001 ATP National Meeting
July 2001 Gate one Submission
August 2001 Gate two Submissions
September 2001 Gate three Oral Presentations
August 2001 Axiom and ATG retained to assist with grant negotiations
September 2001 Gate four Negotiations

2001 Project Launch

October 1 Effective Start of Project
October 8 Notification of Grant Start Retroactive
October 29 First Grant Payment
October 20 ATG and Axiom retained to help manage Grant
October 20 Meetings with ITAC on NY State Co funding
October 30 Dr. Karron makes Salary Advance and Pays Rent (major error repaid over remainder of year)
November xx Kickoff Meeting in Gaithersburg 2002
December Jill Feldman Certifies Accounting System
December 2001 Jill Feldman takes in Hayes as partner/prospective practice purchaser
December 2001 Hayes introduced to CASI, starts managing account
December 2001 First Budget Revision (Correcting errors in grant budget; requested by ATP)
December 2001 NIST Rebuffed visit to attempt budget negotiations.
December 2001 Request for Fiscal Control Specialist made

2002

January 2002: Discussions with ATP: Discussions about quarterly budget revisions
February 2002 Hayes Purchases CASI account
June 2002 Hayes First Engagement Letter
June 2002 Start Payroll / Hayes makes errors in NJ payroll
July 2002 Start Negotiating Budget revisions / submit budget.
July 2002 First Site Visit
July 2002 Notify Gurfein of non renewal of Contract
August 2002 Hayes Second Engagement Letter
August 2002 Begin repair of CASI books and taxes by Hayes
September DBK funding of project by non-paycheck withholding payments calculated by Hayes
October 2002 1 Start second project year
October 2002 Ross takes over for Gurfein: only mission is to obtain new budget.
October 2002 Site Visit re: George Wolberg, Lide and Orthwein meet Hayes, Peter Ross
October 2002 New Fiscal Plan clean sweep: Dr. Karron on regular payroll
October 2002: Request actual costs from Hayes for Budget submission by Ross;
November 2002: Hayes begins making threats to Dr. Karron of reporting non-compliance unless Hayes directives implemented.
December 2002: Hayes threatens to report name change to NIST; Memorandum of Law on name change and holdover contracts issues by CASI lawyers.
December 2002 Hayes asks for audit extension, Granted

2003

March 2002: Hayes misses extended audit, citing April 15 tax deadlines

March 2002: Robert Benedict agrees to come in as Project Manager, replacing Peter Ross; Change not acknowledged by NIST ATP
June 2003 OIG Audit visit; Project funding suspended
June 2003 CASI also hired Melvin Spitz, CPA, of Spitz and Greenstein and Professor Jerome Schwartz, CPA ESQ, of Solomon and Schwartz LLC, and Joseph Cornwall, CPA as a backup accounting team, after the OIG completed its fieldwork in June 2003.
July 2003 CASI revised its Financial Status Reports as requested.
October 2003 Joan Hayes releases Audit Report (1 year late)
November 2003 Presentation at MCCAII Montreal Canada
December 2003 Re-Audit by OIG with Spitz

2004

January 2004 MMVR Paper Presented
March 2004 Draft Audit Report Issued
April 2004 Answer to Draft Audit Report commenced

PROJECT KICKOFF MEETING

GENERAL INFORMATION

Project Management Team

Technical Specialist (Project Lead?)

Name
Phone number
Email address

Business Specialist (Project Lead?)

Name
Phone number

Kickoff Agenda

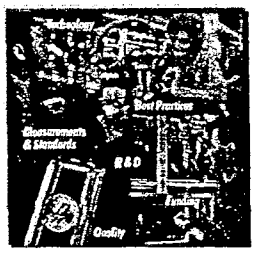
- Getting Started
  - General ATP information
  - FY2000 competition results
  - Understanding ATP's perspective
- Establishing Expectations
  - Project Management and Planning
  - Managing Change
  - Reporting Requirements
  - IPR, Human & Animal Subjects, Change in Name or Ownership
  - Closeout Procedures

ATP's Mission

*To accelerate the development of **innovative technologies** for **broad national benefit** through **partnerships** with the private sector.*

ATP is part of NIST

NIST Mission:
Strengthen the U.S. economy and improve the quality of life by working with industry to develop and apply technology, measurements, and standards.



- 3,300 employees
- $800 million annual budget
- 1,200 industrial partners
- 2,000 field agents
- 1,550 guest researchers
- $1.5 billion co-funding of industry R&D
- National measurement standards

NIST Lab Contacts

- *NIST Division*
  - *Contact info*
- *Intramural NIST Project*
  - *Contact info*

A Decade of Innovation

- Since 1990, 4,435 proposals submitted to 41 competitions, requesting $9.6B from ATP
- 522 projects awarded with 1,162 participants and an equal number of subcontractors
- 172 joint ventures and 350 single applicants
- $3.3 billion of high-risk research funded
  - ATP Share = $1.640 billion
  - Industry Share = $1.629 billion
- Small businesses are thriving
  - 59% of projects led by small businesses
- Over 100 universities participate
- Nearly 20 national laboratories participate

FY2000 Competition Results

417 Proposals Submitted

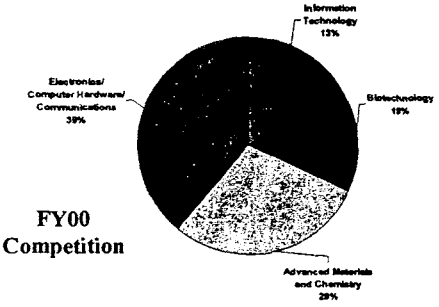
89 Semifinalists Selected

54 Awards Issued

- *15 joint ventures*
- *39 single applicants*
- *$144M ATP funding; $130M industry cost share*
- *$2.7M average award size*

54 ATP Awards by Technology Area

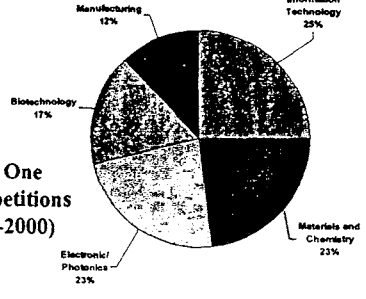
(As a Percent of $144 M Awarded)



FY00 Competition

522 ATP Awards by Technology Area

(As a Percent of $1,640 M Awarded)



Forty One Competitions (1990-2000)

Two Major Criteria

- Scientific and Technological Merit (***50%***)
  - Technical Rationale
    - Technological Innovation
    - High Technical Risk & Feasibility
  - R&D plan
- Potential for Broad-Based Economic Benefits (***50%***)
  - Economic benefits
  - Need for ATP funding
  - Pathway to Economic Benefit

National Economic Benefits

ATP Perspective

ATP cares about the totality of benefits and costs for the nation

Private Investor Perspective

Private investors care about near term return on their investment (the revenues/costs that affect profitability)

INTELLECTUAL PROPERTY

Intellectual Property Protection

- ATP protects your intellectual property
- Proprietary technical and business information is exempt from FOIA
- Mark all documents "proprietary"
- E-mail may not be secure

Intellectual Property Provisions

- U.S. for-profits may retain title to inventions
- Companies may license inventions
- Universities/non-profits may receive royalties; cannot own title; cannot be granted exclusive license to inventions
- Any recipient may hold copyright or trademark
- Government reserves right to paid up, royalty-free non-exclusive license for governmental use; not exercised to date

CHANGE IN NAME OR OWNERSHIP

Change in Name or Ownership

- Report any change in name or ownership to your Grants Specialist in writing within FIFTEEN days that it becomes legally effective
- Grants Specialist will provide samples of documents needed
- If you are no longer majority U.S. owned or controlled, a foreign eligibility finding will be carried out
- Refer to "ATP Eligibility Criteria for U.S. Subsidiaries of Foreign-Owned Companies: Legislation, Implementation, and Results"

Research Involving Human and Animal Subjects (short version)

General Information

- See the ATP booklet titled "Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects"
- Request a copy by calling 1-800-ATP-FUND

Human and Animal Subjects Modifications

- Notify ATP well in advance if your research project will be modified for changes in the use of, or to include, human and/or animal subjects
- Call your Project Technical Specialist or Mr. Tryn Stimart at (301) 975-8779

Research Involving Human and Animal Subjects (long version)

General Information

- See the ATP booklet titled "Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects"
- Request a copy by calling 1-800-ATP-FUND

Human Subjects Research Examples

- **Bodily materials** such as cells, blood, urine, tissues, hair, organs, even if you did not collect the materials
- **Humans to test research output** such as products, software usability, human-machine interfaces or materials
- **Data collected** through intervention or interaction with individuals, including data from voice, video, digital or image recordings made for research purposes
- **Private information or data** that can be readily identified with an individual, including genetic information, medical records, worker surveillance studies, even if you did not collect the information
- **Human studies** involving categories or classes of subjects such as certain types of workers in an organization

Human Subjects Regulations

- NIST requires full compliance with all federal guidelines, regulations and presidential policies
- Human Subjects Protection regulations for DOC are found at 15 CFR Part 27
- Regulations for the protected classes are found at 45 CFR 46 Subparts B, C and D

Human Subjects Approvals

- All research involving human subjects must be approved by NIST prior to beginning
- All non-exempt research must be reviewed and approved by an Institutional Review Board (IRB)
- Under no circumstance can members of the protected class defined in Subpart B be added to research projects after the award has been issued

Human Subjects Exemptions

- NIST will determine if the use of human subjects qualifies for an exemption. The following items should be submitted to the Project Technical Specialist in order to process an exemption request:
  - ✓A written request for an exemption
  - ✓Answers to Appendix 3 or 4 of the ATP booklet on human and animal subjects

Human Subjects Non-exempt Research

- NIST is required to review requests for non-exempt research prior to beginning use of human subjects
- An Institutional Review Board (IRB) must review and approve the research
  - ✓The NIST IRB cannot perform this review
  - ✓NIST cannot provide IRB services
- The IRB must have an assurance
  - ✓MPA on file with OHRP(NIH)
  - ✓SPA with NIST (limited circumstances)

Human Subjects Deferred

- Previously deferred research involving human subjects is allowed to begin after NIST has reviewed and approved the research
- Depending on the type of research, please follow the guidelines and documentation requirements

Animal Subjects Assurances/Certifications

- Each institution housing and caring for animals must have and maintain an appropriate certification for animal welfare throughout the research involving animals:
  - ✓USDA Certification
  - ✓AWA Assurance
  - ✓AAALAC Accreditation

Animal Subjects Approvals

- All Animal Study Protocols (ASP's) must have IACUC review and approval prior to beginning use of animals
- A copy of the approved ASP, the IACUC approval letter and assurance/certification documentation must be submitted to ATP and approved in advance of using animals

Human and Animal Subjects Modifications

- Notify ATP well in advance if your research project will be modified for changes in the use of, or to include, human and/or animal subjects

Project Management and Planning

Project Management Objectives

- Maintain fidelity to the cooperative agreement
- Continued application of the criteria to the project
- Monitor progress through reports and other communications
- Monitor technological and business environments
- Company makes all business decisions

ATP Project Team Roles

- Project Lead (maybe Tech or Bus Specialist)
  - general oversight and PM functions
  - ensures that the project is executed in accordance with the proposal and the award
  - recommends appropriate actions to NIST Grants Office
- Technical Specialist
  - reviews technical reports and progress against milestones
  - provides technical support as needed
- Business Specialist
  - business and commercialization issues
- NIST Grants / Cooperative Agreement Specialist
  - grants administration
- Technical Advisor
  - a technical resource to entire project

Awardee Project Team

- Make sure your team is integrated
- PI and company's business team need to be working together to accomplish long term commercialization goals
- PI needs to be familiar with terms and conditions of award
  - many have technical implications for the project

Project Management Tools

- Site visits
  - kickoff meeting, annual reviews, close-out meeting
  - additional, if required
- Technical and business reports
- Audits
- Open communications
  - phone, email, etc.
- Long-term evaluation

Project Milestones

- **Essential element for measuring project progress:**
  - Defines qualitatively & quantitatively what it means to overcome technical barriers
  - Integrates the efforts of project tasks
  - Advances the state of the technology
  - Describes the project's achievements
  - Provides foundation for reporting project activities and accomplishments

Project Milestones (cont'd)

- How ATP uses milestones:
  - Encapsulates the scope and merit of original goals
  - Helps in the assessment and comparison of alternative pathways
  - Supports flexibility in the project by defining critical project points
  - Provides foundation for decision point analysis

Barriers/Tasks/Milestones

- Barriers
  - technical blocks that prevent technology from working today
- Tasks
  - steps required for achieving milestones
- Milestones Track
  - overcoming a technical barrier
  - advancing the level of technology
  - integration of tasks into quantifiable/measurable achievement

Annual Reviews

- Comparison of previous year's accomplishments to milestones
- Comparison of budget vs. progress
- Problems / challenges /opportunities
- Review of technology in light of global advances in technology and market changes
- Commercialization and market developments
- Establish and achieve mutual understanding of technical milestones and business plans for the upcoming year

Project Renewals

- Timeline
  - Obligation of next year's funds (typically done in the second quarter of the calendar year)
  - Authorization to spend next year's funds (close to actual renewal date)
- Requires
  - prompt submission of complete technical and business reports
  - approval of revision of any project elements that changed or will change (i.e., tasks, budget)

Managing Project Change

What Kind of Change Matters?

- Any change in the project that can significantly impact the relationship between the project and ATP's criteria and/or the terms and conditions of the award

Change Happens!

- Change is to be expected in conducting innovative, high risk research
- Keep your ATP Project Lead and Grants Specialist informed of possible changes
- ATP encourages change that strengthens the project against the criteria and makes project success more likely.

We Need to Talk When a Change Could Impact...

- Milestones, decision points, plans, and task timeline
- Risk profile
- Commercialization plan and national economic benefits
- Budget
- Human and/or animal subjects protocols
- JV agreement
- Company ownership or name

Managing Change

- Identify potential or actual change and notify ATP early
- Pursue consistent and auditable decision making
  - simplifies project audits re: prior approval/appropriateness
  - protects award recipient from being at risk for costs
  - maintains peer reviewed merit of projects
  - enables ATP to correctly track all project benefits
- Change will likely be approved if it results in a project that is equivalent or stronger against ATP's criteria

Written Prior Approval Required for

- Significant changes to the technical plan/tasks/approach from the approved proposal
- Changes in key personnel
- Sole source procurements (equipment or subcontracts) in excess of $100,000
- Changes in joint venture membership
- Transfer of funds among direct cost categories exceeding 10% of the total annual budget (inc., indirect costs for JVs and for large SAs)
- Continuing the project after an ownership change (e.g., acquisition)
- Change in the use of human and/or animal subjects
- Addition of subcontractor(s)

Reporting Requirements

Reporting During Award

- Financial Reports and Audits
  - contact: Grants Specialist
- Technical Reports
  - contact: ATP Technical Specialist
- Formatted Business Reports
  - contact: ATP Business Specialist or ATP-EAO's Jeanne Powell 301-975-4196

Reports Are Used For ...

- Project monitoring
- Renewals
- Documenting project changes
- Short and long term evaluation

Financial Reports and Audits

See Grants Specialist's presentation

Technical Report

- Due within 30 days after end of each calendar quarter
  - reporting periods: Jan.-Mar., Apr-June, July-Sept. and Oct.- Dec.
  - reports due: April, July, October, January
- Prepared by principle investigator and R&D team
- Integrated JV technical report compiled and finalized by lead company
- Submit complete report to ATP Project Lead or Technical Specialist
- Provide copy to Grants Specialist

Technical Report Content

- Executive Summary
  - brief statement of project and its end objectives
  - significant accomplishments during reporting quarter
  - perspective on status of project in terms of final technical and business objectives
- Project objectives
- Project baseline
  - assess technology at start of project to current state of art
  - status of technology at large; within team
  - allows for future assessment of project progress
- Technical Milestones
  - key remaining ones for the year

Technical Report Content (cont'd)

- Technical progress and impact
  - report against milestones and metrics
  - technical findings this quarter and implications for future progress
  - Gantt chart helpful
  - Identify work and progress of each participant (incl., subcontractors)
- Problems or opportunities
- Potential project changes
- Highlight any business developments of interest (copy this info to business quarterly short-from report)

Business Reporting Requirements

- Notification from ATP-EAO on business reports and their requirements
- Letter from ATP-EAO explaining on-line reporting system
- Each award recipient will receive a company-specific password for online submission
- Each JV participant submits separate reports directly to ATP

Business Reporting Requirements (cont'd)

- ATP-EAO will send formatted reports to award recipients to fill out either online or in hard copy (see next slides), including
  - baseline report
  - annual reports
  - quarterly reports
  - close-out report
  - three post-award reports (currently telephone survey)

Business Reporting Online: Baseline, Annual, Closeout

- All ATP award recipients (incl., JVPs) will file the following business reports on-line via the ATP web-based system
  - baseline reports are due to ATP within 30 days after end of first calendar quarter
  - annual reports are due to ATP within 30 days after the end of anniversary quarter
  - closeout reports are due to ATP within 90 days after project end

Business Reporting: Quarterly Short-Form Reports

- One page document that is due 30 days after 2nd, 3rd and 4th quarters
  - submit by hard copy, fax or e-mail
- Award recipient will review and update organization, address, telephone, and contact information
- Award recipient will report significant business developments occurring during the quarter

Content of Business Reports

- General company information
- Business goals and objectives
- Target application areas
- Commercialization strategies
- Collaboration experiences and activities
- Strategies for IP protection and diffusion
- Progress towards commercialization
- Short- and long-term economic impacts

Content of Business Reports (cont'd)

- Update on competitive factors
  - company's position relative to major competitors
  - current status of the technology (for project baselining)
  - major cost and/or performance drivers
  - project fit within company's strategic vision
- Future investment plans

Summary of ATP Business Reporting System

- Brevity is built in
- Comprehensive
- Confidential-participant level of information

	Reporting Schedule			
	Baseline	Quarterly	Annual	Close-out	Post Project
• Business Plans	✓				
– Identification of applications					
– Strategies for commercialization, protection of IP, and dissemination of non-proprietary information					
• Significant business developments		✓			
• Update of business plan and progress		✓	✓	✓	
• Collaboration experiences		✓	✓		
• Attraction of new funding		✓	✓	✓	
• New IP		✓	✓	✓	
• Technology diffusion		✓	✓	✓	
• Company financial data		✓	✓	✓	
• Next 5 years--Technical & Business Goals			✓		
• Effects outside your organization			✓		✓

Closeout Procedures

Closeout Procedures

- ATP will conduct a closeout meeting within 30 days of award completion
- Company will be responsible for having an independent audit performed on all award expenses
- Award recipient will be responsible for submitting final quarterly progress reports, a final technical report, and a final business report

Closeout Meeting

- Review requirements for completing closeout
- Project team and ATP staff will assemble to review entire ATP project
- Award recipient will compare technical accomplishments against milestones
- Project team will discuss any technical activities or remaining barriers for project success
- Project team will discuss current business activities and keys to move project through to commercialization

Final Technical Report

- Due within 90 days following project completion
- Summarize work performed during entire ATP project
- Discuss technical barriers overcome and milestones achieved
- Discuss plans to achieve any remaining technical milestones
- Review application specific commercial plans and partnering activities
- Final quarterly report due 30 days after project completion (a different report than final technical)

Final Business Report

- Due within 90 days after project completion
- Document business achievements during project award and discuss future plans for commercialization
- File online via the ATP web-based business reporting system

Post ATP Involvement

- Award recipient will be asked to participate in a telephone interview to update commercialization activities and other impacts of the project, every 2 years for a total of 6 years beyond project completion
- Award recipient may be asked to participate in studies conducted through ATP-EAO to:
  - evaluate the success of ATP in achieving its goal of assisting U.S. businesses in technological development to promote U.S. economic growth

OMB Approval No: 0693-0009
Approval Expires: November 30, 2003

EXHIBIT 14

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in Gate 2. The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided:

Budget Data
Proposal Number _00-00-4607_
Name of Company _Computer Aided Surgery, Inc. **Year _2001**

A. **Personnel** – List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
Dr. D. Karron, P.I.	$175,000	100%	$175,000
Mr. E. Gurfein, Project Manager	$133,333	75%	100,000
Math and Graphics Programmer (TBD)	$100,000	25%	25,000
Systems Administrator	$75,000	100%	75,000
Network Programmer (TBD)			

TOTAL $375,000

B. Fringe Benefits – Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34.0 % check here if included in indirect:

If percentage rate exceeds 35%, provide breakdown:

TOTAL $127,500

C. Travel – Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
Paper Presentation @ Medicine Meets	Newport Beach, CA	Air, hotel, per diem	1 person, 3trips	$4,000

Travel justification for foreign travel and conferences:

TOTAL	$4,000

D. Equipment – Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
SGI Workstation	1 each		$20,000
SGI Server	each		$65,000
Linux Server + RAID	each		$20,000
Linux Workstations	$5,000 each	x3	$15,000

Justification for any item over $100,000, or construction costs:

TOTAL $120,000

E. Materials/Supplies – Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost

TOTAL $0

Subcontractors – For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
NYU Medical Center	**Clinical Consultant** **250 Hours B. Ellerin, MD** **250 Hours K. Dewyngaert**	**500 Hours @ $200/Hour**	**$100,000**
CUNY CISDD	**Algorithm Development Consultant** **1000 Hours Jim Cox, PhD** **1000 Hours Michael Anshel, PhD**	**1000 Hours @ $ 100/Hour**	**$100,000**
		Subtotal	**$200,000**

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost
		Subtotal	
		TOTAL	**0**

G. **Other** – Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audits	First Year	$10,000

TOTAL $10,000

H. **Indirect Costs** –Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost
Internet Service		$6,500

TOTAL $6,500

Percentage Rate	Computation	Cost
Internet Service	%54 of $6,500	$3,500

TOTAL **$3,500**

Materials and supplies: This category is increased to $35,000 due to increased supply needs because of the larger amount of onsite work.

Decrease in consultant fees: There is a decrease in consultancy fees from 250,000 approved to $101,500 actually used due to the larger amount of onsite work.

Increase in equipment purchases: There is a partially offsetting increase in equipment purchased from 110,000 to 223,300. In addition, equipment was purchased in year 1 that was not paid for with year 1 funds. These equipment purchases total 88,000. It is requested that these purchases be made from the year 2 budget for reasons explained under "Transfer of Year 1 equipment charges to year 2."below.

Conversion of consultant fees to equipment: The task breakdown in the approved year 1 budget reflects an approximately even split between salaries and equipment. However, in the original approved budget, request was made for more consultancy fees. It was felt that programming could be outsourced and done at home on pc. Early on in the project, it was found that work was not progressing when outsourced this way. It was found that the PC environment could not handle the workload of heavy image processing. In addition, one contractor was working at home on a Sun Computer Systems environment and was unable to get his code to run on the machines in CASI. It was therefore decided to do all development in the actual CASI shop. In order to get more control over the project, it was further decided to have all personnel work on site. Accordingly, the increase in equipment basis reflects a decrease in the amount spent on consultancy fees. It was decided to get better value from equipment purchases than from the one-time services of outsourced work. By means of this change, Dr. Karron has in fact strengthened the business plans considerably. As the work in years 2 and 3 unfolds, availability of these high-powered computers will make the services more widely available. This consolidation increases accessibility of CASI services to potential clients. When appropriate IRB approvals are available, this will make it even more attractive for physicians in the local community to use the service for their data.

Transfer of Year 1 equipment charges to year 2.The amount of $88,000 is requested to be transferred from year 1 to year 2 of the grant. Year 1 equipment spending exceeded the original budgeted amount for the reasons described above. SGI provided one machine on permanent loan. A second graphics super workstation was ordered and delivered in January but not billed until late September. When we asked them whether this machine was part of their support of CASI's project, they gave indirect answers. An invoice was requested repeatedly by CASI. SGI sent a statement, at our request acting on an ATP suggestion, showing no balance due. It looked like this machine was a contribution from SGI to CASI for the NIST project, and Dr. Karron had several conversations with SGI employees on this topic. Then, unexpectedly, SGI back billed CASI $35,000 without the benefit of discounts they applied to a third machine purchased subsequently. Having already adopted a policy that all programming must be done on site, CASI found it needed the machine. At present, therefore, CASI feels that the most prudent course is to renegotiate the bill and pay it from year 2 funds. After receiving evidence that the first bill was not going to b e rendered, CASI decided to use then available equipment funds to buy a third machine, at a 60% discount. This machine was a low-end superworkstation with two graphics heads permitting two people to simultaneously work on the same machine. This machine was found to be highly valuable to our work for this reason. These items, and additional $14,000 to Silicon City needed to replace a heat related RAID failure to provide comprehensive, high density backup of all our computer systems, and the balance in miscellaneous technology glue are necessary expenses in use and vital to the project. All the bills were either unexpected or came

due right at the juncture of years 1 and There remained no money in year 1 budget. It is therefore requested to transfer the amount for these items to the year 2 budget.

Reduction in investigator matching funds to the grant and increase in costs absorbed:
We propose budget changes to reflect the fact that unexpected personal taxes are reducing the available funds the PI can use to match ATP supplied funds. Currently, the only available source of matching funds is from the PI's salary, which is taxed in the approximately 50% tax bracket. Instead of the anticipated 175 + fringes K the PI considered abundant for co-funding the project, the PI now nets approximately 85K, which is in midtown not a even considered a middle class income. With a co-funding contribution of 36,500 that leaves about 49K for living expenses and for CASI overhead funding. The PI has had to borrow 30K to help fund the first year and still was unable to make the full contribution. There exists the real possibility the PI will run out of salary in project year 2 to make the year 2 co-funding requirement and repay the first year loan. This was unanticipated during the original budget drafted last year. There has been serious controversy about what is a direct and chargeable cost element and what is not. The PI is paying a significant number of overhead and direct costs; the urgency of the need obtaining matching funds has not been lost. This is going to be an important uncompensated task of Dr. Ross. This was a major factor in Mr. Gurfein's abrupt departure at the end of year one.

Year 3 budget: Year 3 revisions reflect changes in years 1 and 2. Year 3 salaries reflect small cost increases and an increase in project involvement by Mr. Rothman. $15,000 travel is requested mainly for the dissemination of findings and publicizing the availability of the techniques developed under the grant. A significant request for equipment ($65,000) is included because of the heavy reliance of the project on high end computing and the consequent need to ensure availability of adequate computing power to process and display data. A slot is requested for "miscellaneous programmers" to assist with front-end development and refinement. We are really looking for a salaried person, but we do not yet have continuation funding, and we prefer to bring new people in as consultants to see how they work with the group. We have also had excellent experience with Dr. Karron's students hired on a semester-to-semester basis. Overall, the year 3 budget is a natural extension of the year 2 budget leading to the wind-up of the project.

ESTIMATED MULTI-YEAR BUDGET - SINGLE COMPANY

	YEAR ONE	YEAR TWO	YEAR THREE	TOTAL
1. OBJECT CLASS CATEGORY				
A. Personnel Salaries/Wages	$ 322600	$ 331000	$ 350000	$ 1003600
B. Personnel Fringe Benefits	109700	112000	119000	340700

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in **Gate 2**. The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided:

RE: Cooperative Agreement No. 70NANB1H3050

Dear Dr. Karron:

In response to your e-mail dated July 16, 2003, the money in your bank account does not constitute cost share. To qualify as cost share, you would have to actually apply your contribution to the project cost.

In order to resolve amendment #6 "non-compliance of Special Award Condition #7, Cost Share," you need to refund to the government your applicable portion of the project cost and resubmit corrected 269's reflecting that contribution.

In reference to your proposed in-kind contribution, you cannot claim the full cost of pre-owned equipment. According to the Cost Principals you can only claim fair use allowance (rental). If you need additional information, please contact Hope Snowden at (301) 975-6002 or via e-mail at hope.snowden@nist.gov.

Sincerely,

Marilyn Goldstein

RE: Cooperative Agreement 70NANB1H3050
Resubmission of SF262

Dear Hope and Marilyn;

The attached originals were mailed to me to Canada in August by Bob Benedict, my business manager for my signature and lost in the mail.

I resubmitted copies, but now that the originals have returned a month late, I hereby submit the The originals as Bob prepared them and as I have signed them for your records.

Please excuse the delay; please also understand that non of us are being paid and as such it is hard to keep the focus of what remains of the staff on this project at this late date.

Similarly, I hope to have Joan Hayes Audit, now almost a year late, shortly. I have been unable to get her to focus on getting her job done, and I apologize for her latness.

Sincerely,

Dr. Karron

Subject: Dialogue and Fax Number

Dear Ms. Snowden;

When you have your written response in hand, I would appreciate a fax advance copy at 212 448 0261 so that we can respond as rapidly as we are able.

It is coming up on a month already with this suspension, and I have arranged for emergency credit lines and I have drawn hard on these credit lines.
At this point I am paying for the money to sit idyll in the NIST checking account praying for project resumption.
I am keeping my key employee from going on unemployment or another job paying his payroll out of pocket, and Jim Cox and Bob Benedict are most graciously donating their time.
Our University of Delaware/Christiana Medical Center collaboration is moving forward, and our state ITAC contact is trying his best to find state co-funding and partners.

We intend to complete the next quarterly technical report despite these business setbacks and progress is continuing.
We are submitting our most recent results to MMVR for presentation next January.
We are working on the assumption that we can cure all problems and move our research forward at an even faster rate now that we are becoming a well oiled team.
I hope we can recover from our first year problems, and I believe I have a business manager I trust and respect and I trust
can work with you if you give us a chance to prove it to you.

Sincerely,

Dr. Karron

Re: Cooperative Agreement 70NANB1H3050, Amendment No. 6

Subject: Request for lifting of award suspension

Dear Ms. Goldstein;

This letter is to inform you that CASI LLC has made cash deposits into the CASI NIST Project checking account (JPMorgan-Chase Bank Account XXXXXXXX3166) totaling $47,000.00. This funds in part the CASI contribution of $67,000.00, as required by cooperative agreement 70NANB1H3050, Amendment No. 6, through the end of the current fiscal year through September 30, 2003

Additionally, CASI is providing $20,100.00 as 30% of its $67,000.00 contribution as an "in-kind" contribution, based on invoice or fair market value assessment noted in the attached spreadsheet and supporting documents. The equipment valued in the attached was purchased with CASI funds prior to the start of this current award, but has been used 100% for our current NIST project.

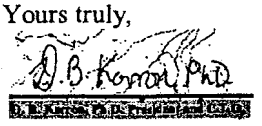
CASI has made, in good faith, previous match contributions totaling $16,600.00, however these were later re-classified as non-match by our accountant. The Project PI has taken a second mortgage on the project apartment to cover the new re-match payments made since the suspension.

Mr. Robert Benedict, our Administrator and Business Manager of CASI LLC has established management controls and procedures that will ensure the appropriate amount of Member Contribution will be made at the appropriate time for any future ATP fund draw to prevent this problem from happening during the remaining course of this year funding when resumed, and at any point in the future.

C. A. S. I.
Computer Aided Surgery, Inc.

Finally, with the CASI Member Contribution now met through the end of the second project year, as supported by the appended documents, CASI respectfully requests the lifting of the grant suspension amendment so that our research project may continue.

Yours truly,



Enc:

Re: Cooperative Agreement 70NANB1H3050, Amendment No. 6

Subject: Request for lifting of award suspension

Dear Ms. Goldstein;

This letter is to inform you that CASI LLC has made cash deposits into the CASI NIST Project checking account (JPMorgan-Chase Bank Account XXXXXXXX3166) totaling $47,000.00. This funds in part the CASI contribution of $67,000.00, as required by cooperative agreement 70NANB1H3050, Amendment No. 6, through the end of the current fiscal year through September 30, 2003

Additionally, CASI is providing $20,100.00 as 30% of its $67,000.00 contribution as an "in-kind" contribution, based on invoice or fair market value assessment noted in the attached spreadsheet and supporting documents. The equipment valued in the attached was purchased with CASI funds prior to the start of this current award, but has been used 100% for our current NIST project.

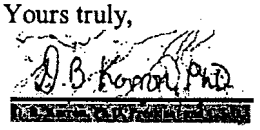
CASI has made, in good faith, previous match contributions totaling $16,600.00, however these were later re-classified as non-match by our accountant. The Project PI has taken a second mortgage on the project apartment to cover the new re-match payments made since the suspension.

Mr. Robert Benedict, our Administrator and Business Manager of CASI LLC has established management controls and procedures that will ensure the appropriate amount of Member Contribution will be made at the appropriate time for any future ATP fund draw to prevent this problem from happening during the remaining course of this year funding when resumed, and at any point in the future.

C. A. S. I.
Computer Aided Surgery, Inc.

Finally, with the CASI Member Contribution now met through the end of the second project year, as supported by the appended documents, CASI respectfully requests the lifting of the grant suspension amendment so that our research project may continue.

Yours truly,



Enc:

Dan,

It is not clear from what is written whether CASI plans to use ATP funds in some capacity of the collaboration you propose with Dr. Buckholz at SLU. If this is the case, you must notify ATP and provide the associated paperwork to request authorization for the addition of a subcontractor and to modify the budget.

Thanks,

Jayne

CASI 6Q Report.pdf

Joan M. Hayes

From: dr d b karron [karron@casi.net]
Sent: Tuesday, December 31, 2002 2:58 PM
To: Joan Hayes CPA
Subject: Payroll/Tax Amnesty/Happy New Year

Dear Joan;

Would you mind if I sent you all of my paper CASI checks (I have them all scanned in color) For safekeeping/final resting place/recycleing ?

Also, I am concerned about making my co-investment for this year. I realized from getting yelled at by Hope that I need to deposit my co-investment The same time I transfer money from ASAP at the co-investment rate called out On the approved budget.

So if my co-investment is .06 somehting... Like 6.25 percent.. I will move some money and we need to do the cash rec reports together ; They need to be done for each month.

Independent Auditor's Report
Schedule of Budgeted and Actual Fund Sources and Project Costs

To the Members of
CASI LLC

We have audited the accompanying Schedule of Budgeted and Actual Fund Sources and Project Costs (the "Schedule") of CASI LLC ("CASI") for the year ended September 30, 2002. This Schedule is the responsibility of the management of CASI. Our responsibility is to express an opinion on the Schedule based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and Government Auditing Standards issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the Schedule is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the Schedule. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the Schedule. We believe that our audit provides a reasonable basis for our opinion.

The accompanying Schedule was prepared for the purpose of complying with the award requirements of the Advanced Technology Program ("ATP") Cooperative Agreement Number 70NANB1H3050 entered into by Computer Aided Surgery, Inc. (the predecessor company to CASI LLC) and the U. S. Department of Commerce as described in Note 2. The Schedule was prepared in conformance with the award requirements which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

The Schedule includes certain project costs which we questioned as allowed costs based on the standards and cost principles to which adherence is required under the terms and conditions of the ATP Cooperative Agreement. In our opinion, if these questioned costs, as described in our Schedule of Audit Findings and Questioned Costs, which also accompanies this report, are determined to be disallowed, the total direct project costs would be reduced by $178,776.

In our opinion, except for the effects to the matter discussed in the preceding paragraph, the Schedule of Budgeted and Actual Fund Sources and Project Costs referred to above presents fairly, in all material respects, the sources of funds and project costs of CASI for the year ended September 30, 2002 in conformity with the basis of accounting described in Note 4.

This report is intended solely for the information and use of the members and management of CASI and the U. S. Department of Commerce and is not intended to be and should not be used by any other parties.

CASI LLC
Notes to Schedule of Budgeted and Actual Fund Sources and Project Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

1. **Business Activities**

CASI LLC ("CASI") performs basic research to bring computer aided design and manufacture to surgical specialties and radiation-oncology. CASI's approach is to move beyond the state of the art in telerobotics and augmented reality and focus on hard mathematical issues not currently addressed by the state of the art. CASI is advancing the state of the art in applied math by forging new theorems and software technology where needed to manage biological shape segmentation and by changing the connectivity of these using a novel concept of editing the Digital Morse Theory tree. CASI's objective is to use these and other means under development to provide precise and accurate anatomic models for a variety of medical and other applications.

Computer Aided Surgery, Inc. was incorporated December 12, 1995. Effective August 30, 2002, CASI LLC, a partnership, was established in New York State, and Computer Aided Surgery, Inc. merged into CASI LLC.

2. **Cooperative Agreement**

Computer Aided Surgery, Inc. (the predecessor company to CASI LLC) was the recipient of Advanced Technology Program ("ATP") Cooperative Agreement Award Number 70NANB1H3050 (the "Agreement") for Anatomic Computer Modeling for Precise and Accurate Therapies (the "Project") granted by the National Institute of Standards and Technology (NIST) of the U. S. Department of Commerce (DOC). The scope of work and budget included in this award cover a three-year period from October 1, 2001 to September 30, 2004 for a total amount of $2,000,000 in federal funds. The funding is limited to $800,000 during the first project year, and funding for the second and third years is subject to availability and written approval by the Grants Officer.

The terms of the Agreement require CASI to provide a share of the project costs. For the year ended September 30, 2002, the cost sharing ratio is 4.36% for CASI, and the federal contribution is 95.64%.

3. **Administration Requirements**

The terms of the Agreement require adherence to 15 CFR Part 14 which defines the uniform administration requirements for agreements awarded by the DOC.

4. **Summary of Significant Accounting Policies**

Basis of Accounting Presentation
The financial statements of CASI are prepared in accordance with the requirements of the Agreement which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America. Revenue is recognized upon receipt of the funds, and project costs are recognized when paid.

Project Cost Requirements
In accordance with the requirements of the Agreement, project costs must be incurred during the reporting period, be directly related to the Project, and be allowed under the:

- Federal Acquisition Regulations (FAR) System, Part 31, "Contract Cost Principles and Procedures";
- DOC Financial Assistance Standard Terms and Conditions;
- DOC Financial Assistance Award (Form CD-450) and any amendments thereto (Form CD-451); and
- ATP general terms and conditions and special award conditions of the Agreement.

Only direct costs, in accordance with applicable cost principles and award guidelines, are eligible for federal funding. Indirect costs are the responsibility of CASI and cannot be recorded as project costs.

Approved Budget
The terms of the Agreement require adherence to a budget and any budget amendments approved by NIST. The costs in any approved budget line-item that exceed 10% of the total approved budget for the year are not eligible for federal funding.

The most recent approved budget, for the year ended September 30, 2002, was dated December 27, 2001 under Amendment Number 2 to the DOC Financial Assistance Award.

Equipment
In accordance with the requirements of the Agreement, equipment is charged as a project cost when cash is disbursed for its acquisition, which is a basis other than accounting principles generally accepted in the United States of America.

Fiscal Year
The first project year was the fiscal year ended September 30, 2002.

5. Recipient's Contribution

In accordance with the requirements of the Agreement, as described in Note 2, CASI is required to provide 4.36% of the project costs for the first project year. CASI did not contribute its 4.36% share of the project costs expensed during the year ended September 30, 2002. Funding from other sources, which CASI anticipated at the inception of the Agreement, has not been awarded.

6. Direct Project Costs

Only those costs in accordance with the terms of the Agreement, as described in Note 4, are allowable as project costs and eligible for inclusion in the Schedule of Budgeted and Actual Fund Sources and Project Costs.

CASI LLC
Notes to Schedule of Budgeted and Actual Fund Sources and Project Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

7. Funds Carried Forward to the Second Project Year

As of September 30, 2002, federal funds provided for the Project exceeded the direct project costs. The excess funding was carried forward to the second project year.

8. Concentration of Risk

Since the Agreement is providing the single source of revenue for CASI, as described in Note 5, the completion of the Project is dependent upon the continuation of federal funding.

9. Related Parties

The Principal Investigator for the Project was the majority shareholder of Computer Aided Surgery, Inc. and is now the majority member of CASI LLC.

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
Project Salaries and Related Fringe Benefits	During our examination of payroll records, we noted that all of the salaries and related payroll taxes, which were paid by the award recipient during the year ended September 30, 2002, were recorded as project costs. We also noted that timesheets did not indicate the performance of services for non-project activities. Based on our employee interviews, review of individual responsibilities, and examination of contracts, we determined that three employees were compensated for services that were partly related to the ATP project and partly for non-project activities. The resulting questioned costs, which include a percentage of salaries and the related payroll taxes and other fringe benefits, are quantified below under the reporting line-items from the Schedule of Budgeted and Actual Fund Sources and Project Costs. The percentages used to determine the questioned costs were provided by the DOC Office of Inspector General auditor, as a result of her testing, and, based on our testing, appeared reasonable.	(see below)
Project Salaries - Technical	15% of the salary paid to the Principal Investigator was determined to be compensation for administrative, management, and other responsibilities not directly related to the ATP project.	$ 26,250
Project Salaries - Administrative	25% of the salary paid to the Business Manager was determined to be compensation for fundraising and other responsibilities not directly related to the ATP project. During our examination of the contract between the Business Manager and award recipient, we noted the expressed responsibilities of the Business Manager which included project related and non-project related activities.	25,000
	25% of the salary paid to the Administrative Assistant was determined to be compensation for bookkeeping, scanning, and other administrative responsibilities which were performed for the award recipient and not directly related to the ATP project.	2,337
Fringe Benefits - Technical	During our examination of expenditures for fringe benefits, we noted doctor, dental, and pharmacy bills, which were paid for medical services and drugs that were in excess of the health insurance coverage provided by the award recipient. These payments were made as reimbursements to the Principal Investigator or directly to the medical and pharmacy providers. In our opinion, such payments are not allowed by FAR 31 cost principles, as they do not appear reasonable for an organization in the financial condition of the award recipient, and they are not ordinary and necessary for such an organization. We also noted that a significant portion of the medical services billed were rendered prior to the start of the ATP project. Even if these costs were considered reasonable and, consequently,	38,661

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
	allowed by FAR 31, the terms of the ATP cooperative agreement require written approval from the NIST Grants Officer before costs incurred prior to the start of the project are allowed as project costs. No such documentation was provided for our review.	
	Employer payroll taxes, attributable to the salary costs for the technical employee questioned above, were determined to be not related to the ATP project, as described in the first audit finding.	1,326
	Other fringe benefits, including health insurance coverage and fitness benefits attributable to the questioned percentage of salary costs for the technical employee, as described in the first audit finding, were also determined to be not related to the ATP project.	1,047
Fringe Benefits - Administrative	During our examination of expenditures for fringe benefits, we noted that health insurance premiums were expensed for an individual who was not an employee of the award recipient. These costs were not directly attributable to the ATP project.	3,340
	Other fringe benefits, including health insurance coverage and child-care benefits attributable to the questioned percentage of salary costs for the administrative employees, as described in the first audit finding, were determined to be not related to the ATP project.	2,281
	Employer payroll taxes, attributable to the salary costs for administrative personnel questioned above, were also determined to be not related to the ATP project, as described in the first audit finding.	2,257
	During our examination of expenditures for fringe benefits, we also noted doctor and dental payments, for administrative personnel, for medical services that were in excess of the health insurance coverage provided by the award recipient. In our opinion, as expressed above for comparable benefits paid on behalf of a technical employee, such payments are not allowed by FAR 31 cost principles, as they do not appear reasonable for an organization in the financial condition of the award recipient, and they are not ordinary and necessary for such an organization.	707
	During our examination of expenditures for fringe benefits, we noted that transit checks were purchased for the use of employees, but documentation was not provided for our review to evidence the distribution of the transit checks to individual employees and to document the adherence of such distributions within the limits defined by Regulation 1.132-9 of the Internal Revenue Code. The	639

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
	terms of the ATP cooperative agreement require adherence to federal laws before a cost can be allowed.	
	During our examination of expenditures for fringe benefits, we noted that worker compensation insurance premiums were paid for a period beyond an employee's termination. In our opinion, such premiums should be refunded by the insurance carrier and not be allowed as project costs.	130
	During our examination of expenditures for fringe benefits, we noted a penalty paid to the State of New Jersey for late filing of an employment tax return. FAR 31 cost principles do not allow payments of fines and penalties as project costs.	29
Travel and Meals	During our examination of travel expenditures, we also noted various local and long distance travel expenses which were not directly related to the ATP project.	553
	During our examination of travel expenditures, we noted the payment of a parking ticket to the New York City Department of Revenue that was recorded as project travel. As previously stated, FAR 31 cost principles do not allow the payment of fines and penalties as project costs.	55
Materials and Supplies	During our examination of expenditures for materials and supplies, we noted that bank charges, which were not directly related to the ATP project, were recorded as project costs.	133
Subcontracts - Technical	During our examination of payments to subcontractors, we noted that payments were made to Advanced Technology Group for billings which were dated prior to the start of the project. The written approval from the NIST Grants Officer, which is required for these costs to be allowed, was not provided for our review.	9,000
Subcontracts - Administrative	During our examination of payments to subcontractors, we also noted that payments which were made to an individual for services rendered to clean both the residential and business areas of the Principal Investigator's apartment were recorded as project costs. The costs related to maintenance of the business area, as may be related to the ATP project, could not be identified from the documentation provided. The terms of the ATP cooperative agreement do not allow single companies, such as the award recipient, to record indirect costs as project costs.	4,819

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
Other - Direct Utilities	During our examination of expenditures for direct utilities, we noted that invoices for telephone and pager bills did not provide the information to identify those costs that may be directly related to the ATP project. As stated above, the ATP cooperative agreement does not allow indirect costs.	1,375
	During our examination of expenditures for direct utilities, we also noted that a payment to Thorn for network services, which was recorded as a project cost during the first project year, was for services that were provided prior to the start of the project. The written approval from the NIST Grants Officer, which is required for these costs to be allowed, was not provided for our review.	285
Other - Professional Services	During our examination of expenditures for professional services, we noted that fees were paid and recorded as project costs for legal services that were not directly related to the ATP project.	842
	Total questioned costs for expenditures listed above	121,066
Equipment Budget	During our testing of project costs and budgeted amounts, we noted that equipment costs exceeded the budgeted amount by more than 10% of the total budget. The terms of the ATP cooperative agreement do not allow costs which exceed the budgeted amount by more than 10% of the total budget. These costs would otherwise be allowable under FAR 31 cost principles:	
	• Total equipment purchased and recorded as project costs	223,503
	• Approved equipment budget	(110,000)
	• 10% allowed excess	(83,650)
	Total questioned costs for ineligible equipment	29,853
Cost-Match	During our examination of the Schedule of Budgeted and Actual Fund Sources and Project Costs, we noted that the ATP award recipient did not contribute its matching share of project costs as specified in the ATP cooperative agreement.	
	• Cost share as specified in the ATP cooperative agreement at 4.36% of project costs reported in the Schedule of Budgeted and Actual Fund Sources and Project Costs (4.36% of $789,841)	34,437
	• Impact of all questioned costs listed above on cost-share (4.36% of $150,919)	(6,580)
	Total questioned cost-match	27,857

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
Other Uses of Federal Funds	During our examination of cancelled checks, we noted that certain expenditures of the award recipient, which were not directly related to the ATP project, were paid with federal funds provided for the ATP project. These payments were made to the Principal Investigator for rental expense, at the monthly rate of $2,000, for the use of his apartment as office space for 11 months during the first project year and for 19 months prior to the start of the project. Our examination of the Schedule of Budgeted and Actual Fund Sources and Project Costs revealed that these expenditures were not recorded as ATP project costs. However, the payment of these expenditures from federal funds has resulted in a shortfall in the ATP project bank account and, consequently, is payable to the ATP project.	60,000
	During our examination of the check register, we noted that federal funds provided for the project had been disbursed as salary advances to the Principal Investigator and loans to the award recipient with subsequent repayments from salaries, the reimbursement of business expenses, and cash deposits. The use of these funds for non-project expenditures was in excess of repayments. The terms of the ATP cooperative agreement do not allow such advances and loans, and, consequently, the balance due is payable to the ATP project.	9,651
	Total questioned costs for other uses of federal funds	69,651
	Total questioned costs	$248,427
Funds Carried Forward	The use of federal funds for non-project expenditures and loans, described above under Other Uses of Federal Funds, impacts the cash balance maintained by CASI in the ATP project's bank account as of September 30, 2002 and, consequently, the Funds Carried Forward to Second Project Year in the Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002, as follows: • Cash balance/(deficit) $(59,492) • Due from CASI for other uses of federal funds 69,651 • Funds Carried Forward to Second Project Year $ 10,159	(see above)
Procedures	During our review of operating procedures, we noted the following weaknesses: • Written procedures for the ATP project were not available for our review until such procedures were drafted by the newly appointed Business Manager subsequent to the year ended September 30, 2002. These procedures were being implemented and further developed as of the date of our report. • In our opinion, the written procedures, which were in the	n/a

Item	Audit Findings	Questioned Costs
	development phase, did not include adequate controls over timesheets, bank reconciliations, the payment of invoices which include both project and non-project items, and the engagement of subcontractors. The Business Manager agreed to enhance the procedures, as we recommended.	
	Based on our review of procedures, examination of personnel files, and interviews with management, we noted that procedures were not in place to ensure that adequate documentation is obtained and maintained in employee files. In our opinion, written procedures for human resource responsibilities should also be developed and updated, as may be necessary, on a regular basis to educate personnel who are responsible for these functions and to enable compliance. In particular, the following documents should be included, with other requirements, in personnel files: • Federal form I-9 which is required to be completed by all employees and signed by the employer. • Health insurance forms to accept or decline coverage. • Documentation to support the acceptance or refusal of other fringe benefits. • Mandated COBRA letters for terminated employees.	n/a
Budget	We observed that the effective date of the most recent approved budget was approximately nine months before the end of the first project year. Variances between approved budget amounts and actual project costs, evident in the Schedule of Budgeted and Actual Fund Sources and Project Costs, indicate significant changes since the budget was approved, and we were not provided with an updated budget that, in our opinion, realistically forecasted the remainder of the project.	n/a
Project Reporting	During our examination of reports submitted to NIST by the award recipient, we noted that reports were not properly prepared. The total ATP award funds received were used, instead of the actual project costs from the accounting records, to report cash outlays. These reports also included recipient contributions, but cost-matches had not been made from non-federal funds. The Business Manager agreed to amend reports as applicable.	n/a
Subcontractor Agreements	During our examination of subcontractor agreements, we noted that written agreements were not available for certain subcontractors and the contracts which were available did not include specific language to document the requirement that subcontractors adhere to federal laws and regulations as specified by the ATP award and the sanctions for noncompliance.	n/a

CASI LLC
Schedule of Audit Findings and Questioned Costs
For NIST ATP Cooperative Agreement 70NANB1H3050
For the Year Ended September 30, 2002

Item	Audit Findings	Questioned Costs
Summary of Questioned Costs	The summary of questioned costs, as described above, is as follows:	
	• Questioned costs from examination of specific expenditures	$121,066
	• Questioned costs for ineligible equipment	29,853
	• Questioned cost-match	27,857
	• Total questioned direct project costs	178,776
	• Questioned other uses of federal funds	69,651
	• Total questioned costs	$248,427

Independent Auditor's Report
Statement of Management's Assertions on Compliance with Specified Requirements

To the Members of
CASI LLC

We have examined Management's Assertions on Compliance with Specified Requirements that CASI LLC ("CASI") complied with certain specified requirements relative to its Schedule of Budgeted and Actual Fund Sources and Project Costs for the National Institute of Standards and Technology ("NIST") Advanced Technology Program ("ATP") Cooperative Agreement Number 70NANB1H3050 for the year ended September 30, 2002. The five specific compliance requirements are listed in our accompanying Statement of Management's Assertions on Compliance with Specified Requirements.

Management is responsible for the compliance of CASI with those requirements. Our responsibility is to express an opinion on management's assertions about its compliance based on our examination.

Our examination was conducted in accordance with Government Auditing Standards, issued by the Comptroller General of the United States, attestation standards established by the American Institute of Certified Public Accountants, and the NIST program-specific audit guidelines for ATP cooperative agreements with single companies which was issued by the U. S. Department of Commerce Office of Inspector General, dated May 1999. Accordingly, we examined, on a test basis, evidence about the compliance of CASI with those requirements and performed such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on the compliance of CASI with specified requirements.

In our opinion, management's assertions that CASI complied with the aforementioned requirements relative to its NIST ATP Cooperative Agreement Number 70NANB1H3050, during the year ended September 30, 2002, are fairly stated for one of the assertions but not fairly stated for the remaining four assertions. The accompanying Statement of Management's Assertions on Compliance with Specified Requirements provides our findings and opinion regarding each of the assertions.

This report is intended solely for the information and use of the members and management of CASI and the U. S. Department of Commerce and is not intended to be and should not be used by any other parties.

Joan M. Hayes, CPA, LLC

June 27, 2003

CASI LLC
Statement of Management's Assertions on Compliance with Specified Requirements For NIST ATP Cooperative Agreement 70NANB1H3050 For the Year Ended September 30, 2002

1. Cost-Share

Management's Assertion
The cost-share established by the budget in the Advanced Technology Program ("ATP") award has been met. The funds claimed as cost-share are not from a subcontractor or other federal sources and were not used as matching or cost-sharing funds on other federally supported activities. The funds claimed as cost-share meet the definition provided in 15 CFR Part 14, Section 23 and conform to the limitations in 15 CFR Part 295.2(1).

Examination Findings
CASI LLC ("CASI") did not contribute its cost-share, as stated in this assertion, to the project being funded by the ATP award during the year ended September 30, 2002.

Independent Auditor's Opinion
This assertion of management has not been fairly stated for the year ended September 30, 2002.

2. Equipment

Management's Assertion
Equipment acquired with the ATP funds has been accounted for in accordance with federal property management standards found in 15 CFR Part 14 Sections 30-37.

Examination Findings
Equipment acquired with ATP funds included computer and network hardware assembled from individually purchased components and configured as required for the ATP project. An inventory report was developed by CASI, and a physical inventory was taken during our audit of their Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002. The inventory report included total purchase price and a description of the equipment with identifying codes which allowed the equipment to be traced to the purchase records. Purchase records provided the source of the equipment, acquisition dates, and other detailed information required by 15 CFR Part 14 Section 34.

Independent Auditor's Opinion
This assertion of management has been fairly stated for the year ended September 30, 2002.

3. Procurement Policies

Management's Assertion
Federal procurement standards described in 15 CFR Part 14 Sections 40-48 have been incorporated into the purchasing policies and adhered to for ATP award expenditures. Contracts and subwards have not been made to any organizations or its principals listed in the "List of Parties Excluded from Federal Procurement or Nonprocurement Programs," issued by General Service Administration (the "List").

Examination Findings
Written procurement procedures, as required by 15 CFR Part 14 Section 44, were not available during the year ended September 30, 2002. During the subsequent year, management appointed a new Business Manager who developed an operating procedures guide. The updated procedures, as of June 2003, require bids, in accordance with federal standards, and written pre-approval for the procurement of equipment.

Contracts and payments to subcontractors were not made to organizations or individuals included in the List during the year ended September 30, 2002. However, the requirement to verify the omission of proposed contractors from the List was not included in the updated procedures referred to above.

Independent Auditor's Opinion
Except for contracts and payments to subcontractors not included in the List, this assertion of management has not been fairly stated for the year ended September 30, 2002. However, management has taken action to cure this finding going forward.

4. Reporting Requirements

Management's Assertion
The amounts in the quarterly financial status reports and the requests for advance or reimbursement agree with the underlying accounting records and summary records.

Examination Findings
Form 269 Financial Status Report or Form 269A Financial Status Report (short form) was provided and examined for each of the quarterly reporting periods during the year ended September 30, 2002. Each of the reports examined included a cost-match which the award recipient did not provide with non-federal funds. Each of the reports examined reported cash outlays of federal funds which agreed to the total federal funds received during the reporting period, but did not agree to the accounting records of actual cash transactions that were used to generate the Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002.

Form 270 Request for Advance or Reimbursement was provided and examined for ten of the monthly reporting periods during the year ended September 30, 2002. Reports were not provided for months ended December 31, 2001 and January 31, 2002. Each of the reports examined included a cost-match which the award recipient did not provide with non-federal funds. Each of the reports examined reported cash outlays of federal funds which agreed to the total federal funds received during the reporting period, but did not agree to the accounting records of actual cash transactions that were used to generate the Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002.

Form 272 Federal Cash Transactions Report was provided and examined for nine of the monthly reporting periods during the year ended September 30, 2002. Reports were not provided for months ended October 31, 2001, January 31, 2002, and August 31, 2002. Each of the reports examined included a cost-match which the award recipient did not provide with non-federal funds. Each of the reports examined reported cash outlays of federal funds which agreed to the total federal funds received during the reporting period, but did not agree to the accounting records of actual cash

transactions that were used to generate the Schedule of Budgeted and Actual Fund Sources and Project Costs for the year ended September 30, 2002. In addition, the cash on hand at the end of each monthly reporting period was reported as zero instead of the actual cash balance from the accounting records of cash transactions.

Independent Auditor's Opinion
This assertion of management has not been fairly stated for the year ended September 30, 2002.

5. Subcontractor Agreements

Management's Assertion
The agreements entered into with subcontractors/subrecipients, as defined below, require that the subcontractors/subrecipients adhere to federal laws and regulations as specified by the ATP award, and sanctions are specified for the subcontractor's/subrecipient's noncompliance.

Subcontractors included: Advanced Technology Group, J. Cox (who subsequently became an employee), A. Karron (who provided a one-time service), G. Wolberg, S. Albin (who subsequently became an employee), and The Jackson Group.

Examination Findings
Written agreements with J. Cox and with G. Wolberg were provided for examination. Agreements with the other subcontractors listed above were not provided for examination. The agreements examined did not contain the specific requirement for adherence to federal laws and sanctions for noncompliance that is referenced in this assertion.

Independent Auditor's Opinion
This assertion of management has not been fairly stated for year ended September 30, 2002.

APPENDIX 7B

Disclosure Requirements for Financial Statements of Nonpublic Businesses (Long-form Disclosure Checklist)

Company: CASI F.S. Balance Sheet Date: 9/30/02

Prepared by: JW Date: _____

Explanatory Comments

The following is a list of the primary disclosure requirements for financial statements of a *nonpublic business* (*organized for profit*) as required by generally accepted accounting principles. Note, this is a disclosure checklist, not a GAAP application checklist; accordingly, GAAP application and measurement questions are not included. Consideration has been given to Statements of Financial Accounting Standards (SFAS), Financial Accounting Standards Board Interpretations (FASBI), Opinions of the Accounting Principles Board (APB), Accounting Research Bulletins (ARB), FASB Technical Bulletins (FTB), AICPA Statements of Position of the Accounting Standards Division (SOP), AICPA Industry Audit and Accounting Guides, consensus positions of the FASB Emerging Issues Task Force (EITF), Practice Bulletins of the AICPA Accounting Standards Executive Committee (AcSEC PB), AICPA Accounting Interpretations (AI), and FASB "Qs and As" (QA).

An occasional reference is made to Statements on Auditing Standards (AU sections) published by the AICPA. Disclosure guidelines for certain financial statement items, e.g., subsequent events, are in auditing pronouncements. Inclusion of those disclosures without regard to whether the financial statements are audited or unaudited is generally accepted practice.

Some checklist questions do not cite a specific authoritative reference but indicate that the disclosure is "generally accepted." Most firms disclose that information even though a specific requirement in authoritative literature cannot be identified.

This checklist is divided into two parts: Part I—Most Frequent Disclosures, and Part II—Other Disclosures. See separate instructions for Part I and Part II.

Additional disclosures may be required for entities in certain industries as discussed in the Specialized Accounting and Reporting Principles section in Part 1 of this checklist. In addition, PPC publishes a supplemental industry disclosure checklist for construction contractors and homebuilders. See PPC's *Guide to Construction Contractors* or *Guide to Preparing Financial Statements*. (The supplemental checklist is not a substitute for this checklist. It presents only the disclosures unique to the particular industry. It should only be used in conjunction with this checklist.)

This checklist is current through the following pronouncements:

- SFAS No. 147 (October 2002)
- FASB TB 01-1 (July 2001)
- Consensuses reached by the EITF through its September 2002 meeting.
- FASBI No. 44 (March 2000)
- AICPA SOP 02-1 (August 2002)
- AcSEC PB No. 15 (January 1997)
- FASB Qs and As on SFAS No. 140 (February 2001)

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

For a list of disclosures required by subsequent pronouncements, visit PPC's home page on the World Wide Web at **www.ppcnet.com**. An online version of this checklist, updated quarterly, also is available for a nominal annual fee. For order information, call (800) 323-8724 or visit PPC's home page.

PART I—MOST FREQUENT DISCLOSURES

Instructions

Part I should be completed in its entirety. A block ☐ has been provided for each major disclosure caption. If the major caption is not applicable to your client, simply place a (✓) in the block. It will then not be necessary to check N/A for each question under the major caption. Otherwise, respond to each question with a (✓) in the appropriate column: (a) Yes— disclosure made; (b) No—item present but no disclosure made (any item checked "No" should be explained in the checklist or in a separate memorandum); or (c) N/A—either the item is not present or it is immaterial to the financial statements.

Specialized Accounting and Reporting Principles
Part II Disclosures
Subsequent Pronouncements Issued

	Disclosure Made?		
	Yes	No	N/A
BALANCE SHEET			
CURRENT ASSETS			☑
1. If a classified balance sheet is used, is a total of current assets presented? (Generally accepted)	____	____	____
CASH			☐
1. Are restrictions on cash properly disclosed (SFAS No. 5, paras. 18 and 19) and are restricted amounts appropriately segregated from other cash items, showing restricted cash as a noncurrent asset if appropriate? (ARB No. 43, ch. 3A, para. 6)	____	____	____
2. Are material bank overdrafts presented as a separate caption among current liabilities? Similarly, are material dollar amounts of held checks (checks on the bank reconciliation but not released until after the balance sheet date) reclassified as accounts payable? (Generally accepted)	____	____	____
3. Are significant concentrations of credit risk arising from cash deposits in excess of federally insured limits disclosed? (See FINANCIAL INSTRUMENTS, Question No. 1.)	____	____	____
NOTES AND ACCOUNTS RECEIVABLE			☐
1. Are all significant categories of loans and receivables presented separately in the balance sheet or disclosed, e.g., trade receivables, trade receivables held for sale, tax refunds, contract termination claims, advance payments on purchases, amounts due from officers, employees, directors, stockholders, affiliates? (ARB No. 43, ch. 1A, para. 5 and SOP 01-6, para. 13)	____	____	____
2. Are amounts due from affiliates or subsidiaries classified as current only if it is the entity's practice to liquidate them periodically and the current financial position of the affiliate or subsidiary warrants that treatment? (ARB No. 43, ch. 3A, para. 4)	____	____	____
3. Is the allowance for doubtful accounts disclosed? (APB No. 12, para. 3)	____	____	____
4. Are accounting policies for loans and trade receivables, credit losses and doubtful accounts, and nonaccrual and past due loans and trade receivables disclosed? (See ACCOUNTING POLICIES, Question No. 1.)	____	____	____
5. Is the aggregate amount of gains or losses on sales of loans or trade receivables (including recorded unrealized gains and losses) presented separately in the

	Disclosure Made?		
	Yes	No	N/A
(including recorded unrealized gains and losses) presented separately in the financial statements or disclosed in the notes to the financial statements? (SOP 01-6, para. 13)			✓
6. Are foreclosed and repossessed assets not subsequently to be used in operations presented separately in the financial statements or disclosed in the notes to the financial statements? (SOP 01-6, para. 13)			
7. Is the following disclosed about nonaccrual and past due loans and trade receivables as of each balance sheet date presented: (SOP 01-6, para. 13)			
a. Recorded investment in such receivables on nonaccrual status?			
b. Recorded investment in such receivables past due ninety days or more and still accruing?			
8. Is the carrying amount of loans and trade receivables that serve as collateral for borrowings disclosed? (SFAS No. 5, paras. 18–19 and SOP 01-6, para. 13)			
9. Are unearned income, unamortized discounts and premiums, net unamortized deferred fees and costs, and imputed interest appropriately disclosed? (APB No. 6, para. 14; APB No. 21, para. 16; and SOP 01-6, para. 13)			
10. For transfers of receivables with recourse reported as sales, do the transferor's financial statements disclose the proceeds to the transferor during each period for which an income statement is presented? (Generally accepted)			
11. Are contingent liabilities associated with sold or discounted receivables disclosed (guarantees to repurchase receivables or related property)? (SFAS No. 5, para. 12)			
12. Are significant concentrations of credit risk arising from receivables disclosed? (See FINANCIAL INSTRUMENTS, Question No. 1.)			
13. If impairment of loans has been recognized, have the disclosures required by SFAS No. 114, as amended by SFAS No. 118, been made? (See TROUBLED DEBT RESTRUCTURINGS—CREDITORS, Question No. 2.)			
14. Have the necessary fair value disclosures been made? (See FINANCIAL INSTRUMENTS, Question Nos. 2–6.)			
MARKETABLE DEBT AND EQUITY SECURITIES			
1. Are separate disclosures of the following made for all major security types classified as available for sale as of each date for which a balance sheet is presented: (SFAS No. 133, para. 534)			
a. Aggregate fair value?			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
b. Total gains for securities with net gains in accumulated other comprehensive income?			✓
c. Total losses for securities with net losses in accumulated other comprehensive income?			

[Financial institutions should disclose the preceding information for the following types of securities: (a) equity securities, (b) debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies, (c) debt securities issued by U.S. states and political subdivisions of the states, (d) debt securities issued by foreign governments, (e) corporate debt securities, (f) mortgage-backed securities, and (g) other debt securities.] (SFAS No. 115, para. 19)

2. Are separate disclosures of the following made for all major security types classified as held to maturity as of each date for which a balance sheet is presented: (SFAS No. 133, para. 534)

a. Aggregate fair value?			
b. Gross unrecognized holding gains?			
c. Gross unrecognized holding losses?			
d. Net carrying amount?			
e. Gross gains and losses in accumulated other comprehensive income for any derivatives that hedged the forecasted acquisition of the held-to-maturity securities?			

3. If individual amounts for the three categories of investments are not presented on the statement of financial position, are they disclosed in the notes and reconciled to the reporting classifications used in the statement of financial position? (SFAS No. 115, para. 117)

4. Are separate disclosures of the following made for all investments in debt securities classified as available for sale or as held to maturity: (SFAS No. 115, para. 20)

a. Information about the contractual maturities as of the most recent balance sheet presented (disclosure can be by appropriate groups)?			
b. Method used to allocate securities into maturity groups, if necessary?			

[Financial institutions should disclose the fair value and net carrying amount (if different from fair value) of the investments based on at least four maturity groupings— within one year, after one year through five years, after five years through 10 years, and after 10 years.] (SFAS No. 133, para. 534)

5. For each period for which an income statement is presented, have the following been disclosed: (SFAS No. 115, para. 21, and SFAS No. 133, para. 534)

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
a. Proceeds from sales of securities available for sale?			✓
b. Gross realized gains and losses that have been included in earnings as a result of sales of securities available for sale?			
c. Method used to determine the cost of a security sold or the amount reclassified out of accumulated other comprehensive income into earnings (average cost or other method)?			
d. Gross gains and gross losses included in earnings from transfers of securities from the available for sale category into the trading category?			
e. Amount of the net unrealized holding gain or loss on securities available for sale that has been included in accumulated other comprehensive income for the period?			
f. Amount of gains and losses reclassified out of accumulated other comprehensive income into earnings for the period?			
g. Portion of trading gains and losses for the period that relates to trading securities still held at the balance sheet date?			
6. For each period for which an income statement is presented have the following for sales of or transfers from securities classified as held to maturity been disclosed: (SFAS No. 115, para. 22, and SFAS No. 133, para. 534)			
a. Net carrying amount of the sold or transferred security?			
b. Net gain or loss in accumulated other comprehensive income for any derivative that hedged the forecasted acquisition of the held-to-maturity security?			
c. Related realized or unrealized gain or loss?			
d. Circumstances leading to the decision to sell or transfer the security?			
7. Has the policy for accounting for the premium paid to acquire an option classified as held to maturity or available for sale been disclosed? (EITF 96-11)			
8. If the entity enters into repurchase agreements or securities lending transactions, has its policy for requiring collateral or other security been disclosed? (SFAS No. 140, para. 17)			
9. Have the necessary fair value disclosures been made? (See FINANCIAL INSTRUMENTS, Question Nos. 2–6.)			
INVENTORIES			☐
1. Is the basis for stating inventories disclosed, including the method of determining cost? (ARB No. 43, ch. 3A, para. 9, and ch. 4, paras. 4–16; and APB No. 22, para. 13)			
2. Are unusual losses from write-down to market disclosed separately from cost of goods sold in the income statement? (ARB No. 43, ch. 4, paras. 14 and 17)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
goods sold in the income statement? (ARB No. 43, ch. 4, paras. 14 and 17)			
3. If practicable, are the major classes of inventories such as finished goods, work-in-process, materials, and supplies disclosed? (Generally accepted)			
4. For conformity with IRS Regulations for entities using LIFO, are disclosures of annual income, profit, or loss on any inventory basis other than LIFO *excluded* from presentation on the face of the financial statements? (Such disclosures may be made only in the notes to the financial statements or in a supplementary schedule.) [CAUTION: Read IRS Reg. 1.472-2(e) to become familiar with LIFO conformity disclosure and reporting subtleties.]			
PROPERTY AND EQUIPMENT			
1. Are the following disclosed relating to depreciable assets:			
a. Balances of major classes of depreciable assets, by nature or function, at the balance sheet date? (APB No. 12, para. 5b)			
b. Accumulated depreciation, by class or in total, at the balance sheet date? (APB No. 12, para. 5c)			
c. A general description of the method or methods used in computing depreciation with respect to major classes of depreciable assets? (APB No. 12, para. 5d, and APB No. 22, para. 13)			
d. Depreciation expense for the period? (APB No. 12, para. 5a)			
2. Is the carrying amount of property not a part of long-term operating assets, e.g., idle or held for investment, segregated? (Generally accepted)			
3. If property and equipment is impaired or is being held for disposal, have the disclosures required by SFAS No. 121 been made? (See IMPAIRED LONG-LIVED ASSETS AND LONG-LIVED ASSETS TO BE DISPOSED OF.)			
CURRENT LIABILITIES (EXCEPT INCOME TAXES)			
1. If a classified balance sheet is used, is a total of current liabilities presented? (SFAS No. 6, para. 15)			
2. Are significant categories segregated, e.g., accounts payable, accrued expenses, customer deposits, dividends payable, interest payable, amounts due to officers or employees? (Generally accepted)			
3. If the entity has not accrued compensated absences because the amount cannot be reasonably estimated, has that fact been disclosed? (SFAS No. 43, paras. 6 and 7)			
4. If real and personal property tax accruals are subject to a substantial measure of			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
4. If real and personal property tax accruals are subject to a substantial measure of uncertainty, has the liability been disclosed as an estimate? (ARB No. 43, ch. 10A, para. 16)			✓

NOTES PAYABLE, LONG-TERM DEBT, AND OTHER OBLIGATIONS

1. Are significant categories of debt identified in the balance sheet or related notes, e.g., notes to banks, mortgage notes, or related party notes? (Generally accepted)			
2. Are interest rates, maturity dates, subordinate features (Generally accepted), pledged assets, and restrictive covenants (SFAS No. 5, paras. 18–19) disclosed?			
3. Have the necessary fair value disclosures been made? (See FINANCIAL INSTRUMENTS, Question Nos. 2–6.)			
4. If a note is noninterest bearing or has an unreasonable stated interest rate: (APB No. 21, para. 16)			
a. Is the discount or premium presented as a deduction from or addition to the face amount of the note?			
b. Does the disclosure include the effective interest rate and face amount of the note?			
c. Is amortization of the discount or premium reported as interest in the income statement?			
5. If a classified balance sheet is presented: (ARB No. 43, ch. 3A, paras. 7–8; SFAS No. 78, para. 5; and EITF 86-30)			
a. Are current portions of debt obligations presented as current liabilities?			
b. Does the current liability classification include obligations that, by their terms, are due on demand or will be due on demand within one year (or operating cycle, if longer) from the balance sheet date, even though liquidation may not be expected within that period?			
c. Does the current liability classification include long-term obligations that are or will be callable by the creditor either because the debtor's violation of a provision of a debt agreement at the balance sheet date makes the obligation callable or because the violation, if not cured within a specified grace period, will make the obligation callable unless (1) the creditor has waived or subsequently lost the right to demand payment for more than one year from the balance sheet date or (2) it is probable the debtor will cure the violation within the grace period?			
d. If obligations callable by the creditor because the debtor was in violation of the debt agreement at the balance sheet date are classified as long-term obligations because it is probable the debtor will cure the violation within the specified grace period, are the circumstances disclosed?

	Disclosure Made? Yes	No	N/A
6. Are the combined aggregate amounts of maturities and sinking fund requirements for all long-term borrowings disclosed for each of the five years following the date of the latest balance sheet presented? (SFAS No. 47, para. 10)			✓
7. If a short-term obligation expected to be refinanced is to be excluded from current liabilities, do disclosures include: (SFAS No. 6, para. 15; FASBI No. 8, para. 3; and FTB 79-3)			
a. General description of the financing agreement?			
b. Terms of any new obligation incurred or expected to be incurred, or equity securities issued or expected to be issued as a result of the refinancing?			
8. If assets are set aside after December 30, 1996, solely for satisfying scheduled payments of a specific debt, has the nature of restrictions placed on those assets been disclosed? (SFAS No. 125, para.17 and SFAS No. 140, para. 17)			
9. Are conversion features for convertible debt appropriately accounted for and disclosed? (Generally accepted)			
INCOME TAXES			☐
1. If the entity is an S corporation, partnership, or proprietorship, do disclosures explain why income tax expense is not recorded? (Generally accepted)			
2. Are the following amounts appropriately classified in the balance sheet:			
a. Taxes currently payable or refundable? (ARB No. 43, ch. 3A; and APB No. 2, para. 14)			
b. Current and noncurrent deferred tax assets and liabilities, including a valuation allowance, if any, related to deferred tax assets? (SFAS No. 109, para. 41)			
3. Within each tax jurisdiction (e.g., federal, state, and local), have current deferred tax assets and liabilities been offset and presented as a single amount and noncurrent deferred tax assets and liabilities been offset and presented as a single amount? (SFAS No. 109, para. 42)			
4. If the entity includes more than one taxpaying component, have the net current deferred tax asset or liability and the net noncurrent deferred tax asset or liability within each tax jurisdiction been shown separately for each taxpaying component? (SFAS No. 109, para. 42)			
5. Have the following components of the net deferred tax asset or liability recognized in the balance sheet been disclosed: (SFAS No. 109, para. 43)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
a. Total deferred tax liability for all taxable temporary differences?			✓
b. Total deferred tax asset for all deductible temporary differences, operating loss carryforwards, and tax credit carryforwards?			
c. Total valuation allowance recognized for deferred tax assets?			
6. Has the amount of income tax expense or benefit allocated to the following items been disclosed for each year for which they are presented: (SFAS No. 109, para. 46; APB No. 9, para. 26; and APB No. 20, para. 20)			
a. Continuing operations?			
b. Discontinued operations?			
c. Extraordinary items?			
d. Other comprehensive income?			
e. Items charged or credited directly to stockholders' equity?			
f. Prior-period adjustments?			
7. Have the following significant components of income tax expense attributable to continuing operations been disclosed for each year presented either in the financial statements or notes: (SFAS No. 109, para. 45)			
a. Current tax expense or benefit?			
b. Deferred tax expense or benefit, exclusive of the effects of other components listed in (c) through (h)?			
c. Investment tax credits?			
d. Government grants to the extent recognized as a reduction of income tax expense?			
e. Benefits of operating loss carryforwards?			
f. Tax expense that results from allocating certain tax benefits either directly to contributed capital or to reduce goodwill or other noncurrent intangible assets of an acquired entity?			
g. Adjustments of a deferred tax asset or liability for enacted changes in tax laws or rates or a change in the entity's tax status?			
h. Adjustments of the beginning-of-the-year balance of a valuation allowance because of a change in circumstances that causes a change in judgment about the realizability of the related deferred tax asset in future years?			
8. Has the net change during the year in the total valuation allowance been disclosed? (SFAS No. 109, para. 43)			
9. Have the types of temporary differences and carryforwards that result in significant portions of deferred tax assets (before allocation of a valuation allowance) or liabilities been disclosed? (SFAS No. 109, para. 43)			
10. Do disclosures regarding income taxes include: (SFAS No. 109, paras. 47 and 48)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
a. Amounts and expiration dates of operating loss and tax credit carryforwards for tax purposes?			✓
b. Any portion of the valuation allowance for deferred tax assets for which subsequently recognized tax benefits will be allocated (1) to reduce goodwill or other noncurrent intangible assets of an acquired entity or (2) directly to contributed capital?			
c. Significant reconciling items between income tax expense attributable to continuing operations for the year and the amount of income tax expense that would result from applying domestic federal statutory rates to pretax income from continuing operations?			
11. Do disclosures regarding investment tax credits include: (SFAS No. 109, para. 48; APB No. 4, para. 11; and AI-APB 4, No. 2)			
a. The accounting method used and the amounts involved?			
b. Amounts of any unused investment credits and expiration dates?			
12. If the entity is part of a group that files a consolidated tax return, have the following amounts been disclosed in its separately issued financial statements: (SFAS No. 109, para. 49)			
a. The aggregate amount of current and deferred tax expense for each income statement presented?			
b. The amount of any tax-related balances due to or from affiliates as of the date of each balance sheet presented?			
c. The principal provisions of the method by which the consolidated amount of current and deferred tax expense is allocated to members of the group?			
d. The nature and effect of any changes in the method of allocating current and deferred tax expense to members of the group and in determining the related balances due to or from affiliates during each year for which the disclosures in (a) and (b) above are presented?			
13. Have the nature and effect of any other significant matters affecting comparability of information for all periods presented been disclosed if not otherwise apparent from the disclosures in items 5–10? (SFAS No. 109, para. 47)			
14. If a material income tax benefit realized from the exercise of employee stock options is credited to equity but not presented as a separate line item in the statement of cash flows or in the statement of changes in stockholders' equity, has the amount of that benefit been disclosed? (EITF 00-15)			
STOCKHOLDERS' (MEMBERS') EQUITY			☐
1. Are classes of capital stock presented in order of priority in liquidation? (Generally accepted)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
2. Are the legal title of securities; par or stated values; and number of shares authorized, issued, and outstanding disclosed? (Generally accepted)			✓
3. Are changes in separate accounts comprising stockholders' equity and changes in the number of shares of equity securities during at least the most recent annual fiscal period and any subsequent interim period presented disclosed? (SFAS No. 129, para. 5; APB No. 12, para. 10; and AcSEC PB No. 14, paras. 8 and 12)			
4. Are changes in the equity accounts of S corporations, partnerships, and proprietorships, including limited liability companies and limited liability partnerships, disclosed? (NOTE: GAAP does not require S corporations or limited liability companies and partnerships to disclose changes in the components of retained earnings or equity.) (Generally accepted)			
5. Have the pertinent rights and privileges of the various securities outstanding been disclosed (for example, a description of dividend and liquidation preferences, participation rights, call prices and dates, conversion or exercise prices or rates and pertinent dates, sinking fund requirements, unusual voting rights, and significant terms of contracts to issue additional shares)? (SFAS No. 129, para. 4 and EITF 98-5)			
6. Has the amount of redemption requirements been disclosed, separately by issue or combined, for all issues of capital stock that are redeemable at fixed or determinable prices on fixed or determinable dates in each of the five years following the latest balance sheet presented? (SFAS No. 129, para. 8)			
7. Are the following disclosures made for preferred stock:			
a. The liquidation preference of preferred stock (or other senior stock) that has a preference in involuntary liquidation considerably in excess of its par or stated value? (The disclosure should be made in the equity section of the balance sheet rather than the notes.) (SFAS No. 129, para. 6)			
b. Aggregate or per-share amounts at which preferred stock may be called or redeemed? (SFAS No. 129, para. 7)			
c. Aggregate and per-share amounts of arrearages in cumulative preferred dividends? (SFAS No. 129, para. 7)			
8. Are the following disclosures made for treasury stock:			
a. The number of shares and the basis of carrying the stock? (Generally accepted)			
b. Restrictions of state laws, if any? (APB No. 6, para. 13)			
c. If treasury stock is purchased for purposes other than retirement or if the ultimate disposition has not been decided:			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made? Yes	No	N/A
(1) Has the cost been shown separately as a deduction from stockholders' equity, or			✓
(2) Has the par value of the shares been charged to the specific stock issue and the difference charged or credited to additional paid-in capital? An excess of purchase price over the par value and any amount charged to additional paid-in capital should be charged to retained earnings. (Alternatively, the excess may be charged entirely to retained earnings.) (APB No. 6, para. 12b)			
d. If the purchase of treasury stock also involves the receipt or payment of consideration in exchange for stated or unstated rights or privileges, have the allocation of amounts paid and the accounting treatment for such amounts been disclosed? (FTB 85-6, para. 3)			
9. Is each classification of accumulated other comprehensive income presented either (a) on the face of the balance sheet as a separate component of equity, (b) on the statement of changes in equity, or (c) in the notes to the financial statements? (SFAS No. 130, para. 26)			
10. Have the following been separately disclosed as part of the disclosures of accumulated other comprehensive income: (SFAS No. 133, para. 47)			
a. The beginning and ending accumulated derivative gain or loss?			
b. The related net change associated with current period hedging transactions?			
c. The net amount of any reclassification into earnings?			

STATEMENT OF INCOME (Some income statement disclosures have already been addressed in the section on balance sheet related disclosures.) Program Specific ☐

1. Are the major categories of revenue and expense items, such as sales, cost of goods sold, and selling and administrative expenses, shown separately on the face of the income statement? (Generally accepted)	✓		
2. Are sales or operating revenues shown net of discounts, allowances, etc.? (Generally accepted)			✓
3. Are sales revenues and cost of goods sold shown net of estimated returns? (SFAS No. 48, para. 7)			
4. Are cost of goods sold and expenses shown net of purchase discounts? (Generally accepted)			
5. For each accounting period presented, have the following been disclosed: (SFAS No. 34, para. 21, and SFAS No. 49, para. 9)			
a. The total amount of interest costs incurred, with separate identification of			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
interest costs associated with product financing arrangements?			
b. The total amount of interest charged to expense?			
c. The total amount of interest capitalized?			
6. Are all accrued net losses on firm purchase commitments for inventory separately disclosed in the income statement? (ARB No. 43, ch. 4, para. 17)			
7. Are material events or transactions that are either unusual in nature or of infrequent occurrence, but not both (and thus not meeting the criteria for extraordinary items): (APB No. 30, para. 26; and FTB 82-1, para. 6)			
a. Reported as a separate component of income from continuing operations?			
b. Accompanied by disclosure of the nature and financial effects of each event?			
8. Have the nature of the event or transaction and the principal items entering into the determination of an extraordinary gain or loss been disclosed? (APB No. 30, para.11)			
9. Are all extraordinary items segregated from results of ordinary operations? (APB No. 30, paras. 10–12)			
10. Are descriptive captions and amounts (including applicable income taxes) presented for individual extraordinary events or transactions, preferably on the face of the income statement if practicable? (APB No. 30, para. 11)			
11. Is the adjustment in the current period of a previously presented extraordinary item presented properly? (APB No. 30, para. 25)			
12. Is the following information about comprehensive income disclosed:			
a. Components of comprehensive income and total comprehensive income for the period, presented either in a separate statement of comprehensive income that begins with net income, on the income statement below the total for net income, or in the statement of changes in equity? (SFAS No. 130, paras. 14 and 22)			
b. Reclassification adjustments, displayed on the face of the statement that presents comprehensive income or disclosed in the notes to the financial statements? (SFAS No. 130, para. 20)			
c. Income tax expense or benefit allocated to each component of other comprehensive income, including reclassification adjustments? (SFAS No. 130, para. 25)			
13. Has the net gain or loss on derivative instruments designated as cash flow hedging instruments that are reported in comprehensive income (including qualifying foreign currency cash flow hedges) been reported as a separate classification within other comprehensive income? (SFAS No. 133, para. 46)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
classification within other comprehensive income? (SFAS No. 133, para. 46)			

STATEMENT OF CASH FLOWS

1. Are noncash investing and financing transactions disclosed either in narrative form or summarized in a schedule? (SFAS No. 95, para. 32)			
2. Is the accounting policy for determining which items are treated as cash and cash equivalents disclosed? (SFAS No. 95, para. 10)			
3. If the indirect method of reporting cash flows from operating activities is used, are amounts of interest paid (net of amounts capitalized) and income taxes paid during the period disclosed? (SFAS No. 95, para. 29)			
4. If cash flows from derivative instruments that are accounted for as fair value hedges or cash flow hedges are classified in the same category as cash flows from the item being hedged, is that accounting policy disclosed? (SFAS No. 104, para. 7 or SFAS No. 133, para. 530)			

GENERAL FINANCIAL STATEMENT DISCLOSURES (These are additional note disclosures that have not been addressed in previous checklist questions.)

NATURE OF OPERATIONS

1. Have the following disclosures about the entity's products or services been made: (SOP 94-6, para. 10)			
a. A description of the major products or services the entity sells or provides and its principal markets, including the location of those markets?	✓		
b. If the entity operates in more than one business, the relative importance of its operations in each business and the basis for that determination (e.g., based on assets, revenues, or earnings)?			✓

USE OF ESTIMATES

1. Has the fact that preparation of financial statements in conformity with GAAP requires the use of management's estimates been disclosed? (SOP 94-6, para. 11)			✓

ACCOUNTING POLICIES

1. Have the following accounting policies, if significant, been presented in the first note or in a separate schedule:			
a. Basis for stating inventories and the method of determining cost? (ARB No. 43, ch. 3A, para. 9, and ch. 4, paras. 4–16; and APB No. 22, para. 13)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
b. General description of the methods used to compute depreciation for major classes of depreciable assets? (APB No. 12, para. 5)			✓
c. If SFAS No. 142 has not been adopted, the method and period used to amortize intangible assets? (APB No. 17, para. 30) (SFAS No. 142, *Goodwill and Other Intangible Assets*, generally is effective for fiscal years beginning after December 15, 2001. See INTANGIBLES.)			
d. Policy used to determine whether a short-term investment is treated as a cash equivalent in the statement of cash flows? (SFAS No. 95, para. 10)			
e. Method used to recognize interest income on impaired loans? (SFAS No. 118, para. 6)			
f. Method used to account for the sale or purchase of tax benefits through tax leases? (FASB TB 82-1, para. 4)			
g. Policy for investments in the stock of the entity's parent or joint venture partner? (EITF No. 98-2)			
h. Policy for classifying shipping and handling costs? (If shipping and handling costs are significant and are not included in cost of sales, the amount of such costs and the line item on the income statement that includes such costs also should be disclosed.) (EITF No. 00-10)			
i. Basis for accounting for loans, trade receivables, and lease financings, including those classified as held for sale? (SOP 01-6, para. 13)			
j. Method used to determine the lower of cost or fair value of nonmortgage loans held for sale? (SOP 01-6, para. 13)			
k. Classification and method of accounting for interest-only strips, loans, other receivables, or retained interests in securitizations that can be contractually prepaid or otherwise settled in a way that the entity would not recover substantially all of its recorded investment? (SOP 01-6, para. 13)			
l. Method used to recognize interest income on loan and trade receivables, including the entity's policy for treatment of related fees and costs (including its method of amortizing net deferred fees or costs)? (SOP 01-6, para. 13)			
m. Method used to estimate allowances for loan losses and doubtful accounts, liabilities for off-balance-sheet credit losses, and related charges, including a description of the factors influencing management's judgment? (SOP 01-6, para. 13)			
n. Policies for placing loans and trade receivables on nonaccrual status, recording payments on nonaccrual receivables, and resuming accrual of interest? (SOP 01-6, para. 13)			
o. Policy for charging off uncollectible loans and trade receivables? (SOP 01-6, para. 13)			
p. Policy for determining when receivables are past due or delinquent (that is, based on contractual terms or how recently payments have been received)? (SOP 01-6, para. 13)			
q. Other significant accounting policies, including those for which there is a selection from existing acceptable alternatives, principles, and methods peculiar to the industry in which the entity operates, and unusual or innovative applications of GAAP or methods of application? (APB No. 22, paras. 8–15)	✓		

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made? Yes	No	N/A
2. Is there disclosure of any material changes in classifications made to previously issued financial statements? (AU Section 420.16)			✓

RELATED-PARTY TRANSACTIONS AND COMMON CONTROL ☐

1. Do disclosures of material related-party transactions include: (SFAS No. 57, para. 2)			
a. The nature of the relationship(s)? (If necessary to an understanding of the effects of the transactions, the related party should be identified by name.)	✓		
b. A description of the transactions, including transactions to which no amounts or nominal amounts were ascribed, for each of the periods for which an income statement is presented and such other information deemed necessary to an understanding of the effects of the transactions on the financial statements?			✓
c. The dollar amounts of transactions for each of the periods for which income statements are presented and the effects of any change in the method of establishing the terms from that used in the preceding period?			✓
d. Amounts due from or to related parties as of the date of each balance sheet presented and, if not otherwise apparent, the terms and manner of settlement?	✓		
e. The disclosures required by SFAS No. 109? (See INCOME TAXES, Question No. 12)			✓
2. If representations are made that the related-party transactions were consummated on terms equivalent to those that prevail in arm's length transactions, can such representations be substantiated? (SFAS No. 57, para. 3)			
3. If the entity and one or more other entities are under common control and the existence of that control could result in operating results or financial position of the entity significantly different from those that would have been obtained if the entities were autonomous, has disclosure been made of the nature of the control relationship, even though there have been no transactions between the entities? (SFAS No. 57, para. 4)			

Cash used by R.P.

PENSION AND POSTRETIREMENT BENEFIT PLANS—DEFINED CONTRIBUTION ☐
(Profit-sharing Plans) (See Part II for defined benefit pension plan disclosures.)

1. Is the following information about the entity's defined contribution pension or other postretirement benefit plans disclosed separately from the entity's defined benefit plans: (SFAS No. 132, para. 9)			
a. The amount of cost recognized during the period?			
b. A description of the nature and effect of any significant changes during the			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
period affecting comparability (such as a change in the rate of employer contributions, a business combination, or a divestiture)?			✓

LEASES IN STATEMENTS OF LESSEES

1. General disclosures:

   a. Have the nature and extent of leasing transactions with related parties been disclosed? (SFAS No. 13, para. 29)

   b. Has a general description of the entity's leasing arrangements been disclosed, including, but not limited to, the basis on which contingent rental payments are determined; the existence and terms of renewal or purchase options and escalation clauses; and restrictions imposed by lease agreements such as those concerning dividends, additional debt, and further leasing? (SFAS No. 13, para. 16d)

2. Operating leases:

   a. Has disclosure of the following been made for operating leases having initial or remaining noncancelable lease terms in excess of one year: (SFAS No. 13, para. 16b)

      (1) Future minimum rental payments required as of the date of the latest balance sheet presented, in the aggregate and for each of the five succeeding fiscal years?

      (2) The total amount of minimum rentals to be received in the future under noncancelable subleases as of the date of the latest balance sheet presented?

   b. Has disclosure been made of rental expense for each period for which an income statement is presented, with separate amounts for minimum rentals, contingent rentals, and sublease rental income? (NOTE: Rental payments under leases with terms of one month or less that were not renewed need not be included.) (SFAS No. 13, para. 16c)

3. Capital leases:

   a. Have the following been separately identified in each balance sheet presented or disclosed in the notes: (SFAS No. 13, paras. 13 and 16)

      (1) The gross amount of assets in the balance sheet recorded under capital leases and the accumulated amortization by major classes according to nature or function?

      (2) The lease obligations classified as current and long-term?

   b. Has disclosure been made of future minimum lease payments as of the latest

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
b. Has disclosure been made of future minimum lease payments as of the latest balance sheet presented, in the aggregate and for each of the five succeeding fiscal years, with appropriate separate deductions therefrom for executory costs and imputed interest to reduce net minimum lease payments to present value? (SFAS No. 13, paras. 10 and 16a)			✓
c. Has disclosure been made of minimum sublease rentals to be received in the future under noncancelable subleases? (SFAS No. 13, para. 16a)			
d. Have the following been disclosed for each income statement presented: (SFAS No. 13, paras. 13 and 16a, and SFAS No. 29, para. 12)			
(1) Amortization expense, unless it is included in depreciation expense and that fact has been disclosed?			
(2) Total contingent rentals actually incurred?			
4. Sales-leaseback transactions:			
a. Has the seller-lessee disclosed the terms of the transaction, including any future commitments, obligations, provisions, or circumstances that require or result in the seller-lessee's continuing involvement? (SFAS No. 98, para. 17)			
b. For transactions accounted for under the deposit method or as a financing, has the seller-lessee disclosed the following, in the aggregate and for each of the five years succeeding the latest balance sheet date: (SFAS No. 98, para. 18)			
(1) Obligation for future minimum lease payments as of the date of the latest balance sheet presented?			
(2) Total minimum sublease rentals to be received in the future under noncancelable subleases?			
FINANCIAL INSTRUMENTS			
1. Have significant concentrations of credit risk from all financial instruments been disclosed, including the following about each significant concentration: (SFAS No. 133, para. 531)			
a. Information about the activity, region, or economic characteristic that identifies the concentration?			
b. The maximum amount of loss due to credit risk that, based on the gross fair value of the financial instrument, the entity would incur if parties to the financial instruments that make up the concentration failed to perform according to the terms of the contracts and the collateral, if any, proved to be of no value?			
c. The entity's policy of requiring collateral to support financial instruments subject to credit risk?			
d. Information about the entity's access to collateral?			
e. A description of the collateral?			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
e. A description of the collateral?			
f. The entity's policy of entering into master netting arrangements to mitigate the credit risk of financial instruments?			✓
g. Information about the master netting arrangements for which the entity is a party?			
h. A brief description of the terms of master netting arrangements, including the extent to which they would reduce the entity's maximum amount of loss due to credit risk?			

NOTE: The disclosure requirements in Question Nos. 2 and 3 are optional for nonpublic companies that (a) have total assets on the financial statement date of less than $100 million and (b) have no instrument that, in whole or in part, is accounted for as a derivative instrument under SFAS No. 133 during the reporting period. (SFAS No. 126, para. 2, and SFAS No. 133, para. 537)

2. Have the following disclosures about the fair value of financial instruments been made: (SFAS No. 107, paras. 10 and 14)

a. Fair value of financial instruments for which it is practicable to estimate fair value? (NOTE: For trade receivables and payables, no disclosure is required when the carrying amount approximates fair value.)			
b. The methods and significant assumptions used to estimate the fair value of financial instruments?			
c. If it is not practicable to estimate the fair value of a financial instrument or a class of financial instruments, the reasons it is not practicable and information pertinent to estimating the fair value of the financial instrument or class of financial instruments, such as the carrying amount, effective interest rate, and maturity?			

3. Do the disclosures in Question No. 2a: (SFAS No. 133, para. 532)

a. Include the related carrying amounts in a format that makes it clear (1) whether the fair value and carrying amount represent assets or liabilities and (2) how the carrying amounts relate to what is reported in the balance sheet?			
b. Appear in a single note or, if disclosed in more than a single note, does one note include a summary table containing the fair value and related carrying amounts and refer to the other disclosures required by SFAS No. 107?			

4. For entities that hold or issue derivative instruments or other hedging instruments, have the disclosures required by SFAS No. 133 been made? (See DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES.)

5. If the entity transfers financial instruments during the period and it is not practicable to estimate the fair values of the assets obtained or liabilities incurred in the transfer, have the assets and liabilities been described and the reasons why it is not practicable to estimate their fair value been disclosed? (SFAS No. 140, para. 17)

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
para. 17)			
6. Unless FASB Interpretation No. 39, "Offsetting of Amounts Related to Certain Contracts," or FASB Interpretation No. 41, "Offsetting of Amounts Related to Certain Repurchase and Reverse Repurchase Agreements," permits the carrying amounts to be offset in the statement of financial position, does the entity disclose the fair value of financial instruments without netting the fair value with the fair value of other financial instruments? (SFAS No. 133, para. 531)			✓
7. If the entity has entered into repurchase agreements or securities lending transactions, has its policy for requiring collateral been disclosed? (SFAS No. 140, para. 17)			
8. Have the carrying amount and classification of financial assets pledged as collateral but not separately reported in the statement of financial position (for example, as securities pledged to creditors) been disclosed? (SFAS No. 140, para. 17)			
9. Has the following been disclosed about financial assets the entity has accepted as collateral and is permitted to sell or repledge: (SFAS No. 140, para. 17)			
a. The collateral's fair value as of the date of each statement of financial position presented?			
b. The portion of the collateral that has been sold or repledged?			
c. Information about the sources and uses of the collateral?			
OTHER COMMITMENTS			
1. Are the following types of commitments disclosed:			
a. Obligations to reduce debts, maintain working capital, or restrict dividends? (SFAS No. 5, paras. 18–19)			
b. Unused letters of credit? (SFAS No. 5, paras. 18–19; also see FINANCIAL INSTRUMENTS)			
c. Net losses on inventory purchase commitments? (ARB No. 43, ch. 4, para. 17)			
d. Existence, nature, and amount of any guarantees, even if the possibility of loss is remote? (SFAS No. 5, para. 12; and FASBI No. 34; also see FINANCIAL INSTRUMENTS)			
CONTINGENCIES, RISKS, AND UNCERTAINTIES			
SFAS No. 5 Contingencies			
1. Are the nature and amount of an accrued loss contingency disclosed in the financial statements if exposure to loss in excess of the amount accrued exists, or disclosure is necessary to keep the financial statements from being misleading? (SFAS No. 5, paras. 9–10)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
(SFAS No. 5, paras. 8–10)			
2. For loss contingencies not accrued, but when at least a reasonable possibility exists that a loss (or additional loss in excess of amounts accrued) may have occurred, do disclosures indicate: (SFAS No. 5, para. 10)			
a. Nature of contingency?			
b. Estimate of possible loss or range of loss, or a statement that such estimate cannot be made?			
3. Have contingencies that might result in gains been adequately disclosed but not reflected in the accounts so as not to recognize revenue prior to its realization? (SFAS No. 5, para. 17)			
4. If it is at least reasonably possible that the effect on the financial statements of significant estimates involving SFAS No. 5 contingencies (as referred to in Question Nos. 1–3) will change within one year of the date of the financial statements due to one or more future confirming events and the effect of that change would be material to the financial statements, do the disclosures include an indication that it is at least reasonably possible that a change in estimate will occur in the near term? (SOP 94-6, paras. 13–15) (NOTE: If the entity uses risk reduction techniques to mitigate losses or the uncertainty that may result from future events and, as a result, the preceding criteria are not met, the disclosures are encouraged but not required.)			
5. Has disclosure been made of loss contingencies relating to guarantees made for outside parties including the nature and amounts thereof? [Also, consider disclosing, if estimable, the value of any recovery that could be expected to result. Examples include (a) guarantees of indebtedness of others, and (b) indirect guarantees of the indebtedness of others. (SFAS No. 5, para. 12; also see FINANCIAL INSTRUMENTS)]			
Significant Estimates Other Than SFAS No. 5 Contingencies			
6. Have the following disclosures been made for significant estimates if it is at least reasonably possible that the estimates will change within one year of the date of the financial statements due to one or more confirming events and the effect of that change would be material: (SOP 94-6, paras. 13–15) (NOTE: If the entity uses risk reduction techniques to mitigate losses or the uncertainty that may result from future events and, as a result, the preceding criteria are not met, the disclosures are encouraged but not required.)			
a. The nature of the estimate?			
b. An indication that it is at least reasonably possible that a change in the estimate will occur in the near term?			
Concentrations			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
7. Have the following concentrations and the general nature of the risk associated with each been disclosed if (a) the concentration exists at the financial statement date, (b) the concentration makes the entity vulnerable to the risk of a near-term severe impact, and (c) it is at least reasonably possible that the events that could cause the severe impact will occur in the near term: (SOP 94-6, paras. 21, 22, and 24)			✓
a. Concentrations in the volume of business transacted with a particular customer, supplier, lender, grantor, or contributor? (NOTE: It is always considered at least reasonably possible that any customer, grantor, or contributor will be lost in the near term.)	____	____	____
b. Concentrations in revenue from particular products, services, or fund-raising events?	____	____	____
c. Concentrations in the available sources of supply of materials, labor, or services, or of licenses or other rights used in the entity's operations?	____	____	____
d. Concentrations in the market or geographic area?	____	____	____
e. Concentrations of labor subject to collective bargaining agreements, including the percentage of the labor force covered by those agreements and the percentage covered by agreements that will expire within one year?	____	____	____
f. Concentrations of operations outside the entity's home country, including the carrying amounts of net assets and the geographic areas in which they are located? (NOTE: It is always considered at least reasonably possible that operations located outside an entity's home country will be disrupted in the near term.)	____	____	____

Going Concern

8. If substantial doubt exists about the entity's ability to continue as a going concern for a period not to exceed one year beyond the balance sheet date, do the financial statements adequately disclose the following matters: (AU Section 341.10)			
a. Pertinent conditions and events giving rise to the assessment of substantial doubt about the entity's ability to continue as a going concern for a period not to exceed one year from the balance sheet date?	____	____	____
b. The possible effects of such conditions and events?	____	____	____
c. Management's evaluation of the significance of those conditions and events and any mitigating factors?	____	____	____
d. Possible discontinuance of operations?	____	____	____
e. Management's plans (including relevant prospective financial information)?	____	____	____
f. Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities?	____	____	____

Rents included in "Receipts" contributions"

9. If substantial doubt about the entity's ability to continue as a going concern for a

	Disclosure Made? Yes	No	N/A
period not to exceed one year from the balance sheet date is alleviated, do the financial statements adequately disclose the following matters: (AU Section 341.11)			✓
a. The conditions and events that initially caused the substantial doubt?	___	___	___
b. The possible effects of such conditions and events?	___	___	___
c. Any mitigating factors, including management's plans?	___	___	___

ILLEGAL ACTS

1. If material revenue or earnings are derived from transactions involving illegal acts, or if illegal acts create significant unusual risks associated with material revenue or earnings, such as loss of a significant business relationship, has that information been disclosed? (AU Section 317.15)	___	___	___

CHANGES IN PRESENTATION OF COMPARATIVE STATEMENTS

1. If, because of reclassifications or other reasons, changes have occurred in the manner of or the basis for presenting corresponding items in comparative statements, are the changes explained? (ARB No. 43, ch. 2A, para. 3)	___	___	___

SUBSEQUENT EVENTS

1. Are subsequent events that provide evidence about conditions that *did not exist* at the date of the balance sheet, but arose subsequent to the date, adequately disclosed to keep the financial statements from being misleading? (SFAS No. 5, para. 11; and AU Sections 560.05–.07 and .09)	___	___	___
2. If a change in the entity's tax status becomes effective after year end but before the financial statements are issued, are proper disclosures made? (QA-SFAS No. 109, No. 11)	___	___	___
3. If a material business combination is completed after the balance sheet date but before the financial statements are issued, has the information required by SFAS No. 141 been disclosed, if practicable? (See BUSINESS COMBINATIONS, Question Nos. 1–3)	___	___	___

PART II—OTHER DISCLOSURES

Instructions

Part I contains a checklist of Part II disclosures common to nonpublic entities. If any of those Part II disclosures are present, attach to Part I the appropriate disclosure page(s) in Part II, then complete the added pages. Occasionally the appropriate pages selected from Part II will include disclosure topics not applicable to the entity. If that occurs, check the N/A sections for the nonapplicable topics.

	Disclosure Made?		
	Yes	No	N/A
ACCOUNTING CHANGES AND CORRECTION OF AN ERROR			☑
1. Change in accounting principle:			
a. Have the nature of and justification for a change in accounting principle (clearly explaining why the change is preferable) and its effect on income before extraordinary items and net income of the period of the change been disclosed? (APB No. 20, para. 17)			
b. Have changes that have no material effect on current financial statements but are reasonably certain to have a substantial effect in later years been disclosed? (APB No. 20, para. 38)			
c. If an entity changes its method of amortization for newly acquired, identifiable, long-lived assets and uses that method for all additional new assets of the same class, but continues to use the previous method for existing assets of that class, have the nature of the change, effect on income before extraordinary items, and effect on net income been disclosed? (APB No. 20, para. 24)			
2. For a change in accounting principle accounted for by restating prior statements, has the effect on income before extraordinary items and net income for all prior periods presented been disclosed? (APB No. 20, para. 28)			
3. Change in accounting principle accounted for as a cumulative effect adjustment:			
a. Has the cumulative effect of a change in accounting principle been shown as a separate item in the income statement between the captions "extraordinary items" and "net income," and has the related tax effect also been shown? (APB No. 20, para. 20)			
b. Have pro forma amounts of income before extraordinary items and net income been shown on the face of the income statement for all periods presented as if the newly adopted accounting principle had been applied during all periods affected? (If an income statement is presented for the current period only, the actual and pro forma amounts for the immediately preceding period should be disclosed.) (APB No. 20, paras. 19 and 21)			
c. If the pro forma amounts cannot be computed or reasonably estimated for individual prior periods although the cumulative effect on retained earnings at the beginning of the period of change can be determined, has the reason for

	Disclosure Made?		
	Yes	No	N/A
the beginning of the period of change can be determined, has the reason for not showing the pro forma amounts been disclosed? (APB No. 20, para. 25)			✓
d. If it is considered impossible to compute the effect on retained earnings at the beginning of the period of change (principally changes from FIFO to LIFO), do the financial statements disclose: (APB No. 20, para. 26)			
(1) The effects of the change on the results of operations of the period of change?			
(2) The reason for omitting accounting for the cumulative effect and disclosure of pro forma amounts for prior years?			
4. Change in accounting estimate:			
a. For a change in an estimate that affects several future periods, has the effect on income before extraordinary items and net income of the current period been disclosed? (APB No. 20, para. 33)			
b. Has disclosure been made of the effect, if material, on income before extraordinary items and net income for changes in estimates made each period in the ordinary course of accounting for items such as uncollectible accounts or inventory obsolescence? (APB No. 20, para. 33)			
5. For a change in reporting entity, do financial statements for the period in which a change has occurred describe the nature of the change, the reason for it, and the effect of the change on income before extraordinary items and net income? (APB No. 20, para. 35)			
6. For a correction of an error, have the following been disclosed:			
a. The nature of the error? (APB No. 20, para. 37)			
b. Effect of the correction on income before extraordinary items and net income in the period of correction? (APB No. 20, para. 37)			
c. For comparative financial statements, adjusted net income and its components, retained earnings balances, and other affected balances for all periods presented to reflect retroactive application of the prior-period adjustment? (APB No. 9, para. 18)			
d. For single period financial statements, the effect of restatement (gross and net of tax) on beginning retained earnings and on net income of the preceding year? (APB No. 9, para. 26)			
e. The amount of income tax applicable to each prior-period adjustment? (APB No. 9, para. 26)			
f. If a restated historical financial summary (commonly 5 or 10 years) is presented, disclosure of the restatements in the first summary after the restatements? (APB No. 9, para. 27)			

ADVERTISING COSTS

1. Have the following disclosures about direct-response advertising been made: (SOP 93-7, para. 49)			
a. A description of the direct-response advertising that is capitalized?			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
a. A description of the direct-response advertising that is capitalized?			
b. The accounting policy for it?			✓
c. The amortization period?			
2. For nondirect-response advertising costs, has the policy about whether those costs are expensed as incurred or expensed the first time the advertising takes place been disclosed? (SOP 93-7, para. 49)			
3. Have the total advertising costs charged to expense for each income statement presented been disclosed? (SOP 93-7, para. 49)			
4. Have any write-downs of capitalized advertising to net realizable value been disclosed? (SOP 93-7, para. 49)			
5. Has the total amount of capitalized advertising included in each balance sheet presented been disclosed? (SOP 93-7, para. 49)			
6. Has the amount of revenue and expense recognized from advertising barter transactions been disclosed for each income statement period presented? (If the fair value of such transactions is not determinable, has information regarding the volume and type of advertising surrendered and received been disclosed for each income statement presented?) (EITF 99-17)			
BUSINESS COMBINATIONS			☐
1. Have the following required disclosures been made in the period in which a material business combination is completed: (SFAS No. 141, para. 51)			
a. Name and description of acquired entity?	✓		
b. Percentage of voting equity interests acquired?			✓
c. Primary reasons for the acquisition, including a description of the factors that contributed to a purchase price that results in recognition of goodwill?			
d. Period for which results of operations of the acquired entity are included in the combined entity's income statement?			
e. Cost of the acquired entity and, if applicable, the number of shares of equity interest issued or issuable, the value assigned to those interests, and the basis for determining that value?			
f. Condensed balance sheet disclosing the amount assigned to each major asset and liability caption of the acquired entity at the acquisition date?			
g. Contingent payments, options, or commitments specified in the acquisition agreement and the accounting treatment that will be followed should any contingency occur?			
h. Amount of purchased research and development assets acquired and written off in the period and the income statement line item in which the amounts written off are aggregated?			
i. If the purchase price allocation has not been finalized, that fact and the reasons therefor?			
2. If adjustments to prior period allocations of the purchase price of an acquired entity have been made in the current period, have the nature and amount of the

	Disclosure Made?		
	Yes	No	N/A
entity have been made in the current period, have the nature and amount of the adjustments been disclosed? (SFAS No. 141, para. 51)			✓
3. If goodwill or other intangible assets acquired are significant to the total cost of the acquired entity, have the following been disclosed: (SFAS No. 141, para. 52)			
a. For intangible assets subject to amortization, the amount, residual value, and weighted-average amortization period, in total and by major intangible asset class?			
b. Amount assigned to intangible assets not subject to amortization, in total and by major intangible asset class?			
c. Total amount of goodwill and the amount expected to be deductible for tax purposes?			
4. If a series of individually immaterial business combinations were completed during the period are material in the aggregate, have the following been disclosed: (SFAS No. 141, para. 53)			
a. Number and descriptions of the entities acquired?			
b. Aggregate cost of the acquired entities, number of equity interests issued or issuable, and the value assigned to those interests?			
c. Aggregate amount of contingent payments, options, or commitments and the accounting treatment that will be followed should any such contingency occur (if potentially significant to the aggregate cost of the acquired entities)?			
d. If the aggregate amount assigned to goodwill or other intangible assets acquired is significant to the aggregate cost of the acquired entities, the information in Question No. 3?			
5. If the combined entity plans to incur costs from exiting an activity of an acquired entity, involuntarily terminating employees of an acquired entity, or relocating employees of an acquired entity and the activities of the acquired entity that will not be continued are significant to the combined entity's revenues or operating results or the cost recognized from those activities as of the consummation date are material to the combined entity:			
a. Have the following disclosures been made for the period in which a purchase business combination occurs: (EITF No. 95-3)			
(1) When the plans to exit an activity or involuntarily terminate (relocate) employees of the acquired entity are not final as of the balance sheet date, a description of any unresolved issues, the types of additional liabilities that may result in an adjustment to the purchase price allocation, and how any adjustment will be reported?			
(2) A description of the type and amount of liabilities assumed in the purchase price allocation for costs to exit an activity or involuntarily terminate (relocate) employees?			
(3) A description of the major actions comprising the plan to exit an activity or involuntarily terminate (relocate) employees of an acquired entity?			
(4) A description of activities of the acquired entity that will not be continued, including the method of disposition, and the anticipated date			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
continued, including the method of disposition, and the anticipated date of completion and description of employee group(s) to be terminated (relocated)?			✓
b. Have the following disclosures been made for all periods presented subsequent to the acquisition date in which a purchase business combination occurred, until a plan to exit an activity or involuntarily terminate or relocate employees of an acquired entity is fully executed: (EITF No. 95-3)			
(1) A description of the type and amount of exit costs, involuntary employee termination costs, and relocation costs paid and charged against the liability?			
(2) The amount of any adjustment(s) to the liability account and whether the corresponding entry was an adjustment of the costs of the acquired entity or included in the determination of net income for the period?			
COMPUTER SOFTWARE REVENUES AND COSTS			☐
1. Have the policies for recognizing revenue from selling, leasing, or otherwise marketing computer software been disclosed? (Generally accepted)			
2. Have the following been disclosed for computer software costs to be sold, leased, or otherwise marketed, whether internally developed, produced, or purchased (except costs incurred for computer software created for others under a contractual arrangement): (SFAS No. 86, para. 11)			
a. Unamortized computer software costs included in each balance sheet presented?			
b. The total amount charged to expense in each income statement presented for amortization of capitalized computer software costs and for amounts written down to net realizable value?			
3. Are research and development costs incurred for a computer software product to be sold, leased, or otherwise marketed disclosed (either separately or as part of total research and development costs) for each period presented? (SFAS No. 86, para.12)			
CONSOLIDATIONS			☐
1. If consolidated statements are presented:			
a. Is the consolidation policy disclosed? (ARB No. 51, para. 5; and APB No. 22, para. 13)			
b. Are interentity balances and transactions eliminated? (ARB No. 51, para. 6)			
c. If the financial reporting periods of subsidiaries differ from that of the parent, is recognition given by disclosure or otherwise to the effect of intervening events that materially affect financial position or the results of operations? (ARB No. 51, para. 4; SFAS No. 12, paras. 18–20; and FASBI No. 13)			
DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES			☐

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
1. If the entity holds or issues derivative instruments (or nonderivative instruments that are designated and qualify as hedging instruments), have the following disclosures been made: [The disclosures should distinguish between (a) derivative instruments (and nonderivative instruments) designated as fair value hedging instruments, (b) derivative instruments designated as cash flow hedging instruments, (c) derivative instruments (and nonderivative instruments) designated as hedging instruments for hedges of the foreign currency exposure of a net investment in a foreign operation, and (d) all other derivatives.] (SFAS No. 133, para. 44)			✓
a. The entity's objectives for holding or issuing each type of hedging instrument, including the context needed to understand the objectives and the entity's strategies for achieving the objectives?	____	____	____
b. The entity's risk management policy for each type of hedge, including a description of the items or transactions for which risks are hedged?	____	____	____
c. The purpose of the derivative activity for derivative instruments not designated as hedging instruments?	____	____	____
2. Have the following disclosures been made for each reporting period for which a complete set of financial statements is presented: (SFAS No. 133, para. 45)			
a. For derivative instruments designated and qualifying as fair value hedging instruments (as well as nonderivative instruments that may give rise to foreign currency transaction gains or losses under SFAS No. 52) and for the related hedged items:			
(1) The net gain or loss recognized in earnings during the reporting period representing (a) the amount of the hedges' ineffectiveness and (b) the component of the derivative instruments' gain or loss, if any, excluded from the assessment of hedge effectiveness?	____	____	____
(2) A description of where the net gain or loss is reported in the income statement or other statement of financial performance?	____	____	____
(3) The amount of net gain or loss recognized in earnings when a hedged firm commitment no longer qualifies as a fair value hedge?	____	____	____
b. For derivative instruments designated and qualifying as cash flow hedging instruments and for the related hedged transactions:			
(1) The net gain or loss recognized in earnings during the reporting period representing (a) the amount of the hedges' ineffectiveness and (b) the component of the derivative instruments' gain or loss, if any, excluded from the assessment of hedge effectiveness?	____	____	____
(2) A description of where the net gain or loss is reported in the income statement or other statement of financial performance?	____	____	____
(3) A description of the transactions or other events that will result in the reclassification into earnings of gains and losses that are reported in accumulated other comprehensive income?	____	____	____
(4) The estimated net amount of the existing gains or losses at the reporting date that is expected to be reclassified into earnings within the next 12			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made? Yes	No	N/A
date that is expected to be reclassified into earnings within the next 12 months?			✓
(5) The maximum length of time over which the entity is hedging its exposure to the variability in future cash flows for forecasted transactions excluding those forecasted transactions related to the payment of variable interest on existing financial instruments?			
(6) The amount of gains and losses reclassified into earnings as a result of the discontinuance of cash flow hedges because it is probable that the original forecasted transactions will not occur by the end of the originally specified time period or within the additional period of time discussed in paragraph 33 of SFAS No. 133?			
c. The net amount of gains or losses included in the cumulative translation adjustment during the reporting period for derivative instruments designated and qualifying as hedging instruments for hedges of the foreign currency exposure of a net investment in a foreign operation (as well as for nonderivative instruments that may give rise to foreign currency transaction gains or losses under SFAS No. 52)? (SFAS No. 133, para. 45)			
3. Has the net gain or loss on derivative instruments designated and qualifying as cash flow hedging instruments that are reported in comprehensive income been displayed as a separate classification within other comprehensive income? (SFAS No. 133, para. 46)			
4. Have the following disclosures been made separately as part of the disclosures of accumulated other comprehensive income: (SFAS No. 133, para. 47)			
a. The beginning and ending accumulated derivative gain or loss?			
b. The related net change associated with current period hedging transactions?			
c. The net amount of any reclassification into earnings?			
DEVELOPMENT STAGE COMPANIES			☐
1. Do the financial statements of development stage companies disclose: (SFAS No. 7, paras. 11–13)			
a. Balance Sheet—any cumulative net losses reported with a descriptive caption such as "deficit accumulated during the development stage" in the stockholders' equity section?			
b. Income Statement—amounts of revenues and expenses for each individual period presented as well as cumulative amounts from the entity's inception?			
c. Statement of Cash Flows—cash inflows and outflows for each period for which an income statement is presented and, in addition, cumulative amounts from the entity's inception?			
d. Statement of Stockholders' Equity—showing from the entity's inception:			
(1) For each issuance, the date and number of shares of stock, warrants, rights, or other equity securities issued for cash and for other consideration?			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made? Yes	No	N/A
(2) For each issuance, the dollar amounts (per share or other equity unit and in total) assigned to the consideration received for shares of stock, warrants, rights, and other equity securities? (Dollar amounts should be assigned to any noncash consideration received.)			
(3) For each issuance involving noncash consideration, the nature of the noncash consideration and the basis for assigning amounts?			
e. That the financial statements are those of a development stage company and a description of the nature of the development stage activities in which the entity is engaged?			
f. In the financial statements for the first fiscal year in which the entity is no longer considered to be in the development stage that in prior years it had been in the development stage? [If financial statements for prior years are presented for comparative purposes, the cumulative amounts and other additional disclosures required by (a) through (e) need not be shown.]			

DISCONTINUED OPERATIONS

The disclosures in items 1–2 apply if SFAS No. 144 has not been adopted. SFAS No. 144 is effective for financial statements of fiscal years beginning after December 15, 2001, and interim periods within those fiscal years.

1. For discontinued operations of a segment of a business, has disclosure been made for: [For periods subsequent to the measurement date and including the period of disposal, notes should disclose the information in items (e) through (i).] (APB No. 30, paras. 8 and 18)			
a. Income or loss of the discontinued segment (net of applicable income taxes) reported separately from income from continuing operations (before extraordinary items and cumulative effects of accounting changes)?			
b. Gain or loss from disposal of the discontinued segment (net of applicable income taxes) reported separately from income from continuing operations (before extraordinary items and cumulative effects of accounting changes)? (If the gain or loss cannot be reasonably estimated, that fact should be disclosed.)			
c. Amounts of income taxes applicable to income from discontinued operations and the gain or loss on disposal?			
d. Revenues applicable to the discontinued operations?			
e. The identity of the segment of business that has been or will be discontinued?			
f. The expected disposal date, if known?			
g. The expected manner of disposal?			
h. A description of the remaining assets and liabilities of the segment at the balance sheet date (may instead be disclosed by segregating the net assets and liabilities in the balance sheet)?			
i. Income or loss from discontinued operations and any proceeds from disposal of the segment during the period from the measurement date to the balance sheet date, and for periods subsequent to the measurement date including the period of disposal, those amounts compared to previously disclosed

	Disclosure Made?		
	Yes	No	N/A
estimates?			✓
2. For each adjustment in the current period of a loss on disposal of a business segment that was reported in a prior period, has the following been disclosed separately in the current period as a gain or loss on disposal of a segment: (APB No. 30, para. 25, and SFAS 16, para. 16)			
a. Year of origin and nature?			
b. Amount of adjustment?			
The following disclosures are required by SFAS No. 144, which is effective for financial statements of fiscal years beginning after December 15, 2001, and interim periods within those fiscal years (or for financial statements of entities who have adopted SFAS No. 144 early).			
3. Have the following disclosures been made for each period in which a component of an entity has been disposed of or classified as held for sale:			
a. Results of operations for the component, including any gain or loss on disposal and less applicable income taxes, reported as a separate component of income before extraordinary items and the cumulative effect of accounting changes, if applicable? (SFAS 144, para. 43)			
b. Nature and amount of any adjustments to amounts previously reported in discontinued operations that are directly related to the disposal of a component of the entity in a prior period? (Such adjustments should be classified separately in the current period in discontinued operations.) (SFAS No. 144, para. 44)			
c. Assets and liabilities of the disposal group presented separately in the asset and liability sections of the statement of financial position, with the major classes of such assets and liabilities separately disclosed either on the face of the statement of financial position or in the notes? (SFAS No. 144, para. 46)			
d. Description of the facts and circumstances leading to the expected disposal, the expected manner and timing of the disposal, and, if not separately presented on the face of the statement of financial position, the carrying amounts of the major classes of assets and liabilities included in the disposal group? (SFAS No. 144, para. 47)			
e. Loss recognized for any initial or subsequent write-down to fair value less cost to sell (or gain recognized for subsequent increases in fair value to the extent of such losses) and, if not separately presented on the face of the income statement, the caption in the income statement that includes the gain or loss? (SFAS No. 144, para. 47)			
f. Amounts of revenue and pretax profit or loss reported in discontinued operations? (SFAS No. 144, para. 47)			
g. The segment in which the long-lived asset is reported, if applicable? (SFAS No. 144, para. 47)			
4. If a decision was made during the period not to sell a disposal group previously classified as held for sale, do disclosures include a description of the circumstances leading to the decision and the effect of the decision on results of			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
circumstances leading to the decision and the effect of the decision on results of operations for all periods presented? (SFAS No. 144, para. 48)	____	____	____
EMPLOYEE STOCK OWNERSHIP PLANS (ESOPs)			
The disclosures listed in items (1) through (6) are required by SOP 93-6, and apply to shares acquired by an ESOP after December 31, 1992 (new shares). Shares acquired on or before December 31, 1992 (old shares), may be accounted for following SOP 93-6, or SOP 76-3. If SOP 76-3 is followed, the applicable disclosures in items (1) through (4) and (6) through (7) should be made.			
SOP 93-6			
1. Do the financial statements disclose the following general information regarding the plan: (SOP 93-6, para. 53a)			
a. A description of the plan?	____	____	____
b. The basis for determining contributions to the plan?	____	____	____
c. The employee groups covered by the plan?	____	____	____
d. The nature and effect of significant matters affecting comparability of information for the periods presented?	____	____	____
e. The basis for releasing shares and how dividends on allocated and unallocated shares are used (applies to leveraged ESOPs and pension reversion ESOPs)?	____	____	____
2. Have the following accounting policy disclosures been made: (The disclosures are required for both *old shares* and *new shares* if the employer does not adopt SOP 93-6 guidance for old shares.) (SOP 93-6, para. 53b)			
a. The method of measuring compensation?	____	____	____
b. The classification of dividends on ESOP shares?	____	____	____
c. How ESOP shares are treated in the employer's earnings per share calculations?	____	____	____
3. Do the financial statements disclose the amount of plan compensation cost recognized during the period? (SOP 93-6, para. 53c)	____	____	____
4. Do the financial statements disclose the number of allocated shares, committed-to-be-released shares, and suspense shares held by the plan at the balance sheet date? (Separate disclosure is required for both old shares and new shares if the employer does not adopt SOP 93-6 guidance for the old shares.) (SOP 93-6, para. 53d)	____	____	____
5. Is the fair value of unearned ESOP shares at the balance sheet date disclosed? (This disclosure need not be made for old ESOP shares if the employer does not adopt SOP 93-6 guidance for the old shares.) (SOP 93-6, para. 53e)	____	____	____
6. Do the financial statements disclose the existence and nature of any repurchase obligations, including the fair value of any shares subject to a repurchase obligation and allocated as of the balance sheet date? (SOP 93-6, para. 53f)	____	____	____

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made? Yes	No	N/A
SOP 76-3			
7. If an employer has, in substance, guaranteed the debt of an ESOP, do the employer's financial statements disclose: (SOP 76-3, para. 10)			
a. The compensation element and the interest element of annual contributions to the ESOP?	____	____	____
b. The interest rate and debt terms?	____	____	____
ENVIRONMENTAL REMEDIATION OBLIGATIONS AND CONTINGENCIES			
1. Has the following information been disclosed about recorded accruals for environmental remediation loss contingencies and related assets for third-party recoveries: (SOP 96-1, paras. 7.11 and 7.20)			
a. Whether the accrual for environmental remediation liabilities is measured on a discounted basis?	____	____	____
b. The nature and amount of the accrual (if necessary for the financial statements not to be misleading)?	____	____	____
c. If any portion of the accrued obligation is discounted, the undiscounted amount of the obligation and the discount rate used?	____	____	____
d. If it is at least reasonably possible that the accrued obligation or any recognized asset for third-party recoveries will change within one year of the date of the financial statements and the effect is material, an indication that it is at least reasonably possible that a change in the estimate will occur in the near term?	____	____	____
2. Have the following disclosures been made about unaccrued environmental remediation contingencies (including exposures in excess of amounts accrued): (SOP 96-1, para. 7.21)			
a. A description of the reasonably possible loss contingency and an estimate of the possible loss (or the fact that such an estimate cannot be made)?	____	____	____
b. If it is at least reasonably possible that the estimated loss (or gain) contingency will change within one year of the date of the financial statements and the effect is material, an indication that it is at least reasonably possible that a change in the estimate will occur in the near term?	____	____	____
3. If an environmental liability for a specific clean-up site is discounted because it meets the criteria for discounting in SOP 96-1 and the effect of discounting is material, do the financial statements disclose the undiscounted amounts of the liability and any related recovery and the discount rate used? (SOP 96-1, para. 7.20)	____	____	____
EXIT OR DISPOSAL ACTIVITIES			
The disclosures in item 1 apply if SFAS No. 146 has been adopted. SFAS No. 146 is effective for exit or disposal activities initiated after December 31, 2002. (Early application is encouraged.)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
1. Has the following been disclosed if an exit or disposal activity was initiated or in process during the period: (SFAS No. 146, para. 20)			✓
a. A description of the exit or disposal activity, including the facts and circumstances leading to the activity and the expected completion date?	___	___	___
b. For each major type of cost associated with the activity:	___	___	___
(1) The total amount expected to be incurred in connection with the activity, the amount incurred during the period, and the cumulative amount incurred to date?	___	___	___
(2) A reconciliation of the beginning and ending liability balances showing separately the changes during the period attributable to costs incurred and charged to expense, costs paid or otherwise settled, and any adjustments to the liability? (The reasons for any adjustments should be explained.)	___	___	___
c. The line items in the income statement in which the exit or disposal costs are included?	___	___	___
d. If a liability for a cost associated with the activity is not recognized because fair value cannot be reasonably estimated, that fact and the reasons therefor?	___	___	___
The disclosures in items 2–3 apply if SFAS No. 146 has not been adopted. SFAS No. 146 is effective for exit or disposal activities initiated after December 31, 2002. (Early application is encouraged.)	___	___	___
2. Have the following disclosures about accrued employee termination benefits been made: (EITF 94-3)			
a. The amount of the termination benefits accrued and charged to expense and the classification of those costs in the income statement?	___	___	___
b. The number of employees to be terminated?	___	___	___
c. A description of the employee group(s) to be terminated?	___	___	___
d. The amount of actual termination benefits paid and charged against the liability accrued for employee termination benefits?	___	___	___
e. The number of employees actually terminated as a result of the termination plan?	___	___	___
f. The amount of any adjustment(s) to the liability accrued for employee termination benefits?	___	___	___
3. Have the following disclosures about the entity's plan to exit an activity been made in the financial statements of all periods until the exit plan is fully executed if the activities that will not be continued are significant to the entity's revenue or operating results or the exit costs recognized at the commitment date are material: (EITF 94-3)			
a. A description of the major actions included in the exit plan and the particular activities that will not be continued, including method of disposition?	___	___	___
b. When the major actions of the exit plan are expected to be completed?			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
b. When the major actions of the exit plan are expected to be completed?			✓
c. A description of the type and amount of exit costs recognized as liabilities?			
d. The classification of the exit costs in the income statement?			
e. A description of the type and amount of exit costs paid and charged against the liability?			
f. The amount of any adjustments to the liability?			
g. For all periods presented, the revenues and net operating income or losses from activities that will not be continued if those activities have separately identifiable operations?			

EXTINGUISHMENT OF DEBT

1. If debt is considered to be extinguished prior to December 31, 1996, under the provisions of SFAS No. 76, para. 3(c) relating to cash or other assets placed in trust, is a general description of the transaction and the amount of debt that is considered extinguished at the end of the period disclosed so long as the debt remains outstanding? (SFAS No. 140, para. 17)			
2. If assets are set aside after December 30, 1996, solely for satisfying scheduled payments of a specific debt, has the nature of restrictions placed on those assets been disclosed? (SFAS No. 140, para. 17)			

SFAS No. 145 rescinds SFAS No. 4 for fiscal years beginning after May 15, 2002. (Early application is encouraged.) If SFAS No. 145 has not been applied, the disclosures in items 3–4 are required, if applicable.

3. When a gain or loss from the extinguishment of debt is classified as an extraordinary item, has the transaction been described either on the statement or in a separate note (including the source of any funds used to extinguish the debt, if identifiable), and has the income tax effect in the period of extinguishment been disclosed? (SFAS No. 4, para. 9)			
4. Has the aggregate gain or loss from the extinguishment of debt not classified as an extraordinary item, e.g., sinking fund transactions, been identified in the income statement as a separate item, if material? (SFAS No. 4, para. 8)			

FOREIGN OPERATIONS

1. Are significant foreign operations disclosed, including foreign earnings reported in excess of amounts received in the U.S. (or available for unrestricted transmittal to the U.S.)? (ARB 43, Ch. 12, paras. 5–6)			
2. Has the following information about foreign currency translations been disclosed: (SFAS No. 52, paras. 30–32)			
a. Aggregate foreign currency transaction gain or loss included in net income?			
b. Analysis of the changes during the period in accumulated other comprehensive income for cumulative translation adjustments, including at a minimum—			
(1) Beginning and ending amount of cumulative translation adjustments?			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
(1) Beginning and ending amount of cumulative translation adjustments?			✓
(2) Aggregate adjustment for the period resulting from translation adjustments and gains and losses from hedges of a net investment in a foreign entity and long-term intercompany foreign currency transactions?			
(3) Amount of taxes for the period allocated to translation adjustments?			
(4) Amounts transferred from cumulative translation adjustments and included in net income as a result of the sale or liquidation of an investment in a foreign entity?			
(5) Information about investments designated as hedges of the foreign currency exposure of a net investment in a foreign operation? (See DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES, Question Nos. 1 and 2, page 30.)			
c. Exchange rate changes occurring after the balance sheet date (if their effects are material), including their effects on unsettled foreign currency transactions? (If it is not practicable to determine the effect of the rate changes, that fact should be stated.)			

FRANCHISE FEE REVENUES ☐

1. Has the nature of all significant commitments and obligations resulting from franchise agreements, including a description of the services that have not yet been substantially performed, been disclosed? (SFAS No. 45, para. 20)			
2. If the installment or cost recovery method is used to account for franchise fee revenue, has the following been disclosed: (SFAS No. 45, para. 21)			
a. Method used to account for franchise fee revenue?			
b. Sales price?			
c. Revenue and related costs deferred on both a current and cumulative basis?			
d. Periods in which the fees become payable by the franchisee?			
e. Amounts originally deferred but later recognized because uncertainties about the collectibility of franchise fees are resolved?			
3. Has the amount of initial franchise fees, if significant, been disclosed separately from other franchise fee revenue? (SFAS No. 45, para. 22)			
4. When practicable, have revenue and costs related to franchisor-owned outlets been disclosed separately from revenue and costs related to franchised outlets? (SFAS No. 45, para. 23)			
5. If it is probable that initial franchise fee revenue will decline in the future because sales will reach a saturation point, has that fact been disclosed? (SFAS No. 45, para. 22)			
6. Has the relative contribution to net income of initial franchise fee revenue been disclosed if not otherwise apparent? (SFAS No. 45, para. 22)			
7. Have the following been disclosed if significant changes in the ownership of			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
franchises occur during the period: (SFAS No. 45, para. 23)			✓
a. Number of franchises sold during the period?	____	____	____
b. Number of franchises purchased during the period?	____	____	____
c. Number of franchised outlets in operation during the period?	____	____	____
d. Number of franchisor-owned outlets in operation during the period?	____	____	____
IMPAIRED LONG-LIVED ASSETS AND LONG-LIVED ASSETS TO BE DISPOSED OF			☐
1. Have the following disclosures been made about impaired assets that will continue to be used (SFAS No. 121, para. 14 and SFAS No. 144, para. 26):			
a. A description of the impaired assets and the facts and circumstances leading to the impairment?	____	____	____
b. The amount of the impairment loss and how fair value was determined?	____	____	____
c. The caption in the income statement in which the impairment loss is aggregated if that loss has not been presented as a separate caption or reported parenthetically on the face of the statement?	____	____	____
d. The business segment(s) affected, if applicable?	____	____	____
2. Have the following disclosures been made for all assets to be disposed of in each period the assets are held (SFAS No. 121, para. 19 and SFAS No. 144, para. 47):			
a. A description of assets to be disposed of, the facts and circumstances leading to the expected disposal, the expected manner and timing of the disposal, and the carrying amount of those assets?	____	____	____
b. The business segment(s) in which assets to be disposed of are held, if applicable?	____	____	____
c. The loss, if any, resulting from writing down the assets to fair value less cost to sell?	____	____	____
d. The gain or loss, if any, resulting from subsequent changes in the carrying amounts of assets to be disposed of?	____	____	____
e. The caption in the income statement in which the gains or losses (from c. and d.) are aggregated if those gains or losses have not been presented as a separate caption or reported parenthetically on the face of the statement?	____	____	____
f. If SFAS No. 144 has not been adopted, the results of operations for assets to be disposed of to the extent that those results are included in the entity's results of operations for the period and can be identified?	____	____	____
3. For financial statements of fiscal years beginning after December 15, 2001, and interim periods within those fiscal years (or for financial statements of entities who have adopted SFAS No. 144 early), if a decision was made during the period not to sell a long-lived asset previously classified as held for sale, do disclosures include a description of the circumstances leading to the decision and the effect of the decision on results of operations for all periods presented? (SFAS No. 144, para. 48)	____	____	____
INCOME TAXES—SPECIAL AREAS			☐

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
INCOME TAXES—SPECIAL AREAS			
1. Have the following disclosures been made whenever a deferred tax liability is not recognized for any of the areas addressed by APB No. 23 (undistributed earnings of subsidiaries or corporate joint ventures, bad debt reserves of savings and loan associations, or policy holders' surplus of life insurance companies), for deposits in statutory reserve funds by U.S. steamship companies, or for inside basis differences of foreign subsidiaries in the consolidated financial statements of the parent and its foreign subsidiaries: (SFAS No. 109, para. 44; and EITF 93-16)			
a. A description of the types of temporary differences for which a deferred tax liability has not been recognized and the types of events that would cause those temporary differences to become taxable?	____	____	____
b. The cumulative amount of each type of temporary difference?	____	____	____
c. The amount of the unrecognized deferred tax liability for temporary differences related to investments in foreign subsidiaries and foreign corporate joint ventures that are essentially permanent in duration if determination of that liability is practicable or a statement that determination is not practicable?	____	____	____
d. The amount of the unrecognized deferred tax liability for temporary differences related to undistributed domestic earnings, the bad debt reserve for tax purposes of a U.S. savings and loan association or other qualified thrift lender, the policy holders' surplus of a life insurance company, and the statutory reserve funds of a U.S. steamship company?	____	____	____
2. If the tax benefits of deductible temporary differences and carryforwards arising prior to a quasi-reorganization are recognized in net income rather than contributed capital, have the following been disclosed: (SFAS No. 109, para. 39)			
a. The date of the quasi-reorganization?	____	____	____
b. The manner of reporting the tax benefits and that it differs from present accounting requirements for other entities?	____	____	____
c. The effect of the tax benefits on income from continuing operations, income before extraordinary items, and on net income?	____	____	____
INSURANCE CONTRACTS AND PROCEEDS			☐
1. Have the following been disclosed for insurance and reinsurance contracts accounted for as deposits: (SOP 98-7, para. 18)			
a. A description of the contracts accounted for as deposits?	____	____	____
b. Total deposit assets reported in the balance sheet?	____	____	____
c. Total deposit liabilities reported in the balance sheet?	____	____	____
2. If business interruption insurance proceeds were received during the period, have the following been disclosed: (EITF 01-13)			
a. Nature of the event resulting in business interruption losses?	____	____	____
b. Aggregate amount of proceeds recognized during the period and the income statement line item in which they are presented?

	Disclosure Made?		
	Yes	No	N/A
...income statement line item in which they are presented.			☑

INTANGIBLES

The disclosures in Questions 1–2 apply if SFAS No. 142, *Goodwill and Other Intangible Assets*, has not been adopted. SFAS No. 142's disclosure requirements are effective for fiscal years beginning after December 15, 2001. (Early application is permitted for entities with fiscal years beginning after March 15, 2001, if the first interim statements have not been presented previously.)

1. Are the method and period of amortization of intangible assets disclosed? (APB No. 16, para. 95, and APB No. 17, para. 30) ____ ____ ____
2. Are the reasons for significant reductions relating to intangible assets disclosed? (APB No. 17, para. 31) ____ ____ ____

The disclosures in Questions 3–11 are required by SFAS No. 142, *Goodwill and Other Intangible Assets*, and are effective for fiscal years beginning after December 15, 2001. (Early application is permitted for entities with fiscal years beginning after March 15, 2001, if the first interim statements have not been presented previously.)

3. Are individual intangible assets or classes of intangible assets presented as separate line items in the statement of financial position or, at a minimum, aggregated and presented as a separate line item? (SFAS No. 142, para. 42) ____ ____ ____
4. Is the aggregate amount of goodwill presented as a separate line item in the statement of financial position? (SFAS No. 142, para. 43) ____ ____ ____
5. Is the aggregate amount of any goodwill impairment loss presented as a separate line item in the income statement and included in income from continuing operations (unless it relates to discontinued operations, in which case is it included in discontinued operations, net of tax)? (SFAS No. 142, para. 43) ____ ____ ____
6. Has the following been disclosed in the period intangible assets are acquired: (SFAS No. 142, para. 44)
   a. For intangible assets subject to amortization, the amount, residual value, and weighted-average amortization period, in total and by major intangible asset class? ____ ____ ____
   b. Amount assigned to intangible assets not subject to amortization, in total and by major intangible asset class? ____ ____ ____
   c. Amount of research and development assets acquired and written off in the period and the income statement line item in which the amounts written off are aggregated? ____ ____ ____
7. Has the following been disclosed for each period for which an income statement is presented: (SFAS No. 142, para. 45)
   a. For intangible assets subject to amortization, the gross carrying amount and accumulated amortization, in total and by major intangible asset class, the aggregate amortization expense for the period, and the estimated aggregate amortization expense for each of the five succeeding fiscal years?

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
b. Carrying amount of intangible assets not subject to amortization, in total and by major intangible asset class?	___	___	✓
c. Changes in the carrying amount of goodwill during the period, including the aggregate amount of goodwill acquired, impairment losses recognized, and goodwill included in the gain or loss on disposal of all or a portion of a reporting unit?	___	___	___
8. Has the following been disclosed for each intangible asset impairment loss recognized during the period: (SFAS No. 142, para. 46)			
a. Description of the impaired intangible asset and the facts and circumstances leading to the impairment?	___	___	___
b. Amount of impairment loss and method of determining fair value?	___	___	___
c. Income statement caption in which the impairment loss is aggregated?	___	___	___
9. Has the following been disclosed for each goodwill impairment loss recognized during the period: (SFAS No. 142, para. 47)			
a. Description of the facts and circumstances leading to the impairment?	___	___	___
b. Amount of impairment loss and the method of determining the fair value of the associated reporting unit?	___	___	___
c. If the impairment loss is an estimate, that fact and the reasons therefor?	___	___	___
10. If significant adjustments to a prior-period estimated goodwill impairment loss have been made in the current period, have the nature and amount of the adjustments been disclosed? (SFAS No. 142, para. 47)	___	___	___
11. If SFAS No. 142 has been applied but goodwill and other intangible assets have not been accounted for following SFAS No. 142 in all periods presented, has the following been disclosed: (SFAS No. 142, para. 61)			
a. Income before extraordinary items and net income adjusted to exclude amortization expense (including any related tax effects) related to goodwill, intangible assets no longer being amortized, any deferred credit related to an excess over cost, equity method goodwill, and changes in amortization periods for intangible assets that will continue to be amortized (including any related tax effects)?	___	___	___
b. A reconciliation of reported net income to the adjusted net income?	___	___	___
INTERIM FINANCIAL STATEMENTS			☐
1. Do the notes disclose the method used to determine inventory and cost of sales amounts if physical inventories as of the interim date have not been used to determine those amounts? (APB No. 28, para. 14)	___	___	___
2. If seasonal variations affect revenues, has that fact been disclosed and consideration been given to supplemental reporting of interim information for the 12-month period ended as of the interim date for the current and preceding years? (APB No. 28, para. 18)	___	___	___

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
3. If there are significant variations in the customary relationship between income tax expenses and pretax accounting income, and the reasons the variations exist are not apparent, has appropriate disclosure been made? (APB No. 28, para. 19, fn. 2)			✓
4. Do the notes disclose contingencies and other uncertainties that are necessary to make the interim financial statements not misleading? (APB No. 28, para. 22)			
5. If there is a retroactive application of a change in accounting principle, is the effect on all periods presented disclosed? (APB No. 28, para. 25)			
6. Have appropriate disclosures been made for changes in accounting principles when neither the cumulative effect of the change nor pro forma amounts can be computed (principally changes to the LIFO method of inventory pricing)? (SFAS No. 3, para. 12)			
7. Are extraordinary items and unusual or infrequently occurring transactions and events that are material to the operating results of the interim period reported separately in the period they occurred? (APB No. 28, para. 21)			
8. Has disclosure been made of any change in accounting principles or practices from those applied in the prior annual report, the preceding interim period of the current year, or the comparable interim period of the prior year? (APB No. 28, para. 23)			
9. Has the effect of a change in accounting estimate been disclosed if it is material to any interim period presented? (APB No. 28, para. 26)			
10. Have the nature and amount of costs and expenses incurred in an interim period that cannot be readily identified with the activities or benefits of other interim periods been disclosed? (APB No. 28, para. 15)			
11. If the cumulative effect of an accounting change or correction of an error was not reported because the amounts were not material to the annual financial statements, have such amounts been disclosed if they are material to the interim financial statements? (APB No. 28, para. 29)			
12. Have the following disclosures been made for the interim period in which an adjustment related to prior interim periods of the current fiscal year occurs: (SFAS No. 16, para. 15)			
a. The effect on income from continuing operations and net income for each prior interim period of the current fiscal year?			
b. The income from continuing operations and net income for each prior interim period restated in accordance with SFAS No. 16, para. 14?			
13. Have appropriate disclosures been made for the cumulative effect-type accounting changes other than changes to LIFO in the interim financial statements? (SFAS No. 3, para. 11)			
14. Has disclosure of prior-period adjustments been made in interim financial statements during the year subsequent to the date of recording the adjustments? (APB No. 9, para. 26, fn. 3)

	Disclosure Made?		
	Yes	No	N/A
(FAS 5, para. 20, fn. 3)			
INVESTMENTS ACCOUNTED FOR BY THE EQUITY METHOD			☑
1. Have the following been disclosed if the investor owns 20% or more of the common stock and uses the equity method: (APB No. 18, para. 20)			
a. The name of each investee and percentage of ownership of common stock, if significant?			
b. Accounting policies of the investor relative to investments in common stock?			
c. Difference, if any, between the amount at which the investment is carried and the amount of underlying equity in net assets for the latest balance sheet presented and the accounting treatment of the difference?			
d. The aggregate market value of each identified investment for which a market value is available? (Not required for investments in common stock of subsidiaries.)			
e. When investments in common stock, corporate joint ventures, or other investments accounted for under the equity method are, in the aggregate, material, has summarized information as to assets, liabilities, and results of operations been presented either individually or in groups as appropriate?			
f. Material effects of possible conversions, exercises, or contingent issuances of the investee?			
2. If the investor does not use the equity method, is disclosure made of the names of any significant investee corporations in which the investor owns 20% or more of the voting stock, together with the reasons the equity method is not considered appropriate? (APB No. 18, para. 20, fn. 13)			
3. Is disclosure made of the names of any significant investee corporations in which the investor owns less than 20% of the voting stock and the common stock is accounted for on the equity method, together with the reasons the equity method is considered appropriate? (APB No. 18, para. 20, fn. 13)			
4. Are investments in common stock shown in the balance sheet of an investor as a single amount, and the investor's share of earnings or losses of investees shown in the income statement as a single amount, except for extraordinary items, prior-period adjustments, etc.? (APB No. 18, para. 19)			
5. Has the policy for determining the amount of equity method losses when previous losses have reduced the common stock investment account to zero been disclosed? (EITF 99-10)			
INVESTMENTS IN NONCORPORATE REAL ESTATE JOINT VENTURES			☐
NOTE: The following disclosures relate to investments in noncorporate real estate joint ventures. For investments in corporate joint ventures, refer to the disclosure requirements for INVESTMENTS ACCOUNTED FOR BY THE EQUITY METHOD.			
1. For investments that are accounted for by the equity method, are the following items disclosed: (SOP 78-9, para. 12)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
a. Investee's name and percentage of ownership?			
b. Legal form of venture?			
c. For limited partnership interests of less than 20%, an explanation of why the equity method is used?			
d. Material differences at the balance sheet date between the book value of the investment and the underlying equity in net assets, and the manner of accounting for those differences?			
e. Summary financial information about the assets, liabilities, and results of operations of material investments?			
f. Effects of contingent issuances or provisions of the venture agreement that, if exercised, would materially affect the investor's share of venture profits and losses?			
g. Market value of the investment, if a quoted market price is available?			
2. For limited partnership interests of 20% or more that are accounted for by the cost method, are the following items disclosed: (Generally accepted)			
a. Investee's name and percentage of ownership?			
b. Explanation of why the cost method is used?			
3. For investments that are accounted for by proportionate consolidation, are the following items disclosed: (Generally accepted)			
a. Investee's name and percentage of ownership?			
b. Legal form of venture?			
c. An explanation of why proportionate consolidation is used?			
4. For investments that are consolidated:			
a. Is the consolidation policy disclosed? (ARB No. 51, para. 5 and APB No. 22, para. 13)			
b. Are intercompany balances and transactions eliminated? (ARB No. 51, paras. 5–6)			
c. If the financial reporting periods of subsidiaries differ from that of the parent, is recognition given by disclosure or otherwise to the effect of intervening events that materially affect financial position or the results of operations? (ARB No. 51, para. 4)			
LEASES IN FINANCIAL STATEMENTS OF LESSORS			☐
1. Have the following disclosures been made when leasing, other than leveraged leasing, is a significant part of the lessor's business activities in terms of revenue, net income, or assets: (SFAS No. 13, para. 23, and SFAS No. 91, para. 25)			
a. General description of the lessor's leasing arrangements?			
b. Sales-type and direct financing leases:			
(1) For each balance sheet presented, the components of the net investments in sales-type and direct financing leases including:			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made? Yes	No	N/A
(a) Aggregate minimum future lease payments to be received?			✓
(b) Amount of aggregate minimum future lease payments representing:			
• Executory costs, including any profit thereon?			
• Accumulated allowance for uncollectible minimum lease payments receivable?			
(c) Unguaranteed residual values accruing to the lessor's benefit?			
(d) Unearned income?			
(e) For direct financing leases only, initial direct costs?			
(2) Future minimum lease payments to be received for each of the five succeeding fiscal years as of the date of the latest balance sheet presented?			
c. Operating leases (for the latest balance sheet presented):			
(1) Cost and carrying amount, if different, of property of the lessor held for leasing by major classes of property according to nature or function, and the total amount of accumulated depreciation thereon?			
(2) Future minimum rentals on noncancelable leases in the aggregate and for each of the next five fiscal years?			
d. Contingent rental income:			
(1) Contingent rentals included in income for each income statement presented? (SFAS No. 13, para. 23)			
(2) The accounting policy for contingent rental income? (EITF 98-9)			
(3) If the lessor accrues contingent rental income prior to the lessee's achievement of the specified target (provided achievement of the target is probable), the impact on rental income as if the lessor's accounting policy was to defer contingent rental income until the specified target is met? (EITF 98-9)			
e. Have appropriate disclosures been made for leveraged leases? (SFAS No. 13, para. 47)			
f. Have the nature and extent of leasing transactions with related parties been disclosed? (SFAS No. 13, para. 29)			
LENDING ACTIVITIES AND LOAN PURCHASES			☐
1. If the entity anticipates prepayments of loan principal, has that policy and the significant assumptions underlying prepayment estimates been disclosed? (SFAS No. 91, para. 19)			
LIMITED LIABILITY COMPANIES OR PARTNERSHIPS (LLCs or LLPs)			☐
1. If [illegible] liability is limited, has that fact been disclosed? (AcSEC PB 14, para.			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
1. If members' liability is limited, has that fact been disclosed? (AcSEC PB 14, para. 15)			
2. Have the different classes of members' interests and the respective rights, preferences, and privileges of each class been disclosed? (AcSEC PB 14, para. 15)			
3. Has the amount of each class of members' equity been disclosed, either on the face of the balance sheet or in the notes? (AcSEC PB 14, para. 15)			
4. If the LLC or LLP has a finite life, has the date it will cease to exist been disclosed? (AcSEC PB 14, para. 15)			
5. If the LLC or LLP was formed by combining entities under common control or by conversion from another type of entity, has the fact that the assets and liabilities were previously held by a predecessor entity or entities been disclosed in the year of formation? (AcSEC PB 14, para. 16)	✓		

LONG-LIVED ASSET RETIREMENT OBLIGATIONS

The following disclosures are required by SFAS No. 143, *Asset Retirement Obligations*, which is effective for financial statements of fiscal years beginning after June 15, 2002.

1. Do disclosures include a general description of asset retirement obligations and the related long-lived assets? (SFAS No. 143, para. 22)			
2. Has the fair value of assets legally restricted for purposes of settling asset retirement obligations been disclosed? (SFAS No. 143, para. 22)			
3. If the fair value of the asset retirement obligation cannot be reasonably estimated, has that fact and the reasons therefor been disclosed? (SFAS No. 143, para. 22)			
4. Do disclosures include a reconciliation of the beginning and ending aggregate carrying amount of asset retirement obligations that shows separately significant changes attributable to (a) liabilities incurred during the period, (b) liabilities settled during the period, (c) accretion expense, and (d) revisions in estimated cash flows? (SFAS No. 143, para. 22)			
5. If SFAS No. 143 has not been applied in all periods presented, do disclosures include pro forma amounts of asset retirement obligations as of the beginning of the earliest year presented and the end of all years presented assuming the Statement had been applied in all periods affected? (SFAS No. 143, para. 27)			

LONG-TERM CONTRACTS (This section need not be completed when preparing the financial statements of a construction contractor or homebuilder. Instead, refer to the Supplemental Disclosure Checklist for Construction Contractors and Homebuilders in PPC's *Guide to Construction Contractors* or *Guide to Preparing Financial Statements*.)

1. Have the unbilled costs and fees under cost-type contracts been shown separately from billed accounts receivable? (ARB No. 43, ch. 11A, para. 21)			
2. Have the advances offset against cost-type contract receivables been disclosed? (ARB No. 43, ch. 11A, para. 22)			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
3. Has the method used to account for long-term construction contracts been disclosed? (ARB No. 45, para. 15)			✓

NONMONETARY TRANSACTIONS

1. Are nonmonetary transactions disclosed adequately, including the nature of the transactions, the basis of accounting, and any related gains or losses? (APB No. 29, para. 28)			

PENSION AND POSTRETIREMENT BENEFIT PLANS—DEFINED BENEFIT (See Part I for defined contribution plans.)

NOTE: The following are reduced disclosure requirements for nonpublic entities. Subsidiaries of public companies are considered public entities under SFAS No. 132 and must make the public company disclosures required by paragraph 5 of that Statement.

The following disclosures may be combined for all of the entity's defined benefit pension plans and for all of the entity's defined benefit postretirement plans, or information about plans may be presented in groups, whichever is more useful. Disclosures for plans outside the U.S. may be combined with those for U.S. plans unless the benefit obligations of the plans outside the U.S. are significant relative to the total benefit obligation and those plans use significantly different assumptions. Disclosures about plans with assets in excess of the accumulated benefit obligation generally may be combined with disclosures about plans with accumulated benefit obligations in excess of assets.

1. Has the following information about the plan been disclosed: (SFAS No. 132, paras. 6–8)			
a. The benefit obligation?			
b. Fair value of plan assets?			
c. Funded status of the plan?			
d. Employer contributions?			
e. Participant contributions?			
f. Benefits paid?			
g. The amounts recognized in the balance sheet, including:			
(1) The net pension and other postretirement benefit prepaid assets or accrued liabilities?			
(2) Any intangible asset?			
(3) The amount of accumulated other comprehensive income recognized pursuant to SFAS No. 87, para. 37, as amended?			
h. The amount of net periodic benefit cost recognized and the amount included within other comprehensive income arising from a change in the minimum pension liability recognized pursuant to SFAS No. 87, para. 37, as amended?			
i. On a weighted-average basis, the following assumptions used in the

	Disclosure Made?		
	Yes	No	N/A
accounting for the plans:			✓
(1) Assumed discount rate?	____	____	____
(2) Rate of compensation increase (for pay-related plans)?	____	____	____
(3) Expected long-term rate of return on plan assets?	____	____	____
j. The assumed health care cost trend rate(s) for the next year used to measure the expected cost of benefits covered by the plan (gross eligible charges) and a general description of the direction and pattern of change in the assumed trend rates thereafter, together with the ultimate trend rate(s) and when that rate is expected to be achieved?	____	____	____
k. If applicable, the amounts and types of securities of the employer and related parties included in plan assets, the approximate amount of future annual benefits of plan participants covered by insurance contracts issued by the employer or related parties, and any significant transactions between the employer or related parties and the plan during the period?	____	____	____
l. The nature and effect of significant nonroutine events, such as amendments, combinations, divestitures, curtailments, and settlements?	____	____	____
2. If disclosures about plans with assets in excess of the accumulated benefit obligation have been combined with disclosures about plans with accumulated benefit obligations in excess of assets, has the following been disclosed separately: (SFAS No. 132, para. 6)			
a. The combined benefit obligation and combined fair value of plan assets for plans with benefit obligations in excess of plan assets?	____	____	____
b. The combined accumulated benefit obligation and combined fair value of plan assets for plans with accumulated benefit obligations in excess of plan assets?	____	____	____
c. Amounts recognized in the balance sheet for prepaid benefit costs?	____	____	____
d. Amounts recognized in the balance sheet for accrued benefit liabilities?	____	____	____
3. For multiemployer plans, has the following been disclosed: (SFAS No. 132, para. 10)			
a. Amount of contributions to such plans during the period? (Total contributions to multiemployer plans may be disclosed without separating the amounts attributable to pensions and other postretirement benefits.)	____	____	____
b. A description of the nature and effect of any changes affecting comparability (such as a change in the rate of employer contributions, a business combination, or a divestiture)?	____	____	____
4. If a gain or loss from settlement or curtailment has not been recognized in the current fiscal year and the employer's financial position or results of operations would have been materially different had it been recognized, have appropriate disclosures been made? (QA-SFAS No. 88, No. 28)	____	____	____

POSTEMPLOYMENT BENEFITS

1. If the entity has not accrued postemployment benefits solely because the amount

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
f. If the entity has not accrued postemployment benefits solely because the amount cannot be reasonably estimated (such as salary continuation, supplemental unemployment benefits, severance benefits, disability-related benefits, job training and counseling, and continuation of health insurance coverage), has that been disclosed? (SFAS No. 112, para. 7)			✓

QUASI-REORGANIZATION

1. Following a corporate readjustment (quasi-reorganization), has a retained earnings account been established and dated to show that it runs from the time of the readjustment? (This dating generally should not continue for more than 10 years following the readjustment.) (ARB No. 43, ch. 7A, para. 10, and ARB No. 46, para. 2)			
2. If conservative estimates are used for assets, has that fact been disclosed and the assets properly accounted for on realization? (ARB No. 43, ch. 7A, para. 4)			

REAL ESTATE ACTIVITIES

1. Have accounting policies for the following items relating to real estate development and construction activities been disclosed: (APB No. 22, para. 12)			
a. Capitalization of project costs (such as preacquisition, acquisition, development, and construction costs)? (SFAS No. 67, paras. 4–10)			
b. Capitalization of interest costs? (SFAS No. 34, paras. 12–20)			
c. Capitalization of amenities costs? (SFAS No. 67, paras. 8–9)			
d. Allocation of project costs? (SFAS No. 67, para. 11)			
2. Have accounting policies relating to sales of real estate been disclosed? (APB No. 22, para. 12)			
3. Have accounting policies relating to investments in real estate ventures been disclosed? (SOP 78-9, para. 12 and APB 18, para. 20)			
4. Has real estate held for production and real estate held for sale been disclosed separately on the balance sheet or in the notes? (Generally accepted)			

Real Estate Sales (Other than Retail Land Sales)

5. For sales accounted for by the installment method:			
a. Is deferred gain on sale offset against the related receivable in the balance sheet? (Generally accepted)			
b. Is the following disclosed in the income statement or notes: (SFAS No. 66, para. 59)			
(1) Sales value, cost of sales, and gain deferred for sales occurring during the period?			
(2) Previously deferred gain recognized during the period (or revenue and cost of sales relating to such gain)?			
6. For sales accounted for by the cost recovery method:			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
a. Is deferred gain on sale offset against the related receivable in the balance sheet? (SFAS No. 66, para. 63)			✓
b. Is the following disclosed in the income statement or notes: (SFAS No. 66, para. 63)			
(1) Sales value, cost of sales, and gain deferred for sales occurring during the period?			
(2) Previously deferred gain recognized during the period?			
7. If the deposit method is used, have the related real estate and existing debt been identified as subject to a sales contract? (SFAS No. 66, para. 65)			
Retail Land Sales			
8. Are the following items relating to receivables disclosed: (SFAS No. 66, para. 50)			
a. Maturities of receivables for each of the five years following the balance sheet date?			
b. Delinquent receivables and the method(s) for determining delinquency?			
c. The weighted average and range of stated interest rates of receivables?			
9. Has disclosure been made of estimated total costs and estimated dates of expenditures for improvements for major areas from which sales are being made for each of the five years after the balance sheet date? (SFAS No. 66, para. 50)			
10. Are recorded obligations for improvements disclosed? (SFAS No. 66, para. 50)			
Participating Mortgage Loan Borrowers			
11. For participating mortgage loan borrowers, are the following items disclosed: (SOP 97-1, para. 17)			
a. Description of the terms of the participation by the lender in the operations or appreciation of the real estate project?			
b. The following amounts at the balance sheet date:			
(1) Total participating mortgage obligations?			
(2) Total participation liabilities?			
(3) Total debt discounts on the participating mortgages?			
RESEARCH AND DEVELOPMENT			☐
1. If the entity accounts for its obligations under a research and development arrangement as a contract to perform research and development for others, have the following been disclosed: (SFAS No. 68, para. 14)			
a. Terms of significant agreements under the research and development arrangements as of each balance sheet date presented?			
b. Amount of compensation earned and cost incurred for each period for which an income statement is presented?			
2. Is disclosure made of total research and development costs charged to expense in			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
each period presented including research and development costs incurred for computer software costs to be sold, leased, or otherwise marketed? (SFAS No. 2, para. 13; SFAS No. 86, para. 12; and FASBI Nos. 4 and 6)			✓
RETAINED EARNINGS RESTRICTIONS			
1. Are the following restrictions on retained earnings disclosed:			
a. Restrictions as to dividend payments? (SFAS No. 5, paras. 18–19)			
b. If state laws relating to acquisition of stock restrict the availability of retained earnings for payment of dividends or have other effects of a significant nature, have those facts been disclosed? (APB No. 6, para. 13)			
c. If a portion of retained earnings is "appropriated" for loss contingencies, is the appropriation clearly shown as an appropriation of retained earnings within the stockholders' equity section of the balance sheet? (SFAS No. 5, para. 15)			
STOCK-BASED COMPENSATION (INCLUDING COMPENSATION FOR NONEMPLOYEE SERVICES)			
1. Have the following been disclosed about the entity's stock-based compensation plans (separately for each type of award granted to the extent separate disclosure would be useful): (SFAS No. 123, paras. 46–48)			
a. A description of the plan, including the general terms of awards (such as, vesting requirements, maximum term of options granted, and number of shares authorized for grants of options or other equity instruments)?			
b. Number and weighted-average exercise prices of options that were—			
(1) Outstanding at the beginning of the year?			
(2) Outstanding at the end of the year?			
(3) Exercisable at the end of the year?			
(4) Granted, exercised, forfeited, or expired during the year?			
c. Weighted-average grant-date fair value of options granted during the year? (Amounts related to options whose exercise price differ from the market price of the stock on the grant date should be disclosed separately.)			
d. Number and weighted-average grant-date fair value of equity instruments other than options granted during the year?			
e. Description of the method and significant assumptions used during the year to estimate the fair values of options, including the risk-free interest rate, expected life, expected volatility, and expected dividends?			
f. Total compensation cost recognized in income for stock-based employee compensation awards?			
g. Terms of significant modifications of outstanding awards?			
h. For options outstanding at the date of the latest balance sheet presented, the range of exercise prices, the weighted-average exercise price, and the weighted-average remaining contractual life, and for each range (1) the number, weighted-average exercise price, and weighted-average remaining			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
number, weighted average exercise price, and weighted average remaining contractual life of options outstanding; and (2) the number and weighted-average exercise price of options currently exercisable?			✓
2. SFAS No. 123's disclosure requirements apply to all entities, but its accounting requirements for measuring compensation cost need not be followed unless the entity elects to do so. If the entity continues to apply the old rules when accounting for stock-based compensation, has pro forma net income (and pro forma earnings per share if earnings per share is presented) as if the fair-value-based method prescribed by SFAS No. 123 had been applied been disclosed for all awards granted in fiscal years beginning after December 15, 1994? (SFAS No. 123, para. 45)			

TAX LEASES

1. Have the entities involved in the sale or purchase of tax benefits through tax leases disclosed the method(s) of: (FTB No. 82-1, para. 4)			
a. Recognizing revenue?			
b. Allocating the income tax benefits and asset costs to current and future periods?			
2. If unusual *or* infrequent, have the nature and financial effects of sales or purchases of tax benefits through tax leases been disclosed on the face of the income statement or in a note to the financial statements? (FTB No. 82-1, para. 6)			
3. Have significant contingencies existing with respect to sales or purchases of tax benefits through tax leases been disclosed? (FTB No. 82-1, para. 7)			
4. If comparative financial statements are presented, has any change in the method of accounting for sales or purchases of tax benefits through tax leases that significantly affects comparability been disclosed? (FTB No. 82-1, para. 7)			

TERMINATION CLAIMS RECEIVABLE

1. If the total of the undeterminable parts of a termination claim is believed to be material, have the essential facts been disclosed? (ARB No. 43, ch. 11C, para. 19)			
2. Have material termination claims been separately disclosed in the balance sheet? (ARB No. 43, ch. 11C, para. 21)			
3. Has disclosure been made of the relationship between advances or other loans received on terminated contracts and the potential termination claim receivable? (ARB No. 43, ch. 11C, para. 22)			
4. If the amount of termination sales is material, has it been separately disclosed in the income statement? (ARB No. 43, ch. 11C, para. 23)			

TROUBLED DEBT RESTRUCTURINGS—CREDITORS

1. Has the amount of any commitments to lend additional funds to debtors owing receivables whose terms have been modified in troubled debt restructurings been			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
disclosed? (SFAS No. 15, para. 40b)			✓
2. Has the following information about impaired loans been disclosed: (Restructured loans are not required to be included in disclosures 2a. and 2b. in years after the restructuring, if the restructured loan's interest rate was comparable to a rate that the creditor would have accepted on other loans with similar risks and the restructured loan is not considered impaired based on the new terms.) (SFAS No. 118, para. 6i)			
a. As of the date of each balance sheet presented:			
(1) The total recorded investment in impaired loans as defined by SFAS No. 114?			
(2) The recorded investment in impaired loans that have a related allowance for credit losses determined in accordance with SFAS No. 114 and the recorded investment in impaired loans that do not have an allowance for credit losses determined in accordance with SFAS No. 114?			
(3) The total allowance for credit losses on impaired loans?			
b. For each period for which an income statement is presented:			
(1) The average recorded investment in the impaired loans?			
(2) The related amount of interest income recognized for the time that the loans were impaired during the period?			
(3) The amount of interest income recognized using a cash-basis method for the time that the loans were impaired during the period, unless that is not practical to determine?			
c. The creditor's policy for recognizing interest income on impaired loans, including how cash receipts are recorded?			
3. For each period for which an income statement is presented, has the following activity in the total allowance for credit loss account (i.e., determined in accordance with SFAS Nos. 5 and 114) been disclosed: (SFAS No. 118, para. 6i)			
a. Balance at the beginning and end of the year?			
b. Additions charged to income?			
c. Write-downs charged against the allowance?			
d. Recoveries of amounts previously charged off?			

Copyright © 2002 Practitioners Publishing Company. All Rights Reserved.

	Disclosure Made?		
	Yes	No	N/A
d. Recoveries of amounts previously charged off?			
TROUBLED DEBT RESTRUCTURINGS—DEBTORS			☑
1. When troubled debt restructurings have occurred during a period for which financial statements are presented, have the following disclosures been made: (SFAS No. 15, para. 25)			
a. A description of the principal changes in terms, the major features of settlement, or both, for each restructuring? (Separate restructurings within a fiscal period for the same categories of payable may be grouped.)			
b. The aggregate gain on restructuring of payables?			
c. The aggregate gain or loss on transfers of assets recognized during the period?			
2. Have the following been disclosed for periods after a troubled debt restructuring has occurred: (SFAS No. 15, para. 26)			
a. The extent to which amounts contingently payable are included in the carrying amount of restructured payables?			
b. Total amounts that are contingently payable on restructured payables and the conditions under which those amounts would become payable or would be forgiven when there is at least a reasonable possibility that a liability for contingent payments will be incurred?			
UNCONDITIONAL PURCHASE OBLIGATIONS			☐
1. For unconditional purchase obligations that are not recorded on the purchaser's balance sheet, is the following information disclosed: (SFAS No. 47, para. 7)			
a. Nature and term of the obligation(s)?			
b. Amount of the fixed and determinable portion of the obligation(s) as of the latest balance sheet presented and, if determinable, for each of the five succeeding fiscal years?			
c. Nature of any variable components of the obligation(s)?			
d. Amounts purchased under the obligation(s) for each period for which an income statement is presented?			
2. For unconditional purchase obligations that are recorded on the purchaser's balance sheet, have the following disclosures been made for each of the five years following the date of the latest balance sheet presented: (SFAS No. 47, para. 10)			
a. The aggregate amount of payments for unconditional purchase obligations?			
b. The combined aggregate amount of maturities and sinking fund requirements for all long-term borrowings?

SPECIAL AWARD CONDITIONS
ADVANCED TECHNOLOGY PROGRAM – SINGLE RECIPIENT
COMPUTER AIDED SURGERY, INC.
COOPERATIVE AGREEMENT NO. 70NANB1H3050
AMENDMENT NO. 04

THE FOLLOWING SPECIAL AWARD CONDITIONS ARE AMENDED:

11. AUTOMATED STANDARD APPLICATION FOR PAYMENT SYSTEM (ASAP)

a. This SAC amends the Department of Commerce Financial Assistance Standard Terms and Conditions, dated **October 1998**, Section A.02, Award Payments, and the Advanced Technology Program (ATP) General Terms and Conditions, dated **August 2001**.

b. The advance method of payment shall be authorized unless otherwise specified in a special award condition.

c. Payments will be made through electronic funds transfers, using the Department of Treasury's Automated Standard Application for Payment (ASAP) system, and in accordance with the requirements of the Debt Collection Improvement Act of 1996. The following information is required when making withdrawals for this award: (1) ASAP account identification (id) = award number found on the cover sheet of this award; (2) Agency Location Code (ALC) = 13060001; and (3) Region Code = 01. Recipients **DO NOT** need to submit a *"Request for Advance or Reimbursement" (SF-270)* or a *"Federal Cash Transactions Report" (SF-272)* for payments relating to this award. If you are not enrolled as an ASAP Recipient Organization you must complete the enrollment process with your Federal Reserve Bank, Regional Finance Center. Enrollment applications and information can be found at the following web site:

http://www.fms.treas.gov/asap/handbook.html

If you need a paper copy of the enrollment documentation please contact the Grant Specialist responsible for this award.

Advances taken through the ASAP shall be limited to the minimum amounts necessary to meet immediate disbursement needs. Advanced funds not disbursed in a timely manner must be promptly returned, via an ASAP credit, to the account from which the advanced funding was withdrawn. Advances shall be for periods not to exceed 30 days.

d. Funds that have been withdrawn through ASAP may be returned to ASAP via the Automated Clearing House (ACH) or via FEDWIRE. The ACH or FEDWIRE transaction can only be done by the Recipient's financial institution. Full or partial amounts of payments received by a Payment Requestor/Recipient Organization may be returned to ASAP. All funds returned to the ASAP system will be credited to the ASAP Suspense Account. The Suspense Account allows the Regional Financial Center to monitor returned items and ensure that funds are properly credited to the correct ASAP account. Returned funds that cannot be identified and classified to an ASAP account will be dishonored and returned to the originating depositary financial institution (ODFI).

It is essential that the Payment Requestor/Recipient Organization provide its financial institution with ASAP account information (ALC, Recipient ID and Account ID) to which the return is to be credited. Additional detailed information can be found at

http://www.fms/treas.gov/asap/pay-return2.pdf.

e. This award has the following control or withdraw limits set in ASAP:

__X__ None
____ Agency Review required for all withdrawals (see explanation below)
____ Agency Review required for all withdrawal requests over $_____ (see explanation below)
____ Maximum Draw Amount controls (see explanation below):
$_____ each month
$_____ each quarter
$_____ each year

f. Term # 7.c(3)(b) TO THE ATP General Terms and Conditions, dated **August 2001**, is deleted in its entirety to remove the requirement for a "Federal Cash Transactions Report" (SF-272).

g. Term # 14. TO THE ATP General Terms and Conditions, dated **August 2001**, is deleted in its entirety and replaced with the following:

REFUNDS

This special award condition remains in effect under this award and applies to all payments that the Recipient received outside of the ASAP system. The Recipient shall promptly submit all refund checks (including interest earned on advances) to the following address identified below and notify the Grants Office upon submission. Each check must identify on its face the NIST award number, and no more than a two-word description to identify the reason for the refund. Submit to:

National Institute of Standards and Technology

SPECIAL AWARD CONDITIONS
ADVANCED TECHNOLOGY PROGRAM – SINGLE RECIPIENT
COMPUTER AIDED SURGERY, INC.
COOPERATIVE AGREEMENT NO. 70NANB1H3050
AMENDMENT #02

HE FOLLOWING SPECIAL AWARD CONDITIONS ARE MENDED:

. RECIPIENT ADMINISTRATOR CONTACT

he Recipient Administrator Contact's name, title, address, and elephone number are:

Administrative) Elisha Gurfein
Computer Aided Surgery, Inc.
300 East 33rd Street, Suite N
New York, NY 10016
Phone: (201) 569-4482
Fax: (212) 448-0261

. PROJECT DESCRIPTION

ll research shall be conducted in accordance with the ecipient's proposal dated 07/06/01, and all revisions/late ocumentation dated 09/20/01, including revised budget dated 2/27/01.

. FUNDING LIMITATIONS

he scope of work and budget incorporated into this award cover three-year period (referred to as the "project period") for a total mount of $2,000,000.00 in Federal funds. However, Federal unding available at this time is limited to $800,000.00 for the rst year period from 10/01/01 through 09/30/01 (referred to as ie "budget period"). The Grants Officer may require additional larification to support the budget. If that results in changes to ie budget or budget narrative, the Recipient shall submit, in riting, a revised budget and/or budget narrative to the Grants fficer for approval. Receipt of any funding beyond the first year p to the level projected under this award is contingent upon the vailability of funds from Congress, satisfactory performance, and ill be at the sole discretion of the National Institute of Standards nd Technology (NIST). The Recipient may not obligate, incur ny expenditure, nor engage in any activity that involves a ommitment of Federal funds under this Agreement in excess of ie Federal amount presently available. No legal liability exists or ill result on the part of the Federal Government for payment of ny portion of the remaining funds, which have not been made vailable under the award. If additional funds are not made vailable, any expenses incurred related to closeout activities iust be funded from the amount already made available under iis award. The notice of availability or non-availability of additional funding for the second and third year(s) will be made in writing by the Grants Officer. Only the Grants Officer is authorized to obligate funds. No other verbal or written notice should be relied upon by the Recipient. In the absence of a written notice of additional funding, no assumption should be made by the Recipient that the funds will be forthcoming.

Projected budget amounts and periods:

Year 2: $600,000 (From 10/01/02 to 09/30/03)
Year 3: $600,000 (From 10/01/03 to 09/30/04)

7. COST SHARE

For the first year period, the cost sharing ratio (direct costs only) applicable to this award is the Recipient's contribution of 4.36% ($36,500) and NIST's contribution of 95.64% ($800,000).

9. REQUIREMENT OF ACCOUNTING SYSTEM CERTIFICATION

✓ The above Special Award Condition placed in the original award document is removed, as the requirement has been satisfied.

ALL PRIOR TERMS AND CONDITIONS REMAIN THE SAME.

5. PROJECT DESCRIPTION

All research shall be conducted in accordance with the Recipient's proposal dated 07/06/01 (Gate 1), and 08/06/01 (Gate 2), and all revisions/late documentation dated 08/21/01, 08/27/01, 09/06/01, 09/12/01, 09/14/01, and 09/--/01, including revised budget dated 09/--/01.

6. FUNDING LIMITATIONS

The scope of work and budget incorporated into this award cover a three-year period (referred to as the "project period") for a total amount of $2,000,000.00 in Federal funds. However, Federal funding available at this time is limited to $800,000.00 for the first year period from October 1, 2001 through September 30, 2002 (referred to as the "budget period"). The Grants Officer may require additional clarification to support the budget. If that results in changes to the budget or budget narrative, the Recipient shall submit, in writing, a revised budget and/or budget narrative to the Grants Officer for approval. Receipt of any funding beyond the first year up to the level projected under this award is contingent upon the availability of funds from Congress, satisfactory performance, and will be at the sole discretion of the National Institute of Standards and Technology (NIST). The Recipient may not obligate, incur any expenditure, nor engage in any activity that involves a commitment of Federal funds under this Agreement in excess of the Federal amount presently available. No legal liability exists or will result on the part of the Federal Government for payment of any portion of the remaining funds, which have not been made available under the award. If additional funds are not made available, any expenses incurred related to closeout activities must be funded from the amount already made available under this award. The notice of availability or non-availability of additional funding for the second and third year(s) will be made in writing by the Grants Officer. Only the Grants Officer is authorized to obligate funds. No other verbal or written notice should be relied upon by the Recipient. In the absence of a written notice of additional funding, no assumption should be made by the Recipient that the funds will be forthcoming.

Projected budget amounts and periods:

Year 2: $600,000.00 (From 10/01/02 to 09/30/03)
Year 3: $600,000.00 (From 10/01/03 to 09/30/04)

. COST SHARE

For the first year period, the cost sharing ratio (direct costs only) applicable to this award is the Recipient's contribution of 1.61% ($30,000.00) and NIST's contribution of 98.39% ($800,000.00).

I. PERSONNEL AND CONSULTANT REQUIREMENT

The Recipient must provide to the ATP Project Manager in writing within 60 days of project start date, identification of the personnel on the project and the percentage of time including consultants.

I. REQUIREMENT OF ACCOUNTING SYSTEM CERTIFICATION

The Recipient, whether receiving Federal Funds or only providing matching funds, must have a functioning financial management system that meets the provisions of 15 CFR 14.21 to ensure proper accountability of funds. Therefore, Computer Aided Surgery, Inc., must submit an accounting system certification issued by an Independent Certified Public Accountant (CPA) to the NIST Grants Officer within 90 days from the date of this award.

0. DEFERRAL OF REVIEW OF USE OF HUMAN SUBJECTS

Based upon a review of the proposal dated July 6, 2001, NIST has determined that the involvement of human subjects in research identified herein meets the criteria to qualify for a deferred review. This award is made in accordance with 15 CFR 27.118, which permits research that does not involve human subjects to proceed even though human subjects may be involved at a later stage during the project period. In accordance with the 8/01 ATP General Terms and Conditions '19, the Recipient must submit the following documentation prior to Year 3 of the project and prior to any research that may involve human subjects, to the ATP Project Manager for review and approval by appropriate NIST officials:

a) Documentation establishing approval of the project by an Institutional Review Board qualified under 15 CFR 27.103, OR

b) Documentation to support an exemption for the project pursuant to 15 CFR 27.101(b).

The documentation requirements are available on the ATP website at http://www.atp.nist.gov, outlined in the ATP booklet titled "Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects." No involvement of human subjects in research may be undertaken or conducted, or costs involving human subjects research incurred or charged to the project, until the NIST Grants Officer's approval of the above documentation is obtained in writing.

Re: Lee Gurfein

Dear Ms. Hope Snowden:

This letter authorizes Mr. Lee Gurfein as administrative contact on Cooperative Agreement No 70NANB1H3050 with Computer Aided Surgery, Inc.

This authorization is valid for the period of one year from the start of the Agreement on October 1, 2001 through Sept 30. This authorization can be revoked in writing to you and him by myself at any time this authorization is in effect. Until specifically authorized to do so, Mr. Gurfein is not an officer of the corporation, and is not authorized to sign for the corporation. The authorization for Mr. Gurfein to commit the corporation will be made by separate letter authorization if the need arises.

Sincerely,

HS

5. PROJECT DESCRIPTION

All research shall be conducted in accordance with the Recipient's proposal dated 07/06/01 (Gate 1), and 08/06/01 (Gate 2), and all revisions/late documentation dated 08/21/01 08/27/01, 09/06/01, 09/12/01, 09/14/01, and 09/--/01, including revised budget dated 09/--/01.

6. FUNDING LIMITATIONS

The scope of work and budget incorporated into this award cove a three-year period (referred to as the "project period") for a tota amount of $2,000,000.00 in Federal funds. However, Federa funding available at this time is limited to $800,000.00 for th first year period from October 1, 2001 through September 30 2002 (referred to as the "budget period"). The Grants Office may require additional clarification to support the budget. If tha results in changes to the budget or budget narrative, th Recipient shall submit, in writing, a revised budget and/or budge narrative to the Grants Officer for approval. Receipt of an funding beyond the first year up to the level projected under thi award is contingent upon the availability of funds from Congress satisfactory performance, and will be at the sole discretion of the National Institute of Standards and Technology (NIST). The Recipient may not obligate, incur any expenditure, nor engage ir any activity that involves a commitment of Federal funds unde this Agreement in excess of the Federal amount presently available. No legal liability exists or will result on the part of the Federal Government for payment of any portion of the remaining funds, which have not been made available under the award. If additional funds are not made available, any expenses incurred related to closeout activities must be funded from the amount already made available under this award. The notice of availability or non-availability of additional funding for the second and third year(s) will be made in writing by the Grants Officer. Only the Grants Officer is authorized to obligate funds. No other verbal or written notice should be relied upon by the Recipient. In the absence of a written notice of additional funding, no assumption should be made by the Recipient that the funds will be forthcoming.

rojected budget amounts and periods:

ear 2: $600,000.00 (From 10/01/02 to 09/30/03)
ear 3: $600,000.00 (From 10/01/03 to 09/30/04)

. COST SHARE

or the first year period, the cost sharing ratio (direct costs nly) applicable to this award is the Recipient's contribution of .61% ($30,000.00) and NIST's contribution of 96.39% $800,000.00).

. PERSONNEL AND CONSULTANT REQUIREMENT

he Recipient must provide to the ATP Project Manager in writing vithin 60 days of project start date, identification of the ersonnel on the project and the percentage of time including onsultants.

. REQUIREMENT OF ACCOUNTING SYSTEM CERTIFICATION

he Recipient, whether receiving Federal Funds or only providing natching funds, must have a functioning financial management ystem that meets the provisions of 15 CFR 14.21 to ensure roper accountability of funds. Therefore, Computer Aided Surgery, Inc., must submit an **accounting system certification** ssued by an Independent Certified Public Accountant (CPA) to he NIST Grants Officer within 90 days from the date of this ward.

0. DEFERRAL OF REVIEW OF USE OF HUMAN SUBJECTS

Based upon a review of the proposal dated July 6, 2001, NIST has determined that the involvement of human subjects in esearch identified herein meets the criteria to qualify for a leferred review. This award is made in accordance with 15 CFR 27.118, which permits research that does not involve uman subjects to proceed even though human subjects may e involved at a later stage during the project period. In ccordance with the 8/01 ATP General Terms and Conditions 19, the Recipient must submit the following documentation rior to Year 3 of the project and prior to any research that nay involve human subjects, to the ATP Project Manager for eview and approval by appropriate NIST officials:

a) Documentation establishing approval of the project by an Institutional Review Board qualified under 15 CFR 27.103, OR

b) Documentation to support an exemption for the project pursuant to 15 CFR 27.101(b).

The documentation requirements are available on the ATP website at http://www.atp.nist.gov, outlined in the ATP booklet titled "Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects." No involvement of human subjects in research may be undertaken or conducted, or costs involving human subjects research incurred or charged to the project, until the NIST Grants Officer's approval of the above documentation is obtained in writing.

Dear Friend:

As the Member of Congress representing our district, I am writing to congratulate you on your recent grant award of $2,000,000 from the National Institute of Standards and Technology. I am proud of the work that you and Anatomic Computer Modeling have done to enhance anatomic computer models for cancer treatment therapies, and I want to take this opportunity to thank you on behalf of our community.

I wish you much success in your endeavors. Your research will undoubtedly prove to be helpful to many people. If I can be of any assistance to you in the future, please do not hesitate to contact my office. I stand ready to help in any way that I can. Please keep in touch.

Sincerely,

Carolyn B. Maloney

Dear Dr. Karron:

I am pleased to transmit three (3) copies of the referenced award. Please review the award documents thoroughly and if you agree with the provisions, sign the three (3) copies of the Financial Assistance Award (CD-450) and return two (2) originally signed copies, including the Special Award Conditions and budget, to:

National Institute of Standards and Technology
Grants and Agreements Management Division
100 Bureau Drive, Building 411, Room A143, Stop 3580
Gaithersburg, MD 20899-3580

You are to retain the third copy of the award document and provisions for your records. This award becomes void if not signed and returned within thirty (30) days of receipt. If you have any questions concerning this award, please contact the NIST Grants Specialist identified in the cooperative agreement special award conditions.

We congratulate you on receiving this award and wish you success in the development and broad dissemination of challenging high-risk technologies that could offer the potential for significant, broad-based economic benefits for the nation.

Sincerely,

Marc Stanley

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in **Gate 2**. The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided:

Title: Anatomic Computer Modeling for Precise and Accurate Therapies

Dear Dr. Karron:

We are pleased to inform you that after appropriate peer review and evaluation, we have concluded that your initial proposal submitted to Gate 1 of the FY2001 Advanced Technology Program (ATP) competition has high merit as judged against the ATP selection criteria. In order to receive further consideration for ATP funding, please submit the required Gate 2 additional information to address the potential for broad-based economic benefits selection criterion and the detailed budget data to the following address:

National Institute of Standards and Technology
Advanced Technology Program
100 Bureau Drive, Stop 4701
Administration Building 101, Room A413
Gaithersburg, MD 20899-4701

Please include the above referenced proposal number on your Gate 2 additional information. Required Gate 2 additional information is outlined in the November 2000 ATP Proposal Preparation Kit in Appendix B and Exhibits 2 and 14, as well as on our web site (www.atp.nist.gov). The required Gate 2 additional information must be postmarked or hand delivered by close of business within fourteen (14) calendar days from the date of overnight delivery of this letter. Failure to submit the required documentation within the time frame specified will require you to resubmit. Please note that you will receive an acknowledgement from ATP for receipt of your Gate 2 additional information.

NIST

If it is determined that the Gate 2 additional information, along with the initial proposal previously submitted to Gate 1, have high merit with respect to the ATP selection criteria, the proposal will advance to Gate 3 as a semi-finalist and you will be notified to submit the required Gate 3 documentation, as necessary. Additionally, your organization may be invited to NIST for an oral review. If your proposal is not selected as a semi-finalist, you will be provided a debriefing on the material submitted both in Gates 1 and 2.

If you need clarification of any points covered in this letter, please call me at (301) 975-2218. Thank you for submitting a proposal to the ATP 2001 competition.

Sincerely,

Bettijoyce B. Lide

Gaithersburg, MD 20899-4701

PRIORITY FAX - PLEASE CONFIRM RECEIPT OF THIS FAX TO SENDER

Date: 8/15/01 **To:** Dr. D. B. Karron **FAX #:** 212-448-0261

Organization: Computer Aided Surgery, Inc.

From: Amy Tasker **Phone #:** 301-975-4044 **FAX #:** 301-926-9524

Subject: Invitation to Oral Review For ATP Proposal Number 00-00-4607

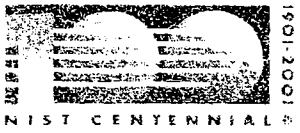
Oral Date: 8/21/01 **Time:** 8:30am **Eastern Time (Please arrive no earlier than 15 minutes before your scheduled time. An ATP representative will meet you in the lobby to escort you. If you arrive early, please wait in the Administration Building lobby or Cafeteria.)**

Location: NIST, 100 Bureau Drive

Please see attached letter and instructions.
Please contact me at 301-975-4044 you have any questions.

Thank you,

Amy Tasker



UNITED STATES DEPARTMENT OF COMMERCE
National Institute of Standards and Technology
Gaithersburg, Maryland 20899-

August 15, 2001

Dr. D. B. Karron
300 East 33rd Street
Suite 4N
New York, NY 10016

Reference: Advanced Technology Program Proposal Number: 00-00-4607

Title: Anatomic Computer Modeling for Precise and Accurate Therapies

Dear Dr. Karron:

We are pleased to inform you that after appropriate peer review and evaluation, we have concluded that your proposal to the FY2001 Advanced Technology Program (ATP) competition has high merit as judged against the ATP selection criteria and has been selected as a semi-finalist. Your proposal now proceeds to Gate 3. In order to receive further consideration for ATP funding, you are requested to attend an oral review at NIST and to submit the required Gate 3 forms.

Oral Review:

Your oral review is scheduled for August 21, 2001 beginning at 8:30am Eastern Time at NIST, 100 Bureau Drive, Gaithersburg, MD 20899. The purpose of the oral review is to: 1) Give you an opportunity to inform us of any important developments that have taken place since your proposal was written, and 2) Give us an opportunity to ask questions regarding both the technical and business aspects of your proposal. On the day of your oral review, please arrive at the NIST Administration Building lobby 15 minutes before your scheduled beginning time. An ATP representative will meet you in the lobby to escort you to the meeting room. If you arrive early, please wait in the NIST Administration Building lobby or the Administration Building's Cafeteria. Attached are directions to NIST and a list of area hotels.

An ATP oral review generally lasts approximately 1½ - 2½ hours. You will be given no more than 10 minutes at the beginning to tell us about developments since the proposal was submitted that affect its current status. Please do not use this time to review the details of your proposal since we have already reviewed it. A question/discussion period will follow. You will have no more than five minutes at the end to summarize any key points. Please limit your attendees to no more than four (4) for single proposers and no more than seven (7) for joint ventures (JV). If your proposal is a JV, it is your responsibility to inform your JV members of this notification. In selecting your attendees, remember that both detailed business and technical issues will be discussed. You may be asked questions regarding the science and technology underlying your proposal as well as detailed questions about the financial and business aspects.

NIST

Pre-Oral and Administrative Questions:

Attached to this letter is a set of ATP Pre-Oral Questions that relate to the ATP criteria and that will have a bearing on the decision of the Source Evaluation Board (SEB). There are two types of questions, as noted on the form - 1) those that require a written response and 2) those that alert you of certain subjects that are likely to be brought up by the SEB. Written responses to the questions are limited to one page per question. Sixteen (16) copies of your responses to the ATP Pre-Oral Questions should be brought to the oral review for distribution. Please include the above referenced proposal number on your submission. The ATP reserves the right to ask additional questions at the oral review. Additionally, under separate cover, Administrative Questions concerning budgetary and human and vertebrate animal subjects' issues may be sent to you at a later date.

Additional Gate 3 Items:

As noted in the ATP Proposal Preparation Kit, additional information is required at Gate 3. For your convenience, attached is a checklist of additional items which must be provided in triplicate (original and two copies) at time of the oral review:

We will invite more proposers than we expect to fund. Thus, while being designated a semifinalist is an indication that your proposal was judged to have considerable merit, receiving an invitation for an oral review is no guarantee that it will be funded.

Please confirm the receipt of this fax to Amy Tasker by phone 301-975-4044 or fax 301-926-9524. Also, at least three days prior to the oral review, please fax to the above number, the names and phone numbers of those who will attend the oral review and the name of the hotel where you plan to stay in case we need to contact you.

Again, thank you for submitting a proposal to the ATP 2001 competition.

Sincerely,

Bettijoyce Lide

5/01

Proposal Number: 00-00-4607 SA X JV ___
Name of Proposer: Computer Aided Surgery, Inc.

ITEMS CHECKED MUST BE SUBMITTED IN TRIPLICATE BY THE ATP SEMI-FINALIST TO NIST AT THE SCHEDULED ORAL REVIEW

1. X SF-424B, Assurances - Non-Construction Programs, with original signature from proposer and if a JV from each JV participant (http://www.whitehouse.gov/WH/EOP/OMB/Grants/sf424b.pdf)

2. X CD-511, Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying, with original signature from proposer and if a JV from each JV participant (http://www.rdc.noaa.gov/~grants/pdf/cd511.pdf)

3. X SF-LLL, Disclosure of Lobbying Activities **(if applicable)** with original signature from proposer and if a JV from each JV participant http://www.whitehouse.gov/WH/EOP/OMB/Grants/sflllin.pdf)

4. X CD-346, Applicant for Funding Assistance, with original signature from proposer's key individuals and if a JV from each JV participant's key individuals (see Exhibit 13 in ATP Proposal Preparation Kit)

5. ___ For JV only, draft JV Agreement (see sample at http://www.atp.nist.gov/atp/jvsample.htm). JV Agreement will not be approved unless it contains required information in the sample. Specifically, the JV Agreement must include: 1) Designation of entity as JV Administrator; 2) Power of attorney clause stating that JV participants give the JV Administrator the power of attorney for the purpose of signing the NIST cooperative agreement on their behalf; 3) Intellectual property plan; 4) Statement that pursuant to ATP statutory restriction, title to intellectual property cannot vest with non-profit, if JV includes a non-profit; 5) Statement of Federal government use license; and 6) Precedence clause stating that if there is a conflict between JV Agreement and NIST cooperative agreement, the NIST cooperative agreement shall prevail). **(NOTE: If proposal is selected as a finalist, a final executed JV Agreement must be submitted prior to award issuance.)**

6. ___ Questionnaire on foreign-owned company (see attached)

7. ___ If research involves the use of human and/or animal research, please refer to the ATP Booklet entitled *Guidelines and Documentation Requirements for Research Involving Human and Animal Subjects* for required information (http://www.atp.nist.gov/atp/kit-00/hasbook2.htm)

ATP PRE-ORAL QUESTIONS

Proposal Number: 00-00-4607 SA: X JV:
Name of Proposer: Computer Aided Surgery, Inc.

Please note that the questions below are not all inclusive and that ATP reserves the right to and will ask additional questions at the oral review.

TYPE A: WRITTEN RESPONSES REQUIRED

Written responses to the following pre-oral questions are limited to one page per question. Please bring sixteen (16) of your responses to your scheduled oral review. Applicable page numbers in the ATP Proposal Preparation Kit are identified to assist you in preparing your response. The ATP Proposal Preparation Kit can be viewed on the web at http://www.atp.nist.gov/atp/kit-00/kit-1100.htm.

A. SCIENTIFIC & TECHNOLOGICAL MERIT (pp. 16-19)

1. Please clarify the discussion of the key technical risk. What is the technical risk that could cause this project to fail?
2. Please provide metrics for measuring the progress of the technology development during the project.
3. Please provide a statement of annual accomplishments (as described on p. 19 of the 2000 proposal preparation kit). What technical results will be achieved at the end of each year of the project.
4. Please provide descriptions of the technical tasks outlined on pages 20 and 21 of the Gate 1 proposal.
5. Please map the technical barriers and new technology listed on page 19-20 of the proposal to the tasks that will develop the new technical capability.
6. How will the results of the project be evaluated?

B. POTENTIAL FOR BROAD-BASED ECONOMIC BENEFITS (pp. 19-20; Appendix B)

1. Please clarify CASI's / Dr. Karron's relationship with CUNY and CCNY.
2. Please identify any applications or products where Digital Morse Theory has been implemented.
3. Please elaborate on CASI's decision not to further pursue TAD commercialization and implications, if any, on potential commercialization of the proposed technology.

TYPE B: WRITTEN RESPONSES NOT REQUIRED

The following questions or subjects are likely to be brought up by the SEB. No written responses are required.

A. SCIENTIFIC & TECHNOLOGICAL MERIT (pp. 16-19)

1. What has been implemented to date? How has DMT so far been tested on medical images?
2. How would the images be used for robotic surgical planning? What else would have to be developed to make this application possible?

3. Expand on the discussion of how the models will be calibrated.
4. How will the accuracy of the models be evaluated?
5. What will the role of the technical advisors be on the project or will they be advising the company more generally?
6. How good (clear) does the data from an MRI or other data source have to be in order to construct a unique segmentation (3D connection, or 2D spider)?
7. What is the metric to determine whether the representation is sufficiently accurate for diagnostics, or more critically, for surgery?

B. POTENTIAL FOR BROAD-BASED ECONOMIC BENEFITS (pp. 19-20; Appendix B)

1. Does CASI have existing alliances or collaborations with potential customers or end-users of the technology?
2. Please elaborate on CASI's plans to introduce the product to potential customers and end-users
3. Have you initiated talks with insurance companies and payers to discuss reimbursement scenarios for the proposed service?
4. Please discuss likely scenarios for ordering, administration, billing and payment associated with RT Planning and other studies that will utilize the proposed technology.
5. Does CASI have agreements or alliances with hospitals or clinics (other than NYUMC) where testing may take place?
6. Please discuss resource requirements associated with implementing a commercialization plan. For example, what type of staffing requirements would be required to provide the modeling service? How will you build this staff?
7. Please discuss the company's plan to build a business team that can help to formulate the direction and strategic plan for CASI. Include a timeline.

DIRECTIONS TO NIST

NIST is located in Gaithersburg, Maryland, just off Interstate Route 270, about 40 kilometers (25 miles) from the center of Washington, D.C. From Washington (northbound on Rt. 270), visitors to NIST should enter the Collector/Distributor lanes at Exit 9 and take Exit 10, Rt. 117 West (Clopper Rd.). Turn left at the first traffic light which is Bureau Drive and proceed through the main gate (Gate A). If coming southbound on Rt. 270, take Exit 11B, Rt. 124 West (Quince Orchard Rd.). Visitors should go to the receptionist in the main lobby of the Administration Building for directions to the appropriate room or for shuttle service to other buildings on the site. During normal working hours, a shuttle van runs between the Shady Grove Metro Station and NIST and back. The shuttle leaves NIST on the hour and half-hour starting at 8:00 a.m., with the final trip at 5:30 p.m. Visitors using Metro can meet the NIST shuttle at the east side "Kiss & Ride" bus kiosk at the Shady Grove Station.

Re: Proposal Number: 00-00-4607

Question 1: Provide elaboration on your rational for requesting ATP funding to perform the project as described. Specifically describe what efforts were made, prior to applying for ATP funding to support the project entirely with internal or external private capital) funding. Include any efforts to secure funding from other government agencies, and/or why ATP is the most appropriate program to fund the proposed work. Please be specific and provide evidence to the extent possible. Indicate whether, to what degree, and within what timing the project would be undertaken if no ATP support were forthcoming.

Answer to Question 1:
Efforts made, before applying to ATP in July 2001, to support the project consisted of participating in national and local Venture Capital meetings and discussions with individual Venture Capitalists, Angel Investors, and government funding agencies including DoD, and the new NIH Bioengineering Institute.

As these meetings were unfruitful, the main source of support for this project has consisted of the PI's personal cash (and personal credit) and in-kind contributions. Cash support consisted of approximately $85,000 in cash to CASI solely in support of this project over the past two years. The PI's in-kind support consists of deferred salary, deferred office rent (the office is owned by the PI, who rents space to CASI) amounting to approximately $350,000. Contributions made by collaborators and consultants consisted of unpaid efforts. Angel investors consisting of family, friends, and colleagues, loaned money to the PI, who forwarded the money to CASI to pay bills and permit minimal scientific progress.

This enabled CASI to function and continue to do minimal scientific research. External contributions were in the nature of consulting from NYUMC and E. Gurfein, which, if paid, would total approximately $25,000.

ATP Funding is needed because CASI's goal is to make a technical forward leap with the DMT based modeling and develop a business model to rapidly bring it to market. CASI needs the funding to focus on its core technology, and then the production of anatomic modeling for RT planning. Building on preliminary results with the NIH Visible Human Project (VHP), CASI will create new markets that will be profitable within five years. Equity markets, in general, have a cloud of uncertainty over them at this time, which translates into investors staying on the sidelines. While we observe this somewhat in publicly traded equities, it is even truer of the illiquid private equity marketplace. Generally, the current requirements, among others, for private equity investors is that:

1. Profitability can be expected within two years.
2. The technology is reduced to practice.

CASI had made a significant effort to obtain private equity funding for this activity.

ATP is the most appropriate funding agency because of its broad scope, relatively deep and long funding cycle, and its policy on technical risk. ATP recognition of technical merit attracts additional business funding after it is awarded. For example, New York State and New York City sponsor a foundation to help obtain funding from Angel Investors and New York State, the Industrial and Technological Assistance Corporation (ITAC). Their mission is to obtain commercial capital (as opposed to technical research funding) to keep high tech and design businesses in New York City. They do not have the capability to evaluate the technical aspects of this project, but can provide state co-funding for the business and commercialization of this proposed technology. The COO has initiated in depth discussion with ITAC, and should ATP make an award, we can reasonably expect follow on state funding in the range of $250,000 to $2,000,000 within 4 to 6 months from application.

This project has many broad implications beyond clinical medicine, and many national benefits beyond cancer treatment. As this project matures, over the next one to two years, CASI will launch new clinically focused projects with its clinical partners with NIH funding. However, the focus at this early stage is not cancer treatment, but on building the core technology, which, when achieved, will permit a range of clinical projects that are in the direct purview of NIH National Cancer Institute and National Institute of Bioimaging and Bioengineering. There are many issues of precision, accuracy, geometric fidelity that need to be address, as well as the development of national standards for the emerging areas of surgical robotics, biomedical image segmentation, and biological morphology characterization that fit the NIST mission.

We can reasonably expect private venture capital funding in 2 to 3 years, as CASI technology is demonstrated at national meetings, and as its alpha collaborators and early adopters demonstrate its utility and economic value.

The PI has approached the following early stage capital investors:

Toucan Capital Corp; ATP National Meeting, Baltimore MD Ms. Linda Powers
Not interested until 1-2 years into ATP funding

Global Business Network, ATP National Meeting, Baltimore MD Mr. Peter Schwartz
Not interested until 1-2 years into ATP funding

Dr. Ved Brat, Braton Biotech, ATP National Meeting Baltimore MD June 2001
Seeking Angel funding at present

The COO has approached the following investors without success for the reasons cited above:

CMMC Ventures, Inc,
Sumitomo Corporation of America,
Madison Partners,
Bristol Meyers Squibb,
Paramount Capital and the
Herrick Fund.

ATP funding is vital at this time. State and private co-funding depend on the technical recognition of this technology. NIH funding requires preliminary clinical and engineering data that this project will produce in order to obtain RO1 level of funding. ATP funding will attract the technical attention in other scientific fields (such as metrology, general image processing, applied math, to name only a few) and provide the broad technical diffusion required for the large national benefit of this technology. Without this funding and recognition, this project ill limp along as a side line to whatever else CASI happens to win contracts to do. The project will probably take an additional 5 to 8 years, as opposed to the 3-year timeline detailed in the project proposal.

C. A. S. I.

Computer Aided Surgery, Inc.

To date, the following private funding has been applied to this project by CASI (via the PI) and its collaborators:

Private Internal Funds (PI's personal contribution)	
1. Direct Cash Contribution: (as of Aug 2001)	$85,000
2. Overhead Contribution (Office Rent)	$45,000
3. Contribution to NIH VHP Project (In-Kind)	$50,000
4. Unpaid PI's Salary (2 Years)	$320,000
Approximate PI's Contribution	$500,000
Private E. Gurfein In-Kind Contribution Uncompensated Consulting and Travel Approximate Business Manager/Coo Contribution	$15,000
NYUMC Contribution Uncompensated Consulting 5 days @ 2000 / day	$10,000
Total Contribution to this project	**$525,000**

Question 2: Please summarize other previously funded (during the past two years) or pending Federal grants, cooperative agreements, or contracts involving the technical group submitting this proposal. Include name and phone number of the responsible Federal agency point of contract for each award, and dollar level, and very brief description of the work.

Answer to Question 2:

Previous funding for this project in the past two years was for different DMT applications and covers different technical areas.

The very early DARPA funding was focused on demonstrating DMT principles in 2D CT images for image registration applications, not image segmentation, as is the main thrust of the current proposal.

The more recent NIH Visible Human Project research was on Color Image segmentation, which is not the focus of the current effort to develop segmentation technology from CT imagery for Breast and Prostate Cancer Radiation Treatment Planning.

The only pending research contract application is to the NAVY, under an SBIR solicitation to develop Catadioptic/Omnidirectional video surveillance of Aircraft Carrier flight deck operations. DMT technology is involved to do steriopsis from multiple camera views, which is not a technical topic under the current ATP technical project. This SBIR has just been submitted, and is not awarded. The earliest award date is October 2001.

DARPA Contract DAAH01 - 98 - C - R195 (add on contract) $ 100,000 1998-1999
Dennis Healy PM +1 (703) 696-0143 dhealy@math.umd.edu
Initial exploratory study on Digital Morse Theory for Data Fusion

Accomplishments: 2D DMT maps/graphs on CT images, published in 1999 IEEE EMBS meeting in Atlanta, Publication of 1archival papers, 1 patent obtained

NIH Visible Human Project (Consulting) $50,000 2000-2001
Don Jenkins PM +1 (301) 435-3273 jenkins@nlm.nih.gov
Brian Athey PI +1 (734) 763-6150 bleu@umich.edu
Application of Digital Morse Theory for Color Object segmentation of Visible Human Data for Medical School Content Development

Accomplishments: 3D Color DMT maps/graphs of Visible Human Color Data, publication of an archival paper, 1 invited lecture at 2001 SPIE Image Science meeting in Boston.

ESTIMATED MULTI-YEAR BUDGET - SINGLE COMPANY				
	YEAR ONE	YEAR TWO	YEAR THREE	TOTAL
1. OBJECT CLASS CATEGORY

		AWARD NUMBER 70NANB1H3050
RECIPIENT NAME Computer Aided Surgery, Inc.		AMENDMENT NUMBER #02
STREET ADDRESS 300 East 33rd Street, Suite 4N		EFFECTIVE DATE
CITY, STATE, ZIP CODE New York, NY 10016		EXTEND WORK COMPLETION TO n/a

CFDA NO. AND PROJECT TITLE: 11.612, Advanced Technology Program (ATP), Proposal No. 00-00-4607
Project Title: Anatomic Computer Modeling for Precise and Accurate Therapies

COSTS ARE REVISED AS FOLLOWS:	PREVIOUS ESTIMATED COST	ADD	DEDUCT	TOTAL ESTIMATED COST
FEDERAL SHARE OF COST	$800,000.00	$0	$0	$800,000.00
RECIPIENT SHARE OF COST	$ 36,500.00	$0	$0	$36,500.00
TOTAL ESTIMATED COST	$836,500.00	$0	$0	$836,500.00

REASON(S) FOR AMENDMENT
This cooperative agreement is being amended to (1) revise administrative contact's name; (2) correct total estimated cost for budgeted year; (3) approve and incorporated revised budget dated 12/27/01; (4) remove Special Award Condition #9; and (5) and indicate on the attached those terms and conditions that affected by these actions.

This Amendment approved by the Grants Officer is issued in triplicate and constitutes an obligation of Federal funding. By signing the three documents, the Recipient agrees to comply with the Amendment provisions checked below and attached, as well as previous provisions incorporated into the Award. Upon acceptance by the Recipient, two signed Amendment documents shall be returned to the Grants Officer and the third document shall be retained by the Recipient. If not signed and returned without modification by the Recipient within 30 days of receipt, the Grants Officer may unilaterally terminate this Amendment.

Fax: (212) 448-0261

5. PROJECT DESCRIPTION

research shall be conducted in accordance with the Recipient's proposal dated 07/06/01, and all revisions/late documentation dated 09/20/01, including revised budget dated 12/27/01.

6. FUNDING LIMITATIONS

The scope of work and budget incorporated into this award cover a three-year period (referred to as the "project period") for a total amount of $2,000,000.00 in Federal funds. However, Federal funding available at this time is limited to $800,000.00 for the first year period from 10/01/01 through 09/30/01 (referred to as the "budget period"). The Grants Officer may require additional clarification to support the budget. If that results in changes to the budget or budget narrative, the Recipient shall submit, in writing, a revised budget and/or budget narrative to the Grants Officer for approval. Receipt of any funding beyond the first year up to the level projected under this award is contingent upon the availability of funds from Congress, satisfactory performance, and will be at the sole discretion of the National Institute of Standards and Technology (NIST). The Recipient may not obligate, incur any expenditure, nor engage in any activity that involves a commitment of Federal funds under this Agreement in excess of the Federal amount presently available. No legal liability exists or will result on the part of the Federal Government for payment of any portion of the remaining funds, which have not been made available under the award. If additional funds are not made available, any expenses incurred related to closeout activities must be funded from the amount already made available under this award. The notice of availability or non-availability of additional funding for the second and third year(s) will be made in writing by the Grants Officer. Only the Grants Officer is authorized to obligate funds. No other verbal or written notice should be relied upon by the Recipient. In the absence of a written notice of additional funding, no assumption should be made by the Recipient that the funds will be forthcoming.

Projected budget amounts and periods:

Year 2: $600,000 (From 10/01/02 to 09/30/03)
Year 3: $600,000 (From 10/01/03 to 09/30/04)

7. COST SHARE

For the first year period, the cost sharing ratio (direct costs only) applicable to this award is the Recipient's contribution of 4.36% ($36,500) and NIST's contribution of 95.64% ($800,000).

9. REQUIREMENT OF ACCOUNTING SYSTEM CERTIFICATION

The above Special Award Condition placed in the original award document is removed, as the requirement has been satisfied.

ALL PRIOR TERMS AND CONDITIONS REMAIN THE SAME.

Subject: Request for Approval of Proposed Budget Changes
Date: Thu, 22 Nov 2001 01:13:00 -0800
From: egurfein <egurfein@earthlink.net>
To: hope snowden <hope.snowden@nist.gov>
CC: Bettijoyce Lide <bjlide@nist.gov>, jayne orthwein <jayne.orthwein@nist.gov>, "Dr. D. Karron." <karron@casi.net>

Upon review and reconsideration of the approved budget, we are submitting the following changes for your approval:

A. Personnel Salaries/Wages	from $375,000 to 325,000	-$50,000	
B. Personnel Fringe Benefits	from $127,500 to $110,500	-$17,000	
C. Travel	from $4,000 to	$20,000	+$16,000
D. Equipment	from $120,000 to $110,000	-$10,000	
E. Material	from $0 to	$11,000	+$11,000
F. Subcontractors	from $200,000 to $250,000	+$50,000	
Net Change		0	

Reasons for requested budgetary changes:

A. In an effort to get more for each dollar, we intend to engage Prof. George Wolberg as a consultant for well defined assignments instead of as an employee (-$100,000). However, we are adding two employees: one Financial Control Specialist (+$25,000) and one Systems Administrator (+$25,000). Net change: (-$50,000).

B. Fringe benefits are reduced by 34% of $50,000, because of reduction of $50,000 in Personnel Salaries. Net Change:-$17,000.

C. The travel amount budgeted was much too low. Based on expected travel for giving papers, attending relevant symposia and meetings, we request an increase to $20,000. Net change: +$16,000.

D. Based on some discounts that we are negotiating, we propose to reduce the equipment costs to $110,000. Net change:-$10,000.

E. Material: Various items for equipment and data services are estimated at $11,000. Net change: +$11,000.

F. Changing George Wolberg from employee to subcontractor adds +$100,000. NYU Medical Center and CUNY are expected to be subcontracted for $50,000. With an additional total of $50,000 in subcontracts to several consultants, the revised number for subcontracts is $250,000. Net change: +$50,000.

The net change for all the above changes is zero.

Please consider these requested changes and advise at your earliest.
Sincerely,
EGurfein

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc **Year** 1 (2001-2002)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
Dr. D B Karron/PI (12 months)	$175,000	100%	~~$175,000~~
Elisha Gurfein/Project Manager (12 months)	$133,333	75%	~~$100,000~~
Prof. James L Cox / Lead Pgmr (1 month)	$127,346	49%	$5,200
Scott Albin / Systems (3 months)	$47,142	42%	~~$4,950~~
Charles DaSalla / Systems (11 months)	$21,905	100%	~~$19,800~~
Nicholee Wynter / Fiscal Control (4 months)	$29,000	100%	~~$9,348~~
Regner Peralla (1 month)	$31,488	50%	~~$1,312~~
RG Wine (1 month)	$42,240	100%	~~$3,520~~
Matthew Rothman (5 wks)	$33,000	100%	~~$3,405~~
		TOTAL	+ 2 $322,537

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34.9% **Check here if included in indirect:**

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,565

C. Travel - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
MMVR (Presentation)	Newport Beach, CA	2x RT Air, Hotel, Rental Car, Meeting Fees, Per Diem for PI and R. Bucholz, MD		6000
NIST Kickoff	Gatherburg, MD	2x Trainfare, Car Rental, Taxi, Per Diem for PI, Gurfein, and R. Satava MD		2000
SPIE Medical Imaging (Presentation)	Boston, MA	2x Amtrak, meeting fees, Taxi, Per Diem, PI and Cox		2621
SGI Developer Conference	San Jose, CA	Airfare, meeting fees, car rental, Hotel, Per Diem for PI		2700
IEEE Signal Proc Soc and NIH NIBIB Joint Conf	Washington, DC	Car Rental, Hotel Meeting Fees, Per Diem:PI and Zevi		2000
side visit to Nist	Gaitherburg, MD			10
Gurfein Travel to CASI	Ft. Lee, NJ	Fuel, Parking, Tolls for visits to CASI for NIST Program Management		1589
DBK Travel to NIST	Gaitherburg, MD	Fuel, Tolls, Per Diem		1000
NYC Parking for Staff and Visitors	New York, NY	Muni Meter and Parking Garage for Program Work by Visitors and Staff, Honoraria Parking		2000

Travel justification for foreign travel and conferences:

TOTAL 19,920

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
	see attached exhibit		

Justification for any item over $100,000, or construction costs:

TOTAL 231719 D

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost
		Subtotal	
		TOTAL	73,605

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost

	TOTAL	53,705

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost
	TOTAL	

Budget Data

Proposal Number 70NANB1H3050

Name of Company Computer Aided Surgery, Inc. **Year** 2 (2002 - 2003)

A. Personnel - List each position by name of employee and title, if available. Show the annual salary rate and the percentage of time devoted to the project. Compensation paid for employees must be consistent with that paid for similar work within the proposer's organization and similar positions in the industry. Employees who are considered indirect labor should not be included in the breakdown of direct salaries or in section 1A of the Form NIST-1262 or NIST-1263. Escalation rates for the out-years should be reasonable. We recognize that a company may not be able to identify all of the personnel to be assigned to the project several years down the road. Where this cannot be done, use generic position titles such as "senior chemical engineer" and for name, "to be determined." Consultants should NOT be included in this category, but more appropriately under the "subcontracts" category and described on Form NIST-1262 or NIST-1263, pages 4 and 5, respectively.

Name/Position Title	Annual Salary	Percentage of Time on Project	Cost
D B Karron, Ph.D./ PI	175,000	100%	175,000
J L Cox, Ph.D. / Lead Pgmr	100,000	45%	45,000
M B Rothman / Graphics Pgmr	66,000	50%	33,000
Peter M. Ross, Ph.D. / Business Manager	127,300	30%	38,000
Tony Pahati, / fiscal control specialist	50,000	30%	15,000
Charles DaSalla / programmer	43,000	60%	25,800

TOTAL 331,000

B. Fringe Benefits - Identify percentage rate; if greater than 35 %, provide a breakdown of what makes up the fringe benefits (i.e., vacation, sick, military leave, health and life insurance, retirement, social security, etc.). If fringe benefits are normally included in your organization's indirect cost rate, they should be budgeted as such, and check the appropriate line below.

Percentage Rate: 34 **Check here if included in indirect:** _____

If percentage rate exceeds 35%, provide breakdown.

TOTAL $112,000

C. Travel - Provide best estimate of travel required for the project, and provide the basis of computation (i.e., item x number of people x number of trips). Note that ATP recipients are expected to adhere to government policies regarding travel, such as, coach rather than first class accommodations, etc. Travel costs should represent a coherent part of the project's "communications strategy" for smooth coordination among participants. While foreign travel is not precluded, it is discouraged and will require a strong justification on how it is directly related to the R&D activities of the ATP project. Likewise, the travel cost for attending conferences must be strongly justified as essential and relevant to the research and development aspects of the project.

Purpose of Travel	Destination	Item (mode transportation, lodging, and subsistence)	Computation	Cost
7500 is requested mainly for trips to Washington or to nearby conferences.				

Travel justification for foreign travel and conferences:

TOTAL 7500

D. Equipment - Identify each item of equipment, methodology used to arrive at the proposed costs, (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., cost per item x number of items), and cost. Budget estimates for equipment items exceeding $100,000 each must be described and justified separately. Also identify by placing an asterisk on any in-kind owned equipment and its current depreciated value using the participant's preestablished depreciation accounting methods. The value of equipment will be further prorated according to the share of total use dedicated to carrying out the proposed ATP work. ATP funds may not be used for construction of new buildings or extensive renovations of existing laboratory buildings. ATP funds may, however, be used for construction of experimental research and development facilities to be located within a new or existing building provided that the equipment or facilities are essential for carrying out the project. If such costs are proposed, include below and provide justification.

Item	Methodology	Computation	Cost
computer equipment purchased year 2			15,900
An allowance is requested for computer equipment purchased in year 1 billed in year 2			
second RAID			10,000
SGI octane plus			30,000
SGI octane plus			40,000

Justification for any item over $100,000, or construction costs:

TOTAL 95900

E. Materials/Supplies - Provide a complete breakdown of each item/type of expendable materials and supplies, methodology used to arrive at the proposed costs (i.e., historical costs, competitive bid, published price lists, or cost/price analysis), basis of computation (i.e., item x number of items), and cost.

Item	Methodology	Computation	Cost
	A 25% increase in materials use is anticipated due to the increase in on-site work.		

TOTAL 31000

F. Subcontractors - For each subcontractor identified on the NIST-1262 Page 4 or NIST-1263 Page 5, enter the name, if known, service to be provided, hourly or daily fee (8-hour day), and estimated time on the project. Subcontractor fees in excess of $450 per day require additional justification. Proposers are encouraged to promote free and open competition in awarding subcontracts.

Name of Subcontractor	Service Provided	Computation	Cost
Ed Weinberger, Ph.D.	Construct 3-D pointer arrows for graphic user interface.	166 h @ $60/h	$7,000
George Wohlberg Ph.D.	Prepare validation suite for DMT tree calculation	75h @ $80/h	$6,000
Isaac Dimitrovsky, Ph.D.	Assist with validation paradigm stochastic properties	100h @ $60/h	$6,000
Axiom/Benedict	Grant Management consultants	22h @ 250/h	5,400
J. Case	Programming	83h @ $30/h	1000
E Bostwick	Programming	33.5h @ $30/h	1000
ATC Consulting	Network/system programming and system administration	30h @ 120/h	3600
		Subtotal	$30,000

Subcontractor Expenses: List all expenses to be paid from the award to the individual subcontractors in addition to their fees (i.e., travel, meals, lodging, etc.).

Item	Location	Computation	Cost
Meals and travel	10 meals @ $20 each		200
	10 trips @ $240 each		2400
honoraria	bringing scientists to CASI	5 @ $200 each	1000
		Subtotal	3600
		TOTAL	$33,600

G. Other - Identify and provide a detailed description of any other direct costs which do not fall into the object cost categories above, basis of computation (i.e., cost per item x number of items), and cost. The cost of the project audit should also be included in this category unless it is part of the indirect costs. If it is part of the indirect costs indicate it as such. Each JV partner should budget for an audit. For awards less than 24 months, an audit is required at the end of the project; for 2, 3, or 4 year awards, an audit is required after the first year and at the end of the project; for 5 year awards, an audit is required after the first year, third year, and at the end of the project.

Description	Computation	Cost
Audit		
Joan Hayes, ATP Audit	133h @ 150/h	20,000

TOTAL 20,000

H. Indirect Costs -Specify the current indirect cost rate(s), computation used, and cost. If an indirect cost rate was negotiated with a cognizant Federal agency, include a copy of the approved negotiated agreement. If an indirect cost rate has not been established by a cognizant Federal agency please state this below.

Percentage Rate	Computation	Cost

TOTAL

1. NAME AND ADDRESS OF SUBCONTRACTOR

George Wolberg, Ph.D.
NAC 8/202G
Department of Computer Science
City College of New York
138th St. at Convent Ave., Rm. R8/206
New York, NY 10031

NAME OF CONTACT:
TELEPHONE NUMBER: (212) 650-6160
FAX NUMBER: +1 (212) 650-6184
E-MAIL ADDRESS: wolberg@cs-mail.engr.ccny.cuny.edu

2. TYPE OF ORGANIZATION (CHECK ALL THAT APPLY)

- [x] PROFIT - SMALL BUSINESS
- [ ] PROFIT - LARGE BUSINESS
- [ ] PROFIT - MEDIUM BUSINESS
- [ ] FOREIGN-OWNED U.S. SUBSIDIARY
- [ ] NON-PROFIT INDEPENDENT RESEARCH ORGANIZATION
- [ ] UNIVERSITY
- [ ] GOVERNMENTAL LABORATORY

3. ESTIMATED AMOUNT OF SUBCONTRACT

$6,000

4. DESCRIBE SCOPE OF WORK

Programming of validation suite for assessment of accuracy of DMT tree construction and mapping.

5. IS THIS A SOLE SOURCE CONTRACT?

- [x] YES (IF YES, EXPLAIN)
- [ ] NO

Dr. Wohlberg wrote early versions of the computer algorithms for DMT based segmentation in this CASI-NIST grant. He is uniquely qualified to develop effective validation software.

1. NAME AND ADDRESS OF SUBCONTRACTOR

Peter M. Ross, Ph.D.
MedReply, Inc.
415 Central Park West, #9D
New York, NY 10025-4

NAME OF CONTACT:
TELEPHONE NUMBER: 212-665-5126
FAX NUMBER: 877 823-1066
E-MAIL ADDRESS: pross@bww.com

2. TYPE OF ORGANIZATION (CHECK ALL THAT APPLY)

- [x] PROFIT - SMALL BUSINESS
- [ ] PROFIT - LARGE BUSINESS
- [ ] PROFIT - MEDIUM BUSINESS
- [ ] FOREIGN-OWNED U.S. SUBSIDIARY
- [ ] NON-PROFIT INDEPENDENT RESEARCH ORGANIZATION
- [ ] UNIVERSITY
- [ ] GOVERNMENTAL LABORATORY

3. ESTIMATED AMOUNT OF SUBCONTRACT

26,000

4. DESCRIBE SCOPE OF WORK

Assistance with presentations, including progress reports, papers, and seminars. Interface with government agencies. Liaise with academic and medical communities.

5. IS THIS A SOLE SOURCE CONTRACT?

- [x] YES (IF YES, EXPLAIN)
- [ ] NO

Dr. Ross brings unique talents to the position, including an interest in the biological validation of the DMT based computer paradigm which is the basis of this proposal. He is extremely well qualified to lead that part of the project.

OMB Approval No: 0693-0009
Approval Expires: November 30, 2003

EXHIBIT 14

Budget Data

[Paperwork Reduction Act: Under the Paperwork Reduction Act no person is required to respond to a collection of information unless it displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 45 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimates or any other aspect of this collection of information, including suggestions for reducing this burden, to Director, Advanced Technology Program, Administration Building, Room A333, MS 4700, Gaithersburg, MD 20899-4700.]

Purpose: The Budget Data worksheets should be used for the preparation of your budget information and should be submitted in **Gate 2**. The electronic version can be found at the ATP website http://www.atp.nist.gov.

The budget is excluded from the page limitation and is used by both technical and business reviewers and by a Grants Official to determine reasonableness and allowability of costs. The overall estimated multi-year budget numbers are to be provided on page 3 of Form NIST-1262 or NIST-1263. Your budget information is a breakdown of the figures reported on the NIST-1262 or NIST-1263. Breakdowns should be as accurate and specific as possible. Include a breakdown for each year of the project and if a joint venture (JV) proposal, include the budget data for each JV participant for each year including each JV participant's annual cost sharing. Make sure any figures presented exactly match the figures on Form NIST-1262 or NIST-1263, and make sure the arithmetic is correct. **Please round to the nearest dollar.**

Proposed costs must be reasonable, allocable, and allowable in accordance with the applicable Federal cost principles (see 15 CFR 14.27). All salaries/wages, fringe benefits, travel, materials and supplies, equipment, subcontracts, other costs, and indirect costs proposed are to be consistent with costs incurred for like or similar items on all other Federal and non-Federal projects or cost centers.

We recognize that unexpected events occur frequently in R&D projects, and that budgets may need to be changed as a project proceeds. Don't fear that by providing a multi-year budget beyond the first year, you will be locked into those details. ATP allows a certain amount of flexibility in moving funds from one line item to another as circumstances change. By stating an amount for a given task, you will not be required to spend precisely that amount on that task. For example, if, in the second or third year of your project, you find that you need to spend more on one task and less on another than anticipated, that can be accommodated. A task that proves unnecessary can be deleted and a new task can be defined if there is adequate justification that such changes will enhance the chances of accomplishing the objectives of the project.

Recognizing that change is inevitable, we may ask our recipients for a revised budget at the beginning of each year of a multi-year project. However, the total amount provided by ATP for the project cannot be increased. You will NOT be reimbursed for project overruns. Try to avoid overestimating or underestimating your project costs. The dollar amount of your request must be commensurate with the tasks you define.

At a minimum, details on the following object class categories must be provided:

MEMORANDUM

To: Dr. D.B. Karron
Fr: Frederica L. Miller
Re: CASI LLC and Computer Aided Surgery Incorporated a/k/a CASI
Dt: April 22, 2003

An issue has arisen concerning whether it is legal and proper to continue to utilize the name "Computer Aided Surgery, Incorporated" also known as "CASI" when both entities became legally inactive as the non-surviving partner in a merger on August 30, 2002, by virtue of the creation of CASI LLC, a limited liability company, on the same date, pursuant to §1003 of the New York Limited Liability Company Law.

It is well settled law in New York State that, as a result of a merger, the surviving corporation, in this case CASI LLC, possesses all of the powers, rights, privileges, immunities, and purposes of each constituent, and that the surviving corporation assumes all of the liabilities and obligations of the constituent corporation. A non-surviving member of a merger can wind down, for a period of time, in order to conclude current business, including servicing its existing contracts. 15A N.Y. Jur. 2d Business Relationships §1296. It cannot solicit new business. The fact that a non-surviving entity continues for sometime after a merger for the passive purposes of collecting and disbursing funds is not fraudulent or illegal. The non-surviving entity is not receiving checks for its own account, but is acting as an agent of the LLC. The income would be reported to the surviving entity, the LLC.

according to F. Miller new bank A/C is advised to retain old EIN

Computer Aided Surgery, Incorporated current status with the New York Department of State is that of an inactive entity, not a dissolved corporation. (See attachment). Therefore, CASI can continue to conclude any business that pre-dated August 30, 2002, the date of the merger. This would include accepting payments from its pre-existing ATP contract.

Please be aware that I have filed this week on behalf of CASI LLC for a d/b/a under the names "CASI" and "Computer Aided Surgery Informatics." I have discussed this issue with Joel Bernstein, Esq. and he concurs with the opinions expressed in this memorandum.

Thursday, October 10, 1996, at 22:43:00 Hours

Daily Message Procedure (For ALL Personnel, including YOU!)

First Person In:

Check phone for messages
(Funny intermittent dial tone means that there are messages pending):
Write down messages on kitchen bulletin board, or
if you take a message elsewhere, pin it on the kitchen bulletin board.
Don't stick notes in funny places that only you will look for
(The kitchen bulletin board is the place to look for messages and notices.
I will get more if needed)
and relay them to the person they are destined for if they call or come in..

Lunch Procedure:

You are welcome to use the kitchen, and remember, I live here too !
(If you go out for lunch or coffee):
Check for messages when you return.

Last Person Out:

Call for Messages,
Leave a message in the voice mail box with any undelivered messages.

Phone Coverage Procedure: Rachel will normally cover phones, but if she comes in late, we would appreciate if she would call in and leave a message or word with whoever is in. If Rachel wants to leave early, she should leave word on the voice mail, or tell whoever is left in the office.

: Eventually we will get pagers for all staffers. In the mean time, if you are going out, and you need to stay in touch, take quarters, or a spare pager, what will remain on the hook in the hallway. Please return this.

Petty Cash: 25 Dollars will remain in a petty cash till in the kitchen. All cash taken should replaced with a receipt, i.e., the cash plus the receipt will always equal 25 dollars. Rachel will write a petty cash check to replenish the till weekly. This is for taxi fares, company means, soda for the office, milk and stuff that we eat and consume for business stuff. Dr. K will keep his own money separate ☺

Surface Mail:

Rachel will pick up mail downstairs.
Chris will pick up mail at NYU every other day.
Dr. K. will pick it up the other days.
We will get a post office box.
Rachel will pick up the Post Office Box Mail daily,
she will buy and keep stamps on hand, and drop mail off at the post office.
If you don't pick up the mail for some reason, leave word that there may be mail pending, so someone will know it may be worthwhile to check for mail.

To Pick Up Voice Mail:

(From Main Extension)
Dial 683 0085.
Enter "#", then
password: 054 42 5466.
Keep messages handy in central place (on message board in kitchen).

Computer Backup Procedures:

PC's : will all get backed up by Rachel once a week, on her way out, generally Friday PM.
I will get a supply of blank tapes.
It is better too many backups then none.
The MAC should be backed up too. Rachel knows more about this than I do.
The PC fax program should be left on and ready to receive incoming faxes at night and on the week-end unless the good doctor is present. This assures that the fax number is useable at all times.

Loose Media Policy:

If it is unlabeled, it is scratch, and anyone can overwrite it
If it is something you want to save, put a label on it, put your name on it, or put some identifying mark on it.
I have special Avery labels for 3 ¼ floppy disks.
4mm DAT tapes MUST be labeled, else they will get recycled as backup tapes.

Taking Days Off

If you don't want to come in one day, please call in and at least leave a voice mail message.
You are expected to work a 40 hour week for full time status.

Logging Hours:

You must log hours,
None of us are doing it properly.
I will have to do something about this soon. We need a good way for everyone to log hours.
Chris gets paid a fixed salary, and so does Dr. K, but the hours must be logged.
Rachel will become salary too, but till then she must log hours, and does not get paid for hours not actually present.

Working from Home:

If you want, you can take work home.
You can take the Think Pad home if you want, but YOU CAN NOT KEEP IT.
You MUST put a note up of you take it and don't tell anyone. You should even if you do tell someone, as that someone will probably forget.

Borrowing Tools:

Don't. If you must, put an index card up on the bulletin board. When you bring it back, throw out the card.
See Borrowing Books

Borrowing Books:

Don't. If you must, consider scanning the article and printing it out.
The main problems is that Dr. K and Chris work late hours and if we start scratching for a reference material, you will get called in the middle of the night and be required to bring it back.

Paychecks/Payroll:
We run a weekly payroll and a 40 hour week.
We have to set a sick day policy, Personal Days policy, and a holiday schedule.
I am open to suggestions.
I was thinking that we each pick the days we want on/off or on travel.
You are paid from Monday through Friday, and the paychecks are generally ready Friday PM.
Rachel will track the hours, write the checks, and Dr. K will sign them. We will try to get the checks ready before the bank closes. If you want, Dr. K will deposit your checks in Chase Bank if you leave some deposit tickets already made out.

Taxes:
Too much, but then were do we get the money from in the first place ?
We need to get up to speed with Quick Books and know when to pay payroll taxes.

Travel Policy
The main reason for an administrator / secretary is to provide stability, and an anchor point.
It is especially important that if no one is in the office, that the administrator leave word as to when she is coming in and when she is leaving if it is not regular time. As Dr. K and Chris will be on the road a lot, it is vitally important that we each know how to contact each other at any time, have appropriate phone numbers, or know how to leave messages for each other.

Temps:
I am open to getting temps to help out if the work is bogging down.
I can get proofreaders and clerical workers on hours notice.

Library Work:
Can be done by volunteers and students, once we work out a procedure.
Shelving/Arranging/Cataloging Journals
Arranging Books (in some reasonable order) and scanning the cover pages to make a CASI bibliography (some day)
Reprints: should be scanned, cataloged, and the paper thrown out so we can reclaim the file drawer space.

Corporate Paper Style
I want you to become familiar with using the printer and MS Word to make envelopes and mailing address labels. I want all of our mail to have a professional look, especially letters to important people.

Letterhead:
I have a CASI template document ready.
Change my name if you are writing in your own voice.
I have an envelope template document somewhere. I need to play with it more.

Central name and address file: this is a big mess. Looks like the main databases is going to be

split between the b-card stuff and the MailingAddress.source stuff. Because the Mailing Address stuff works nicely on UNIX with PERL/TeX, but the carefile stuff won't work with anything else.

Express Mail service:
Actually, it is legal to get something to the express mail when it is not legal to get it to federal express. Go Know ?
But once you give it to express mail, it is as good as served on the government. No such thing for Fed Ex.

Nice auto stamper.
I would like one.

Account at Charettes, or Staples
To get nice stationery stuff.

Account at Fed Ex
We Have an active account with Fed Ex now. The Account number is as follows. <1872-0220-5>. Rachel is the contact person on the account and you should let her know of any changes with it. Also we have Fed Ex Ship 2.0 on the PC and we should try to make it useful. E-forms title is CASI

Personal Use of Office Computers:
I encourage it. It gives us a sense of belonging and means you will have a better knowledge of the machine. You should have your work done before you hang on the IRC for the night...

Changing configurations of the computers:
Make your own bootable disks if you must. If you change the default boot disk, make certain you put it back.

What to do when the printers fail
Change printers. We will have 3 on the network.

What to do when the lights fail
Turn off the computers and reset the circuit breaker that is tripped (not all of them dummy)

What do when all hell breaks out:
Stop Whining.

Vital Office Papers:
Must never walk. They should all be scanned. Right now the scanner software is no good, but the SGI's and network file system will improve matters soon.

Paper Files:
Every file has a hanging folder it lives in, and a kraft insert folder.
The kraft folder goes back into the hanging folder every time. Everything in the kraft folders should eventually be scanned, and only current material retained.

Personal Files:
Make your own copies, and keep your own files, keep your own papers.
Don't keep books or papers from CASI.
Consider keeping scanned copies as much as possible.

Titles
Dr. K is President and Chief Technical Officer (CTO). Lead Genius and Trouble
Chris is Lead Research Technician Franz List look-alike and apprentice genus in training
Rachel is Office Administrator, and Secretary.
She will also be the SWMBO (She Who Must Be Obeyed)

Charged with keeping the two above in line.

Badges:
Hey,
We don't need no stinking Badges.
Actually, we do. Try getting into a government installation without picture ID.
We need to make some picture ID badges.
And get id pictures on the web pages. We need a color digital camera, or at least scan the company pictures.

Corporate Picnic:
yeah, lets go apple picking soon.

Corporate Party:

CERTIFICATE OF INCORPORATION

OF

Computer Aided Surgery, Incorporated

UNDER SECTION 402 OF THE BUSINESS CORPORATION LAW

* * * * * * *

I, THE UNDERSIGNED, of the age of eighteen years or over, for the purpose of forming a corporation pursuant to Section 402 of the Business Corporation Law of New York, do hereby certify:

FIRST: The name of the corporation is:

Computer Aided Surgery, Incorporated

SECOND: The purposes for which it is formed are:

To engage in any lawful act or activity for which corporations may be organized under the Business Corporation Law provided that the corporation is not formed to engage in any act or activity which requires the consent or approval of any state official, department, board, agency or other body, without such consent or approval first being obtained.

THIRD: The office of the corporation is to be located in the County of New York, State of New York.

FOURTH: The aggregate number of shares which the corporation shall have authority to issue is Ten Thousand (10,000) of the par value of One Cent ($.01) each.

FIFTH: The Secretary of State is designated as the agent of the corporation upon whom process against the corporation may be served. The post office address to which the Secretary of State shall mail a copy of any process against the corporation served upon him is: c/o CT Corporation System, 1633 Broadway, New York, New York 10019.

SIXTH: The name and address of the registered agent which is to be the agent of the corporation upon whom process against it may be served, are CT Corporation System, 1633 Broadway, New York, New York 10019.

SEVENTH: No director shall be personally liable to the corporation or its shareholders for damages for any breach of duty in such capacity, except that this provision shall not eliminate or limit the liability of any director if a judgment or other final

adjudication adverse to such director establishes that such director's acts or omissions were in bad faith or involved intentional misconduct or a knowing violation of law or that such director was not legally entitled or that such director's acts violated section 719 of the Business Corporation Law, nor shall this provision eliminate or limit the liability of any director for any act or omission prior to the adoption of this provision.

IN WITNESS WHEREOF, I have made and signed this certificate this 7th day of December, A.D. 1995 and I affirm the statements contained therein as true under penalties of perjury.

are hereby authorized to effect loans and advances and obtain credit at any time for Corporation from Bank and guarantee on behalf of Corporation the obligations of others to Bank), secured or unsecured, and for such loans and advances and credit and guarantees, to make, execute and deliver promissory notes and other written obligations or evidence of indebtedness of Corporation, applications for letters of credit, instruments or guarantee and indemnity and agreements of undertakings, general or specific, with respect to any of the foregoing, and as security for the payment of loans, advances, indebtedness, guarantees and liabilities of, or credit given to, Corporation or others to pledge, hypothecate, mortgage, assign, transfer , grant liens and security interests in, give rights with respect to, endorse and deliver property of any description, real or personal, and any interest therein and evidence of any thereof at any time held by Corporation, and to execute mortgages, deeds of trust, security agreements, instruments of transfer, assignment or pledge, powers of attorney and other agreements or instruments which may be necessary or desirable in connection therewith; and also to sell to, or discount with, Bank, commercial paper, bills receivable, stocks, bonds or any other securities or property at any time held by Corporation, and to that end to endorse, assign, transfer and deliver the same; to execute and deliver instruments or agreements of subordination and assignment satisfactory to Bank and also to give any orders or consents for the delivery, sale, exchange or other disposition of any property or interest therein or evidence thereof belonging to Corporation and at any time in the hands of Bank, whether as collateral or otherwise; and to execute and deliver such agreements, instruments and documents and to such other acts and things as may be necessary or desirable or required by Bank in connection with any of the foregoing and Bank is hereby authorized to honor, accept and execute any of the transactions described above.

8. All loans, discounts and advances heretofore obtained on behalf of Corporation and all notes and other obligations or evidences thereof of Corporation held by Bank are hereby approved, ratified, and confirmed.

9. Corporation does hereby give to Bank a continuing lien for the amount of any and all liabilities and obligations of Corporation to Bank and claims of every nature and description of Bank against Corporation, whether now existing or hereafter incurred, originally contracted with Bank and/or with another or others and now or hereafter owing to or acquired in any manner by Bank, whether contracted by Corporation alone of jointly and/or severally with another or others, absolute or contingent, secured or unsecured, matured or unmatured upon any and all moneys, securities and any and all other property of Corporation and the proceeds thereof, now or hereafter actually or constructively held or received by or in transit in any manner to or from Bank, its correspondents or agents from or for Corporation, whether for safekeeping, custody, pledge, transmission, collection or otherwise coming into the possession of Bank in any way.

10. In case of conflicting claims or disputes, or doubt on Bank's part as to the validity, extent, modification, revocation or exercise of any of the authorities herein contained in Bank may but need not recognize nor give any effect to any notice from any Officer, or from any other person, purporting to cancel, restrict or change any of said authorities, or the exercise thereof, unless Bank is required to do so by the judgment, decree or order of a court having Jurisdiction of the subject matter and of the parties to such conflicting claims or disputes.

11. Corporation agrees to be bound by the Terms and Conditions for Business Accounts and Services, currently in effect and as amended hereafter, as well as any signature card, deposit ticket, checkbook, passbook, statement of account, receipt instrument, document or other agreements, such as but not limited to, funds transfer agreements, delivered or made available to Corporation from Bank and by all notices posted at the office of Bank at which the account of Corporation is maintained, in each case with the same effect as if each and every term thereof were set forth in full herein and made part hereof.

12. The Officers of Corporation or any one or more of them are hereby authorized to act for Corporation in all other matters and transactions relating to any of its business with Bank including, but not limited to, the execution and delivery of any agreements or contracts necessary to effect the foregoing Resolutions.

JPMorgan Chase Bank

CHASE

Corporate Resolutions

I, the undersigned Secretary, hereby certify to JPMorgan Chase Bank, that at a meeting of the Board of Directors of COMPUTER AIDED SURGERY INC NIST ATP DMT PROGRAM ("Corporation") a corporation organized and existing under the laws of NY duly called and duly held on the 21 day of November, 2001, the following Resolutions were duly adopted, and that the said Resolutions have been entered upon the regular minute books of the Corporation, are in accordance with the By-Laws and are now in full force and effect.

RESOLVED:

1. The Officers of Corporation, or any one or more of them, are hereby authorized to open a bank account or accounts from time to time with JPMorgan Chase Bank and its subsidiaries and affiliates (each being hereinafter referred to as "Bank") for and in the name of Corporation with such title or titles as he or they may designate.

2. The President
(Indicate by Title person(s) authorized, for example, President, Treasurer, etc.)

of Corporation, signing Singly
(For purpose of signing items, indicate for example, singly, any two, etc.)

and their successors and any other person hereafter authorized by any means to sign on behalf of Corporation ("Authorized Person(s)") are hereby authorized to sign, by hand or facsimile (including, but not limited to, computer generated) signature(s), checks, drafts, acceptances and other instruments (hereinafter each collectively referred to as "Item(s)"). Notwithstanding the above, any Authorized Person is authorized singly to: (1) initiate Automated Clearing House ("ACH") debits without a signature; (2) initiate payments by use of Depository Transfer Checks ("DTC") without a signature other than the name of Corporation printed on the DTC; or (3) give instructions, by means other than the signing of an Item, with respect to any account transaction, including, but not limited to, the payment, transfer or withdrawal of funds by wire, computer or other electronic means, or otherwise, or of money, credits, items or property at any time held by Bank for account of Corporation ("Instructions").

3. Bank is hereby authorized to honor and pay Items, whether signed by hand or by facsimile (including, but not limited to, computer generated) signature(s). In the case of facsimile signatures, Bank is authorized to pay any Item if the signature, regardless of how or by whom affixed, and whether or not the form of signature used on such Item was actually prepared by or for Corporation, resembles the specimens filed with Bank by Corporation. Bank if further authorized to honor and pay DTCs, ACHs, Instructions, and other orders given singly by any Authorized Person, including such as may bring about or increase an overdraft and such as may be payable to or for the benefit of any Authorized Person or other Officer or employee individually, without inquiry as to the circumstances of the issuance or the disposition of the proceeds thereof and without limit as to amount.

4. Bank is hereby authorized to accept for deposit, for credit, or for collection, or otherwise, Items endorsed by any person or by stamp or other impression in the name of Corporation without inquiry as to the circumstances of the endorsement or any lack or endorsement or the disposition of the proceeds.

5. Any one of the Authorized Person(s) of Corporation are hereby authorized to secure from Bank one or more Chase Business Banking Card(s) (the "Card(s)") on behalf of Corporation which may be used by any cardholder named by such Authorized Person(s) to initiate electronic fund transactions as described in the Chase Business Banking Card Agreement (the "Agreement") with respect to any and all such accounts of Corporation as Corporation or such Authorized Person(s) may designate, including without limitation, transfers from business credit line accounts. Such Authorized Persons(s) be, and each of them hereby is, further authorized to execute and deliver in the name and on behalf of this Corporation an Agreement and supporting

a corporation organized and existing under the laws of NY duly called and duly held on the 21 day of November 2001, the following Resolutions were duly adopted, and that the said Resolutions have been entered upon the regular minute books of the Corporation, are in accordance with the By-Laws and are now in full force and effect.

RESOLVED:

1. The Officers of Corporation, or any one or more of them, are hereby authorized to open a bank account or accounts from time to time with JPMorgan Chase Bank and its subsidiaries and affiliates (each being hereinafter referred to as "Bank") for and in the name of Corporation with such title or titles as he or they may designate.

2. The President
(indicate by Title person(s) authorized, for example, President, Treasurer, etc.)

of Corporation, signing Singly
(For purpose of signing items, indicate for example, singly, any two, etc.)

and their successors and any other person hereafter authorized by any means to sign on behalf of Corporation ("Authorized Person(s)") are hereby authorized to sign, by hand or facsimile (including, but not limited to, computer generated) signature(s), checks, drafts, acceptances and other instruments (hereinafter each collectively referred to as "Item(s)"). Notwithstanding the above, any Authorized Person is authorized singly to: (1) initiate Automated Clearing House ("ACH") debits without a signature; (2) initiate payments by use of Depository Transfer Checks ("DTC") without a signature other than the name of Corporation printed on the DTC; or (3) give instructions, by means other than the signing of an Item, with respect to any account transaction, including, but not limited to, the payment, transfer or withdrawal of funds by wire, computer or other electronic means, or otherwise, or of money, credits, items or property at any time held by Bank for account of Corporation ("Instructions").

3. Bank is hereby authorized to honor and pay Items, whether signed by hand or by facsimile (including, but not limited to, computer generated) signature(s). In the case of facsimile signatures, Bank is authorized to pay any Item if the signature, regardless of how or by whom affixed, and whether or not the form of signature used on such Item was actually prepared by or for Corporation, resembles the specimens filed with Bank by Corporation. Bank if further authorized to honor and pay DTCs, ACHs, Instructions, and other orders given singly by any Authorized Person, including such as may bring about or increase an overdraft and such as may be payable to or for the benefit of any Authorized Person or other Officer or employee individually, without inquiry as to the circumstances of the issuance or the disposition of the proceeds thereof and without limit as to amount.

4. Bank is hereby authorized to accept for deposit, for credit, or for collection, or otherwise, Items endorsed by any person or by stamp or other impression in the name of Corporation without inquiry as to the circumstances of the endorsement or any lack or endorsement or the disposition of the proceeds.

5. Any one of the Authorized Person(s) of Corporation are hereby authorized to secure from Bank one or more Chase Business Banking Card(s) (the "Card(s)") on behalf of Corporation which may be used by any cardholder named by such Authorized Person(s) to initiate electronic fund transactions as described in the Chase Business Banking Card Agreement (the "Agreement") with respect to any and all such accounts of Corporation as Corporation or such Authorized Person(s) may designate, including without limitation, transfers from business credit line accounts. Such Authorized Persons(s) be, and each of them hereby is, further authorized to execute and deliver in the name and on behalf of this Corporation an Agreement and supporting documentation governing the issuance and use of such Cards with such changes, if any, as the Authorized Person(s) executing the same shall approve, and to otherwise conduct any business whatsoever relative to the account(s) and Cards as may be necessary or advisable in order to carry out the full intent and purpose of said Agreement and of these resolutions.

N/A
(Indicate account numbers to be accessed by Card)

13. Bank is hereby released from any liability and shall be indemnified against any loss, liability or expense arising from honoring any of these Resolutions.

14. Subject to paragraph 10 above, each of the foregoing Resolutions and the authority thereby conferred shall remain in full force and effect until written notice of revocation or modification by presentation of new Corporate Resolutions and signature cards shall be received by Bank; provided that such notice shall not be effective with respect to any revocation or modification ot said authorities until Bank shall have had a reasonable opportunity to act thereon following receipt of such notice or with respect to any checks or other instruments for the payment of money or the withdrawal of funds dated on or prior to the date of such notice, but presented to Bank after the receipt of such notice. The Secretary or any Assistant Secretary or any other Officer of Corporation is hereby authorized and directed to certify, under the seal of Corporation or not, but with like effect in the latter case, to Bank the foregoing Resolutions, the names of the Officers and other representatives of Corporation and any changes from time to time in the said Officers and representatives and specimens or their respective signatures. Bank may conclusively assume that persons at any time certified to it to be Officers or other representatives of Corporation continue as such until receipt by Bank of written notcie to the contrary.

I FURTHER CERTIFY that the persons herein designated as Officers of Corporation have been duly elected to and now hold the offices in Corporation set opposite their respective names and that the following are the authentic, official signatures of the said respective Officers and of the named signatories who are not Corporate Officers, to wit:

Name (Typewritten or Printed)	Office	Signature
x Dr. D~~aniel~~ B. Kerron	President	
	Vice President	
	Secretary	
	Treasurer	

IN WITNESS WHEREOF, I have hereunto set ~~my~~ hand as Secretary and affixed the seal of the said Corporation this 21 day of November, 2021.

- Attest (Second Officer)

FF-A

FINANCIAL STATUS REPORT
(Short Form)

(for information)

Please type or print legibly. The following general instructions explain how to use the form itself. You may need additional information to complete certain items correctly, or to decide whether a specific item is applicable to this award. Usually, such information will be found in the Federal agency's grant regulations or in the terms and conditions of the award. You may also contact the Federal agency directly.

Item	Entry

1, 2 and 3. Self-explanatory.

4. Enter the employer identification number assigned by the U.S. Internal Revenue Service.

5. Space reserved for an account number or other identifying number assigned by the recipient.

6. Check **yes** only if this is the last report for the period shown in item 8.

7. Self-explanatory.

8. Unless you have received other instructions from the awarding agency, enter the beginning and ending dates of the current funding period. If this is a multi-year program, the Federal agency might require cumulative reporting through consecutive funding periods. In that case, enter the beginning and ending dates of the grant period, and in the rest of these instructions, substitute the term "grant period" for "funding period."

9. Self-explanatory.

10. The purpose of columns, I, II and III is to show the effect of this reporting period's transactions on cumulative financial status. The amounts entered in column I will normally be the same as those in column III of the previous report in **the same funding period**. If this is the first or only report of the funding period, leave columns I and II blank. If you need to adjust amounts entered on previous reports, footnote the column I entry on this report and attach an explanation.

10a. Enter total program outlays less any rebates, refunds, or other credits. For reports prepared on a cash basis, outlays are the sum of actual cash disbursements for direct costs for goods and services, the amount of indirect expense charged, the value of in-kind contributions applied, and the amount of cash advances and payments made to sub-recipients. For reports prepared on an accrual basis, outlays are the sum of actual cash disbursements for direct charges for goods and services, the amount of indirect expense incurred, the value of in-kind contributions applied, and the net increase or decrease in the amounts owed by the recipient for goods and other property received, for services performed by employees, contractors, subgrantees and other payees, and other amounts becoming owed under programs for which no current services or performances are required, such as annuities, insurance claims, and other benefit payments.

10b. Self-explanatory.

10c. Self-explanatory.

10d. Enter the amount of unliquidated obligations, including unliquidated obligations to subgrantees and contractors.

Unliquidated obligations on a cash basis are obligations incurred, but not yet paid. On an accrual basis, they are obligations incurred, but for which an outlay has not yet been recorded.

Do not include any amounts on line 10d that have been included on lines 10a, b or c.

On the final report, line 10d must be zero.

10e, f, g, h and i. Self-explanatory.

11a. Self-explanatory.

11b. Enter the indirect cost rate in effect during the reporting period.

11c. Enter the amount of the base against which the rate was applied.

11d. Enter the total amount of indirect costs charged during the report period.

11e. Enter the Federal share of the amount in 11d.

Note: If more than one rate was in effect during the period shown in item 8, attach a schedule showing the bases against which the different rates were applied, the respective rates, the calendar periods they were in effect, amounts of indirect expense charged to the project, and the Federal share of indirect expense charged to the project to date.

Form 269/269A

Legend

√ agreed to prior report

F footer and/or cross footer

√1 agreed ledger check log for award funding rec'd during the period reported

A agreed to A+P award funding for first year

X1 reports recipient's match which were not made to projects

X2 includes recipient's match which were not made to projects (see X1)

CASI
Program-Specific Audit and Attestation
ATP Cooperative Agreement Award # 70NANB1H3050
For the Year Ended September 30, 2002

Form 269/269A

Exceptions Noted

Client match was reported as a source of funds. Client match was not made.

Funds disbursed by client were a repayment of funds which were "borrowed" for business / personal reasons from NIST funds.

Above was discussed with Dr. Kaun
Ledger was adjusted to not report "match."
